WANTED salesmen having established trade with jobbers and large retailers to sell on commission a line of patented and well-known night latches Address, giving names of towns visited, with references, "Latches," care HARDWARE, No. 143 Chambers Street, New York.

WANTED—Traveling salesman to take a good line of white metal spoons and forks and other novelties as a side line on commission. Call or address M. L, Room 1, No. 221 Fifth Avenue, Chicago, Ill.

SALESMEN wanted to sell patented staple specialty to the Hardware and grocery trade. Large commission. R. Givens, Corpus Christie Tex.

WE want traveling salesmen to carry as side line direct to retail trade, on commission basis, our line of Wire Hangers for garments. Commission liberal. Further particulars by addressing Barber-Koenig Mfg. Co., No 115 North Vine Street, Hazleton, Pa.

SALESMEN wanted to introduce and sell our new ratchet shutter bowers to the Hardware and house-furnishing stores throughout the country. A good commission paid and exclusive territory given. Sample free. Write for particulars. Walter Smith & Co., Juliustown, Burlington County, N. J.

Agencies for Hardware Specialties Wanted.

AN old-established firm of advertising agents and contractors in the city of London, England, doing business with the leading advertisers of the United Kingdom, are open to accept sole agencies for the United Kingdom for embossed steel or enamelled iron goods, which are suitable for large advertisers, or any novelty in the advertising line for inside or outdoor exhibition. Apply by letter to C. A. H., Room 25, Times Building, New York.

EXPERIENCED cutlery and Hardware salesman, about to locate in San Francisco, wishes to correspond with manufacturers in those lines, with view to representing them on the Pacific Slope. Address Rhoads, care HARDWARE, No 143 Chambers Street, New York.

AN active, pushing salesman, having large acquaintance among Hardware, department stores, etc, in New York, Philadelphia and the South, desires to add a good line on commission. Manufacturer's agency preferred. Highest references. Address "Specialties," care HARDWARE, No. 143 Chambers Street, New York.

Business Opportunity.

WANTED an experienced partner with $3000 to take half interest in an established Hardware business in a growing town. Address, H. H. H., P.O. Box 2383, New York City.

WANTED—An active, energetic young man who can command from $5000 to $8000 capital to enter into a co-partnership with an old established company. He will be wanted to take care of the finances of the company, and attend to the office business. This is an unequaled chance, and to the right man will present an opportunity that will be very valuable. Address XX, care HARDWARE, No. 143 Chambers Street, New York City.

Patent for Sale.

FOR SALE: One-half or whole of United States and Canada patents, recently allowed on the only Adjustable Ratchet Monkey Wrench now made. Demand great. A big winner. Address Owner, No. 231 S. Lincoln Street, Chicago, Ill.

For Sale.

FOR SALE in Philadelphia, Pa., the Lease, Goodwill and Fixtures of the old established House Furnishing and 5 and 10 cent store at No. 127 North Eighth Street. This is cream of location; and if you are looking for such a store this is one of the few opportunities. Address E. Frey, No. 127 North Eighth Street, Philadelphia, Pa.

A FOUR-HORSE Power Gas Engine, in good running order; now in use by us at our stores. Edward Darby & Sons, 233 Arch Street, Philadelphia, Pa.

To Rent.

TO rent at New Rochelle, N. Y., a store in the best business part of town. A good opportunity for a live man. Address H. E. Colwell, agent; or E. Lambden, Jr., owner

Attention! Hardware Travelers!

HARDWARE and other traveling salesmen who wish to increase their incomes, will be placed in a position to do so by sending their name and address to the HARDWARE Publishing Co., No. 143 Chambers Street, New York.

ESTABLISHED 1818.

THE OLDEST AND LEADING MANUFACTURERS OF GALVANIZED WIRE GOODS IN AMERICA.

"Pennsylvania" Fruit Picker

This Cut almost speaks for itself—the device being so much like the human hand, shows at once the utility of the article.

PATENTED.

AS A FRUIT PICKER IT HAS NO SUPERIOR.

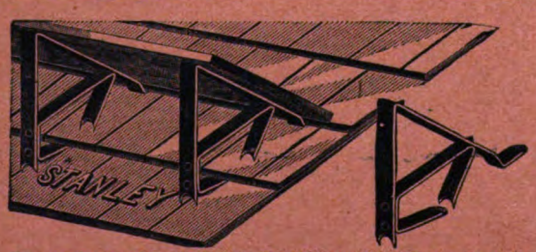
It is made of Heavy Galvanized Wire, and Easily Adjusted to a Pole. It has been sold for several years, and the demand (as it is becoming known) is steadily increasing. The difficulty of detaching fruit and securing it unbruised is apparent to everyone so engaged. This overcomes the difficulty, and saves the finest fruit, which commands the highest prices.

THE LOW PRICE AT WHICH IT IS SOLD

Brings it within the reach of those who have but little fruit to gather as well as those who have large quantities. **Price, per doz., $6.00. Liberal discount to dealers.** It will gather Apples, Peaches, Pears, &c.

—MANUFACTURED BY—

Pennsylvania Wire Works,



EDWARD DARBY & SONS,

233 & 235 ARCH STREET, PHILADELPHIA, PA.

STANLEY'S
PATENT
Roofing Bracket.

STANLEY
Rule & Level Co.
New Britain, Conn.

SOLD BY ALL HARDWARE DEALERS.

The parts are of Spring Steel, firmly riveted together. Push the beveled ends up under two layers of shingles, already nailed down; the Bracket has two separate bearings on the roof, and is so formed that any increase of pressure from above, increases its stability.

One dozen per minute can be placed in position, or removed; and great economy in lumber and nails will be found. There are no loose parts to get lost; and no nail-holes are made in the roof. In constant use these Brackets will last a life-time.

No. 1. Roofing Brackets, 8 inch, ½ dozen in box. Per Doz., $3.00

MAGNOLIA METAL
IN USE BY EIGHT LEADING GOVERNMENTS.

Magnolia Metal Co.,
OWNERS AND SOLE MANUFACTURERS,
74 Cortlandt Street, New York.

CORNELL UNIVERSITY.
ITHACA, N. Y., August 10, 1895.

To whom it may concern: I would respectfully state that I have used Magnolia Metal with satisfaction for bearings where other metals have given a great deal of trouble. I have employed the metal in crank-pin boxes on the Experimental Engine at Sibley College, and in the bearings of water wheels which were under considerable pressure.

We have made some tests to determine accurately the friction reducing qualities and durability of this metal. On account of an accident to our machine these tests are not all completed, and a full report cannot be given at the present time.

Sufficient has been done, however, to indicate the superior quality in every respect. I may say that I fully believe the metal has most excellent quality in every respect for the purposes and uses claimed. I am sir, truly yours, R. C. CARPENTER.

(Professor of Experimental Engineering, Sibley College, Cornell University, Member Society Mechanical Engineers, &c., &c., &c.)

ORANGE SPORTING POWDER, MANUFACTURED BY **LAFLIN & RAND POWDER CO.**

ORANGE RIFLE EXTRA, ORANGE SPECIAL, ORANGE DUCKING, ORANGE LIGHTNING.

The attention of TRAP AND FIELD SHOOTERS, RIFLEMEN AND DEALERS IN GUNPOWDER, is called to the new ORANGE SPORTING POWDER, patented April 17th, 1888, and branded **ORANGE RIFLE EXTRA.**

This Powder is quick and strong, and burns with such perfect combustion that the only residum left in the barrel after shooting is a dark oily substance easily removed While this Powder is not exactly SMOKELESS, it gives only a light bluish smoke, which is almost instantly dissipated, and interferes but little with the shooting of the second barrel, taking the place of the so called smokeless powders in this respect.

This brand of powder sells at the same price as any other brand of Rifle Powder and is superior to any made. No person who shoots can afford not to give it a trial, as after once trying it he will never use any other Powder when he can obtain the ORANGE EXTRA. Weight and quality guaranteed.

MILITARY, MINING AND BLASTING POWDER.

PLACE THE MATTER CLEARLY.

To make a man realize an idea as you realize it, is what is necessary to make him understand his needs. Advertisements should aim to place a matter so clearly before the public that they see it as clearly as the advertiser does.

Digitized by Google

IT TAKES A PULL

to separate the plies of our rubber belting. A yoke of oxen can do it, but hard service won't, so strong is the friction. Our belting is uniform in width and thickness, consequently more of its surface comes in contact with a pulley. That means

NO WASTE OF POWER.

Rubber belting is never injured by water, hence it is best for out-door use, for wet localities, and for mills where the atmosphere is surcharged with moisture or steam, as in paper mills, tanneries, etc. Buy the durable kind, branded 1846-Para, Double Diamond or Carbon, made for 50 years by the

The PUTNAM Hot-Forged and Hammer-Pointed Horse NAILS

Are made in Sizes and Styles as below:

TURF NAILS, Nos. 1 to 5.

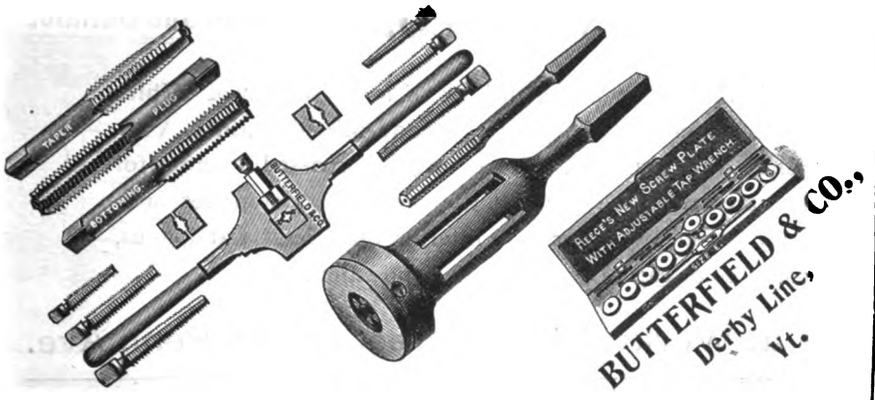
FRENCH HEADS, for punched shoes without creases, Nos. 3 to 7.

REGULAR HEADS, Nos. 5 to 14.

CITY HEADS, for shallow creased shoes, Nos. 5 to 9.

COUNTER HEADS, or FROST NAILS, Nos. 5 to 9.

Prices of these styles are the same as for Regular Heads of the same size.



The **only** Horseshoe nails in the world made precisely the same as the old-fashioned, hand process, being exclusively **Hot Forged and Hammer-Pointed.** This **hammering** (not pressing, rolling or shearing) while the metal is at welding heat blends all the particles into a compact, firm nail that outwears all others and will **Never Split, Sliver or Break.** *They are not sheared but have smooth edges clear to the point.*

The attempts of other manufacturers, in their advertising, to identify their product with the Putnam Nail leads us to state that the PUTNAM NAIL is made SOLELY by us in the ONLY RATIONAL WAY a GOOD horsenail can be produced.

Nickel-plated Mascot Ring for 10 Cents in Stamps or Silver.

PERSISTENT

Enterprising people are beginning to learn the value of advertising the year round. The persistency of those who are not intimidated by the cry of "dull times," but keep their names ever before the public, will surely place them on the right side in the end. Think over the persistent advertisers you know.

Iron & Brass Rivets,

STUDS, PINS, SCREWS,
&c.,

For Manufacturers of Light Hardware.

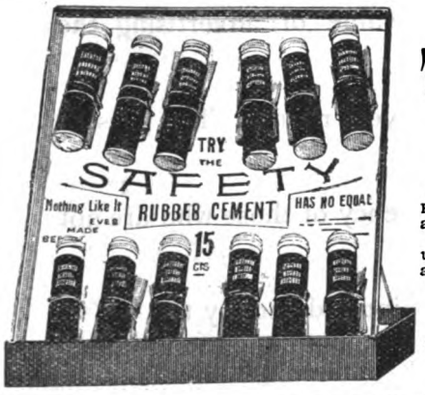
BLAKE & JOHNSON,
WATERBURY, CONN.

American Lead Pencil Co.,

429 Broome Street, New York.
110 Cheapside, London, England.

113. "CARBON" PENCIL.

TO obviate that tired feeling and dull pain in the fingers, which invariably accompany the use of the ordinary black lead pencil whenever too much pressure is brought to bear or it is used any length of time, and at the same time to produce an article that is very smooth, very black and very firm, thus adapting it for all kinds of work where a fine, smooth, black and legible mark is required, this pencil cannot be too highly commended. For writing on soft paper it surpasses anything heretofore produced; and for sketching, draughting and heavy shading it is indispensable.



Dozen mailed on receipt of 50 cents. Samples, Catalogue, Information upon Application. Address

American Lead Pencil Co., 429 Broome Street, New York.

The AMERICAN WICK is made on scientific principles. The gum inherent in the natural cotton is taken out, and no expense is spared to produce a wick that will give THE GREATEST ILLUMINATION.

THE
AMERICAN WICK
Made by the
WICK DEPARTMENT
Of the STANDARD OIL CO. of NEW YORK.

Oil drawn up through the AMERICAN WICK burns with a large, clear, white light and the flame does not drop off in size as it does when a poor wick is used. When the cotton is clogged with its natural dust and gum the full illuminating power of the oil is not obtained and the complaint is heard that the light DROPS.

"A WINNER."
The Safety Rubber Cement Outfit.

EASY TO APPLY.
QUICKEST TO DRY.
SURE TO HOLD EVERY TIME.

Can be depended upon to do the MOST DIFFICULT RUBBER TIRE REPAIRING, Hot Water Bottles, Syringes and all Rubber goods.
The Cement together with materials for mending put up in new style display boxes used only by us. Retails at popular price of 15 cents.
Bicycle and Hardware trade supplied.
Send for circular and price list.

OHIO "WATER TIGHT"

STEEL MORTAR and BRICK HODS

OHIO "Water Tight" Steel Hods are from 25 to 50 per cent. lighter when in use than the common wooden Hod.

Ohio "Water Tight" Steel Hod bodies are positively Water Tight. These bodies are the only ones made, folded from a single piece of sheet steel without cutting the metal, are reinforced on the edges and at the dumping point By our special devised machinery we are enabled to furnish the strongest, lightest, most durable and only double end mortar and brick hods offered to the trade.

Our improved Malleable Iron Fork and Wooden Shoulder Saddle make it easier for the user to carry, or to attach a piece of cloth, should he so desire, to the under side of the saddle than the old style.

With our improved one piece Malleable Iron Fork and socket for holding the hardwood hand e and taking up the shrinkage, a broken handle can be readily replaced, and hods shipped knocked down.

CLASSIFIED INDEX TO ADVERTISERS..... 71
ALPHABETICAL INDEX TO ADVERTISERS..... 74

It is with unwonted sadness and the largest sympathy for those dependent upon him, that we elsewhere record the death of William H. Williams, president of the New York Hardware Club, and an honored and prominent figure in the Hardware trade. There are few men of his years who have crowded so much of useful labor into so small a span; there can be none more sorely missed by those who had come to love him and to admire his fine qualities of head and heart. His work was by no means done; he had only reached a point where widening influence was sure to come with each succeeding year. Why he should have been taken away thus early is beyond mortal ken; all that is left is to bow to the decree of a higher power; to remember his brave life and good deeds; to emulate his example so far as we may, and to extend to the bereaved wife and children a sympathy that becomes the greater because their loss is that of us all.

Hardwaremen: Bicycles: 1896.

It is a fact, borne out by the experience of perhaps all wheel manufacturers, that more Hardwaremen commenced the handling of bicycles during the spring and summer of 1895 than in any previous year since the commencement of this great industry. Those who were wise enough to see what was coming made their arrangements early, and had their stock safely ordered or on hand before the rush began, and were prepared to fill orders as they came. Those who hesitated and allowed opportunity to pass them by while still hesitating, entered the arena too late for the full harvest of success; although there are very few who are in danger of carrying stock over into next year. Fortunately bicycling is becoming more and more of an all-the-year-around occupation or pastime, and there is hardly any season in which bicycles cannot be sold. As the use of the wheel is extended into the practical affairs of business and business travel this continuous sale will become the more certain and pronounced.

The manufacturers are already making extensive arrangements for an increased output during the season of 1896. They justly feel that wheeling has gone beyond mere pleasuring, and that each season will see an increase in the number of those who ride. The demand of 1896 will in any case be greater than that of 1895. Are the Hardwaremen of America preparing to take advantage of that fact?

It is hardly needless at this late day to tell any Hardwareman that it is to his advantage to handle bicycles and bicycle sundries. He can see marked evidence of that fact all about him; and the experience of those who have experimented in that direction is too direct and favorable to be ignored. If he has not yet added a line it is from some reason other than a question as to the advantages of the addition. If that reason is removable the sooner he gets away from it the better. The present seems to be a good time to join the procession, as we believe the boom of 1896 will set in at an earlier date than that of any year preceding. The profits do not come alone from the sale of a wheel; there is a constant demand for parts, accessories and repairs, and the shrewd dealer can extract a profit from all these.

The Passive Merchant.

He is Patience personified. His soul is free from ambition and his nature untainted by an aggressive spirit. He gives no thought for the morrow, nor concern for yesterday, and is content with to-day. He is not a believer in enthusiasm; shows little emotion and is willing to let the store run itself. Just so long as liabilities are met without special exertion he is satisfied. New ideas, progressiveness, keeping up with the times, style, system and a mastery over details occasion no concern, nor is he moved when his easy-going, indifferent policy is brought into contrast with his go-ahead, contented competitor.

He moves in ruts and is satisfied so long as his condition is not materially changed from what it was fifteen, twenty or more years ago. A few years since we met one of these passive fellows who kept his books in pounds, shillings and pence, as was the custom in this country forty years ago, simply because he was satisfied with that plan and didn't care whether the decimal system was better or not. Just so long as the passive merchant has his living he is satisfied to let matters take their course. He claims that he has outlived many a competitor, seen some of them fail, and that his condition is better than the average; that he is free from excitement, worry and risks.

His beat is between his home and his store, to which habit has chained him, so much so that a trip to New York or other city of supply is an event in his life.

Digitized by Google

This passive man is content to order by mail or through drummers, by which course his mind is not disturbed by conflicting quotations and market changes.

Trade papers are never read because they tax his mental powers and are too suggestive. Advertising in any manner is foreign to his thought. He claims that consumers know best what they want and where to purchase; that for many years he has served them in his way, been lenient as to credit, and "that if they want to trade anywhere else why let them go." He is very accommodating, and is always quick to respond to the request of an old patron, but he never attempts to suggest a new line of goods or to educate his trade to a new standard of quality. In short, he allows himself to be led instead of becoming a leader. Long hours never worry him, for he is as happy in his store as his home and with his family as with his merchandise Occasionally he is aroused from his passiveness by some heavy loss through over-confidence in extending credit or by reason of theft, fire or carelessness.

He is unfriendly to associations, boards of trade or other organizations, claiming that it is as much as he can do to attend to his own business without trying to regulate other folks' affairs. It never enters his mind that he is a unit in society and is responsible for the effectiveness of that unit. To entertain such a thought might paralyze him, were he to be receptive to modern methods or new ideas.

Being passive this sort of a merchant does little harm. He is never accused of cutting prices, making innovations, meddling with his neighbors, and therefore is left to pursue his inoffensive way peaceably until death takes him from the scene and his estate goes to the surrogate's court for settlement. All his life long he was fond of the verse:

> Oh, why should the spirit of mortal be proud?
> Like a fast-flitting meteor, a fast-flying cloud,
> A flash of the lightning, a break of the wave,
> He passeth from life to his rest in the grave.

A Series of Failures.

The recent failure of the C. F. Guyon Co., No. 97 Chambers Street, New York, was brought about in a roundabout manner by the assignment of the Woodrough & Hanchett Co., of Chicago, mentioned in a previous issue of HARDWARE. On August 9th, Judge O'Brien, of the Supreme Court, on the application of William P. Foss, of Haverstraw, N. Y., appointed Courtlandt C. Clarke, of the Allerton-Clarke Co., receiver in New York for the property in this State of the Lockwood Mfg. Co., South Norwalk, Conn. The headquarters of the company here are with the C. F. Guyon Co. James H. Cutler, of Boston, and W. A. Curtiss, of Norwalk, were made receivers in Connecticut. Woodrough & Hanchett and the C. F. Guyon Co. were the Chicago and New York representatives of the Lockwood Mfg. Co., and through these agencies the products of the company were marketed principally. The two firms named above received the goods on consignment and made advances on them in the form of notes, which were endorsed and negotiated by the Lockwood Mfg. Co. The amount of the notes given by the Woodrough & Hanchett Co. to the Lockwood Mfg. Co. is close upon $85,000. The Lockwood Mfg. Co.'s liabilities are estimated at $280,000; this amount includes the notes which they endorsed. The company's resources consist of money deposited in South Norwalk, Boston, Worcester and New York banks amounting to $41,000, a large unincumbered plant at South Norwalk, stock, wrought and unwrought valued at $175,000, together with goods in the possession of commission agents. The company have also a large amount of merchandise in the hands of the C. F. Guyon Co., their New York agents. These goods, however, are subject to a lien of the Guyon Co. for advances made. The Merchants' National Bank have attached the stock here for $14,166. The C. F. Guyon Co., who were under the impression that the Lockwood Mfg. Co. were able to take care of their obligations arising from the Chicago failure, were, on the assignment of the Lockwood Co., obliged to do likewise to protect their own and allied interests. This was done on August 9th, the assignee being A. B. Porter, of Porter & Kilvert, Tribune Building. Charles F. Guyon also individually made an assignment to the same person, giving a preference to the Foster Mfg. Co., Middletown, Conn., for $13,696. This is explained by the fact that Mr. Guyon has been for years president and treasurer of the Foster Mfg. Co., and in this capacity had recently purchased a parcel of real estate for the concern which, standing in his name, he had not transferred, owing to an intended reorganization in the near future. The Foster Mfg. Co. also assigned to A. B. Porter on the same date, as did the Essex Mfg. Co., Newark, N. J., Mr. Guyon being the president and having a controlling interest in the last named company.

The Hardware Club Manual.

The New York Hardware Club having grown extensively in membership since the publication of the Manual now in use, it was decided by the board of governors that a new one should be issued, and that it should be complete and up-to-date in all features. The difficult labor of its preparation was committed to the hands of Alfred D. Clinch, chairman of the library committee. The completed work has been mailed to the members of the club, and shows that with his usual keen insight and tireless energy, Mr. Clinch has left nothing to be desired. The book is handy in size, being about 6x7 inches in size, and is bound in an artistic cover of lavender and stone gray. Upon the cover are the words: "Hardware Club of New York, 1895." The typography is excellent, and the paper heavy and finely finished. Within is found a list of the officers; the names of the board of governors, with length of terms; committees; constitution; by-laws; house rules; articles of incorporation; a handsome engraving of the club building; a list of resident and non-resident members; and also of those members who have been called away by death. It is in the compilation of the lists of membership that Mr. Clinch's labor has been best shown. Every name has been verified by correspondence or calls, and all the errors of former issues corrected; and in addition to that the name of the firm or company with which each member is connected has been, with few exceptions, given. It is a book that will prove useful in many ways, and any member of the Club can take pride in comparing it with the manual of any club in the city.

Russell & Erwin Mfg. Co.'s New Discounts.

The Russell & Erwin Mfg. Co., New Britain, Conn., and New York, make the following announcement to the trade, under date of August 15:

Until changed by us our discounts and terms for wood screws will be as follows, from our revised list prices of January 1, 1891 (page 2):

Flat Head Iron	85 per cent.
Round Head Iron	80 "
Flat Head Brass	85 "
Round Head Brass	80 "
Flat Head Bronze Metal	80 "
Round Head Bronze Metal	75 "

Flat head iron screws, blued, 5 per cent. advance on net. We hereby withdraw and cancel all discounts and terms on screws made prior to date of this circular. Unusual assortments or excessive quantities of single sizes subject to special quotations. All orders subject to our ruling rates at date of shipment. Terms cash. No prices guaranteed.

Death of William H. Williams.

In the death of William H. Williams, of the Van Wagoner & Williams Hardware Co., and president of the New York Hardware Club, the trade throughout the country at large loses a useful and prominent member, and many scores of Hardwaremen in all parts of America have lost an honored and beloved friend. This loss is all the greater because of the comparative youth of the departed, and the many avenues of usefulness in which his influence was felt.

It was known by Mr. Williams' close friends that he was in poor health, largely because of overwork, but it was generally thought that a few weeks of summer rest would restore his former health and vigor. Some weeks since he went to Woodstock, Conn., in search of this needed rest, but it was too late for an improvement, and after some days of suffering he departed this life on August 14th, of heart trouble complicated with other consequent difficulties. The end came suddenly and peacefully, as he sat in a chair in the presence of his family—without warning or a chance for a word of farewell.

WILLIAM H. WILLIAMS.

Mr. Williams was yet in the prime of life, having been born in Schoharie County, N. Y., in 1847, a lineal descendant of Roger Williams, of Rhode Island. He came to this city to take employment as an errand boy in the store of Brooks Bros. when he was only fourteen years old. Five years later he obtained a place as clerk in the Hardware store of J. Russell & Co., at No. 83 Beekman Street. In 1871 Mr. Williams went into business in the Hardware trade with his brother-in-law, C. S. Van Wagoner, and they succeeded in building up a prosperous business. In 1892 the firm's manufacturing business was transferred to Cleveland, where Mr. Van Wagoner now lives. The financial depression of 1893 affected the firm somewhat, but it was eventually reorganized on a sound basis. The high esteem in which Mr. Williams was held by the Hardwaremen of this city was shown when, upon the organization of the Hardware Club, in 1892, he was elected its president. This mark of regard was further augmented in the following year when his firm was in trouble. He then tendered his resignation to the directors of the club, who declined to accept it and who placed on their minutes a resolution expressing sympathy with him in his temporary financial difficulty. He was three times re-elected president of the club.

For many years Mr. Williams was a director of the New England Society. Further he was a director of the Long Island Safe Deposit Co., a trustee of the City Savings Bank and a trustee of the Berkeley Institute in Brooklyn. He was an associate member of Grant Post, No. 329, G. A. R.; was at one time a vice-president of the Union League Club of Brooklyn and for many years was a member of the Hamilton Club.

Mr. Williams first became prominent in Brooklyn politics in 1884. From the time of the organization of the Young Republican Club of Brooklyn he was one of its leading members, and was chairman of the club's advisory committee when the mugwump revolt took place in 1884. He was a stanch supporter of James G. Blaine, though the committees of the club were made up mostly of anti-Blaine men. His fight for Mr. Blaine in the club was so successful that at the meeting in September of that year the club indorsed Mr. Blaine as the Republican candidate by a vote of about 1200 out of 1350. Mr. Williams was subsequently elected president of the club, a position to which he was afterward re-elected four years in succession. He resigned his high office in the club as soon as General Harrison was elected president, declaring that he had consented to lead the club only until his party had triumphed at the polls. Mr. Williams, however, remained a member of the executive committee of the club until the beginning of the present year, when he became a member of the Republican County Committee of Kings County.

Mr. Williams has always been known as a Republican, who had always stood for clean politics. Leaders of his party had practically offered to him the nomination for mayor of Brooklyn several times, but he always declined to be a candidate for public office. Some of the Brooklyn Republicans were inclined to find fault with Mr. Williams in 1889, when he was told that if he would stand as the Republican candidate for mayor certain prominent men would guarantee a campaign fund of $50,000, but he declined to run.

In May of this year he was appointed by Mayor Schieren an Election Commissioner. At the time of his death Mr. Williams was an athletic and young looking man, direct of speech and energetic in everything he undertook.

Mr. Williams's home was at No. 858 Carroll Street. He leaves a wife—the daughter of Edward Bowen—and three daughters.

When the death of Mr. Williams was announced many and heartfelt were the expressions of sympathy sent his stricken family. The Board of governors of the Hardware Club met immediately, and appointed a committee of its members to represent the club at the funeral at Woodstock. The Brooklyn Board of Elections also met, and adopted the following resolutions:

Whereas, The members of this Board have learned with infinite regret and sorrow of the death of William H. Williams, our late honored president, who, during a comparatively short official association, endeared himself to us by his invariable courtesy, and commanded our most profound respect by his upright character; genial qualities and marked ability; and

Whereas, The city of Brooklyn has in his death suffered the loss of a fearless, faithful and efficient official, and a public-spirited citizen, and this Board has lost a member whom we were proud to honor; therefore, be it

Resolved, That as a mark of respect to his memory, it is hereby ordered that the offices of this Board be closed upon the day of his obsequies; and, be it further

Resolved, That, realizing the deep sorrow which has been visited upon the family of the deceased, we tender to them our utmost sympathy in this their hour of affliction, and humbly commend them to the care and comfort of "Him who doeth all things well."

Digitized by Google

Mayor Schieren expressed his sorrow and sympathy in these words: "I was sorry to learn of Mr. Williams's sudden death. It was unexpected. He was a warm friend of mine. We had been together in the Young Republican Club for many years, and I admired his firm principles and his stand for pure government. He was always ready to stand up for pure politics. To him must be given the credit for doing more to purify the Republican party within the party, whenever it was found necessary, than to any other man. He believed in reforming the party within itself, and not leaving it. He was a true Republican. Every man who came in contact with him admired his genial spirit, his manliness of character and his fine manners. I have lost a dear friend, whose memory I shall always revere, and I deeply sympathize with his bereaved family."

A just and eloquent estimate of his character is thus given in the Brooklyn *Standard-Union*, from the pen of one who knew him long and well: "Good government and clean politics suffer a serious, if not irreparable, loss in the death of Election Commissioner Williams. To those not long and well acquainted with him, the expression of the plain truth concerning his character and his life will, perhaps, seem to partake of the customary eulogistic compliment, and to be, as is too often the case, an application of the classical injunction to 'speak nothing but good of the dead.' To say this, however, of Mr. Williams, is to say nothing new. His fellow citizens, among whom and in whose constant observation and association his entire manhood has been spent, have never said, or had cause to say, aught but good concerning him. In every walk and department of life; in his relation to society, to family, the club; to business and to the public at large, he was, in all, the Christian gentleman of high, unsullied ideals, of sound and intelligent principles; of earnest and consistent action, and of steadfast and logical performance of duty. His taking-off, after long and arduous service for the party and for the cause to which his life had been devoted, and with which his political faith was identified, just as he had come to receive merited recognition; after a season of business depression, through which he had passed with credit untarnished and with success substantially assured; just at the beginning, as it were, of the harvest of life, comes with redoubled force and sorrow. The individual and personal phases of the event do not, however, fall properly within the scope of public comment. It is, however, almost impossible to separate them at the moment from the broader, larger and official considerations which the Commissioner's death suggests. His life in Brooklyn is not, in its best sense, ended, for the work which he did lives and will live after him."

The funeral services were held at Woodstock, on Saturday, August 17th. A spray of white roses, fastened with white ribbon, affixed to the front door, told the Brooklyn and New York visitors as they entered Woodstock of the home and place of death of their friend, to whose memory they had come to pay the last tribute of regard. The village was never more quiet. Soon after one o'clock the Williams residence, a modest two-story white frame structure, a typical New England village dwelling of the olden time, and hard by the old Congregational Church, now in the third century of its existence, was filled with those in attendance at the funeral, the numbers of friends from Brooklyn and New York being increased by many townspeople and citizens. Seats on the lawn in front, under the trees, accommodated those whom the house could not contain. The casket, plain black, trimmed with silver, was placed in the front parlor and surrounded by floral tributes rich and lavish. The visitors saw through its half open top the form and features of the dead. Disease had left little trace and the expression was lifelike and peaceful.

The Rev. William F. N. Dean, pastor of the Congregational Church, and who was two summers ago Mr. Williams' tenant in the Woodstock home, conducted the services, which were brief and of a formal character. From the words of I Thessalonians, iv: 18, Mr. Dean drew the lessons of the need of all mankind for comfort and consolation, and pointed out that only in the certainty of immortality, a better and a longer life beyond this, have we any adequate stay or resource for the sorrows and the sufferings of mortality. Only a general reference to Mr. Williams' life and character was made, and an editorial tribute to him read. In the parlor with the casket sat Mayor Schieren and Mr. Moore near the head of the casket, General Woodford near the foot, while the position of the minister in the open door made his words audible to the company on the lawn, as well as to those within the house. "Nearer, My God, To Thee," "Rest in the Lord," and a third hymn were the musical selections, by a soprano, with piano accompaniment, and after brief prayer benediction concluded the service.

From the home the little procession with heads uncovered followed the hearse the short walk to the burial plot in the churchyard adjoining. The pall bearers were Mayor Schieren, General Woodford, Mr. Charles A. Moore, Commissioner Moulton, President Frank P. Williams, Elisha S. Chapin, Peter McCartee, Frederic W. Hinrichs and Charles W. Compton, of Newark, were at the head, and next came Mrs. Williams, escorted by her brother, Dr. George Austin Bowen, and the three daughters by Edward Bowen, of Brooklyn, another brother, and Mr. C. Van Wagoner, their uncle, and their father's long time business partner. Then the friends and acquaintances followed, the company numbering in all something more than one hundred.

The spot of burial is in the new portion of the cemetery, with a far and commanding outlook to the east across the valleys and peaceful lake to the wooded hills which bound the view in every direction. Boughs and flowers covered everything, so that earth was nowhere visible; only the green lawn, the grave lined with white and strewn around its margin with flowers could be seen. The lowering of the coffin was followed by the brief sentences of committal and the benediction. The floral tributes that were both lavish and beautiful were placed on the gravel beside the grave. As the last office for the departed closed, the sun, obscured during the day to that hour, broke through the clouds.

Among the floral offerings was a wreath of English ivy nearly three feet in diameter, with large purple asters at the knot, sent by the New York Hardware Club. On an accompanying card were these words, "From the Board of Governors of the Hardware Club of New York," followed by this quotation from Hamlet: "Good night, sweet prince; and flight of angels sing thee to thy rest!" A chair bearing the words, "Our President," from the Brooklyn Board of Election Commissioners; a broken column from the Franklin Literary Society; a broken column from the Brooklyn Young Republican Club; a wreath, bearing the words "Van to Will," from C. Van Wagoner; an anchor, cross, large basket of flowers, three wreaths, and several other designs.

Among those present from Brooklyn, this city and elsewhere were Mayor C. A. Schieren, Gen. Stewart A. Woodford, Charles A. Moore, George E. Moulton, J. W. Erregger, B. F. Blair, Col. George A. Price, Frank P. Williams, D.W. Van Tine, C. W. Compton, E. Bowen, C. T. Stork, and the following committee from the Hardware Club: Peter McCartee, R. H. Swayze, Webster R. Walkley, A. D. Clinch, Eugene Bissell, J. L. Varick.

Aluminum is being employed for general clarifying purposes in German breweries in the form of corrugated strips. These strips are said to have the advantage over wood shavings in that they are non-absorbent and can be readily cleaned and are, therefore, hygienically preferable, while their efficiency is considered quite equal to wood shavings.

Three Successful Novelties.

The Diamond Cutlery Co., No. 60 Broadway, New York, are meeting with great success in the introduction and sale of several Hardware novelties, three of which we are permitted to show herewith. Fig. 1 is their Diamond Skate Sharpener, an entirely new article which the makers say is "a new device for sharpening skates, which we have recently perfected, and are prepared to furnish to the trade at a price which will make it a winner." In detailed description of the same, they add: "The special features are worthy of mention; the simple adjustment of the special Diamond cut file permitting a fresh surface to be brought into position instantly, and without the use of any tools, also the pivoted handle which allows the surface of the file to follow the curved runner from heel to toe, without changing position of handle. This is an important feature, as it is practically impossible to tilt the Sharpener backward or forward, throwing the file out of level and roughening the runner (as is the case with all sharpeners having a rigid handle). The 'Diamond' is provided with a special cut file which will not clog, and works like a smoothing plane on any skate. The spring wings which guide the Sharpener, can be opened wider for a thick runner, or partially closed for a thin runner. The case being made of spring brass—nickeled, the file is readily released by slightly

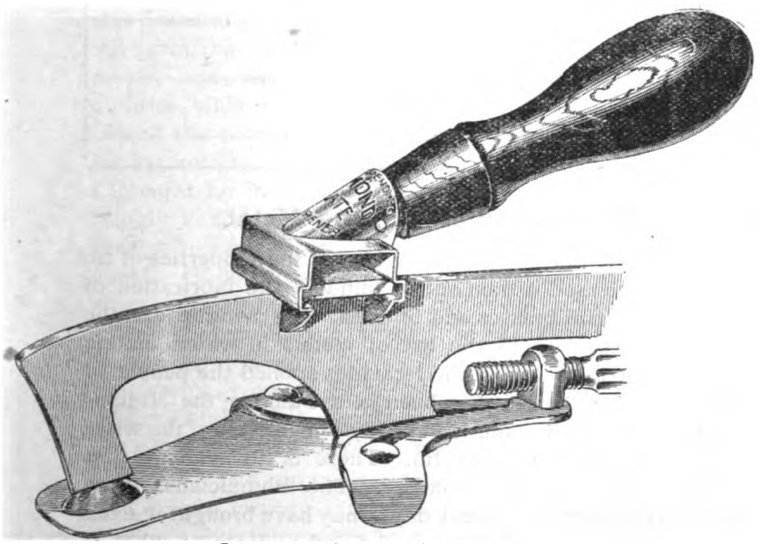

FIG. 1.—DIAMOND SKATE SHARPENER.

springing front of case outward. To sharpen a skate always push Sharpener from you, holding handle about horizontal with skate runner, pressing down enough to prevent Sharpener from jumping or tilting up on front corner, and after the nicks have been removed, slide the file to one side of case until it protrudes an eighth or quarter of an inch, then turn Sharpener at right angles to skate runners and push the protruding file along each side of the runner lightly, to remove the little wire edge which is sure to form during the sharpening operation. This will leave a keen, smooth edge that will last. Sample by mail, 25 cents. Price to the trade per dozen, $1.75." The makers also call attention to the point that "every boy sharpens his own skates and is happy; Hardware dealers sell one with every pair of skates, and hundreds to people who already own skates." They will be pleased to hear from all interested dealers.

In Fig. 2 we see their Diamond Knife Sharpener, which is described as a first-class article for sharpening carvers, table and kitchen knives, etc., and as leaving a keen and lasting edge. "It is made of spring brass, beautifully nickeled and provided with two special Diamond cut files, which are held in position by a very stiff spring. This Sharpener is entirely new and different from anything ever made before. It will put a razor edge on any kind of knife. Every housewife will buy one on sight; and, one sold in a neighborhood will create a demand for others, because a good knife sharpener is a much needed article, and the 'Diamond' is warranted to fill the bill." They want agents in every town, and will give exclusive territory to the right parties.

The third article in this attractive trio is the Diamond Shears and Scissors Sharpener. This convenient and effi-

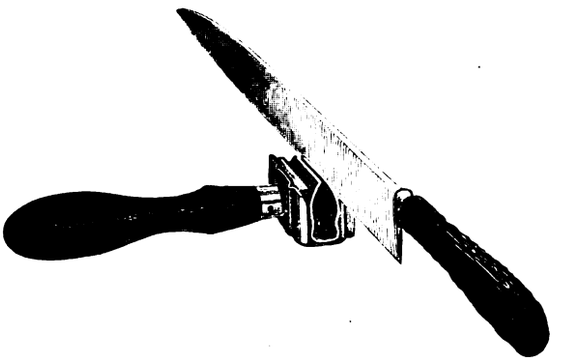

FIG. 2.—DIAMOND KNIFE SHARPENER.

cient device is of recent invention, and is referred to as having "already attained a wonderful and deserved popularity, and is rapidly coming into general use in this and other countries, immense numbers having been sold in the United States and Canada. It supplies a want which is keenly felt in every household, namely, a convenient method for sharpening shears and scissors, without loss of time, without excessive labor, without injury to the implements and with no appreciable expense. Sharpening scissors is one which is productive of very great trouble everywhere. The cost of the Diamond Sharpener is only 25 cents—a mere nothing in comparison with its utility; and when its effectiveness and cheapness are taken into consideration together, it is not wonderful that it has achieved such a great popular success in so short a time. The manufacturers of the Diamond Sharpener present the following claims to superiority in its operation: 1. It gives the exact bevel necessary. 2. It gives the same bevel the whole length of blade. 3. It does not turn a burr, but actually planes the steel away, leaving a keen and lasting edge. 4. It removes the planings from under the blade, so as not to roughen the edge. 5. No tools whatever are required in its use. 6. Any child can use it without injury to the finest scissors made. In addition to this it works very quickly,

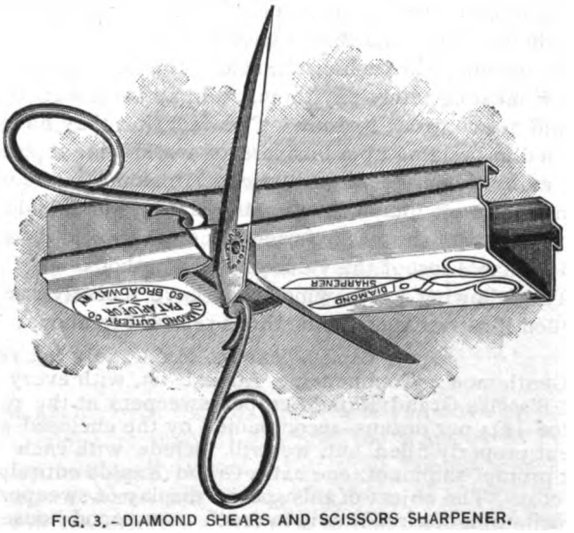

FIG. 3.—DIAMOND SHEARS AND SCISSORS SHARPENER.

and the manufacturers claim that the sharpening can be performed in half a minute." Further facts of interest in regard to any or all of these articles, can be obtained by addressing the Diamond Cutlery Co., No. 60 Broadway, New York City.

A tack factory two stories in height, and 30x60 feet in dimensions, is to be built by Lyman Reed, of Whitman, Mass.

A Good Example.

Some manufacturers seem to think that the duty to their customers end when they ship their goods; they forget that their own success depends upon the success of their customers in selling the goods they have purchased, and let their customers devise their own means to dispose of their goods. This is one of the greatest mistakes any manufacturer can make. He should not forget that his customers have perhaps a thousand other articles to dispose of, and that his is but one of the many, and perhaps a very small one too. He is supposed to be a specialist in the goods he makes—to understand the selling points of his goods better—to create a demand for them quicker than his ever-busy customer; and if more manufacturers would co-operate with their customers more fully, they might be surprised by seeing a very rapid increase in their own business.

These remarks are caused by the recent offer of the Bissell Carpet Sweeper Co., Grand Rapids, Mich., in which they not only offer their customers complete assortment of finishes—a good supply of window and hanger cards, and circulars for distribution, but they go so for as to *actually pay* their customers for doing what most manufacturers take for granted their customers ought to do anyway. This is not the first time the Bissell people have co-operated with their customers in pushing the sale of their carpet sweepers, and it must certainly pay them, and pay them well, or they would not continue to do it. The fact that they have succeeded in building up a business of world-wide reputation, are many times the largest sweeper makers in the world, and from well founded estimates claim to have sold over 85 per cent. of the carpet sweepers of the world, is an unquestionable test of the value of their methods.

The following letter which they have recently issued, is a good illustration of the methods referred to above:

GRAND RAPIDS, MICH., July 29, 1895.

Gentlemen: Commencing August 1st, with every order for Bissell's Grand Rapids carpet sweepers at the regular price—$24 per dozen—accompanied by the enclosed agreement properly filled out, we will include with each dozen for prompt shipment, one extra Grand Rapids entirely free of cost. The object of this special display of sweepers and distribution of circulars, is to reach many good housekeepers who have use for a Bissell carpet sweeper, but who are still using the old-fashioned broom. The general plan offered is one that cannot fail to prove one of the most profitable we have ever placed at the command of our customers. We have aimed to make the method of display and distribution an easy matter and yet effective. Our circulars are neat and concisely worded. We will supply attractive window cards, and, as our part of the expense of displaying the sweepers and distributing the circulars, we will include in each dozen, one extra "Grand Rapids," the most popular and best selling $3 sweeper in the world.

This is a special offer made to take advantage of the extra demand for sweepers during the fall house cleaning season. At this time something must be displayed in your window—why not an attractive assortment of "Bissell" Sweepers? Packages must be wrapped up—why not include a "Bissell" circular? It will pay, and pay well.

Bissells are not experiments. There are millions in daily use. Nine times more Bissells than all other sweepers combined. They have a fixed value—a world-wide reputation. They are good sellers and will pay a quick and good profit. You can make no mistake by co-operating with us at this time.

Yours respectfully,
BISSELL CARPET SWEEPER CO.

PLEASE SIGN AND RETURN WITH ORDER.

This agreement will NOT apply to any orders unless properly filled out and mailed to us before September 30th, 1895, and then only for goods ACTUALLY SHIPPED before that date.

IN CONSIDERATION of receiving from the **Bissell Carpet Sweeper Co.,** one extra carpet sweeper free with each dozen "Grand Rapids" of the accompanying order, we agree,—

FIRST—(a) To devote one of our show windows to a SPECIAL display of this shipment of sweepers for at least ONE WEEK.
OR (b) To use them in a special display at a Local Fair or Exposition.

SECOND—For each dozen ordered under this special agreement, we also agree to distribute 300 special CIRCULARS to be furnished with sweepers, by either one of the following methods:
(a) By enclosing them in packages purchased either by or for LADIES.
OR (b) By reliable distributors from house to house.
OR (c) If a display is made at a Local Fair, by handing them to the better class of visitors.

THREE IMPORTANT POINTS.

1 Check the method selected to DISPLAY the sweepers.
2 Check the method selected to DISTRIBUTE the circulars.
3 Sign your FULL NAME AND ADDRESS.

Antiquity of Tin as a Metal.

The Chinese are said to have known the properties of tin and to have used it time out of mind in the fabrication of their wonderful brasses and bronzes. It is mentioned in the Book of Numbers in the list of metals in which, among other things, Moses and the Israelites spoiled the people of Midian. How long it had been in use among the Midianites nobody knows; nor is anybody much, if any, the wiser as to where they got their tin. There is no evidence that it was native of that country. The Phœnicians, those hardy traffickers of ancient days, may have brought it, even at that early date, all the way from the mines of what is now English Cornwall. If they did, there seems to be thereby a sort of common bond of interest established between ourselves and these old fellows, for in these days, as everybody knows, Cornwall is materially in evidence as a centre of the tin trade. It is not at all likely, however, that the tin plundered by the forefathers of the modern Hebrews from those unfortunate Midianites was in the form of thin plate. At the same time it is well to use a little caution about dogmatizing as to what the ancients did or did not know. The ancient Romans used tin for coating the insides of copper and brass vessels, but they seem to have made no use of it in a similar way with iron.—*Ironmongery, London.*

The city of Buffalo, N. Y., has asked for large space in the Manufacturers and Liberal Arts Building of the Cotton States and International Exposition for a comprehensive exhibit of the manufacturing and other industries of that city. Space has been assigned them, and an exhibit worthy of the city will be at once prepared.

The great wheel at Earl's Court, London, England, modeled after our own Ferris wheel, is completed and in full working order. This wheel is 300 feet high and there are cars enough to hold 1600 people. It is calculated that when the cars are all full the wheel will earn about $600 per journey.

PRACTICAL TALKS TO HARDWAREMEN.

"BE SURE YOU ARE RIGHT THEN GO AHEAD."

One of the many important points to be impressed upon the understanding of a subordinate, and one that the manager should be sure is understood, is, that nothing should be attempted unless the idea is perfectly clear.

But, rather than appear dull of comprehension, the assenting reply is given when the idea is very vague. The following may illustrate the meaning.

"My first position entailing any responsibility" said a retired merchant, "was to make the payments of the city bills which our house settled monthly. My duties consisted in taking the statements and the amount which the bookkeeper prepared, and placed in a small hand satchel. Sometimes I would have only $50, again $200 or $300. On my first trip, the cashier counted the money, footed the statements and handed me the satchel, cautioning me about taking receipts for money paid out, and not to pay out more than the statements called for. It was considered quite an honor to make these monthly trips, and therefore when I was called into office I was very proud indeed, the elation somewhat turning my head. After I had started, I found I was dreadfully hazy on some points, but my pride would not permit my return to the office. I made several payments, and was congratulating myself on my business abilities, when I came to a store where the clerk who received the money said: 'See here, young man! this calls for $35 not $25.' He was very dictatorial, so much so that I thought he must be very high in authority, so I tremblingly handed over $10 more, and hurriedly thrust the receipt he gave me in the satchel and got out as quick as I could. Of course when I came to the last man I was $10 short—a contingency that had not occurred to me. Considerably crestfallen, I returned to the office and made my statement. Imagine my consternation when I was shown the receipt given me by my pompous friend for $25! Where was the $10? Well, I paid over my own money to make up the shortage, but the lesson was worth all it cost."

THE GREEN FIREMAN'S STEAM CLOCK.

We were moving into the new Powell Building of ten stories. Everything was in confusion, as the building was barely completed, the workmen having just arranged a test for the engine and boilers. As we were to occupy the basement and first floor, I was thrown in contact with the workmen, and became quite well acquainted with Bob, the foreman.

I had accepted his invitation to see the machinery start. The fires being lighted we sat in the boiler room, it being January and quite cold. The hand on the steam gauge commenced to move, and when it indicated 40 pounds, the engines were started and everything moved off smoothly.

Bob, who had had no sleep for 48 hours, lay down upon an impromptu bed made of cotton waste, first cautioning the fireman to keep the hand of the gauge at 40, and if it went higher to awaken him. Although the fireman assented readily, yet it occurred to me that he did not understand the direction. However, as Bob did not seem concerned why should I?

I returned to my work, and in arranging the goods, forgot my fears, when there came a hissing of escaping steam and shouts from the fireman, while over and above the din rose the sharp orders of the now awakened foreman.

The fires were drawn and after the excitement the fireman explained the situation.

"You said, keep that 'ere thing at 40, but you hadn't more'n laid down than it was way past, so I piled in the coal to push it on around, an' it was goin' all right, till it got to 2 o'clock and darn me if I could get it past."

Here Bob lost his patience. "Why, you blank fool," said he "you might have blown up the whole concern but for the safety valve. That gauge ha'int a clock. Look here, boys! the blame fool had 200 pounds of steam on and calls it 2 o'clock."

SHOP TALK.

Saturday night the boys were, as usual, discussing the happenings of the week.

The Tool Man told of an addition to the Hardware vocabulary. He said: "A mechanic was trying to describe a new tool he wanted, and to my question 'what is it used for?' he replied 'it's to make a hole in a brick wall, but I can't think of the Tick-Tanick name for it.' As a plugging chisel proved to be what he wanted I gave him its technical name."

"Anyone," said the Hardwareman, "would know it was a lady, who, wanting porcelain escutcheons asked for 'two marble fixings for a key-hole;' while a little girl who wanted some harness snaps asked for 'nippers for a bridle.'"

Here the Paint Man proposed the following question:

"Which would it be: man, woman, girl or boy who would ask for a can of 'Red Indians' Paint' and a 'Fob' for wiping up the floor?"

SHOP MAN.

Keep Awake.

If there be a maxim in the above note, it is: Keep awake. It is no use going about in these days with the eyes closed. The sleepy Hardwareman as a successful or useful member of the trade has passed away. Those who are the drones in the trade stand no chance in these keenly competitive times. There are still Hardwaremen who have never learned to cater for the section of the public who, in summer, are on pleasure only bent. There are trunks and dress boxes and a host of tourists' requirements which it is his business to sell, and which he can sell, if proper means be adopted, easily, in large numbers, and at good prices. Another good rub of the sleepy eyes will reveal the sight of many lady cyclists, some dressed in remarkably ill-becoming costumes, and suggest the thought that, although one may pray, perhaps, that the new woman in her present form may not be always with us, yet that she, like her sensible male relatives, is following a means of recreation which enables the Hardwareman, if he chooses, to add a lucrative special branch of legitimate business to his existing engagements. And then, again, many of the tourists now going to every part of the country and abroad, will like to take a camera with them, and the Hardwareman can and should be able to supply a complete outfit of photographic requisites. If these thoughts come, the result must necessarily be excellent, so far as the Hardwareman is concerned, and he will discover that the goose which lays the golden eggs is ever to be found in the shop of an enterprising, wide-awake member of the trade.—*Ironmongery, London, England.*

The Michigan Stove Co., Detroit, Mich., have hit upon a most unique method of keeping the housewives of the country continually reminded of their famous stoves and ranges. The new device is in the form of a cooky cutter made of tin and is a fac-simile of the trade-mark of the Garland Stoves and Ranges.

The Carnegie wire nail mills in Beaver Falls, Pa., have been purchased by the Consolidated Steel & Wire Co., of Chicago, Ill. Negotiations begun two months ago have been consummated and preliminary payments were made on the purchase price, which is said to be in the neighborhood of $725,000.

Steel Buildings.

The advantages of this method of construction over any other is well exemplified in the case of the Carter building, says the Boston *Commercial Bulletin*. It is stated with authority that the space saved over the old method is worth in rent about $12,000 per annum. Where land is very expensive or where lots are small the steel structure is particularly practical, as it permits the saving of considerable interior space, and space is always a matter of great importance. In the modern steel structure masonry counts for very little, as the weight of the building is borne by columns. Such is the importance of the steel work that goes into these buildings, that the greatest care is taken in its manufacture. The best architects and knowing builders see that every piece of steel is carefully tested, and if not up to the standard it is thrown aside. The method of testing is a most severe one. The experts are hired and controlled generally by the architect at the cost of those who put up the building. The expert is stationed at the mill. Of such a nature is this work that two concerns in Pittsburg are making a specialty of furnishing experts to supervise it and are doing the principal work of this character in the country.

It is required of these experts that they thoroughly test each piece of iron and steel made in the mill, or in other words, physical tests are made of each melt. The test specimens should fill the following requirements: Ultimate tensile strength, from 60,000 to 68,000 pounds per square inch; elastic limit, minimum, 35,000 pounds per square inch; elongation in 8 inches, minimum, 25 per cent.; reduction in area, minimum, 40 per cent. In the bending test it is necessary that the iron or steel bend 180 degrees flat around a curve whose diameter equals the thickness of the specimens without a sign of a crack on the convex side. These tests alone satisfy the high standard of the material used, and when one considers how slender the modern steel frames are that hold up our buildings, the reason for this care can be easily understood. An expert also sees to it that properly marked pieces are put into the buildings, and those without proper marks are thrown aside. These experts are paid so much per ton, and make report to architects. Great care is taken that steel does not contain more than 1-10 of one per cent. of phosphorus.

In steel frame construction the skeleton of the building is generally erected first, before the masonry is started. Under the old method the iron and masonry were used together in the building of each story. Where bolts were used largely in the last mentioned form, the steel sections are riveted almost wholly in the first. A steel frame building thus riveted can be compared to an inverted bridge, for in fact the modern building is built on the bridge plan, and it is riveted in such a manner as to make it, to all intents and purposes, one piece of steel from top to bottom. Thus any strain which may be put upon the building will be shared by the structure as a whole and not confined to any one spot, as in the ordinary building.

The Face of a Watch.

We believe it was George Augustus Sala who once said he would think himself safe in betting a £5 note that not more than one person out of a score could tell correctly, offhand, in what way the hour four is represented on a watch or clock dial, says the *Ladies' Treasury*. Most people, without looking, would say IV instead of IIII. And why should it not be IV? Well, here is the story: The first clock which kept anything like accurate time was constructed by a certain Henry Vick, in 1370. It was made to the order of Charles V. of France, who was called "The Wise." Wise he certainly was in some respects, but he did not know everything, though he liked to pretend that he did. When Vick brought him his clock he looked closely at its movements for some time. "Yes, it works very well," he said at length, "but you have got the figures on the dial wrong." "Surely not, your majesty," said Vick. "Yes, that four should be four ones." "You are wrong, your majesty." "I am never wrong," thundered the king. "Take it away and correct the mistake." Vick did as comanded, and so to this day we have IIII, when we should really have IV. It is not generally known that watches may be used as compasses, yet such is the case. Point the hour hand to the sun, and the South is exactly half way between the hour and the figure XII on the watch. For instance, supposing that it is 4 o'clock. Point the hand indicating four to the sun, and II on the watch is exactly South. Suppose that it is 8 o'clock, point the hand indicating 8 to the sun, and the figure X on the watch is due South.

Interesting experiments have recently been made with a gun made of rawhide, at the Sandy Hook proving grounds. This novel piece of ordinance is the invention of a Frenchman, Frederick La Tulip, a resident of Syracuse. The gun is 5 feet 8 inches long, and was mounted on a home-made gun carriage. Its weight is only 456 pounds, a considerable part of that probably lying in the steel core, which is ¾ of an inch thick at the muzzle and 1½ inches thick at the breech. The officers had never seen or fired a gun like it, and they all placed sand and distance between themselves and the implement when it was fired. The gunner used a lanyard about 150 feet long and stood behind a bank. When the order was given to fire, all hands ducked and lay low for some seconds after the report; for it was believed that the gun would not last. To the surprise of all, the cannon had endured a strain of 2½ tons to the square inch. This strain was increased by heavier charges of powder until it had gone up to 30,360 pounds to the inch, at which point it broke from its carriage with force of the recoil. The endurance of the gun is no doubt due to its great elasticity.

An ironmonger in the south-east of London sold a small gas stove the other day to a person who returned with it shortly afterwards, complaining that it was defective, as there was a hole in the underneath part of the pipe (pointing out the aperture to admit the air), which the assistant ought to have seen was large enough for the gas to escape. The following story was recently told by a "man on the road": A married lady had a birthday anniversary a short time ago, upon which her husband presented her with a pretty piano lamp. He was much flattered when she told him she intended to give it his name, until he asked her reasons for so peculiar a proceeding. "Well," said she, "you know, dear, it has a good deal of brass about it, it is handsome to look at, it is not remarkably brilliant, requires a good deal of attention, is sometimes unsteady on its legs, liable to explode when half-full, flares up occasionally, is always out at bed-time, and is bound to smoke." —*Ironmongery, (England)*.

W. F. ROCKWELL, HARDWARE, WYMORE, NEB., July 23, 1895.

HARDWARE: Enclosed please find check $1 in payment for another year's subscription to HARDWARE, which I find a valuable journal. The advertisements alone are worth the price of the magazine, which, with the notices of new goods, improvements, etc., can be made a source of profit to any dealer—oftentimes one issue containing information of far more value than the dollar your magazine costs. Yours truly, W. F. Rockwell.

One of our large steel mills located in Ohio has just shipped a consignment of 1000 tons of steel billets to England. This shows the substantial footing on which our American industries are now based.

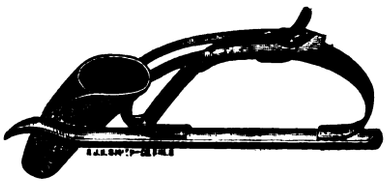
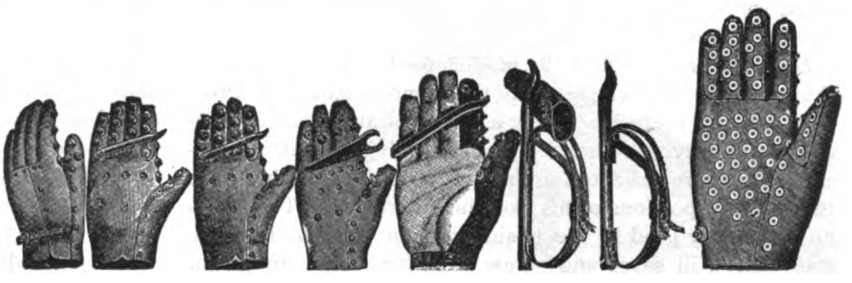
Making Barbed Wire.



When passengers in the railroad trains look from car windows upon the endless miles of sharp-pointed barbed wire that is stretched upon posts upon either side of the roadway, they, no doubt, give but few thoughts to the stages through which the wire passes from the mine to the fence. Yet it is an interesting study and well worth knowing something about in all its details, says a writer in a New York exchange. All the barbed wire is now made of soft steel. When the ore is taken from the mine, it goes directly to the blast furnace, which is a huge iron tower, forty or fifty feet high, lined with brick. Powerful engines force a stream of heated air (called a blast) through openings in the sides of the furnace, near the bottom. First, is put into the furnace a layer of fuel (coke), then a layer of limestone (flux), then some ore; each of the materials is carefully weighed, so that just the required amount is placed in the furnace. The limestone greatly assists in the melting of the ore, and it takes from ten to twelve hours to reduce one "charge." The iron sinks to the bottom of the furnace and the foreign matter, called slag, floats on the top of the iron. The slag is first run off and then the iron. Attached to the furnace is a large shed with a sand floor, in which are numerous moulds about three feet long and four inches square. The iron runs into these moulds through a channel on which the ends of the moulds open. When cold, the iron is taken out of the moulds and called pig iron. The pig iron is taken to the steel mill, where it is melted and combined with a certain amount of imported pig iron, after which it is poured into a large portable iron vessel called a converter. A powerful hot air blast runs through the bottom of the converter and blows through the iron, greatly increasing the heat and expelling all impurities. The metal, which is now steel, is poured into large cast-iron moulds, which hold from twelve hundred to fifteen hundred pounds. These pieces are called ingots.

Everything about the steel mill is handled by machinery —hydraulic cranes carry the ingots from place to place— and very little manual labor is necessary. The ingots are heated and passed several times between large iron rolls, which gradually decrease the diameter of the ingots until they are about four by four inches. The last time they come through the rolls they pass under a huge machine which cuts them into regular lengths, weighing about one hundred and fifty pounds. Then they pass to the rod mill, where they are heated and passed through a number of smaller rolls, which run at a very high speed. Here the steel is rolled into round rods about three-sixteenths of an inch in diameter, and are coiled into bundles by a machine while hot. They then pass to the wire mill. In the wire mill the rods are first immersed in a bath of diluted sulphuric acid, which eats off all rust and dirt. After being washed free of acid they are dipped in a thick solution of lime water, dried in a furnace, pointed on one end and taken to the drawing room. The drawing machine consists of a heavy wood table, called a bench, on which are a number of revolving cast iron cylinders, called blocks. In front of each block, fastened to the bench, is an iron die box for holding the die. The die is of chilled cast iron, perforated with a number of holes, which are reamed out to the size of the wire required. The pointed end of the rod is put through one of the holes in the die and fastened to the block, which, in revolving, pulls the rod through the die, reducing the size and coiling it up. This last operation is repeated twice for each rod to get it to the size required for fence wire No. 12½.



While drawing, the wire has become very hard and brittle, and has to be softened before it can be worked into fence. All barbed wire is either painted or galvanized. For painted fence, the wire is taken from the drawing room to the annealing department and placed in large iron pots, which hold about four thousand pounds each. These pots, which are inclosed in furnaces, are heated until the contents are red hot; they are then allowed to cool gradually. This process is called annealing, and requires about twenty-four hours; the wire is then very pliable. For galvanized fence the wire is taken from the blocks to the galvanizing department. Here the coils of wire are placed separately on wooden reels, which revolve as the wire is first put through a pan of melted lead heated until it is red hot (this answers the same purpose as the annealing process, the lead being so hot does not stick to the wire). After passing through the lead pan, the wire is carried a distance over rollers until it has cooled off; it then passes through a vat of muriatic acid, which removes all dirt from the wire. Without this acid the galvanizing would not adhere to the wire. From the acid the wire passes through a large iron pan of melted zinc or spelter, which forms a thin coating on the wire, and then between two pads of asbestos, which remove all surplus metal and give the wire a smooth finish. The end of the wire is then fastened to an iron pulley, which, as it turns, coils the wire up and pulls it through the various stages of this process. Wire, after being galvanized, will stand exposure for a number of years without rusting.

The Blair Husking Gloves.

The Blair Husking Glove Co., Bucyrus, Ohio, have so thoroughly impressed the knowledge of their goods upon the Hardware trade of the country, that they hardly need any form of introduction to any dealer. It may be proper,

however, to here state that the company are in the market this season with a better and more extensive line than ever, and that they guarantee all their goods as first-class in every respect. We are permitted to illustrate a few of their leading articles in this connection. They make, for instance, a glove of the best selected heavy oil tan calf leather, with copper rivets and burrs, that protect all the wearing parts thoroughly. The makers speak of this as "the most durable glove that has ever been offered to the trade for general use," and add that "by applying any husking pin it will make the best corn husking glove ever made." They have another article which is described as

"the husker of huskers;" as comfortable on the hands, and a special protection to the wrists because of their extra length. This entire glove is made of duck, and all the wearing parts, seams and joints are covered with leather, and protected with steel disks, "making the best wearer and best seller, and the lowest priced goods on the market." They also make wrist supporters, husking pins, etc., and will be pleased to send prices and illustrated descriptions upon application.

"Women," said the old lady, "are the biggest fools in the world—except men."

An Aged Maker of Tools.

"I have made about everything in the line of tools, from a sewing machine needle to a steam engine," said Edwin S. Hill, whom his fellow workmen declare to be the oldest maker of tools in the city, says the Boston *Globe*.

Mr. Hill is short of stature, with hair and whiskers tinged with red, and when he is working away amid a host of others, in a busy machine shop, there is nothing about his movements to indicate that he is the oldest maker of tools in the hub. Mr. Hill was born in Hopkinton, Aug. 21, 1832, and has been for the past forty-one years engaged in the tool-making business. While he was quite young his parents moved to New Hampshire, and in the granite state he received his education, in Litchfield, Nashua and Peterboro. He was brought up on a farm, and when quite young was sent to learn the harness-making trade. Three and a half years at the harness-making business, however, gave him all of that kind of work that he relished, and in 1846 he went to Worcester and started in to learn the machinist's trade.

It was the year of the big fire in Worcester, which old-time residents of the heart of the commonwealth will doubtless remember, and after his exertions at the fire Mr. Hill was sick for a month. That was in 1854. He was then working for the old Howard & Davis Clock Co., and as the establishment was burned out in the fire, the firm moved to Boston, to East Street, which is now known as Albany Street. There they made everything from a clock to a fire engine, and Mr. Hill was working on sewing machines. He remained with the firm for four years, during which he learned the machinists' business throughout, and in 1859 he turned his footsteps toward New York, where he engaged in the manufacture of sewing machine needles until 1862.

Then he came back to Massachusetts and went to work in Salem, taking charge of the machinery in a shoe factory for James Trefren, and after a year with that concern he went to Peterboro, N. H., the scene of many of his boyish pranks. He worked in a machine shop in Peterboro for a year, and then went to Winchendon, Mass., and from there to the old Spencer Rifle Mfg. Co. His next work was for a Mr. Barber, on Green Street, Boston, on sewing machines, and from there he went to Bowker Street to work on needle machinery for Haskell & Edwards.

He then essayed the needle business on his own account in Abington, and after three years' experience in that town went to work for the Waterbury Brass Co., at Waterbury, Conn., later on transfering to the Seth Thomas Clock Co., at Thomaston, Conn. He tired of being out of Boston, however, and so decided to return to this city. He worked in turn for the several firms, and three years ago went to work for William Hall & Co., on Sudbury Street, where he has been since.

Mr. Hill made most of the models for the Bell Telephone Co., when it was engaged in the famous suit with Prof. Dolbear, and there is scarcely a model of any piece of difficult machinery, whether telephone, sewing or knitting machine that is represented in the patent office at Washington, that has not portions of his work included in it. There was no machinery used in the business when he went into the trade, Mr. Hill says, and screw machines were unknown. A lathe with a temporary turret, which the men rigged up themselves, was all that was used for what to-day is one of the most important factors in the use of machinery in tool shops. Still Mr. Hill declares that the introduction of machinery has not hurt the trade, to any extent, and he has not the least hesitatiou in saying that the wages for men engaged in the business to-day are far above what was paid in his young days.

Philadelphia is preparing to make a splendid exhibit of heavy machinery at the Cotton States and International Exposition.

Australian Trade With America.

Colonel Bell, the United States Consul at Sydney, contributes to the *Seattle Telegraph* an article on Australian trade, from which we take the following passages: In this age of gigantic things but few people in the business world of America, or even in the world of books, have appreciated the commercial importance of Sidney, the chief port and capital of New South Wales, and the metropolis of Australasia. Few of our people realize that this colony has a superficial area of 310,750 square miles, or 198,840,000 acres, an area nearly equal to the three great Pacific States, California, Oregon and Washington, or as great as the combined states of Ohio, Indiana, Michigan, Illinois, Iowa and Missouri, or that it has great commercial value. Nor is this the largest of the Australian colonies, as Western Australia has 1,060,000 square miles, South Australia has 903,690 square miles, and Queensland 668,497 square miles, while Victoria has 87,884 square miles, making a total of 3,030,771 square miles on the Australian continent, or an area more than equal to the land surface of the whole United States and territories—aside from Alaska. New Zealand, one of the "seven colonies," has an area of 104,371 square miles, and Tasmania, another, has 26,240 square miles, giving a total area of 3,161,458 for the seven colonies.

The commercial importance of this country cannot be properly estimated by a mere reference to the population, for to those whose attention has not been directed this way there are many surprises. To many very intelligent persons the exhibit of New South Wales at Chicago conveyed the first knowledge that this was a country of any considerable importance. Few people in America realize that Sydney has a population of 411,000, that it is as substantially and beautifully built as any city of its size in America, and better paved than any other city in any country, or that in the value of its export and import trade it ranks fourth among the great ports of English-speaking Britain—only London, Liverpool and Hull leading—and sixth in the whole British empire, only Calcutta and Bombay being added to the cities above enumerated. The harbor, Port Jackson, upon which the city is situated, is probably the finest, most commodious and safe on the globe, and Sydney is a centre in which the ships and trade of the world meet in open, equal and fair competition for the trade of this most distant of all the great commercial centres of Christendom.

That we have people and firms in America who desire this trade is evidenced by the fact that some goods now come, and successful agencies are well established. That there is a natural tendency for American goods to seek outside markets is shown by the fact that our people pay annually at least $150,000,000 to foreign shipowners for carrying our cargoes to the points where they must compete with the people who own the ships. Why, in this desire and effort for outside trade which we must have or soon deteriorate, do we ignore this country, so peculiarly well prepared to supply one at least of our greatest wants—wool? Other nations are not slow in appreciating the wonderful value of the Australasian trade, and we are outstripped in a competition where we should be masters of the situation. Every country but ours is reaching out and making efforts to "busy giddy minds with foreign" enterprises, and to lure them by foreign profits. We, who are most in need of a foreign market for a stupendous surplus, and who are best prepared by wealth and skill and genius to challenge the world for open competition, most need to broaden the fields of industry and to interest the ambitious and discontented by opening up new opportunities for commercial enterprise.

What seems to be the very latest novelty in the aluminum line, is in the form of rifle stock, used by a marksman at the recent match at Bisley, England. It is claimed that the substitution of the metal avoids the risk of warping to which wood stocks are liable.

NEW GOODS IN THE MARKET.

If you have anything NEW, let the world know it by illustrating it in these columns.

NO CHARGE WHATEVER is made, direct or indirect, as our interest lies in showing the readers of "HARDWARE" where the LIVE manufacturers and wholesalers are, and what they are doing.

When your NOVELTY or SPECIALTY is ready, send us an Electrotype and descriptive matter, which will appear immediately.

The Hardwaremen everywhere read this department; it is to your interest to make prompt use of it.

Christman Combined Shutter Lock and Bower.

The illustrations herewith represent the Christman Combined Shutter Lock and Bower which the Wrightsville

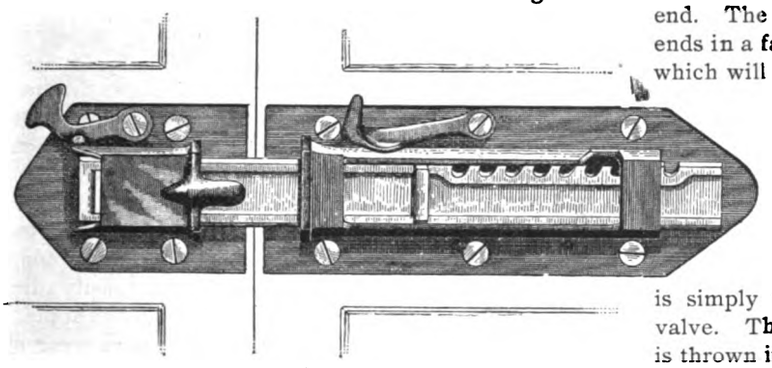

FIG. 1.

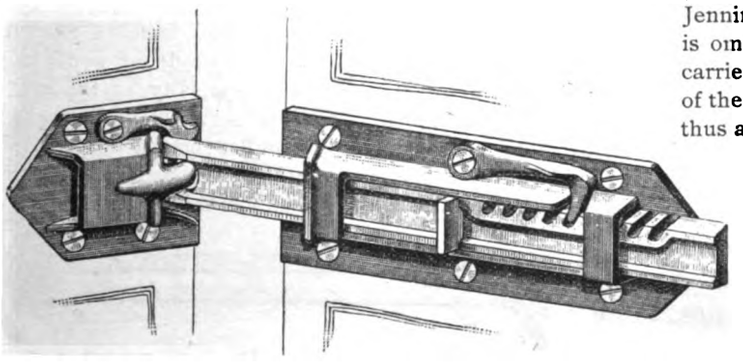
Hardware Co., Wrightsville, Pa., are placing on the market. This device is described as having a very simple bowing arrangement. The free movement of the bolt in the operations of locking or unlocking is not interfered with, and there is nothing, it is stated, in the construction of the Lock to make it less durable than a plain, common bolt. The



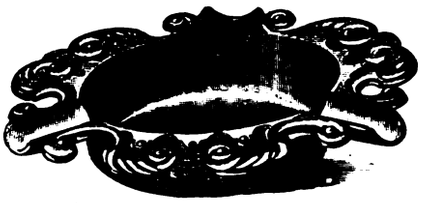


FIG. 2.

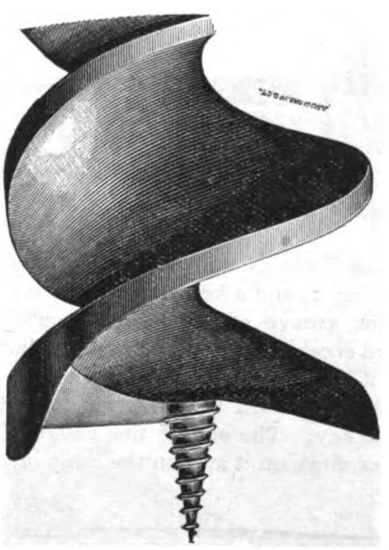
finger piece is made solid with the bolt. All the parts are said to be fitted and fastened together before the complete article is japanned or galvanized, thus preventing the appearance of unsightly rust stains on the shutter beneath the lock.

New Ash Receiver.

Bernard & Frank, No. 174 Fulton Street, New York, are the patentees and manufacturers of an Ash Receiver illustrated herewith, which they are just placing on the market. The Receiver is made in bronze and in brass, both deco-

rated and plain, in several handsome patterns. The special features which recommend it to the sedentary smoker, are the cigar rests attachment, a grooved projection, in which the lighted cigar may be laid when sitting at the desk or card table. This obviates the risk of burning the table, table cloth or desk, which is often incurred by smokers when, in default of any such convenience, they place their live cigar on the edge of the table or desk.

The Lloyd Window Brush Handle.

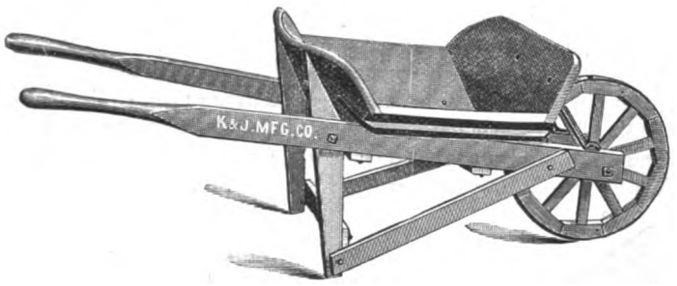


Henry F. Knowles, No. 49 Federal Street, Boston, Mass., is the sole agent for the Lloyd Patent Window Brush Handle herewith shown. The handle is grooved from the bottom to within three inches of the brush end, and a tube is laid in the groove its full length, leaving the handle at its end. The tube then bends over the back of the brush and ends in a fan. On the lower end of the handle is a valve which will fit any ordinary garden hose. In use the water

is simply turned on, the supply being regulated by the valve. The water passes through the tube, strikes the fan, is thrown in a sheet on the brush, which spreads it over the window. When used in rinsing the brush is simply held away from the window giving a stream of clear water. The handle is adapted for store, office, residence, and railroad car washing.

Jennings' Perfection Extension Lip Auger.

The Extension Lip Auger herewith illustrated is being introduced by S. H. Jennings, Deep River, Conn. It is explained that one half of the Auger is the same as Russell Jennings' Extension Lip Bits and Augers, and that the spur is omitted on the other side of the Auger and the floor lip carried down obliquely, so as to cut to within about 1-16 inch of the end of the spur on the opposite side. The friction is thus almost entirely avoided, it is remarked, and that as the



cut of the floor lip on one side crosses the cut of the floor lip on the other side, the chip is cut in two, coming out in small pieces to avoid clogging. The point is made that this feature renders it superior as a ship auger or a millwright auger. It is stated that as the spur cuts ahead of the lip, outlining the hole, it performs perfect work, and that the strain on the spur is so relieved that the one spur will do more work than three spurs under the old construction. The object aimed at in this Auger has been to overcome the firction caused by the spurs when forced into hardwood, to perform perfect work, and to avoid clogging, all of which

Digitized by Google

is claimed, has been accomplished. It is not intended to make augers for use in a brace smaller than 1 1-16 inch, nor for any other use smaller than 1 inch in size. S. H. Jennings is president and treasurer of the Russell Jennings Mfg. Co., but has concluded, we are advised, to sell this patent Auger in his own name. The same list prices will be used on the Russell Jennings extension lip bits.

Railroad or Canal Barrow.

The Kilbourne & Jacobs Mfg. Co., Columbus, Ohio, who are known the world over as manufacturers of wheelbarrows, etc., are placing upon the market with great success,

the article here shown. It is a bolted Railroad or Canal Barrow, with Jacobs' patent No. 2 wood wheel; is painted; and of the following sizes: Diameter of wheel, 17 inch; tire, 3-16x1⅛ inch; spokes, ⅞x1 inch; ½ inch axle bolt. Full sized bent tray, planed, cleated and strapped together, and well finished. Bolted securely to frame. The legs extend upward, serving as a brace to the bowl, to which they are bolted. They are also bolted to handles. The makers say: "This Barrow has all the merits of other bolted barrows, and, in addition, has the Jacobs' patent wheel, superior in every way to any wood wheel manufactured. The wheel revolves on a fixed axle bolt, ½ inch in diameter, similar to a buggy wheel, and runs true and evenly. The Barrow for railroad contractors. Knocks down completely for shipping, and is easily set up. Weight, 50 pounds." The company will be pleased to send full catalogue upon application.

Cleveland Grip Socket for Twist Drills.

The Grip Socket designed by the Cleveland Twist Drill Co., Cleveland, Ohio, is intended for holding and driving taper shank drills and other tools. A groove which is an

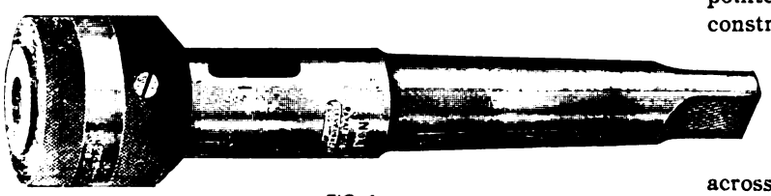


FIG. 1.

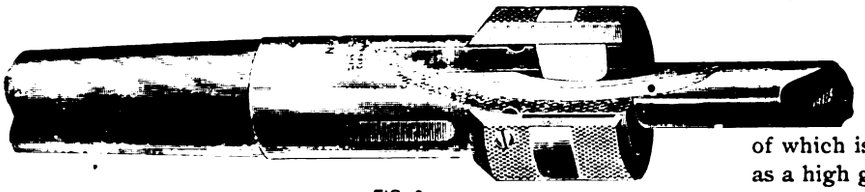
arc of a true circle is milled in the shank of the drill, as shown in Fig. 2, and a key let into the body of the socket fits into the groove and is locked securely in place by a turn of the eccentrically counterbored collar. After the key is locked it is impossible for the tool to slip in the socket or to be pulled out until the collar is turned back again to release the key. The end of the collar is beveled, and a plain index mark on it and on the body of the socket shows



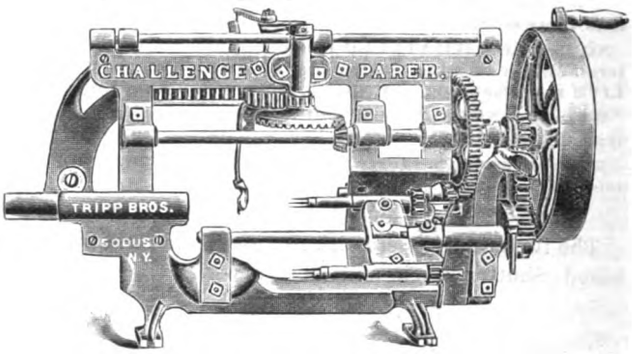


FIG. 2.

when the key is released. Drills or tools that have had the tangs on the shanks twisted off can be used in these grip sockets successfully. Boring bars for undercutting can also be used without any danger of their pulling out of the sockets,

The Challenge Parer and Corer.

Tripp Bros., Sodus, N. Y., are putting on the market the Parer and Corer herewith illustrated. By removing the crank the machine is converted from a hand to a power parer, and may be belted direct from the main shaft, no connecting shafts being required. There is a clutch on the

main shaft operated by a hand lever, to enable the machine to be stopped or started instantly. The boxes are made adjustable and are bolted to the parer frame, each having a brass lining. The shafts are made very long, this being referred to as a desirable feature, especially for the reel shaft, as it enables the reel to be held rigid when locked. The makers remark that the machine is simple in construction, that all parts are readily accessible and easily adjusted, and that but three turns are required to pare an apple. The point is made that the cutting or excessive wear of the gears, common to reel machines, is in this machine entirely overcome. The Parer is designed for use in canning houses and evaporators, or where apples are pared in considerable quantities. It is stated that the capacity of the machine, when run by power, is 100 bushels per day, and when run by hand that it will pare from 70 to 85 bushels per day, according to the expertness of the operator.

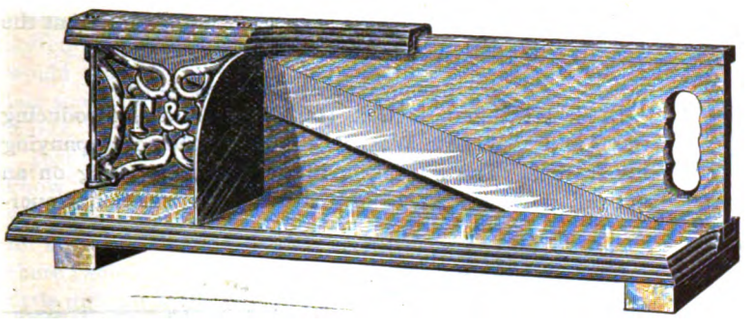
Cary's Skeleton Pail Clasp.

The Cary Mfg. Co., Nos. 5–9 Elm Street, New York, have placed on the market an improved form of Skeleton Pail Clasp, as here illustrated. It is made of good stock and is very tough. It is designed especially for the use of shippers of butter, lard, cheese, preserves, jellies, crackers, candy, tobacco, oysters and similar commodities. It is pointed out by the manufacturers that from the peculiar construction of this clasp it can be driven easily with or

across grain without splitting the wood. It will be seen there are three strong prongs at each end, fashioned much on the principle of brads; also owing to the flexible skeleton back they will bend easily and closely around sharp corners. They can be furnished in four sizes, viz., 2¼, 2¾, 3¼ and 3¾ inches long. They are sold by the 1000 and packed in 50 and 100 pound boxes, or in barrels.

The Sandow Wrench.

Lavigne & Scott Mfg. Co., New Haven, Conn., are putting on the market the Sandow Bicycle Wrench illustration



of which is here given. It is offered by the manufacturers as a high grade tool for bicycle and household trade. It weighs about 5½ ounces, is highly polished and finished with a heavy coat of nickel, and we are told, made of the best quality steel. The jaws, which are case hardened, are but 3-16 of an inch thick, which enables the user to get at nuts which, owing to their position, could not be reached by wrenches having jaws of greater thickness. The Wrench

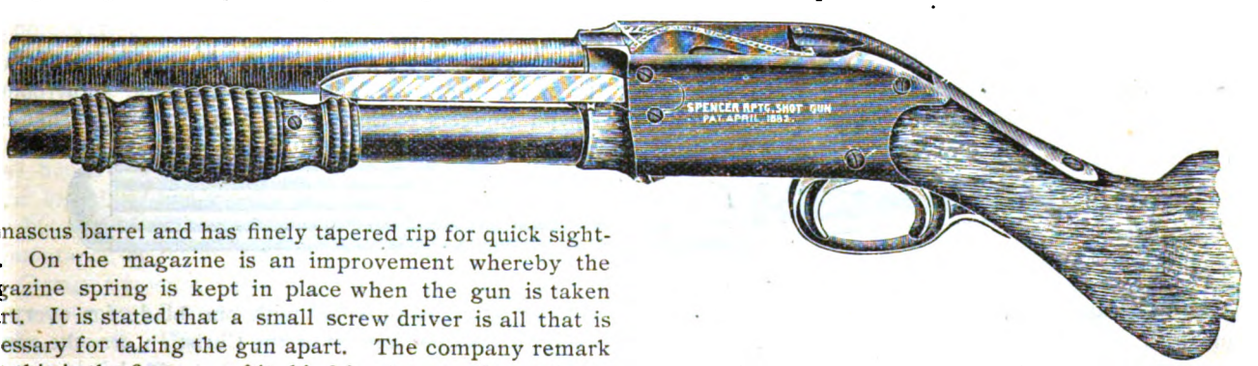
Digitized by Google

is said to be light, strong and durable, and it is pointed out the leverage increases with the size of the nut on which it is used. The Wrench will take any nut to 1¼ inch in diameter.

The "T. & D." Slicer.

The Tucker & Dorsey Mfg. Co., Indianapolis, Ind., are manufacturing an improved meat, bread and vegetable Slicer, per accompanying illustration. The desirable features claimed are simplicity, strength and durability, quick and accurate adjustment and perfect shear of knife, which bears against an iron bracket instead of wood. The woodwork is of oak, well seasoned, varnished and polished; the

knife of special steel, ground to a fine cutting edge; the iron bracket and other castings nickel-plated. By loosening the set screw and moving the gauge the cutter may be adjusted to any thickness. It will slice equally well dried beef, cold tongue, Saratoga chips, bread, cold slaw and vegetables of all kinds. Special mention is made of its bread cutting qualities. An excellent article for hotel, restaurant, boarding house, grocery, meat market and family use.



The Pai point Mailing Box.

The Pairpoint Mfg. Co., New Bedford, Mass., are putting on the market the Mailing Box represented in the accompanying illustration. It is made of heavy cardboard and is designed principally for sending samples through the mails. The operation of opening consists in merely turning the little brass fastener shown in the illustration, upward when the cover opens easily. It is almost impossible for the cover to slip when the catch is properly adjusted.

Spencer Repeating Shotgun.

Herman Boker & Co., Nos. 101-103 Duane Street, New York, have just put on the market their new Spencer Repeating Shotgun for trap shooting. The gun is made with

Damascus barrel and has finely tapered rip for quick sighting. On the magazine is an improvement whereby the magazine spring is kept in place when the gun is taken apart. It is stated that a small screw driver is all that is necessary for taking the gun apart. The company remark that this is the first gun of its kind for the use of trap shooters combining all the points required, and that it is turned out in response to request for a trap gun as the result of the large demand created for their regular gun.

The Eureka Vine Fastener.

M. D. Jones & Co., No. 368 Washington Street, Boston, Mass., are putting on the market the Eureka Vine Fastener,

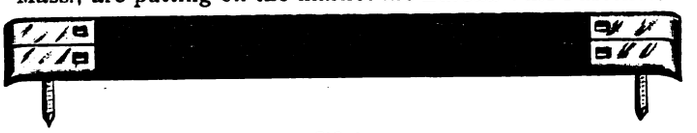


FIG. 1.

illustration of which is here shown. Fig. 1 represents it full size; Fig. 2 shows the Fastener applied to a tree. The Fastener is made of strong woolen braid, with metallic tips and wire nails. It is explained that it is sufficiently stiff to

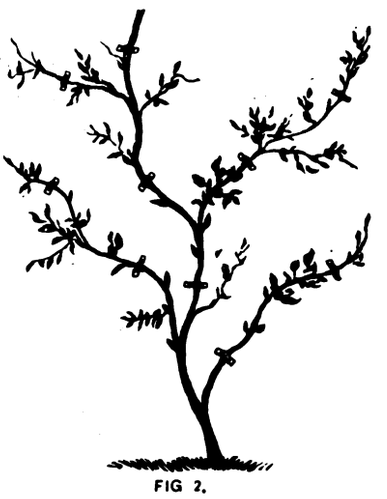

FIG 2.

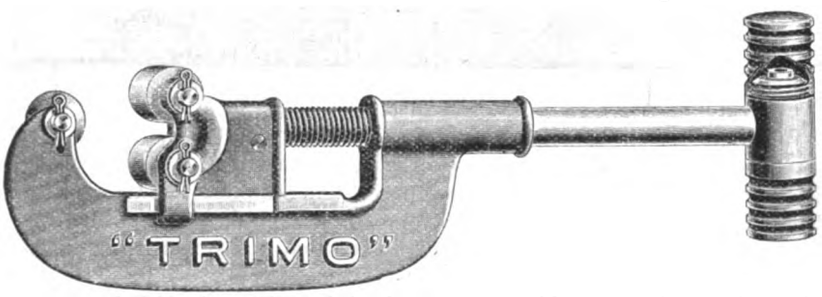
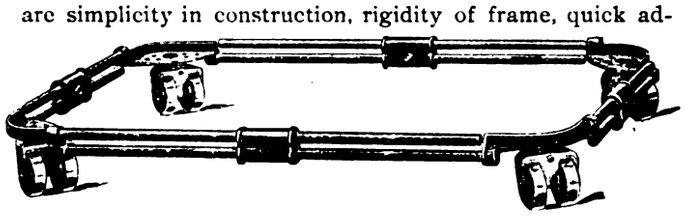


support itself while being put up; that the nails being attached, all danger of hammering the fingers is avoided, and that carrying a nail box is unnecessary. The Fastener may be used on house vines, grapevines, etc., and is designed as a durable, cheap and convenient device for these uses.

Trimo Pipe Cutter.

The Trimont Mfg. Co., Roxbury, Mass., are introducing the Pipe Cutter shown in the accompanying illustration. The frame of the cutter is drop forged from bar steel, the cutting wheels are drop forged from the best of tool steel, and the burr removing rolls are case hardened. It is explained that the construction of the cutter is such that when used as a single wheel cutter, as shown in the cut, it does not crawl either to the right or to the left, but cuts a square end, also saving materially the breakage of the cutting wheel. The point is made that no burr is left on the pipe, but that it is smooth and ready for the threading die without the use of a file. Each cutter is accompanied by two extra cutting wheels, a receptacle for which is provided in the handle. The cutter is convertible from a single wheel with rolls into a three-wheel cutter by substituting the two extra cutting wheels; when the cutting wheels are in use the two rolls can be placed in the handle from which the cutting wheels have been taken. The tool has an antifriction washer placed at the end of the screw in the block that carries either rolls or the cutting wheels, to enable the operator to turn the screw with little resistance, to imbed the cutting wheel into the pipe, and also to prevent chipping of the cutting wheels by the twisting of the frame.

Digitized by Google



The bearing for the handle in the frame is long, so that when the cutter is opened to its full extent the thread of the screw will not come out of the frame, the screw being

surrounded by the socket of the frame to provide strength where it is required. The company remark that in practice they have found that the screws upon which cutter wheels revolve work loose, and to avoid this they have substituted straight pins, held in place by cotters. These are designed to make it more convenient when changing from a single wheel with rolls to a three-wheel cutter, and also to add strength, as the pins are of increased size. The manufacturers state that the tool is made throughout in a workmanlike manner.

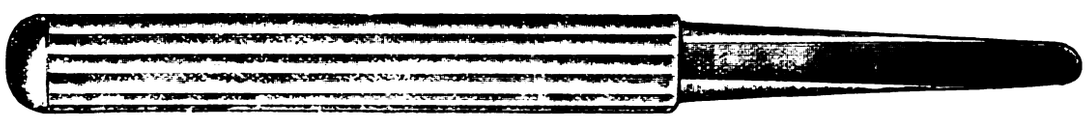
Tucker's New Stove Truck.

The attention of the Hardware and stove trade is called to the improved Tucker Stove Truck, see accompanying illustration, manufactured by the Tucker & Dorsey Mfg. Co., Indianapolis, Ind. The chief points of merit claimed are simplicity in construction, rigidity of frame, quick ad-

justment and light weight. Will adjust from 18x24 inches to 30x40 inches and holds the legs of stoves only 2½ inches from floor. The frame is all steel and malleable iron; is mounted on Martin's truck casters and finished in oil. Has a very neat appearance under stove.

Coe's Belt Punch and Lacer.

The accompanying illustrations represent a tool for punching, enlarging and lacing belts, offered by G. D. Oberschelp, No. 1607 N. Broadway, St. Louis, Mo. The device is referred to as a small, handy tool, the punch and awl made of one piece of best cutlery steel, tempered for the purpose and nicely finished. It may be sharpened when dull. The handle is of corrugated brass tubing, made to fit the punch and awl, and affording a firm grip for making holes and for lacing. The tool as shown in Fig. 1 is for making holes of any size from 1/8 to 3/8 inch in diameter, in any kind of belting, for lacing, and is designed to supersede the common belt punch with which a hammer must be used. It is



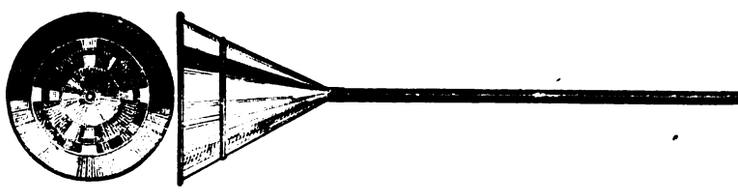


FIG. 1.

explained that with this tool holes can be made uniform in size and with smooth, clean cut edges; also that belts can be punched and laced in places where the ordinary belt punch cannot be used. In Fig. 2 the other end of the tool is shown used in connection with the same handle. This end of the tool is a slotted awl to be used for enlarging the holes and for lacing. The slot is used to insert the end of the lace to be drawn through the belt, and avoids pointing the lace in order to get it started through the hole. The awl is inserted in the hole, the end of the lace is laid in the slot, and by withdrawing the awl the lace is drawn through. The point is made that only this tool is required to lace a bolt; that one man can punch and lace any sized belt without an assistant to hold tools or a block of wood; that a belt can be punched and laced on pulleys by the aid of a ladder, without taking it down on the floor, and there is no danger of injury to the hands when using the tool, as the end not in use is in the handle, and that the tool may be carried in the vest pocket like a pencil.

Compressed Air Washer.

E. M. Heathman & Co., Hamilton, O., are introducing the Compressed Air Washer, shown in the accompanying illustration. The washer is referred to as working on an entirely new principle, and that instead of friction it oper-

ates by compressed air and suction, forcing hot suds through the goods with sufficient force to remove all dirt from a tub full of clothes, cleansing them in from two to five minutes. The makers state that the washer will cleanse the finest and most delicate lace or the heaviest bed-spreads, quilts or blankets, as well as any small wearing apparel, in one-fourth the time it can be done by hand, besides making the work easy, with comparatively no hard labor. The manufacturers guarantee the Washer to be a great saver of time and labor, with no wear or injury to the fabric, and remark that it is light and portable and that it lasts a lifetime.

Wire ropes are not a modern invention. A bronze wire rope ½ inch in diameter and from twenty to thirty feet long has recently been found in the ruins of Pompeii. It is estimated that the rope is at least 1900 years old.

The nail mills of the Portage Iron Works, Duncansville, Pa., are to be put in operation immediately. These mills have not been worked since 1873. The resumption is said to be due to the boom in the nail business. The employees will number at least 275.

Perhaps the most wonderful specimen of cutler's cratt in the world is the knife to be seen in the showrooms of Joseph Rodgers & Sons, Sheffield, England. This extra-

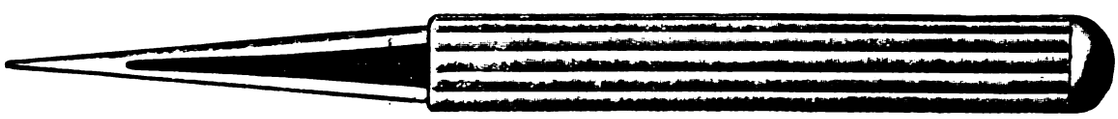

FIG 2.

ordinary knife is provided with one blade for every year since the commencement of the Christian era, the number of blades, of course, now being 1895. Blades are inserted five at a time at the lapse of every five years.

HARDWARE costs only One Dollar a year.

CONFESSIONS OF AN UNSUCCESSFUL CLERK.—VI.

At first it was a great pleasure to show and sell goods. The mere fact that I was behind the counter in a warm, clean and showy place, dressed in good clothes, and employed at light labor, while my former associates up at home were driving cows and cutting brush, was a satisfaction and comfort not to be ignored. I did not see how any one could grow weary in such occupation, although it grew a little tiresome toward night, when the counters were piled with heaps of goods that had to be rolled up, arranged, and sorted back into their shelves and boxes. In quiet hours, I would stand at the door and watch for customers, fearing lest some one else might be ahead of me in supplying their wants.

Just how long this burst of enthusiasm lasted, I do not know. Perhaps some young clerk of to-day who finds himself undergoing the same sad transformation, would be better able able to guess than I, after this lapse of years. But there came a time, I distinctly remember, when it was a little difficult to get up from the stove, lay down my book—there was no objection to novel reading in the store, in leisure hours—and go to the front to chaffer with some difficult customer over cotton cloth or a suit of clothes for the boy. It was a temptation to keep the eye upon the page, and remain in the company of Sam Weller or David Copperfield, and allow Almon or Smith to go forward and attend to the new comer. This was only when we boys were alone in the store, and seldom occurred when the proprietors were about.

It is with no small degree of shame that the confession is made, that upon the general subject of mercantile life, I knew as little at the end of the two years with Samson & Crown, as at the beginning. I learned all about the prices, but nothing about the books; could pack butter with considerable skill, but had only a hazy idea as to discounting bills; could deliver a suit of clothes with celerity over on Quimby Hill, but learned nothing of banking or bank methods; was quite valuable in unrolling broadcloth and handing down rubber boots during the annual invoicing, but was never trusted to go over the footings—the balance sheet would have been something wonderful to look at, had I done so. As I now recollect it, there was many a time when I might have made a sale or secured a regular customer, had I held on to the eagerness of the earlier days, and not been in a hurry to get rid of the caller without a show of rudeness, or a downright discourtesy. There has been recently coined in New York a variety of slang that described my attitude in too many cases—that describes that of too many of the clerks of to-day who show "the marble heart" or "the dead face" to customers who interfere with their reading, or snoozing down upon the back counter.

There were two main causes that led to the condition of mind described in the above. In the first place, I was always too much inclined to use my pen in preparing something for the local press when I should have been at work about the store. Even now this habit is in my way to success—here I am, scribbling this matter on the head of a sugar barrel, when I should be making out those bills Mr. Striebinger has ordered me to get ready. I had made the acquaintance of "Gib" Braden, a printer connected with the *Grange Chronicle*, and felt that through him I had made a sure entry into literature, and must push my opportunities to the utmost. When I saw my first article in print—a defence of the Ohio temperance laws, I was almost ready to throw up business altogether, go to New York, and take immediate charge of a leading magazine. I sat right down and commenced a novel entitled "A Story of Rum,"—I saw its ten unfinished pages of foolscap in an old trunk, up at the house the other day.

The second of the two drawbacks mentioned above, was the necessity which the social part of my nature imposed of having "a good time," whenever and wherever opportunity offered. Too often the demand and opportunity worked together for the injury of business. There never was a firm more lenient in these lines toward employees than Samson & Crown. In Grange at that time there was no closing of the stores on holidays, with the exception of Christmas, and on the evening before a holiday Mr. Samson would say, "We'll be open as usual to-morrow, boys, and expect you to be here." We would all three be on hand to open up, and sweep out, but the chances were that before noon all three would disappear; and as Mr. Crown was very domestic, and liked to remain with his family on such days, Mr. Samson would be left to hold the fort all alone, and wait for the customers who never came. But not a word of censure came from him on the day following; the displeasure which was caused by our desertion, evaporated over night.

Although himself a confirmed bachelor, Mr. Samson had the highest respect for woman, and for the good influences by her exerted over those of the opposite sex. I remember my first application to him for permission to be away from the store in the evening. I had made the acquaintance of the young people of the Methodist church, and was about to plunge into my first great excitement and social cyclone, in the shape of a "Mite Social." When the request had been made, Mr. Samson deliberated a moment, and then said: "I don't know, Henry. It all depends upon where you wish to go, and who are to be there. We have some pretty bad boys in Grange, and if you have commenced to go about with them, I will be compelled to forbid it."

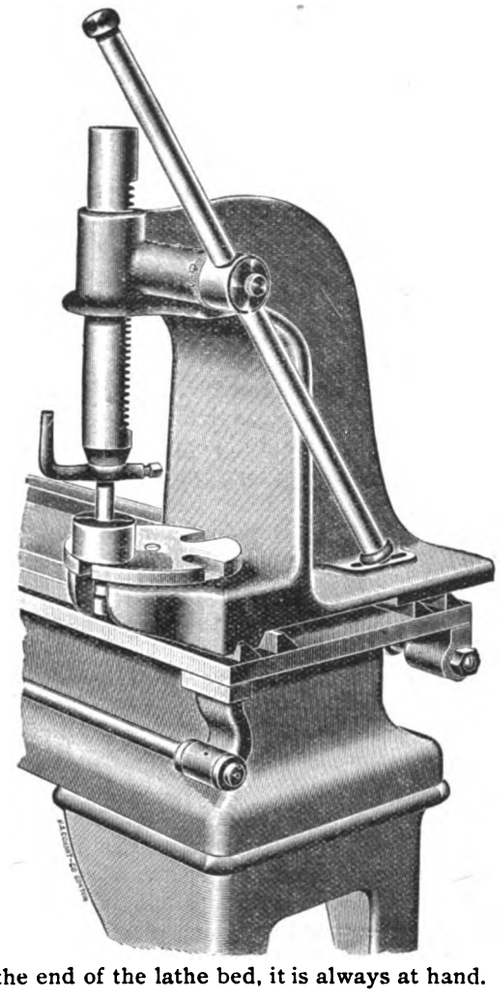
"It is only a church social, at George Van Gorder's."

"Of course, young ladies will be there?"

"Yes, sir."

"You may go then. I have always made it a rule with my clerks to encourage their going about with the young ladies. I then know they are safe and in good company; but I always discourage their going about alone with a lot of other boys. They learn too much mischief."

I can now see that Mr. Samson was right. In pursuance of our quest for "a good time," as suggested above, a half dozen clerks along the street would meet almost every evening in some one of the stores left in their charge, and hold revel at hours when they all should have been in bed getting rest for the labor of the coming day. The shutters would be put up and lights turned down at the regular hour of closing, the bed made, and preparations made for the night; and then when "the boss" had put on his hat and gone home, in the expectation that only peace and sleep were left behind, the clerk would slip out, lock the door, and proceed to the point for which the evening's appointment had been made.



We never did anything very bad at these gatherings. A can of raw oysters, crackers, cigars for those who smoked, and conversation seldom wise, with stories too often low, made up the extent of our dissipation. I do not know that any direct harm came of these meetings, but their tendency was to make us careless as to business, place our thoughts upon unworthy things, and cause drowsiness for the following day.

With this I shall cease moralizing, and resume a plain recital of facts. The above has seemed necessary in explanation of why I have chosen the word "unsuccessful" in my caption.

The Greenerd Arbor Press.

We show herewith an illustration of the Greenerd Arbor Press, manufactured by J. M. Marston & Co., Nos. 226 to 230 Ruggles Street, Boston, Mass. In description of it, the makers say that "while most of the advantages are apparent to those who now drive in and out their arbors, we think that the following will more fully call to mind the principal advantages of this tool. It saves marring, upsetting or springing the arbors. It saves cleaning out the centers and taking off the dogs. Saves defacing or otherwise damaging finished work. It preserves the arbors and will pay for itself in the increased life of them. Clamping

on to the end of the lathe bed, it is always at hand. A useful tool in the manufacture of machinery." Now built in three sizes.

A Huge Wire Machine.

F. B. Shuster, proprietor of John Adt & Son's machine works, New Haven, Conn., has constructed for Holmes, Booth & Haydens, Waterbury, Conn., what is thought to be the largest automatic wire straightening and cutting machine ever built in the United States. This mammoth machine is constructed with a straightener which revolves continually, through which the wire passes into a long grooved bar or sleeve with an adjustable gauge therein, against which the wire strikes. By the wire striking against this wire or gauge in the guide bar, it operates a lever attachment, which in turn operates the cut off of the machine. Forked holders are employed in this machine to catch the wire as it is cut off and dropped from the groove in the guide bar. These holders are mounted upon a piece of wrought iron pipe, which is fastened in the base of the machine at one end, and at the other is supported by a floor stand. Some of the holders are carried up so as to support the shaft, guide bar, and other necessary parts, thus rendering great security and strength to the various parts of the cutting extension. This machine had to be built in two sections, as the whole length was so great that it was impossible to obtain a car long enough to ship it on.

Marlin Fire Arms Co. to the Trade.

The Marlin Fire Arms Co., New Haven, Conn., address the trade as follows, under date of August 10th: "We are pleased to announce that we can furnish our 30-calibre Rifle in the Model 1893, in all of our accustomed styles of this model. The cartridge as here illustrated is a 30-calibre cartridge loaded with 30 grains of Smokeless Powder and a 160-grain full metal patched bullet. The velocity of this bullet is a little over 1800 feet per second; the penetration is nearly four times as great as that of the ordinary lead bullets shot out of the regular hunting rifles. The steel used for barrel, as well as that used in the receiver and breech-bolt, is manufactured and guaranteed to the regulation specifications of the United States government. The

price of the rifle is $23 for the regulation 26-inch rifle with octagon, half octagon or round barrel. Take Down, $5 extra. Half magazine will be furnished in either the regular or Take Down rifles without extra charge. All extras, such as pistol grip, fancy wood, engraving, etc., are at our usual list prices. Extra lengths of barrel likewise. The discount on this rifle is the regular discount given on our Model 1893. The list prices for Ammunition are as follows: Cartridges, $38 per thousand; Primed Shells, $18 per thousand; 160-grain Bullet, $6 per thousand. We can furnish these rifles promptly."

Has Numbered Ninety-nine Years.

A man who has reached the age of ninety-nine cannot be found in every city, yet Underhill, Clinch & Co., No. 94 Chambers Street, New York, have a customer whose father has reached that advanced age. This is Elijah B. Glenn, who lives with his son in Elm Street, near Pacific Street, Newark, who some days since celebrated the ninety-ninth anniversary of his birth. He was born at Carpenter's Point, Cecil County, Md., on August 7, 1796, and says he is a direct descendant of Pocahontas, and has books and papers to prove his claim. His mother's maiden name was Boulden, which is the name of a man who married one of the daughters of Pocahontas, and the name has been continued in the family ever since then. Mr. Glenn married in 1829, and had two sons, one of whom, Samuel, lives at the age of sixty years. He is in the Hardware business. The nonogenarian has voted in every Presidential election since 1817, and two years ago he walked to the polls to cast his ballot. In 1832, while living in New York, Mr. Glenn was stricken with cholera, and nearly died from the disease. He preserves his faculties wonderfully, and is delighted to do little jobs of work.

The New England Iron & Hardware Association have opened an office in room 41, No. 113 Devonshire Street, where they will be glad to see any visitors to Boston. Copies of catalogues, etc., will be thankfully received from manufacturers and dealers in the Hardware line.

The Laughlin Nail Works, Martin's Ferry, W. Va., have recently resumed operations with 2000 hands. These works are said to be the largest cut nail factory in the world.

To remove a rusty screw, apply a red-hot iron to the head for a short time, the screwdriver being used immediately afterwards while the screw is still hot.

RECENT TRADE PUBLICATIONS.

The Simmons Hardware Co., St. Louis, Mo., have issued and sent among their friends and patrons a magnificent catalogue for 1895. The company say: "We ask from the trade a careful and critical inspection of this volume, feeling sure that they will find it contains the most complete assortment of desirable, up-to-date goods in our line ever catalogued. Since issuing our lastcatalogue in 1891, we have discarded many goods and made many extensive additions in most all the lines we carry. We offer six complete lines of real bronze goods of popular finishes and artistic designs, so arranged as to render the ordering of them very simple. In the compilation of this book we have endeavored to combine simplicity with clearness and brevity, so as to make it, in the future, as in the past, the standard book to the Hardware trade, and from which every one of our customers can intelligently order goods. We have also carefully considered the question of condensation of space, as far as was practicable, in illustrating our large lines, comprising over 45,000 articles, at the same time not crowding the goods too closely, nor impairing the beauty and value of our illustrations. We therefore believe that the book is particularly valuable to our customers for mail orders, and this is a large and growing department of our business. We have illustrated together similar goods, selling in the same season of the year, as in the case of such articles as fire goods, commencing with page 960 and continuing some fifty pages. In builders' Hardware we have separated each distinct line of ornamentation and finish, so that it is possible, as in the case of Madras goods, shown on pages 448 to 459, to trim a house throughout with this line. To make the object lesson complete, we have shown the actual color and finish of the various lines of goods in colored cuts, preceding the said lines, as in the case of plain bronze, old copper goods, commencing on page 461. We have endeavored to simplify the various Hardware terms, relating to right and left hand locks, by illustrations, as shown on page 442. The comparative list of finishes, shown on pages 440 and 441, we have esteemed so valuable that we have copyrighted it, and we have been complimented by all the manufacturers whose goods are listed, requesting us for copies of this list for their own use. We need scarcely more than refer to our large assortment, embracing as it does everything needed in the Hardware and machinists' line, even to such items as mathematical instruments and fine mechanics' tools. The most notable additions to this assortment, since the issue of our former catalogue, have been the items of rope and of sheet metal, embracing tinplate, galvanized iron, sheet iron, sheet steel and zinc. We have exceptional facilities for handling these goods expeditiously and economically, and in their selection have followed our general principle of having only the best, so that we have already established among our customers a most valuable reputation for the quality of our tin-plate, sheet iron, galvanized iron and rope. Our illustrations of cutlery show only a few of the leading patterns which we handle, as we find it more advantageous to have our salesmen show the complete line in their sample rolls. We only indicate in our book our lines of Clocks, Lamp Goods and Bicycles, as these are very large departments with us, and have separate catalogues devoted to them. Our sporting goods department shows an especial increase, and we have endeavored to comprehend in it everything needed, even to the smallest item."

The following are some very interesting statistics connected with this gigantic catalogue: It contains, including index, 1768 pages; 8350 illustrations; the entire edition consists of 12,000 copies; weighing 95 tons, each copy weighing 16 pounds; 6 carloads of paper, 13½ tons of tar boards, 11,000 square feet of seal grain leather and 24,000 square yards of cloth, were used in printing and binding; 14 months' time was consumed in printing and binding this catalogue, which required 650 packing cases and 110 wagons to deliver it in. In the front of this volume are two handsome illustrations of the company's headquarters and ware house. It also gives some valuable suggestions for mail orders.

The new catalogue of the Humber & Co., America, Ltd., New York, under date of July, 1895, has been distributed. It is of 32 pages and the cover is very attractively gotten up, it being done in green and gold. The frontispiece is a picture of the Humber factory at Westboro, Mass. We quote from the catalogue a portion of Hamlet (modernized):

"And these few precepts in thy memory lock most carefully;
Be thou familiar with the goods thou buyest, and by no
Means let the crafty trader fill thine ear with bombast
Meaning naught but like to overthrow thy better understanding.

Those things thou hast by close adoption tried, grapple them
To thy use with hooks of steel, and do not palter with experiment
Of each new hatched, untried elucidation of the hoped for perfect thing.

Beware of how thou placest judgment; but when once convinced, let no man change thy course;
Give every man thine ear, but believe that only which thy mind accepts beyond the peradventure of a doubt.

Costly thy cycle as thy purse can buy, but not expressed in fancy colors or in nickel plate, for oftentimes such gauds
But serve to cover up a multitude of flaws and imperfections,
Remember that the wheel he rides proclaims the man, and
They in all the world of the best rank and station are most
Select and careful in that they own and ride a HUMBER,
And he who buys the best, no matter what the cost, must
Needs have that which cannot fail to satisfy his wants.

Neither a borrower nor a lender be, for loaning cycles oft'times
Fractures friendship (and the wheel), and borrowing works the same sad end.
Count down the cash for that thou buyest; 'tis always best, for thus thou holdest
Him who sells in certain confidence, and gain respect which otherwise thou losest.

Beware of entrance to a race,
That thy condition is well fit;
But once in, bear on thy HUMBER all thy might,
It will bring thee victory.

This above all, to thine ownself be true; buy no man's goods
Until thy judgment hath been satisfied;
And it must follow, as the night the day, thou must possess
That which will pleasure thee.
For it is writ, 'That which is the best is never dear,' e'en
Though thou payest rather more therefor in filthy lucre.
Season this in thee, keep in thy
Mind the noble qualities of the HUMBER."

The remainder of the catalogue is devoted to a detailed description of the Humber.

We have, from the Harrisburg Foundry & Machine Works, Harrisburg, Pa., a neat and attractive little booklet entitled "An Ideal Engine Room." A full description of this engine room is to be found on several pages of this book, quoted from the three great papers of Boston. The engine room here described is situated under Keith's Theatre in Boston, and the engines were constructed by the Harrisburg Foundry & Machine Works. "It is situated over thirty feet beneath the level of the street, under the theatre. A long, winding passage, called the tunnel, leads down to it from the foyer. This tunnel, like the engine room itself, is paved with white marble, the sides composed of marble tiles, while the ceilings are beautifully frescoed, with a pretty pattern traced upon them in stucco. The entire length of this passage is brilliantly lighted by electric lights, making it seem like the entrance to some fairy land. The engine room itself is even more beautiful than the tunnel. Shaded electric lights shed their soft glow

Digitized by Google

over the huge engines, and show off to its best advantage the exquisite workmanship in the decorations and the beauty of the white marble with which the room is fitted up. Around the room is a dado of white tiles; above, the walls and ceilings are tastily painted, while ornaments in stucco add to the beauty of the scene. Down beside the huge engines, which, by the way, owing to the absence of belts, revolve with little or no noise, are the chairs in which the engineers are allowed to take their leisure when the work on the engines has been attended to." The remainder of this diminutive catalogue shows illustrations of the far famed engines made by the company.

We have received from the Brown & Sharpe Mfg. Co., Providence, R. I., a copy of the new edition of their catalogue. It has been thoroughly revised and contains 366 pages, sixty more than the preceding one. The new matter and the changes in the old make it especially desirable that this should replace former editions. A large number of new tables have been added, making it especially valuable to the workman as a book of reference. As noted in the colored inset the principal additions this year to the machines and tools they regularly manufacture are No. 1 Universal milling machine, design 1895; No. 4 Universal milling machine, design 1893; No. 2 power lapping machine, No. 6 automatic gear cutting machine, No. 2 gear rim milling machine, No. 1 screw machine with automatic chuck and wire feed, No. 2 screw machine with automatic chuck and wire feed, polishing and finishing machine with brake, No. 1 case hardening furnace, hard coal tempering furnace, hand milling attachment for No. 0 plain milling machine, taper milling attachment for Nos. 1 and 2 Universal milling machines, driving fixture for high speed milling attachment, 8 inch and 6⅞ inch single dial index centres, Nos. 1 and 2 flanged vises, milling machine screw arbors, centrifugal water pump, geared water pump, new sets of tools for milling machines, new sizes side milling cutters, cutters for fluting reamers, sprocket wheel cutters, cutters for making four-lipped twist drills, end mills with centre cut, fly cutters, new sizes of T slot cutters, angular cutters with threaded holes, patent metric involute cutters, improved stocking cutters for involute gears, new sizes special bevel and mitre gear patterns, rubber tipped foundry rammers, test indicator to read to 1-50 m. m., 29 degree screw thread tool gauge, "acme standard;" No. 20 screw pitch gauge. These catalogues are mailed to any address without charge upon application, or are furnished by Hardware dealers.

The new price list of the Union Metallic Cartridge Co., Bridgeport, Conn., has made its appearance. It is a neat affair with a light blue cover, in the centre of which appears the well-known trade mark of the company. The catalogue gives the prices of all, and shows illustrations of some of the productions of the company, which include paper and brass shot shells, gun wads, primers, percussion caps, loaded shells, etc. Attention is called to the following new goods recently put upon the market by the company: U. M. C. Primers for Smokeless Powders, 22 Short Cartridges with Mushroom Bullets, 32 Long Rifle Cartridges, Rim Fire, with inside lubricant; 32 Long Rifle Cartridges, Centre Fire, with inside lubricant; 32, 38 and 44 Smith & Wesson Cartridges with self-lubricating bullets; 25-25 Stevens, 25-36 Marlin, 236 Navy, 30 Government and other Cartridges with metal cased and mushroom bullets, and Smokeless Cartridges.

We are in receipt of the fall catalogue of the Central Oilgas Stove Co., Florence, Mass. The company make the following announcement to the trade: "The steady growth in the demand for something in the way of a heating stove that would be far superior to either the coal or wood heater, and at the same time dispense with the great annoyance of dumping grates, cleaning out stoves, carrying coal and ashes—in a word, the ever increasing demand for a stove far more economical, convenient and cleanly, has prompted us to increase our efforts to keep pace with this demand. We have devoted our energies to the production of oil and gas heating stoves in such variety and perfection that the most skeptical and unbelieving must be convinced, and can certainly find in this catalogue something to please and satisfy them." A casual glance through the catalogue will convince one that the company have striven to give their patrons as many new styles to choose from as possible. Those most worthy of attention are Parlor Vase, Parlor Dome, Cabinet Register, Little Giant, Parlor Grand and Florence Heaters, and Oilgas heater; this last is said to be one of the most wonderful things in the way of an oil heater that has ever been produced; it is said to produce as much or more heat than the largest circular burner heater, without smoke or odor, and the principal feature is that it does not use any wick, but produces a very powerful vapor flame, and burns ordinary, everyday kerosene.

The new price list and catalogue recently issued by the National Screw & Tack Co., Cleveland, Ohio, is certainly a handy little volume, the pages being indexed, so that the reader can turn to whatever class of screw or bolt he is in search of. The company say: "We take pleasure in presenting to you our revised price list, embracing the various lines of goods now manufactured by us. It will be our aim in the future, as has been in the past, to place goods of highest standard on the market, and to carry a complete assortment in stock, realizing the advantage of being able to execute orders promptly. We acknowledge with thanks the liberal patronage extended to us in the past, and solicit a continuance of your favors." Illustrations of the full line of goods are shown on the pages indexed for that particular class; these include steel, iron and brass wood screws; tacks, trunk, clout and small nails; machine screws, stove bolts and tire bolts.

We have at hand the catalogue and price list of the Silver Mfg. Co., Salem, Ohio, for the season of 1895-96. On the cover of this pamphlet is an outline map of the State of Ohio, showing a portion of Lake Erie and also Salem, where the works of the company are located. Its pages are copiously illustrated with representations of the well known machines manufactured by the company, which include the "Ohio" ensilage and fodder cutters, engines, horse powers, feed mills, grain separators, steam cookers, etc. The company state that "to parties desiring such information we will furnish on application our book, entitled 'Silos and Ensilage, with Hints to Dairymen,' by Prof. Samuel Johnson and James M. Turner; also our other catalogue, containing 'A Treatise on Silos and Ensilage,' and plan of a 100-ton silo, together with numerous testimonials of the merits of the 'Ohio' Cutters."

We have at hand the general catalogue, Catalogue No. 5 and the Revised Telegraphic Cipher No. 6 of the Kilbourne & Jacobs Mfg. Co., Columbus, Ohio. The catalogues are attractively gotten up and reflect nothing but credit on the company. The two together contain 148 pages, supplemented by inserted leaves. They are naturally devoted to the well-known productions of the company which include trucks of all kinds, baggage barrows and express wagons, store, warehouse, railroad, hotel, dry goods, carpet, barrel and wagon trucks, grain or meat wagons, hand-carts, skids, push carts, drag and wheel road scrapers, railroad and grading plows, bolted wheelbarrows of all kinds, steel tubular mining and foundry barrows, mining cars, railroad, farm and plantation dump carts, wrought steel sinks, etc.

Wages have been advanced in the Sternberg Bolt & Nut Works, Reading, Pa., ranging from five to twenty per cent. Mr. Sternberg said that the advance was due to better feeling in the iron business, and that it is only right that the men should receive some benefit of the revival.

Cleveland Twist Drill Co. in New York.

The Cleveland Twist Drill Co., Cleveland, Ohio, have a New York office at No. 99 Reade Street, with C. I. Markham as manager. The quarters selected are roomy and pleasant, and though at time of writing not completely fitted up, give promise of being one of the best equipped salesroom of its class in this city. Five large cases, seven feet high, with a total length of twenty-five feet, and one case three feet high, two feet deep and twelve feet long, containing one hundred drawers, give ample space for the accommodation of a stock which is large enough to supply all orders promptly. The Drills carried in stock range in size from 13-1000 of an inch to 3 inches. It is quite hard for prosaic everyday mortals to believe that the tiny drills 13-1000 of an inch in diameter can be of any earthly use, as they are so minute that it is difficult to see them with the naked eye, yet these little marvels of mechanical skill are in common use with jewelers. In direct contrast to these midgets is a huge affair capable of making a hole three inches in diameter and used for the heaviest machine work. The company, we are informed, are manufacturing in Cleveland a still larger drill, eight inches in diameter and eight feet long. A comparison between the two extremes in sizes is quite interesting. The front part of the office is occupied by Mr. Markham and his up to-date roller-top desk. Both he and his assistant are most courteous to callers and willingly show the large assortment of drills and explain the uses to which they are adapted. Very handsome cases, large enough to hold the stock of drills carried by the average Hardware house, are displayed. These cases are presented to large buyers. The situation of the company's new quarters is excellent, being in the centre of the Hardware district.

Some days since the Buck Stove & Range Co. gave a banquet to the retail merchants of St. Louis in the large hall over the Buck Co.'s office, on the corner of Main and Destrehan Streets. Covers were laid for one hundred guests. The following is a list of the toasts proposed by J. W. Van Cleave: "The Maintenance of Prices," responded to by Henry Von der Au; "Casting Bread Upon the Waters," E. J. O'Connor; "The Ladies," D. A. O'Brien; "The Stove Industry," H. H. Roberts; "Politics and Stoves," L. C. Koch; "St. Louis Manufacturers," A. G. Brauer.

The Knapp-Burrell Hardware Co. and the Polson-Wilton Hardware Co., Seattle, Wash., have consolidated, and in future will be known as the Polson-Wilton Hardware Co. The consolidated business will be jointly managed by Alfred and Robert Wilton. The latter was the manager of the local house of Knapp, Burrell & Co., and the former managed the Polson-Wilton Hardware Co.

J. W. Fenner, of the W. Bingham Co., Cleveland, Ohio, has returned from a two months' visit to Europe. He spent a few days with friends and upon business, in New York.

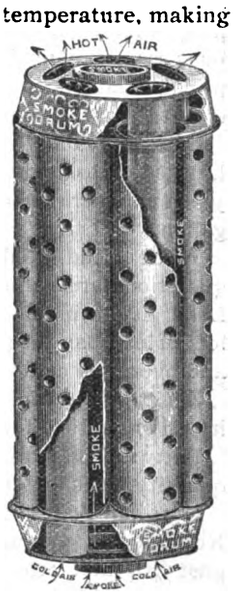
" 36	Block and Carriage Rivets, and Burrs	" Nov. 1, 1894
" 37	Hame, Coopers', and Trunk Rivets, and Belt Rivets and Burrs	" Nov. 1, 1894



Printed sheets, for insertion in the Catalogue, will be furnished upon application.

A New Location.

The Chicago Hardware Co., one of the largest concerns of the kind in the country, has closed a contract with the North Chicago Association to locate its extensive manufacturing plant in North Chicago, Ill., thus giving that city the largest factory that has been established on the outer belt line since the erection of the Washburn & Moen works in that locality three years ago. The plant will consist of a number of buildings covering an area of about four acres and having switch connection by means of the belt line and the Chicago & Northwestern with all railroads leaving Chicago and with the harbor, three miles away. Work will be commenced on the new buildings in the very near future, and it is expected that the plant will be completed and in operation on or before the first of next January. The company has a capital of $300,000 and the building and machinery will cost $100,000 or over. A large number of skilled workmen will be employed at the start and the force will be rapidly increased.

New Era Radiator.

Wilmot Castle & Co., Rochester, N. Y., believe with good reason born out of experience, that their New Era Radiator is an enemy to the consumption of coal. In a little circular just at hand—the text of which seems to be "Facts"—they call attention to the fact that "an immense proportion of the heat made by the fuel we burn passes out of the chimney instead of warming our rooms." They add: "Hotter on top of the chimney than down by the stove? Yes, a good deal. Your coal bills are nearly twice as large as they would be if you used this waste heat. Don't waste it; stop it before it reaches the chimney with a New Era Radiator. This simple device is a scientific combination of drums and flues compactly arranged to take the place of a section of stove pipe. It intercepts the intense heat which always passes up the centre of a pipe or chimney without injury to the draft. The current of hot air is caused to flow naturally and uniformly over an immense radiating surface, and a large proportion of the heat radiated into the room. The cold air from the floor also passes through the inner tubes and is heated. This quickly changes the coldest air in the room to the hottest, and equalizes the temperature, making a pleasant and healthy circulation. Thousands who are using them will attest this truth. No person who studies economy and comfort can afford to be without one or more in the house." The various ways in which the Radiator can be used is thus described: On a stove pipe in the same room with the stove by actual test it saves nearly half the fuel or heats twice the space. Placed on a pipe running through from below it saves the waste heat that is escaping through the smoke pipe and comfortably warms an upper room at no expense or trouble. Placed in an out-of-the-way corner of a hall the whole temperature of the house is changed, and much less fuel is required to run the furnace. An additional radiator can also be used upstairs with good results. It is adapted for any fuel except soft coal. It saves 700 to 1000 pounds of coal out of every ton. It is as easy to clean or repair as a stove pipe. It has no horizontal obstructions to catch soot. It does not leak gas. It saves the heat but does not obstruct the draft.

The company announce that this year they intend to make the same Radiator without the inner tubes, for soft coal.

Yale & Towne Announcement.

The Yale & Towne Mfg. Co. make the following announcement: The recent advances in cost of new materials, amounting in some cases to more than 25 per cent., necessitates a revision of the prices of our Branford products, pending which we hereby withdraw all former quotations, including those in the 1895 price book of our Branford Lock Works department, just issued. Our revised prices will be furnished to you with as little delay as possible, and in the meantime any orders with which you may favor us will have our best attention and will be invoiced at the lowest rates ruling on the date when such order is received by us.

Respectfully

THE YALE & TOWNE MFG. CO.

Stamford, Conn., August 19, 1895.

Review of the Markets.

Money: Call money is quoted at 1 per cent., while time money can be had at 1½ to 2 per cent. as to length of loan. Commercial paper is quoted as follows: Prime endorsed bills receivable at 3@3½ per cent. and choice single-name paper at 4@4½ per cent. The exports of general merchandise from the port of New York for this week were valued at $5,223,765, against $6,111,882 last week. The official crop reports indicate a fine yield of corn, though the wheat and cotton crops are not so good. The advances in both price and wages continue, and altogether the outlook for the autumn trade is very encouraging.

Hardware: A cheerful feeling prevails in Hardware circles. Prices are firmly maintained, and advances are still being made, and it is hard to predict just where this movement will stop. Orders for later fall trade are many and large in size, which indicates that dealers are beginning to have confidence in the promises of a good autumn business. Builders' Hardware is in healthy demand. The principal advances announced are Barb Wire, Nuts, Bolts, etc.

Linseed Oil: The following are the figures at which Linseed Oil is quoted: Raw, 50 cents per gallon; boiled, 53 cents per gallon, and Calcutta raw, 55 cents per gallon.

White Lead, Red Lead and Litharge: The following quotations are subject to change without notice: White Lead, dry or in oil, Red Lead and Litharge in kegs:—In lots of less than 500 pounds, 6 cents net; in lots of 500 pounds and over, 5½ cents.

Zinc: Values for the present are 4@4½ cents, as to quality and quantity, for jobbing parcels.

Putty: The market remains steady at $1.45@$2.25, as to quantity, package and place of delivery.

Nuts and Bolts: At a largely attended meeting of the Nut and Bolt manufacturers, held at Niagara Falls on August 7th and 8th, prices were advanced on Square and Hexagon Nuts, Machine and Carriage Bolts, Coach Screws, etc. The following are the prices in force:

	Cents off.
H. P. Square Nuts, Manufacturers' sizes	5 to 6
" " " U. S. Standard	5 1-10 to 6 1-10
" Hexagon Nuts, Manufacturers' sizes	5 6-10 to 6 6-10

Skein Screws	" " 75 and 17½

Wire Nails: The Wire Nail Manufacturers' Association held a meeting in Pittsburg on August 20th, and it was decided to make no advance in the prices for September. The prices that have ruled during August will be in force for September delivery. The figures are as follows: Carload lots or mixed cars, $2.05 per keg, base, f.o.b., Pittsburg. On direct shipments on contracts in less than car lots of 24,000 pounds of Nails an extra 5 cents per 100 pounds will be charged. To jobbers taking from one mill within one calendar month 1000 kegs and over 5 cents per keg rebate will be made. The New York price for carload lots of Wire Nails on dock is $2.20; small lots from store are fetching $2.30.

Cut Nails: There is no change in the condition of the Cut Nail market. The prices are as follows: Carload lots or over, $1.80, base, Pittsburg; less than carload lots, $1.85, base, Pittsburg. To jobbers taking from one mill within one calendar month 500 kegs or over 2½ cents rebate per keg is allowed, and on 1000 kegs 5 cents per keg rebate is made. For half kegs 10 cents extra will be charged. New York quotations are as follows: Carload lots on dock, $1.95; small lots on dock, $2.06; small lots out of store $2.10.

The prices quoted below are for small lots. Round lots, except Tobin Bronze, can be purchased at lower prices:

Clapp & Co., bankers and brokers, New York, in their weekly market letter say: "When rivulets are full, the rivers are swollen to unusual proportions. When farmers and planters have plenty, merchants, manufacturers and employees each get their share. The railways are the servants of adverse circumstances, and the masters of themselves only when worked to full capacity. The sunlight kisses a prosperous country that is rejoicing in plentiful harvests, fair wages and moderate prices. Straws: The United States expends $150,000,000 yearly for imported sugar and sells twice that amount of raw cotton. In 1894 the consumption of pig iron was about 6,600,000 tons; this season it will be about 9,000,000 tons. The iron that cost three to five years ago about $12 in Pennsylvania and $9 in Alabama to manufacture, now costs $9 and $6 respectively, and is sold nearly as high as in 1892. Since the recent great advance or doubling of prices of nails and various kinds of iron, the demand has slackened. New locomotives are being constructed to run 150 miles an hour. There are 976 street railways, covering 110,000 miles, that have a funded debt of about $100,000,000, have yearly earnings estimated at 125 to $140,000,000, netting about 18 to $20,000,000 annually. The world's production of coal in 1894 is estimated at about 554,000,000 tons. The United Kingdom yearly produces about the same amount, and mines the most. The United States stands second, and annually gains from 7 to 10 per cent. Large imports, diminished exports, a monthly deficiency and excessive rates of exchange, tend to force the government to continue to lean on the bond syndicate."

THE BIRMINGHAM TRADE.

Prices are firm, and in many lines advancing, most notable of which are Barbed Wire and Screws. It seems that Barbed Wire manufacturers have finally reached a satisfactory basis of operation. The great success of the Nail men so far, has led others to imitate them and doubtless we have not seen the end yet, either of combinations or advances in prices. There is an element of danger when prices are fixed by combinations of individuals instead of the great law of supply and demand. The individuals make haste to be rich and sometimes advance prices too rapidily and in the end spoils the effect which they seek to produce. It is true they have their way temporarily, but when the profit becomes great others enter into the field of competition and even members of associations are greatly tempted to divide the commission and thus destroy the effect, and in the end they must use some of the money made in the early advances in crushing out the new competitor.

Crop prospects are good; August business holds holds up well and in this particular locality we do not feel the periodical dullness which is expected at this season of the year. Builders' Hardware is in better demand which we take as a good omen and an evidence that people are beginning to

Great Western Files.

Important Announcement.

The Plant of the Great Western File Co., at Beaver Falls, Pa., formerly known as the Western File Works, is now operated and controlled by the

Nicholson File Co.,

Providence, R. I.,

who already own and operate three distinct plants in Rhode Island. Since obtaining control of this property important changes have been made in the arrangement of buildings. Numerous machines added of the latest and most modern type, so that the Plant in its entirety is now, with the exception of the Nicholson, at Providence, the largest and best equipped file works in the world. The product will be strictly first quality and known as the Great Western Brand.

Main Office and Address :

Nicholson File Co.,
Providence, R. I., U. S. A.

Operating four distinct plants :

Nicholson--- Providence, R. I.
R. I.--- Providence, R. I.
Great Western--- Beaver Falls, Pa.

build and that better times are here to stay. The only difficulty we see in the way of continued prosperity is the termination of the contract with the syndicate will soon end and if gold should begin to go out it will produce a bad effect. We hope, however, that the exports of the agricultural products will more than counterbalance any bad effect of this kind. We will have to wait and see. In the meantime this will tend to make people act with more caution and not be led into heavy speculations.

MOORE & HANDLEY HARDWARE CO.

THE DAVENPORT TRADE.

The Phœnix Bridge Co. were the lowest bidders on the new double track government bridge to be built here, and will doubtless be awarded the contract.

A recent letter from Swansea, England, states that prices of tin and terne plates have stiffened there, and it may be that American tin plates will soon advance in sympathy.

A telegram just received announces an advance in screws. Axe makers have withdrawn all quotations and personal advices state that new purchases could not be made for less than a half a dollar per box advance, and possibly a dollar would be nearer the figure that would now be demanded. Rope and lath yarn have gone up another half cent; carriage and machine bolts, plain wire, wrought iron goods have ascended one more notch. The price of barb wire is expected any moment to make a bound clear over the moon, eclipsing the recent high jumps of the wire nail athletes.

Farmers are more than pleased with their harvest. The yield of one field of wheat within five miles of this city was sixty bushels per acre.

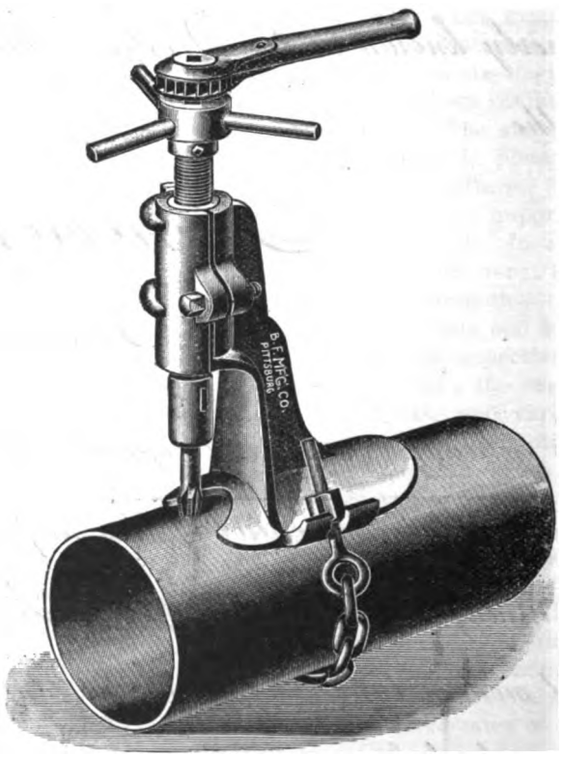
Trade continues very good, with collections only fair.

SICKELS, PRESTON & NUTTING CO.

THE GRAPHITE TRADE.

Vice-President Walker has returned from his vacation trip through England and Scotland. His corps of able assistants have finished their summer outings and business booms.

The marked increase in Crucible orders gives evidences of activity in the great industries of the country—steel, brass and copper. Pencil sales follow a close second with encouraging orders from wholesale stationers and Hardware houses. Graphite Lubricants and Cycle Chain Graphite come in third, followed by Graphite Paint, polish and sundries, and buyers are actually impatient for prompt deliveries. All augurs well for the fall trade, and orders are largely distributed. We have just received an edition of a handssme show card, which has been several months in preparation, intended to illustrate the productions and properties of the company, and which will be distributed appropriately framed, entailing an expense which would have been hesitated at a year ago. Some concessions have been made to slow payers, but as a rule collections are very satisfactory.



JOSEPH DIXON CRUCIBLE COMPANY.

Fire in the Plant of the Central Stamping Co.

The works of the Central Stamping Co., Newark, N. J., covering almost an acre of ground, were wiped out by fire on Sunday, August 11th, the total loss being in the neighborhood of half a million dollars. The factory occupied most of the block bounded by Liberty, East Fair and Green Streets and Railroad Avenue, Newark, and was considered one of the most extensive and modern of its kind in the country. It consisted of a collection of buildings ranging from two to five stories in height. The flames started in the main structure, which had a frontage of 60 feet on Liberty Street, and extended through the entire block. At 2 P.M. the first blaze was discovered in the blacksmith shop, from whence it spread with great fury to the other parts of the factory in spite of the heroic efforts of the firemen. Extensive improvements had recently been made, a costly electrical power plant being one of them. A large quantity of finished and raw material was also consumed. All that remained of the huge plant when the fire was finally extinguished, was the front wall on Liberty Street and the lower floor of one of the new buildings. The damage to this portion and its contents was that caused by water. The works had been running at full blast for several months past, and at the time of the fire 487 hands were employed. The insurance policies held by the company will amount to about $300,000. The origin of the fire is not known, but the officials of the company do not suspect incendiarism. The company will endeavor to fill all orders through its Brooklyn factory, which is running on full time.

Rapid Pipe Tapping Machine.

The article here shown is the Rapid Pipe Tapping Machine, being successfully placed upon the market by the Bailey-Farrell Mfg. Co., Nos. 619 and 621 Smithfield Street, Pittsburg, Pa. It is described as a simple, effective and

strongly built machine, "by means of which any workman of ordinary intelligence can rapidly make service connection to any water or gas main without turning off the pressure or interfering with the customers' supply of water or gas." It is thus described: "Is made of steel and aluminum bronze, combining great strength with reduced weight. Its parts are substantial, and fifty per cent. less in number than any other machine. It can be operated in any position, drills, taps and inserts the ferrule without moving the machine from the pipe." Price of machine fitted for ½, ⅝, ¾ and 1 inch connections, $100. Liberal discount to the trade.

Arrangements are being made for a Hardware association in Minnesota, and a call for a convention of the retailers of that state, will soon be issued. It will probably be held in St. Paul, in January next.

For Sale.

FOR SALE—In one of the best manufacturing towns in Ohio, a stock of Shelf and Builders Hardware, Paints, Oils, and Agricultural Implements; stock will invoice $17,000 to $19,000; clean and in good shape. Store does a business of $40,000 per annum. Apply to T. B. Rayl Co., Detroit, Mich.

New England Iron and Hardware Ass'cn. Banquet.

Auburndale, Mass., was on Tuesday, August 20th, the scene of the regular monthly banquet of the New England Iron & Hardware Association. At about 10.30 A.M. fully fifty members and guests started in drags from the Exchange Club, Boston, for the scene of the merrymaking, ten miles distant. The drive had the effect of sharpening appetites and full justice was done to the bounteous repast that was provided at Lee's Hotel. At the close of the dinner an address of welcome was delivered by Chairman A. M. Wiley. Charles C. Adams was introduced as toastmaster. The following gentlemen were introduced by Mr. Adams and made short and interesting addresses: Mayor Edwin U. Curtis, of Boston; his private secretary, Courtney Guild; H. C. Bangs, of Congdon, Carpenter Co., Providence, R. I.; Jesse C. Ivy, one of the counsel of the association, and William Chamberlain, of Emery, Waterhouse Co., Portland, Me. The pleasures of the day were fittingly closed by partaking of refreshments at the Boston Athletic Association, where the committee of arrangements, consisting of A. M. Wiley, Charles C. Adams, C. H. Breck and H. C. Dodge, received the congratulations of the party for having provided such an enjoyable entertainment.

The plant of the Fond du Lac Wheelbarrow Co., Fond du Lac, Wis., was recently destroyed by fire. The total loss amounted to $8,000, partly covered by insurance. The works will be rebuilt at once.

The California Stove & Iron Works, San Francisco, Cal., incorporated; capital stock $25,000.

BICYCLE TRADE RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Companies, Stores, Etc.

Amesbury, Mass.—Steps are being taken, looking to the organization of a company to establish a large bicycle factory. A. H. Atwood and prominent Chicago business men are reported interested.

Atlanta, Ga.—W. D. Gash & Co., bicycles, and agents for the Stearns wheels, have recently opened a new store in the City Armory, under the auspices of the Woman's Board of Cotton States Exposition. The riding school was opened during the day for ladies only.

Boston, Mass.—The Morrill Fire Arms Co., Oliver Street, have added a line of bicycles, sporting goods, etc.

Bridgeport, Conn.—The Liberty Bicycle Co., of New Jersey, it is reported, will establish a bicycle factory at Bridgeport.

Brockton, Mass.—Wm. A. Sweetser will add selling and repairing bicycles to his business. Propositions from bicycle manufacturers solicited.

Cairo, Ill. — Dillon Bros., Hardware, opened new store, and will add bicycles.

Columbus, Ind.—Williams Mfg. Co. has been incorporated, with a capital stock of $25,000, to manufacture bicycles. Contract has been let with the Lodge & Davis Machine Tool Co., Cincinnati, Ohio, for complete outfit of bicycle machinery. Erection of factory buildings has been commenced, and it is expected that the plant will go into operation September 1st.

Cortland, N. Y.—The Wesson-Nivison Mfg. Co., recently reported incorporated, have elected W. C. Nivison as president; David Wesson, vice-president and treasurer, and C. C. Goodwin, secretary. The name selected for their wheel is the Loyal, which possesses a number of special features, including a new fastener for the handle-bar, a new tubular hub, and a seat post, doing away with the bolts, and using a hexagon tapered nut, instead of the ordinary clip and bolt.

Eau Claire, Wis.—Herman Schlegelmilch will open a new Hardware store, and is inviting propositions from manufacturers of bicycles, looking to the accepting of agency.

Elkhart, Ind.—The Indiana Buggy Co., reported to be going into the manufacture of bicycles next season.

Farmertown, Conn. — Steps are being taken looking to the establishment of a new bicycle factory.

Indianapolis, Ind.—The rumor is revived that Studebaker Bros., wagon manufacturers of South Bend, will start a bicycle factory, utilizing a former sewing machine factory. This report, however, is not verified.

Jacksonville, Fla.—F. Williams' Son & Co., Hardware, at No. 105 East Bay Street, are taking up bicycles, handling the Niagara.

Louisville, Ky. — M. T. Callahan has opened a bicycle livery in the Macauley Building, and is negotiating for the Louisville agency of a high grade wheel.

New Berne, N. C.—Freeman S. Manwell, machinist and plumber, has commenced a bicycle repairing business. Will entertain propositions from bicycle manufacturers, looking to accepting agency.

New York, N. Y.—Parkhurst & Wilkinson, of Chicago, have established an Eastern branch at No. 95 Reade Street, with J. I. Brandenburg as resident manager. This firm is headquarters for fine goods of all descriptions that enter into the construction of bicycles. They are the sole United States agents for the Sager saddle.

Norwich, Conn.—Negotiations are pending with parties interested in a Boston bicycle company, organized two years ago, looking to the purchase of factory building, and the establishment of a bicycle manufacturing plant.

Passaic, N. J.—The Worcester Cycle Mfg. Co. has been incorporated by Francis H. Mollenhauer, George D. Patton, J. J. Bowers, Charles T. Boyd and others, to manufacture bicycles. Capital stock, $30,000.

Portland, Me.—The Puritan Cycle Mfg. Co. has been incorporated, with Carl Blazer as president, G. E. Saenlen as treasurer, both of Portland, Me., to manufacture bicycles. Capital stock, $10,000.

Portland, Me.—J. M. Linscott Cycle Co. has been incorporated by J. M. Linscott, of Chelsea, Mass.; S. D. Smith, of Boston, and others, to manufacture bicycles. Capital stock, $50,000.

San Francisco, Cal. — Bicycle Railway Construction Co., reported incorporated.

Thompsonville, Mass.—The Enfield Cycle Co. has been organized to manufacture and place on the market the Enfield, a wooden frame bicycle, weighing twenty-two pounds, invented by Sydney A. Grant, who is the inventor of the League Chainless Bicycle.

Veedersburg, Ind.—McAlister & Warren, Hardware, bicycles, etc., commenced business.

Woodstock, Ill.—The Illinois Watch Case Co. have decided to commence the manufacture of bicycles and have given the contract for factory building, to be completed by July 15. The works will employ 150 operatives.

Worcester, Mass.—The Decker Cycle Co. has been organized to manufacture a high grade bicycle, invented by W. L. Decker. The wheel is to retail at $125.

Changes and Removals.

Auburn, Cal. — J. L. Smith, sporting goods, reported to have sold out business.

Brooklyn, N. Y.—Park Slope Cycle Co., not incorporated, reported dissolved partnership, Henry C. A. Gibbs continues.

Canon City, Colo.—Merrick & Avery, bicycles, dissolution of copartnership reported.

Chicago, Ill.—Chicago Tire & Spring Co. deny the reported sale of their plant to the Latrobe Steel Co.

Memphis, Tenn.—Whitehead & Ferbush, bicycles, has been succeeded by W. H. Whitehead.

New York, N. Y.—The Premier Cycle Mfg. Co. is preparing to remove to Bridgeport, Conn., where factory buildings have been purchased, and where a plant will be put in for the manufacture of Helical Tube Premier bicycles, estimating their next years capacity at 18,000.

North Adams, Mass.—Berkshire Cycle Co. works have been sold by H. E. Blake to C. B. Hubbard, who will resign a position with the Fitchburg R. R. to push the business.

New Goods and Improvements.

Bristol, Conn.—The Horton Mfg. Co., manufacturers of sportsmens' supplies has commenced the erection of an additional building, which will be larger than the present plant.

Cleveland, Ohio.—The Western Bicycle Co., manufacturers of the Winton bicycle, are making preparations looking to the enlargement of their factory building to twice its present size, and put in an equipment of the most modern machinery. Their present building is three stories high, is 150 feet deep, and has a frontage of 400 feet.

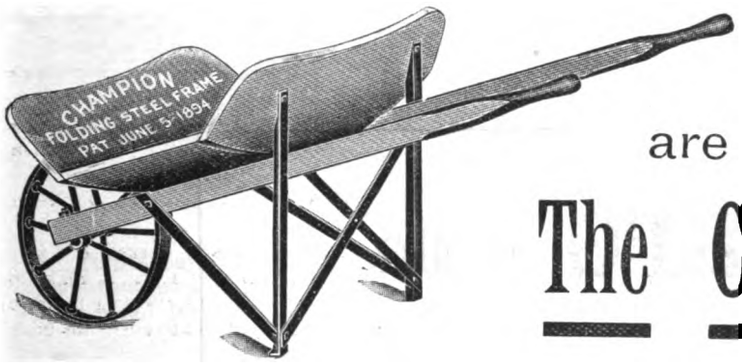
Grand Rapids, Mich.—W. S. Burnes, of Wykes & Burnes, has commenced the manufacture of an improved automatic bicycle seat, composed of a carrying bar that crosses the regular saddle bar, to which it is attached at right angles. It is reported that he is endeavoring to organize a company to manufacture his invention on an extensive scale.

Hartford, Conn.—The Woodruff Mfg. Co., manufacturers of machinery for making bicycle chain, have enlarged their plant and added to its equipment.

New York, N. Y.—William E. Guard, No. 30 Park Place, is putting on the market a detachable crank for bicycles, invented by himself. Negotiations are reported pending with bicycle manufacturers, looking to the use of this crank on machines for 1896.

Willimantic, Conn.—Charles H. Barrows is reported to be interested in the organization of a company for the purpose of manufacturing and putting on the market an improved electrical tricycle, invented by Mr. Barrows, the guiding device of which is similar to that of an ordinary bicycle. The frame of the tricycle is of the bicycle style, and the wheels are constructed with two rubber tired rims, between which is what corresponds with the sprocket in the bicycle. An electric motor is carried in the box cover and is connected with it by a sprocket chain. The power is stored in a battery between two rear wheels, and is carried to the motors between flexible wires. A seat, capable of carrying from one to three persons, is over the small rubber or pneumatic wheels.

Westborough, Mass.—The Humber Bicycle Co. contemplate enlarging their factory and will double their capacity.



Worcester, Mass. — The Bloomingdale Cycle Mfg. Co. will erect a new two-story bicycle factory building, and equip it with the latest machinery.

Recent Fires.

Minerva, Ohio.—William Fass, bicycles, stock destroyed by fire.

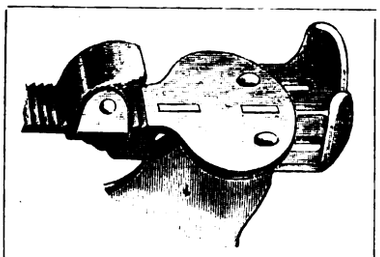
PECK & SNYDER'S NEW AMERICAN CLUB SKATE.



Peck & Snyder's NEW AMERICAN CLUB SKATE for 1895 has revolutionized the art of skate making. New American Club represents an entirely new heel clamp that will fit any heel instantaneously. The old method of clamping to the heel is entirely done away with. It cannot slip, is stronger, acts instantaneously, no screwing or adjusting necessary, saves time, and is without question the most perfect heel clamp ever invented.

MADE IN FIVE GRADES.

Peck & Snyder's New American Club Skate is the most perfect skate ever constructed. It has simplicity of adjustment, solid foot plates, solid heel clamps, and will fit any heel.

The Clasps Cannot Slip. Sure Grip. Thumb Screws and Sets entirely disregarded. It is Light, Handsome, and Twice as Strong as the old club skate.

HERE'S THE NEW CLAMP.

Ask your jobber to show you samples of the **"New American Club."** If he doesn't carry them, send direct to us for samples and prices. Handsomely illustrated catalogue of this skate mailed on application. Address

Just What Every Manufacturer Wants!

The Reference Book

OF THE

Hardware and Kindred Trades of the United States and Canada.

THE Book contains, in the most condensed and convenient form possible, the Names and Ratings of all firms in the following Trades in the United States and Canada:

Hardware Dealers.
Dealers in Sporting Goods, Bicycles, Firearms, &c.
Agricultural Implement Dealers.
Stove Dealers.

Sent (Postpaid) on Receipt of

TWO DOLLARS.

CERTAIN marks are printed after each name, showing the line or lines of goods handled.

The work is complete, condensed and convenient, and will be found especially desirable in sending circulars, on account of the street numbers. The ratings enable the user to select names of any specified rating or over that may be desired.

In cities the lists are classified—Hardware dealers all in one condensed list, Stove dealers in another, etc. In most cases, in the Hardware list, are specified the special kind of Hardware handled, as Shelf Hardware, Cutlery, etc.

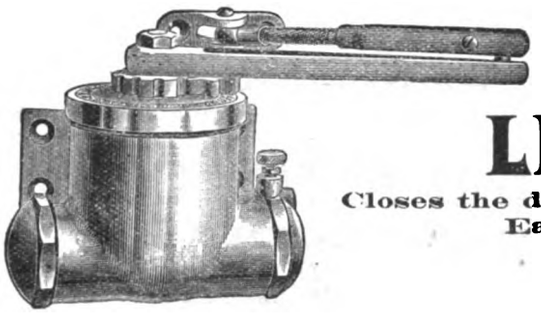
BEST AND CHEAPEST
STONE WATER FILTER
ON THE MARKET.
Tripoli Stone Block System.

Set up ready for use. There are two crocks, each of four gallons capacity—an upper one holding the Filter Block, and the lower one, which can be used as a water cooler if desired. This Block is four inches in diameter by the same in height, and is hollowed out on inside. This fits on a metal tube, which fastens by means of a nut to bottom of Filter Jar. Block can be lifted off tube, cleaned and replaced in two minutes, and with no trouble at all. Water passes from outside of block, through the walls, into the hollow chamber, and from thence, by the means of the Drip Tube, into the lower receptacle.



The Finest Piece of Salt Glazed Stoneware Ever Offered the Public.

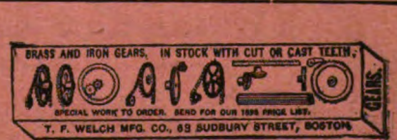
STANLEY'S PATENT

Roofing Bracket.

STANLEY

Rule & Level Co.
New Britain, Conn.



SOLD BY ALL HARDWARE DEALERS.

The parts are of Spring Steel, firmly riveted together. Push the beveled ends up under two layers of shingles, already nailed down; the Bracket has two separate bearings on the roof, and is so formed that any increase of pressure from above, increases its stability.

One dozen per minute can be placed in position, or removed; and great economy in lumber and nails will be found. There are no loose parts to get lost; and no nail-holes are made in the roof. In constant use these Brackets will last a life-time.

No. 1. Roofing Brackets, 8 inch, ½ dozen in box. Per Doz., $3.00

FOR TIGHT FASTENINGS of anything to stone or brick, try

HARDWARE

HARDWARE EXCLUSIVELY.

A Review of the American Hardware Market.

Published Fortnightly by the HARDWARE PUBLISHING COMPANY, No. 143 Chambers St., New York.

VOL. XI. No. 11. New York, September 10, 1895. $1.00 A YEAR.

MAGNOLIA METAL
IN USE BY
EIGHT LEADING GOVERNMENTS.

Magnolia Metal Co.,
OWNERS AND SOLE MANUFACTURERS,
74 Cortlandt Street, New York.

CORNELL UNIVERSITY.
ITHACA, N. Y., August 10, 1895.

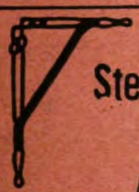
To whom it may concern: I would respectfully state that I have used Magnolia Metal with satisfaction for bearings where other metals have given a great deal of trouble. I have employed the metal in crank-pin boxes on the Experimental Engine at Sibley College, and in the bearings of water wheels which were under considerable pressure.

We have made some tests to determine accurately the friction reducing qualities and durability of this metal. On account of an accident to our machine these tests are not all completed, and a full report cannot be given at the present time.

Sufficient has been done, however, to indicate the superior quality in every respect. I may say that I fully believe the metal has most excellent quality in every respect for the purposes and uses claimed. I am sir, truly yours, R. C. CARPENTER.

(Professor of Experimental Engineering, Sibley College, Cornell University, Member Society Mechanical Engineers, &c., &c., &c.)

Improved Cartridges for Accuracy and Cleanliness.



HAVING SELF-LUBRICATING BULLETS.

.32 S. & W., .38 S. & W., and .44 S. & W. Russian Model,
Under S. & W. Patents, Nov. 18, '90; Jun 13, '93.

Bullets are perforated to permit flow of lubricant when fired. A larger number of shots can be fired and greater accuracy maintained without cleaning the arm, than with the ordinary style of lubricant. Orders for these cartridges should specify "self lubricating."

NOTICE.
GENTLEMEN:—On and after March 1st, the business heretofore conducted by me will be continued by a Company, to be known as
The Estey Wire Works Company.
Thanking you for favors received in the past, I bespeak a continuance of your patronage under the new organization and trust that the same pleasant relations existing between us may be continued.
Yours truly,
W. S. ESTEY.

As above announced we have succeeded to the business of W. S. ESTEY, and trust that we will merit a continuance of your valued orders as heretofore extended to Mr. W. S. Estey.
Yours truly,
ESTEY WIRE WORKS COMPANY

ORANGE SPORTING POWDER, MANUFACTURED BY LAFLIN & RAND POWDER CO.

ORANGE RIFLE EXTRA, ORANGE SPECIAL, ORANGE DUCKING, ORANGE LIGHTNING.

The attention of TRAP AND FIELD SHOOTERS, RIFLEMEN AND DEALERS IN GUNPOWDER, is called to the new ORANGE SPORTING POWDER, patented April 17th, 1888, and branded ORANGE RIFLE EXTRA.

This Powder is quick and strong, and burns with such perfect combustion that the only residum left in the barrel after shooting is a dark oily substance easily removed While this Powder is not exactly SMOKELESS, it gives only a light bluish smoke, which is almost instantly dissipated; and interferes but little with the shooting of the second barrel, taking the place of the so-called smokeless powders in this respect.

This brand of powder sells at the same price as any other brand of Rifle Powder and is superior to any made. No person who shoots can afford not to give it a trial, as after once trying it he will never use any other Powder when he can obtain the ORANGE EXTRA. Weight and quality guaranteed.

MILITARY, MINING AND BLASTING POWDER.

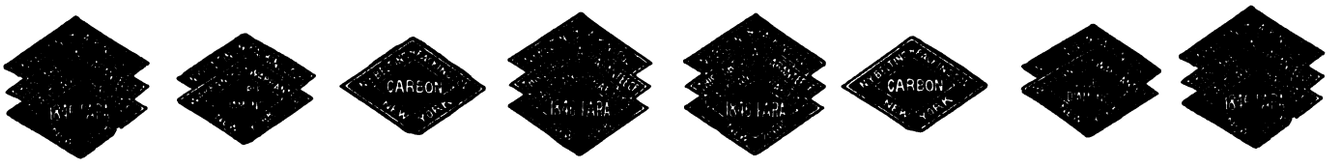
PLACE THE MATTER CLEARLY.

To make a man realize an idea as you realize it, is what is necessary to make him understand his needs. Advertisements should aim to place a matter so clearly before the public that they see it as clearly as the advertiser does.

Digitized by Google

IT TAKES A PULL



to separate the plies of our rubber belting. A yoke of oxen can do it, but hard service won't, so strong is the friction. Our belting is uniform in width and thickness, consequently more of its surface comes in contact with a pulley. That means

NO WASTE OF POWER.

Rubber belting is never injured by water, hence it is best for out-door use, for wet localities, and for mills where the atmosphere is surcharged with moisture or steam, as in paper mills, tanneries, etc. Buy the durable kind, branded 1846-Para, Double Diamond or Carbon, made for 50 years by the

The PUTNAM Hot-Forged and Hammer-Pointed Horse NAILS

Are made in Sizes and Styles as below:

TURF NAILS, Nos. 1 to 5.

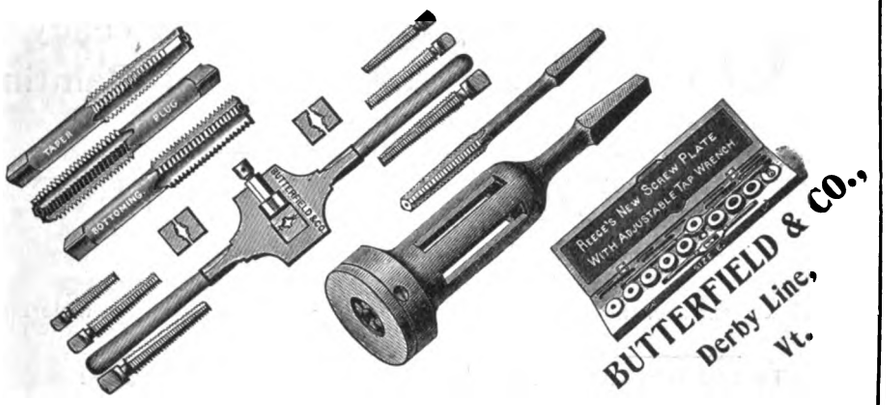
FRENCH HEADS, for punched shoes without creases, Nos. 3 to 7.

REGULAR HEADS, Nos. 5 to 14.

CITY HEADS, for shallow creased shoes, Nos. 5 to 9.

COUNTER HEADS, or FROST NAILS, Nos. 5 to 9.

Prices of these styles are the same as for Regular Heads of the same size.



The **only** Horseshoe nails in the world made precisely the same as the old-fashioned, hand process, being exclusively **Hot Forged and Hammer-Pointed.** This **hammering** (not pressing, rolling or shearing) while the metal is at welding heat blends all the particles into a compact, firm nail that outwears all others and will **Never Split, Sliver or Break.** *They are not sheared but have smooth edges clear to the point.*

The attempts of other manufacturers, in their advertising, to identify their product with the Putnam Nail leads us to state that the PUTNAM NAIL is made SOLELY by us in the ONLY RATIONAL WAY a GOOD horsenail can be produced.

Nickel-plated Mascot Ring for 10 Cents in Stamps or Silver.

BLACKBOARDS

Are now ready for Painting,

AND THERE IS BUT ONE ARTICLE WITH WHICH TO PRODUCE A SATISFACTORY RESULT, AND THAT IS

THE LAWRENCE BLACKBOARD SLATING.

This slating will not glaze, scale or blister when properly applied. The great fault with other liquid slatings is that they produce either too smooth or too rough a surface. **The Lawrence Slating** avoids both faults and produces a slightly rough yet black surface, that can easily be written on, which takes up but little chalk, and from which erasures are easily made.

CIRCULARS AND PRICE LISTS ON APPLICATION TO THE MANUFACTURERS.

For Manufacturers of Light Hardware.

BLAKE & JOHNSON,

WATERBURY, CONN.

American Lead Pencil Co., 429 Broome Street, New York. 110 Cheapside, London, England.

113. "CARBON" PENCIL.

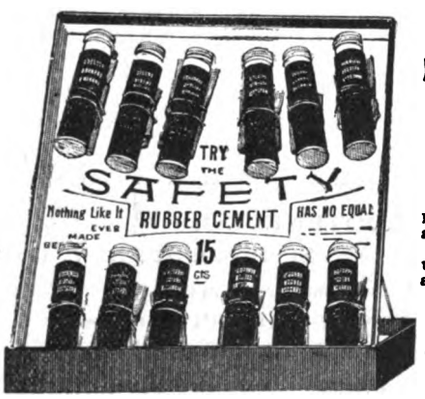
TO obviate that tired feeling and dull pain in the fingers, which invariably accompany the use of the ordinary black lead pencil whenever too much pressure is brought to bear or it is used any length of time, and at the same time to produce an article that is very smooth, very black and very firm, thus adapting it for all kinds of work where a fine, smooth, black and legible mark is required, this pencil cannot be too highly commended. For writing on soft paper it surpasses anything heretofore produced; and for sketching, draughting and heavy shading it is indispensable.

Dozen mailed on receipt of 50 cents. Samples, Catalogue, Information upon Application. Address

American Lead Pencil Co., 429 Broome Street, New York.

The AMERICAN WICK is made on scientific principles. The gum inherent in the natural cotton is taken out, and no expense is spared to produce a wick that will give THE GREATEST ILLUMINATION.

THE



AMERICAN WICK

Made by the

WICK DEPARTMENT

Of the STANDARD OIL CO. of NEW YORK.

Oil drawn up through the AMERICAN WICK burns with a large, clear, white light and the flame does not drop off in size as it does when a poor wick is used. When the cotton is clogged with its natural dust and gum the full illuminating power of the oil is not obtained and the complaint is heard that the light DROPS.

THE ORIGINAL IS THE BEST.
ROYAL CENTRAL DRAFT LAMP.

This Lamp has no Superior in the known world.

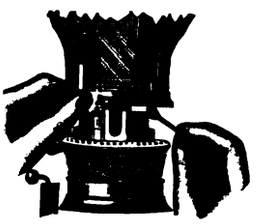
Gives the Largest Light for Wick Exposure of any Lamp made.

ROYAL LAMP.—No. 1013.

Chimney Lift and Wick Raising Device the best and easiest of adjustment. There are many imitations of these improvements, but the **ROYAL** is still the best.

The Royal Chimney. Lift will stay in position while lighting the lamp without support from the hands. This no other lift device will do.

The Wick Raising Device of the Royal Lamp is unquestionably the best, and has the approval of our largest competitors by their practical adoption of it.



The Wick can be adjusted more accurately and more easily than by any other device.

Workmanship, Style and Finish are unsurpassed. Made in all finishes of Stand, Table and Banquet Lamp. No better lamp for the dealer to handle.

The "Alligator Wrenches are forged solid in one piece, with tempered steel jaws They have ratchet teeth *out diagonally* across one jaw, thus enabling them to bite with three teeth at once.
The "Curtis" Wrenches have the diagonally cut teeth of the "Alligator" on both jaws acting in opposite directions. The jaws are connected by swinging bolt and swinging link which gives a quick, sure grip. These Wrenches can be used in contracted space where no other wrench can.

THE ROYAL DOOR CHECK AND SPRING.

The Latest, Cheapest, Best.

Patented, Sept. 11, 1894.

Simple, Compact, Strong, Durable.

The ***Royal*** has a ***compressed air check.*** No liquids to freeze up or leak. Doors open easily. No back suction. Easiest attachment. Does not require a skilled mechanic to put them on. Improved ratchet for increasing tension on spring. Will fit right or left-hand doors.

PRICE LIST:

	BRONZED.
No. 1, for Light Screen Doors	each, $2.40
No. 2, for Medium Inside Doors	" 3 30
No. 3, for Large Inside or Small Store Doors	" 4 30
No. 4, for Large Store or Vestibule Doors	" 5.80
No. 5, for Extra Large Doors	" 7.00

Packed One Dozen in a Case. Write for Trade Discounts

DIRECTIONS.

Place the shoe (S) in an upright position on the door, about six inches from back and flush with the top; *fasten securely;* slide the check into the shoe until the lugs (B) fit solid, then put in the end-screw (D). Bring arm (L) down to the transom-rail till it rests firmly, then put in the screws and the spring is ready for adjustment.

HOW TO ADJUST IT.

The thumb-screw (E) regulates the air check. A very slight turn changes the result. If the door slams, tighten it up. If it checks too soon, loosen it. It should check about three inches from the closing. If the spring is weak, increase the tension by turning up the ratchet-wheel (C) one cog. Care should be taken that the spring is not made too strong. If the spring swings the door easily, it is strong enough. Regulate the closing by the screw (E). In case that the transom-rail has a raised moulding, shorten the arm (R) by changing it into the next hole. Also, in putting the arm on the pintle, see that it is *securely fastened* and *rigid.* The checks are reversible for right or left-hand doors by simply changing the arms from one side of the pintle to the other. Follow the above directions, and the spring will give good satisfaction.

The Sportsmen's Exposition of 1896.

We publish at some length elsewhere, a report of the discussion which occurred at the meeting of the Sportsmen's Association some days since, where the question as to a continuance of the Expositions so successfully inaugurated last year, was under consideration. The gentlemen who so ably and successfully inaugurated and carried out that first great event were present, and each one candidly stated his opinion, and the general decision seemed to be that it would be a great mistake for the manufacturers and sellers of sporting goods, to forego the fine opportunity afforded by these expositions, for the display and illustration of their goods. The opinion was quite emphatically expressed that in direct benefits to exhibitors, the results were not such as to warrant an expensive display; but, on the other hand, it was generally agreed that in indirect benefits, the trade was fully justified in going to the labor and expense which the Exposition involves. This seems to us to have been a wise decision. Certainly there never was any line of manufacture which made a better or more artistic showing in its first attempt, than that seen in the Sportsmen's Exposition at the Madison Square Garden last year. The great majority of exhibitors who were present will be on hand the coming year with larger and more attractive displays; while many who hesitated about taking space in 1895, have already promised to be present in 1896. We have no hesitation in expressing the opinion that the Exposition of the coming year will in all essentials be a great improvement over the one in 1895, and that in one great respect—that of the attendance of the general public—there will be a marked improvement. For the credit and the good of the trade in general, we sincerely hope that there will be no question as to the holding of an Exposition at an early period in 1896.

Uncle Sam and His Neighbors.

There may have been a time when one nation could plod upon its way, with little concern as to what was going on outside its borders, but if so, it passed away before the day of the railroad, the steamship, the telegraph, and the necessity of being first in foreign markets. There can hardly be a move made in any quarter of the globe, that does not have its influence upon interests far remote. It is a wonderful education for any narrow-minded man, to take the daily newspaper for a teacher, and study the changing panorama of events going on in the world at large. The overshadowing Asiatic question has by no means been answered by the military humiliation of China. In the higher meaning of statesmanship, it has been only fairly opened; and from henceforth, the great powers of the world will endeavor to keep both China and Japan within bounds,—with especial reference to the preservation and extension of European trade.

The partition of Turkey, and the expulsion of the Turk from Europe, are but a natural consequence of the history that has been made in the last half century; the main question being whether England, Russia, France and Germany can so divide up the effects of the Sick Man as to warrant them in working together for his banishment across to Asia. Spain is straining her credit and resources to the utmost, to retain Cuba in subjection; Russia and England are warily watching each other across the borders of India; all the great nations are clamoring for a larger slice of Africa than has yet fallen to their share; the republics of Central America are agitating the question of a federation among themselves,—and a general Latin-American combination for trade purposes may be the eventual outcome.

There are wars and rumors of wars. The wars are confined to small contests, now that Chinaman and Jap have put up their swords, and are discussing the question of dollars; the rumors are large enough, but nations, like men, are in little danger of blows while talking about them. Crops, finances, reforms, emigrations, are as ever the subject of discussion the world over: the prophets of evil are still declaring, also as ever, that things generally are on the road to eternal smash.

In all this international hubbub, the American nation seems to be quietly holding its own; and if any one is getting his share in the gifts and favors of fortune, that individual is Uncle Sam. He is in good health at home; he takes second place to nobody abroad. His farms are doing well this year; his factories are humming; his stores are having all they can do; his finances are in good shape; his law makers are happily at home, and not engaged in law-making; he is attending

Digitized by Google

to business just now, rather than diplomacy abroad, or politics at home. All this ought to keep him from grumbling or envy, and give him a fit mind for true thanksgiving and gratitude.

The talk about the political influence of the bicycle clubs is probably largely uncalled for. But the personal influence of the wheelmen will certainly be felt in many quarters for good roads; and perhaps that influence may reach into politics so far as this one great public question is concerned.

The File Works Resume.

The Great Western File Works plant, in this place, resumed operations Monday in full in all departments, giving employment to about 350 men, women and boys. The greater part of the employees worked in the factory when it closed down three years ago and are thoroughly conversant with all parts of the business, and only a few of them are new men. When the whistle blew this morning, which placed the plant in operation again, it appeared like a great family reunion inside the factory. Many of the former employees had left town, but returned on learning that the plant was to resume. Numerous repairs have been made both inside and outside the factory during the past three weeks, which not only makes it much more pleasant for the workmen, but also greatly facilitates the work. The company has plenty of orders, and the factory will undoubtedly run steadily.—*New Brighton, Pa., News.*

A Pennsylvanian has recently invented a new lawn mower. The knives are driven by crank and pitman connection with the ground wheels, the driving mechanism being located entirely within the outer face of the frame, and there being no projections to collect the cut grass. The axle carrying the ground wheels is journaled in depressions of the side or cheek pieces of the frame, the wheels being cupped on their outer faces. The wheels are loosely mounted and ratchet wheels on the axle adjacent to the hubs are adapted for engagement by a dog on each wheel, the dogs turning the axle when the mower is pushed ahead and slipping over the ratchets when the mower is drawn backward, the cutting mechanism being then inoperative. In each of the side pieces is a horizontal depression or well having near its centre an opening. The shaft of the cutter is journaled in the inner walls of the wells, and on the shaft are spiders which carry the spiral cutting knives, extending from the inner face of one side piece to the inner face of the other side piece, the knives being thus protected from obstacles at the sides of the machine and adapted to cut a swath of nearly its full width.

A new electrolytic method, of great use to plumbers, is the joining of metal to earthenware. The earthenware should have an unglazed surface, but if otherwise the glaze is removed and the surface is coated with plumbago and placed in an electrolytic bath, thus obtaining a metallic coating. To this coating the lead pipe can be soldered in the ordinary way by means of a plumber's "wiped" joint. This process, it is said, will probably supersede the use of rubber sleeves, washers and putty, with which imperfect joints have often been associated.

The Hardwaremen of Duluth, Minn., some evenings since gave a farewell banquet at the Hotel St. Louis to Eldert Lott, who has been buyer for the Marshall-Wells Hardware Co., and leaves that concern to become the manager for the Great Western Mfg. Co. at Kansas City. Speeches were made by T. McNaught, Doctor Harris, John Meining, John Munro and Alex. Stevenson. H. S. Eaton presented Mr. Lott on behalf of those who were present with a gold-headed cane.

In Memory of William H. Williams.

The following resolutions in regard to the death of William H. Williams were adopted at a meeting of the directors of the Van Wagoner & Williams Hardware Co., at Cleveland, Ohio, on August 30th:

Whereas, In consequence of the death of William H. Williams, vice-president of the Van Wagoner & Williams Hardware Co. and one of the founders of the business, we, the directors of said company, at a special meeting held at Cleveland, August 30, 1895, desire to add our tribute of respect to his memory and express our sympathy with his family; therefore, be it

Resolved, That we deplore the death of William H. Williams and most heartily express our appreciation of his ability, fine character and attractive manners and also our gratification at the high regard in which he was held by the Hardware trade, his fellow citizens and so large a circle of friends; and be it further

Resolved, That we desire to express to his family the sympathy we feel for them in their sorrow and for the great loss which they have sustained; and therefore be it further

Resolved, That the resolutions be entered upon the records of this company and a copy transmitted to his family and the trade journals.

The following letter carries its own explanation:

PHILADELPHIA, August 17, 1895.

Mr. J. Leonard Varick, Secretary New York Hardware Club.

Dear Sir: Permit me to sympathize with the New York Hardware Club in the loss of their able president, Mr. William H. Williams.

Mr. Williams was well known by all his friends as a man of the highest integrity, of great ability, conscientious and self-sacrificing.

I well remember his kind words to me in Cleveland at the time I was honored with the presidency of the National Hardware Association, when I expressed to him the fear that other duties might prevent my giving that attention that the position would require. His reply was: "Mr. Supplee, there are certain duties we owe to our friends and the trade which we cannot consistently ignore, and I feel that you are placed in that position now."

Permit me, therefore, to sympathize in the name of the National Hardware Association of the United States, of the Philadelphia Hardware Merchants' & Manufacturers' Association, the Supplee Hardware Co. and personally, being quite aware that time alone can overcome the sorrow and regret which must follow the loss of one so prominent, beloved and esteemed a gentleman as was Mr. Williams.

Believe me with kindest regards,

Yours very truly,

WILLIAM W. SUPPLEE.

A dispatch from Salem, Va., states that the Camden Iron Works of that place have been awarded the contract by one of the largest wholesale Hardware houses in the United States for the manufacture of two thousand dozen iron shoe lasts and stands. "This is the largest contract of its kind ever placed by any one concern, and some idea of its extent will be gathered from the fact that in filling it one hundred tons of pig iron will be consumed and several months required to complete the contract. Additional force will be put to work in the foundry and the Camden works will be a very busy place now."

Dr. David T. Day, Chief of the Department of Mines, is busy preparing the statistical column of minerals at the Cotton States and International Exposition. He says of it: "You can see just how much coal is mined in Alabama in a minute, how much granite is quarried in Georgia in the same time. So with the rest of the minerals. I believe it will be better than the column exhibited at Chicago. There the output for one second was shown, here it will be for a minute. The column will be thirty-four feet high."

The Kelley nail mill, Ironton, Ohio, has resumed work. The local chronicler adds the pleasing information that "now everything in Ironton is in operation."

HARDWARE costs only One Dollar a year.

A Hustler From Chicago.

We had a call the other day from a man whose card showed that he was representing one of the very large companies of New York; one owning factories in several States, and doing the largest business in its line in the country, if not in the world. I saw that his headquarters were in Chicago, and something led our talk to the way business was done there, when he announced to me that he had formerly been in trade there in Hardware specialties.

"I started in business there in 1889," he said, "with just $20 in my pocket, and I failed in 1893 for $15,000."

He looked at me after telling this as if he were waiting for applause; but he did not see that he observed that I was interested, so he went on:

"Yes, sir, I had $20 in my pocket when I started for myself. I had been clerking for a firm at $40 per month, but the man who was my friend died and the surviving partner did not like me, so I had to walk. I had just $20. I determined to go into business for myself. I rented part of an office, had some letter-heads, cards and bill-heads struck off, and then I called on the agent of an eastern lock company. I knew him pretty well. I told him that I wanted a nice line of samples, and then he was to imagine that I was the biggest buyer on earth and consequently entitled to the very lowest discount he dared quote. He fixed me out with samples, gave me a big discount, and I started off to interview the retail Hardware trade of Chicago.

"You bet, I didn't talk 3/0 padlocks! Not much! I showed goods with flat, steel keys, and the best price I quoted anyone was 70 off, but to most of them I sold at 60 or 65 off. I took orders that day for $400 worth of locks. I agreed to deliver all the goods at their stores and made arrangements with a local express company to do this for me, letting the carrier collect charges at each store. I supposed my customers would deduct these from the bill when they came to settle, but, do you know, not a single one remembered to do this and I was quite a sum ahead on that.

"I had no trouble in getting samples of other goods and finally I began to carry some stock. Then I had to get a larger office, and finally moved into a good sized storeroom. I was selling lots of goods and doing splendidly when in 1893, one concern got acting mean, a table cutlery concern, and sued me, and then I went under. My debts were $15,000, but that table cutlery factory didn't get one cent of their claim, and they had to pay their lawyer's bill besides."

I looked at him with increased wonder. I was very much interested in the story. I had forgotten how easy it was for anyone to get goods on credit who happened to have a printed business card.

"What were you able to pay?" I asked.

"Well, those that had treated me white I paid, but the others didn't get one cent."

"Then you must have made some money out of the deal!" I said.

"Oh, yes; I made something. I am a hustler, and I'm bound to make things go. I can make business, and I'd have made a big thing out of that if the Yankee concern had let me alone."

"Why didn't you pay their bill, then they would have let you alone?"

"I would have paid them if they had kept still, but they sued me and they didn't get a cent, and what's more, they never will. Those that treated me decent, got their pay."

"Do you mean that you paid them in full?"

"N-o—not exactly; I paid them 35 per cent. of their accounts; they treated me well, so I paid them that; but the others got nothing."

He said this as if he was a model of commercial uprightness and generosity, and his face shone with self approbation. He was the most unique specimen of a salesman and ex-merchant that I had ever seen and I hardly knew whether I should be amused or exasperated at his cheek. But my approval was evidently taken for granted and he continued:

"Yes, sir; I am a hustler. Not many men can start with $20 and in four years fail for $15,000." And he smiled all over his face. "I'm coming around here regularly and hope next time to do some business with you. Well; good bye; I'm pleased to have met you."

He took his departure as smilingly as if he had booked a good order. I turned to a man who had been working near us, and heard the story, asking him what he thought of it. "I don't know what to think of it," he said, "but I guess it is somewhere near true. They can do such things in Chicago, because, as a class, the Chicago merchant has an excellent name. This little Napoleon put on their livery and was given credit on the strength of their reputation. He really thinks he has done something creditable to fail for $15,000! I wonder what opinion he would have had of himself if he had succeeded in business?"

I had no answer to that ready.

Wm. H. Maher

Why Are They So Named?

EDITOR HARDWARE: I was very much pleased with the interest taken in your inquiry, "Why is a Crowbar called a Crowbar?" and submit herewith a few names of articles so common to our trade, and hope some of your readers will answer why these names are applied to the articles:

Spike. Tack. Saw. Brad. Razor. Sledge. Axle.

Also the following inquiries:

When a buyer declared that he "Paid cash right on the *nail*, and thereby *nailed* a great bargain," what kind of a *nail* did he refer to?

What is meant by a Door Nail, and the expression "Dead as a door nail?"

Hoping to create a little interest in the derivation of Hardware terms, I am Yours sincerely,

Davenport, Iowa, September, 1895. J. R. NUTTING.

The Keystone Lock Works, E. T. Fraim, Lancaster, Pa., announce under date of September 2nd, that hereafter the following locks will be known by the number specified only: No. 1304, No. 1333 (old No. 303), No. 303 (old No. 411). They add: "The trade will observe our well-known and exceedingly popular No. 411 will hereafter be known as, and labeled 303, and sold at No. 303 prices. The full size, weight, design and quality will be maintained. All above locks are made of solid real aluminum bronze. Spring shackle. Self-locking. Highly polished. Two keys each. From this date all former prices, discounts and terms on our entire line are withdrawn. Special prices quoted on application."

Alfred Field & Co., No. 93 Chambers Street, New York, make an announcement upon page 45 of this issue that will be of especial interest to all who use or sell guns. A detailed description of their line of Double Barrel Muzzle Loading Guns is there given, and the statement made that illustrated catalogue and prices, or sample, will be sent upon application. Dealers will find that any representation made by Alfred Field & Co. can be implicitly relied upon.

Vincent P. Travers, treasurer of the Travers Bros. Co., with headquarters at No. 107 Duane Street, New York, has been appointed president of the new Cordage Co. now being organized under direction of the court. He has also been appointed general manager for the receiver of the old Cordage Co. Mr. Travers is admirably fitted in all respects for these important positions of trust, and his selection will be hailed as a good omen by all interested

Digitized by Google

Revival Topics from the Buckeye State.

EDITOR HARDWARE: The iron industry, Cleveland's commercial barometer, if not that of the entire country, is steadily picking up. There are now but few plants inoperative, and most are running a full complement. Scores are working night and day, with many months' business ahead and unable to even fill pressing orders. The two years inactivity has depleted even the stocks of staples and the supply seems not equal to the demands by mills, foundries and other manufacturing establishments. Prices are well maintained and encouraging and wages are going up from 5 to 25 per cent. all along the line. Even the smaller manufacturing places, whose usefulness seemed to have been outgrown during the calamity times, have resumed new life and proportions. Only last summer every trunk line freight train running through the State was loaded down with idle workmen, generally characterized as hoboes. You don't see them now. Every skilled workman is being drawn into the tide of reviving activity; in fact there is work for every willing and able-bodied man, or will be if the labor market is not too much crowded. The far West, almost depopulated during the panic-stricken times, is getting its emigrants back as fast as the trains can carry them. Everybody out there is looking up and stirring excepting the crop liar who died an ignominious death.

All of the wholesalers at Cleveland are preparing for an unprecedented autumn trade despite the fact that the giant Competition is stalking about. They are getting in their lines as fast as they can, or as the manufacturer can furnish them. The local wire and wire nail mills, shut down during their busiest season through a strike, are now running night and day in order to retrieve their annual prestige of turning out more product than any two cities in the world. The bolt and nut works, carriage Hardware factories, vapor stove and sewing machine concerns, in all of which branches Cleveland leads, are very busy and behind in orders.

The bicycle industry throughout the State is especially growing, despite certain disadvantages. Cleveland has now several cycle factors, and the plants are steadily adding to their outputs, for the wheel traffic of Ohio is now as consequential as that of any other great State. Toledo and several smaller towns in northern and central Ohio take an important aggregate interest in Ohio bicycle manufacture. Cincinnati, of course, keeps up her corner of the State in truly representative manner. What she can't accomplish in the manufacture she does in the distribution of cycle makes.

Carriage Hardware is one of the most important features of the Ohio market. Cleveland takes the lead in manufacture and is therefore a great distributor. The Ohio consumption alone would self-sustain many of the large concerns, for the carriage and buggy industry of Ohio is very large and comprehensive.

There is a great building revival and engineering improvements are being taken up or completed throughout the State. This condition calls for an improvement in the tool and implement trade, and those departments are actually doing splendidly. Up-to-date architecture calls for large quantities of structural iron and steel, many parts of which, to meet the growing demand, are now carried by large dealers. It seems as if the supply of structural iron does not nearly cover all the demands, for many buildings are delayed on this very account.

Shipbuilding, especially at Cleveland, is extremely active. The two large concerns are filled up with contracts calling for up-to-date craft, and the impetus received by the Hardware trade from this quarter is by no means inconsequential.

The paint industry shows much life and many works are busy indeed. Cleveland, which furnishes more red paint than any other city in the world, is, of course, the world's criterion in this line. When we consider the languid state of the paint branches during '93-'94 it goes without saying that Cleveland's factors are much gratified over the returned activity.

The "new" telephone industry, for such it is since the Bell syndicate is no longer feared, is assuming remarkable dimensions in Ohio. Before another two years almost every hamlet in Ohio will have telephone facilities, and the accessories or appurtenances thereto are of such common demand that they receive Hardwaremen's earnest attention.

Such a big electrical manufacturing centre as Cleveland seems to leave not much room for the Hardwareman's exploitation, and yet there are many staples and novelties which our dealers carry to advantage, especially as regards outward trade. In some of the interior towns one finds at the Hardwareman's electrical goods departments quite often, and as the electrical industry expands with every year so will the scope of the Hardware dealer.

The bad times for the industrial factors in the cities were worse for most of our country dealers, particularly those who expect a certain amount of business in agricultural implements. The farmer catches the calamity fever quicker than his city constituents of iron nerves. Even if his crops are good and he gets his prices he will fight shy of new investments as long as the reports from the cities are not over sanguine. Now it has been said that the May frosts have done millions of damages, but the matter is not half so bad. Not even our cunningly modern farmer can cover up the fertile tracks of nature. His poor cry will hold no longer good, and the country Hardwareman has already found that out. The farmer not only pays his old notes, but invests for additional improvements. While the agricultural situation is not exactly roseate it is well enough to help push along the new tokens of prosperity.

With the healthy private building boom and the varied improvements undertaken by every live municipality the plumbing lines are doing exceptionally well, and this department needs the Hardwareman's best attention, despite the extraneous competition. The modern is getting more and more fastidious when he comes to build a home, and builders of modern apartment houses, well aware of this whimsicality or whatever we may term it, pays zealous attention to the plumbing specifications, and the public propagation of modern hygiene only more stimulates the needs, odds and commodities in this line.

There are many new things extant, creating and to be created, useful and ornamental, profit-bringing and trade-getting, which the country dealer could handle to advantage. The traveling man is doing his best to further all interests in the novelty lines, but time is precious and he can not always do justice to all. Every Hardware dealer reading up on Hardware matters as they happen periodically must be aware of all these new things, providing he reads a journal of HARDWARE'S calibre. To be without such a medium to-day is a crime against one's own best interests. I have heard country dealers remark: "Well, I keep one or two farmers' papers for the use of my customers, and they have 'purty near' all that's going on." Now it is easy to convince all of these people that they have been asleep; that the world did not move within or without the sphere of the farmer's journal. The latter, if good, it is well to keep, but no Hardware man, be he "price-listed" and "catalogued" from all over the territory, can and will get along without a representative Hardware journal, if he once knows it. J. B. RINDFLEISCH.

Cleveland, September, 1895.

The strike at the H. P. nail works, Cleveland, Ohio, which had been in progress ten weeks, has been settled, the wire drawers accepting the advance of 10 and 15 per cent. in wages and the nail makers an advance of 5 per cent. Five hundred men resumed work.

THE SPORTSMEN'S ASSOCIATION.

A special general meeting of the above association, called pursuant to notice, was held at the office of the Winchester Repeating Arms Co., No. 312 Broadway, New York city, on Tuesday, August 27, 1895, at 2:30 P. M. There were present president Charles Tatham, secretary F. S. Webster, treasurer J. A. H. Dressel; J. H. Studer, C. F. Wiebusch, Alfred Chasseaud, W. W. Hart, Chas. Daly, J. Von Lengerke, H. C. Palmer, P. G. Sanford, F. W. Sanger, J. Burnham and Jacob Pentz.

The report of the treasurer was read by J. A. H. Dressel. F. S. Webster moved that the financial report be accepted, and placed on file. This was carried.

Mr. Webster, as secretary, stated that he had no report to make, as the treasurer's financial report covered the secretarial report. The only remark he desired to make was with reference to work entailed by the Exposition. Everyone seemed entirely satisfied with the Exposition; there were something like sixty-nine exhibitors, all of whom had expressed themselves as pleased with the exhibition, and hoped that they would be represented at another Exposition.

The chairman said that the object of the meeting was to receive the financial report of the Exposition, and to take what steps might be necessary towards holding another Exposition, if it was so desired. He would be pleased to hear the opinion of those present. Mr. Dressel moved that another exposition be held in the early part of 1896, as may be decided upon, and that a committee be appointed to fix the date. This was seconded by Mr. Hart.

Mr. Studer thought that it would be advisable to appoint a committee to see what arrangements could be made with exhibitors before deciding upon an Exposition. The chairman ruled that they first decide whether or not they should have an Exposition.

Chas. Daly said that the Exposition was not sufficiently remunerative to exhibitors to justify them in having another.

The chairman stated that his firm had not received back the amount they had expended in the Exposition, and he did not think they had saved anything in advertising. However, their business was different to anyone else's, and if there was to be an Exposition they would go into it.

Commodore Sanford on behalf of the Winchester Repeating Arms Co. said that if there was to be an exhibition his firm would exhibit with a larger space than last year. The chairman asked Mr. Sanford if he was in favor of an Exposition or not, to which Mr. Sanford replied in the affirmative, and that he would go with the rest. The chairman said that an Exposition meant an expenditure of thousands of dollars, and he thought the matter ought not to be gone into without mature consideration. He was of the opinion that the benefit to exhibitors was indirect.

Commodore Sanford did not believe that anyone could see direct results from the show, or say that they had made money by it. The chairman said that it was a question of increasing business. So far as a simple advertisement of a firm is concerned, he believed that it might be a good thing, and if one wanted to increase the interest in one's business it might be of service.

Mr. Webster thought that the chairman had touched upon a very vital point. They were all agreed that no one exhibitor could trace any immediate benefit from the Exposition itself. It had been held for the purpose of increasing the love of sports; that the manufacturers might get together to show what is being done for the benefit of the sportsman, and it was more in that direction than in any other that the Exposition had been held. No one could say but what the World's Fair had enlarged the field of the manufacturer, had spread trade to a certain extent, yet at the present time no manufacturer who was an exhibitor there could trace any direct benefit from that outlay. The Sportsmen's Exposition was started for the purpose of getting exhibitors together, and of keeping up the interest of sportsmen, and when it was looked at from that point of view you could not fail to see its importance. Many of the old exhibitors had expressed their willingness to exhibit again, and he had also received eight or ten letters from other companies, who were also in favor of another Exposition. He did not think the present meeting at all indicative of the feeling of the whole body of exhibitors, as he had not found one of them, but was in favor of another Exposition. Besides these there were at least a dozen others who had expressed a regret that they were not present at the last show.

Mr. Von Lengerke said that there was a general undercurrent of feeling that there should be another Exposition. In looking for data for comparison of the success of the last Exposition, he believed the only comparison that could be made was with the bicycle show. But the Sportsmen's Exposition was different even from that. He then minutely gave his reasons why the public should more heartily support a Sportsmen's Exposition than a bicycle show. The popularity of the latter was largely attributed to the fact that the manufacturers at the show made contracts for machines for the whole season with dealers. Whilst they could not do that with the Sportsmen's Exposition, yet there was so much more interest manifested in the latter that the attendance of the general public was, he believed, five to one over the bicycle show, and he was of the opinion that at the next Exposition this attendance would be even exceeded.

Mr. Sanger thought that the month of May was not altogether a suitable time to hold the Exposition. This year he thought it might be held in March with far greater advantage, so far as attendance was concerned. Mr. Palmer agreed with Mr. Sanger, and thought that the next show would go far towards increasing the public interest in the Exposition. Exhibitors now had a fair idea of what they would require at such a show, and he understood from many that they would have much better exhibits next year.

Mr. Sanger said that he had been informed that from twenty to thirty hunting parties had been made up during the show. His informant had told him that he had just returned from Maine, and the people there had told him that these parties were some of the direct results of the Exposition.

Mr. Palmer stated that he canvassed for the first show, and he had found that many of the most prominent manufacturers had come to him, and said how sorry they were that they could not get ready in time for the show. The former show gave them an illustration of what could be accomplished with plenty of time to prepare their exhibits, and there was no doubt that the last Exposition could be improved upon, and even if the same number of people attended as then did when they knew nothing at all of the nature of the Exposition, their success would be assured. Last year there was no organized press committee, and certainly the Exposition did not receive that support from the daily press that it deserved.

Mr. Chasseaud did not think they could judge of the success of an Exposition by the first. He did not think it had been properly advertised, and he never remembered having seen an exhibition that had ever had such a cold shoulder from the press. He thought that for the next ex-

Digitized by Google

hibition the spaces and bill of expenses would be less and would show much better results. They would be able to rectify any mistakes which were made in the last show.

The chairman thought the motion should now be put to the meeting as to having another Exposition, and asking a committee to fix the date. He thought also it would be necessary to appoint another committee to see the exhibitors. Of course, if the committee who had charge of the matter should find that there were not enough people sufficiently interested to make it a success, they would have to report again to another meeting.

Mr. Studer offered as an amendment that an Exposition be held in March, 1896. Mr. Sanger thought that that would be the best time of the year to hold the meeting, and he could leave the week of the 16th of March open. The chairman asked if it was a question of just that week, and Mr. Sanger replied in the affirmative. Mr. Webster desired to mention that a great number of exhibitors were desirous that the Exposition should remain open longer than a week, and it would be well to get the ideas of exhibitors on that point.

Mr. Dressel thought the motion had better be put in the form he had first suggested that an Exposition be held in the early part of 1896, that a committee be appointed to consider the best thing to do, and report the facts to another meeting. The chairman thought it would be best first to make a motion to hold the Exposition, and have a committee to settle the time and place, and find out what exhibitors would be willing to come in. The committee could report to the trustees, who are the officers of the association, and then they could go ahead and take the necessary steps. The chairman then put to the meeting Mr. Dressel's motion that there be an Exposition in 1896, and it was carried. Mr. Daly voted no.

The chairman then put the motion that the chairman appoint a committee of three to decide the time to hold the Exposition, and to find out the best arrangements that can be made and report to the trustees. This was put to the meeting and carried.

The chairman appointed Mr. Dressel, Mr. Daly and Mr. Chasseaud as the committee.

Mr. Webster pointed out that no time was stated when the committee should report. He thought that a time should be fixed, as many exhibitors were anxious to know if there was to be an exhibition or not. He thought it highly advisable that they should report as expeditiously as possible.

The chairman decided to ask the committee to report by the 17th of September, and he adjourned the meeting until that date.

Yale & Towne on Cases and Cartage.

The Yale & Towne Mfg. Co. make the following statement in regard to "Charges for Cases and Cartage":

Our rule for many years has been to make no charge for cases or cartage in connection with the Yale locks and similar products of our works at Stamford. Since the Branford Lock Works passed into our possession, we have until now adhered to the practice previously obtaining of charging for cases for Branford goods.

Hereafter we will make no charge for cases or cartage on the locks and other Hardware products of either of our works at Stamford or Branford.

Respectfully,

August 28, 1895. THE YALE & TOWNE MFG. CO.

The Western File Works plant, at Beaver, Pa., after ten years of idleness, has been put in full operation again. This means another big supply of files for the calamitist organs to gnaw upon, but they have been upon that fare so many months that perhaps they rather like it.—*Freeport (Ill.), Democrat.*

New England Hardware Outing.

The Western New England Iron, Steel & Hardware Association enjoyed a very pleasant outing at the Seaside Outing Club House, Bridgeport, Conn., some days since. This was the regular monthly meeting of the association. It is the custom of the members to hold the meeting in different parts of the section to which they belong, instead of having them in one particular spot, and while the headquarters are in New Haven, there is not often a meeting there. This moving from place to place, gives the members a variety, and each member a chance to entertain the others and keep interest in the association alive. There are seventeen members in all, enrolled on the books as belonging to the association, and of these, thirteen were present in the Outing Club's house and at the entertainments which followed. Among the gentlemen present were the president of the association, L. L. Ensworth, Hartford; vice-president, S. S. Hunter, of Bridgeport; secretary, R. S. Woodruff, New Haven; treasurer, C. C. Lewis, Springfield; and the members of the association, among whom were Mr. Hoyt, of Hull & Co., Danbury; Mr. Foote, of Horrer, Foote & Co., Springfield; Mr. Russell, of Russell & Co., Holyoke; Mr. Tanner, of M. H. Tanner & Co., Winsted; Mr. Dickerman, of Winsted; Mr. Boland, of Waterbury; Mr. Chapman, of Bridgeport, and Samuel Dudley, of New London. After the meeting, which was called to order at 11 o'clock, the members dispersed and wandered about the grounds and along the broad walk near the water, until dinner was announced. Then they repaired to the club-house, and sat down to a meal which embraced every delicacy which the season affords.

In the afternoon the members embarked on the handsome launch of William E. Burnham, the *Hattie*, and enjoyed a sail on the Sound.

The Atlas Mfg Co.'s Improvements.

The Atlas Mfg. Co., sole manufacturers of Bradley Steel Shelf Brackets, Wire and Sheet Metal specialties, etc., New Haven, Conn., inform us that the continually increasing demand for their goods has forced them to provide much larger quarters, and about the 15th of September they will move into their new shop at No. 125 Water Street. This large shop has been fitted up with the best facilities for the economical production of the Bradley Steel Wire Shelf Bracket, Atlas Closet Hooks and other specialties. Nothing could so forcibly attest the great popularity of these goods, as the demand for them during the present year. This has been fully 100 per cent. greater each month in 1895 than ever before, and in some months has exceeded this gratifying figure. The trade can expect the same high standard in the finish and quality of the goods as heretofore and much more prompt shipments.

T. H. Cranston & Co., manufacturers agents, No. 60 Wabash Avenue, Chicago, Ill., represent the following concerns, as sole western agents: The Christy knife Co., the Sanson Cutlery Co., the Wyoming Shovel Works, Marion Tool Co., A. C. Rex & Co. and the Troy Nickel Works. The above consist of a full line of scalloped edge knives, table knives and forks, shovels and scoops, hammers and hatchets, house-furnishing goods, toy banks, stove pokers, lifters and curling irons.

Capt. J. A. H. Dressel, of the Union Metallic Cartridge Co., has been appointed inspector of rifle practice of the Thirteenth Regiment of infantry, National Guard of the State of New York, with rank of captain.

The city of Savannah has selected space in the Manufacturers' and Liberal Arts Building of the Cotton States and International Exposition.

"Hop's" Corner.

Now, my young friend, if you have definitely made up your mind that you like the Hardware business well enough to make of it a life's vocation, let me have a word or two with you, so that you will not waste the best years of your life simply flirting with an elegant business, for which you may not have a single qualification to be of any use to you.

Are you fond of hard work? Sure? I know you say "Yes" when asked any such question, and you may think that its only asked "just for the fun of it." Well, this time it isn't. Unless you are fond of work, and plenty of it, let me beg of you to select some other business. In the Hardware business a man may eventually achieve success if he will metaphorically "take off his coat and roll up his sleeves," and tackle the labor which is always before him; but if he expects a short cut to the inner sanctorium of this complex trade, a royal road to the stores of various information to fully equip him, and make him a power in the business, he will come to grief as sure as twice two equal four. There is no royal road. Contact with the labor; a love to perform it; willingness to meet it half way; and the possession of a desire to even hunt for it, for fear somebody else may have it to do and not you—these are the pre-requisites for the formation of a character destined to make a record in the Hardware world.

This may be equally a desirable element of success in any business, but in the Hardware business it is a prime essential.

A young man to-day can go into any one of the training schools, formed by the jobbing and commission houses of these hustling times, and ride rough-shod over one-half the force there employed, if he is only possessed of the willingness and indefatigability connected with a love of work. One-half of the young men to-day in this important trade avoid doing anything they think someone else would do if they didn't; and one-half of the remainder attempt to do their palpable duty in such a half-hearted, slovenly manner, that some one higher in authority has to follow them up, and see if it is done at all. Don't be afraid to take a little trouble. You may save tenfold the amount of time all the way along the line, if you will only do your part of the work, in that perfect and systematic manner which carries a conviction of completeness. That which is worth doing at all, is surely worth doing well, and as an old quaint writer expresses it:

> "It isn't wealth, or rank, or state,
> But 'git up and git' that makes man great."

And this is a homely method of expressing a great truth. Its the "git up and git," the vitality, the push, vim, ambition, love of work for the sake of work, which forms a proper discipline, and which completes the characteristics of a successful man in any business, but more especially the Hardware.

Always keep busy, doing something or other continually. Don't say you can find nothing to do. That you have done everything you were told to do. Don't wait to be told about things which you know should be attended to by somebody. Why not by you? Suppose you are showing some samples to make a sale, and you find one or more so rusty and shopworn that you fail to impress the customer that the stock is any better. Are you one of those who would think it's too much trouble to get a new sample out of stock to disprove the supposition erroneously formed by the would-be customer; or do you put back the tough sample and pay no further attention to the matter? I tell you, young man, the ambitious junior who follows you and has sense enough to supply the deficiency, will reach you and pass you anon, while you are murmuring about unappreciated services that are counted by years and not by the mile stones of usefulness and indispensibility. I was brought up under a disciplinarian to whom a short piece of twine neglected on the store floor would create a shiver. I was taught to pick them up and tie them together, and add the stock so formed to what was already on the reel. We threw nothing away in those frugal days, everything possessed a value.

Many of the millionaires of to-day received this sort of an education, and knew that this careful consideration for trifles eventuated in the formation of a foundation of character on which to build business capacity, and without this important factor no man can achieve permanent success. Why, the American people of to-day are supporting in their midst whole nations of frugal foreigners who thrive on what we throw away as valueless. You may meet them daily on the thoroughfares, their bundles of wood on their heads; their baskets and bags of various kinds of truck upon their willing backs, while the American, whose ideas are wholesale and not retail, has no time for small detail. He wants greater results, and generally overestimates his limited business capacity and lands—nowhere!

Let me urge upon the rising young man in the Hardware business always to be an understudy for the position above him. Familiarize yourself with its duties; know all its requirements. The time will come, sometimes soon and often late, when the question will be asked: "Do you think you can fill the position?" If you know you can you will answer unhesitatingly, "Certainly!"

If I had my life to live over again I should devote some of the hours I wasted in useless desultory amusements to the acquisition of a working vocabulary of at least two or three languages besides my own.

Numbers of men possessing no other ability maybe to-day, are starving themselves to death with several languages at their tongue's end; but no young man possessing the requisite ambition to become a Hardwareman would ever find it disadvantageous to his advancement to be at least a linguist in a commercial sense, if his knowledge in continental tongues extended no further.

Don't roam around a store with your mouth and ears shut and be afraid to take in a grain or two of knowledge for fear it may extend your sphere of employment. Cultivate a gladness that exults in the opportunity of extending your usefulness. Try to absorb more positive knowledge than anyone else in the establishment. Be the reservoir of information to whom everybody has to come for quick returns. Let your heart rejoice to hear everyone echo the same sentiment, "Oh, ask Rutherford, he knows all about it."

When that's the case I'll tell you what Rutherford will become if he lives: An ornament to the business his character adorns.

"Hop."

At the suggestion of President Collier the executive committee of the Cotton States and International Exposition has voted to make September 21st Blue and Gray Day at the exposition. It is estimated that one hundred thousand veterans of the Union army will be at Chickamauga and Chattanooga on the 19th and 20th of September, and the majority of them will go to Atlanta on the 21st.

A corporation to be known as Rival Brass Co. has been organized at Portland, Me., for the purpose of the manufacture of brass goods, with $50,000 capital stock, of which $300 is paid in. The officers are: President, George A. Taylor, of Newton, Mass.; treasurer, Nathan Clifford, of Portland, Me. Certificate approved August 15, 1895.

Horseless Carriages in France.

The United States Consul at Havre writes as follows: The time seems approaching when automatic road carriages, propelled by steam, electricity, or petroleum, will come into general use and take away from the patient horse the worst part of his daily toil. The odds, at present, seem to be rather in favor of petroleum. A most interesting competition has recently taken place in France between varied specimens of motor carriages. The course described was from Paris to Bordeaux—a distance of 358 miles—and back again, any vehicle to stand disqualified if it consumed more than one hundred hours on the road. The big prize of the day—40,000 francs ($7720)—was for four-seated carriages, which was won by Les Fils de Pengeot freres, while Messrs. Panhard & Levasson secured second place with a two-seated carriage, making the round trip in twenty-four hours and fifty-three minutes. The winning conveyances were propelled by gasoline, and the rate of speed was about fifteen miles an hour, which is regarded as an extremely creditable performance, the long lines of hills being taken into account. These hills appear to have proved too much for the carriages propelled by electricity, of which only one got through, the others having abandoned the contest. One of the steam carriages was brought to a standstill at Versailles early in the race, owing to an accident, and the others lost time by frequent stoppages of five and ten minutes, made for the purpose of taking in coal and water. The electrical conveyances had also to stop, from time to time, to renew their dynamic charges, but the petroleum machines carried enough force for a twenty-four hours' run, and on the return journey the run was made without a single stop. In comparing the merits of the different propelling agents, the palm must, so far, be awarded to petroleum, which is clean and can be easily carried The ordinary feeder used for short distances contains less than four quarts of oil, which will last over a journey of twenty miles, or two and one-half hours. For long distances, a receptacle capable of holding enough petroleum for a run of at least twenty or twenty-four hours is provided.

We hear also of bicycles propelled by petroleum, in which great interest has been exhibited, and half a dozen of such machines started in the race to Bordeaux, one, at least, holding its own among the larger vehicles. It is believed that light petroleum bicycles, tricycles, and even four-wheelers, will soon come into general use, which will tend to relieve lady cyclists from the necessity of wearing short skirts. Altogether, it seems that petroleum is destined to become the popular agent for solving the problem of traffic and conveyances without horses in the streets of great cities and on smooth country roads. It has already made astonishing headway in the uses and industries of the world. In Japan, it has become almost the sole illuminant, and on the Caspian Sea the Russian steamers burn nothing else for their engines. In commenting on the success of the horseless vehicles propelled by petroleum, in the race between Paris and Bordeaux, a leading English journal says:

"Why is it that we are so slow in this country to take up improvements of such immense social importance? Ours is the land of machines and machinery, of skilled inventors and colossal enterprises, yet in many respects England lags behind the whole civilized world in availing herself of the discoveries of science. There is not as much use made in the whole of London of the telephone as in one single quarter of Washington City, and there are prairie towns in the West of the United States more magnificently lighted by electricity than the best street of London. Electric tram cars and tram cables may be seen in many and many a city abroad, while here they are still novelties. Years ago, the tourist might have watched a detached electric or petroleum phaeton quickly threading the thickest crowd of carriages in the Place de l'Opera, at Paris; and now we have Frenchmen again, instead of the countrymen of Watt and of Stephenson, acting as pioneers to the new age which will certainly effect the deliverance of great cities from horse traffic, and of the horses themselves from a cruel and destructive use of their strength. It is a circumstance which has been frequently commented on, that there are no horseless conveyances other than cycles and a few cable tram cars in London. The reason is said to be that the law restricts the adoption of horseless vehicles in England to a very great extent. They are all subject to conditions upon which alone locomotives of primitive construction, steam rollers, etc., are suffered to go through the streets. A man must go before with a red flag, and the speed must be under four miles in the country or two in the town. The restriction was probably very well before the days of rapid transit, and it may be very well yet in its application to heavy locomotives. It was no doubt intended to guard against accidents due to the frightening of horses. But horses, like human beings, soon become accustomed to new and strange sights, and are nowadays seldom frightened even by the railway locomotive; besides, it is absurd to class a light carriage with a road locomotive or steam roller, because its motive power is steam, gas, petroleum, or electricity. But since the successful experiments recently made in France, London seems to have caught the gleam of a ray of hope that horseless cabs and omnibuses may soon be seen in her streets. Mr. Shaw-Lefevre, president of the Local Government Board, has introduced into the House of Commons a bill intended to permit such carriages to be used, and they will no doubt soon become a common sight in the streets of London, as they are now in the streets of Paris, Havre, and other French cities."

Rubber Mats for the President's New Launch.

A short time ago the newspapers devoted considerable space to a description, and in some cases illustrations, of a new launch which President Cleveland had purchased and taken down to Buzzards' Bay. They did not, however, all mention the fact that the very attractive rubber mats used aboard the craft were furnished by the New Jersey Car Spring & Rubber Co., of Jersey City, N. J. The company received the order direct from Buzzards' Bay and assume the President said: "I want new perforated mats for this new launch, and must have the best. The proper place to get them is the New Jersey Car Spring & Rubber Co."

Shortly before the Hardware store of Richards & Conover, Kansas City, Mo., was closed some days since, a well dressed man called and purchased several pistols, handcuffs and other articles. When he came to pay for the goods he said that he did not have sufficient money with him and asked that an employee of the store ride with him in his buggy to his home on Woodland Avenue. A clerk named Matthews accompanied the man, who got out of the buggy on Woodland Avenue and left the clerk to hold the reins while he went after the money. Matthews waited a long time for the man to return. Finally he drove the buggy to the police station and left it after making a report of what had taken place. The buggy had been hired at a livery stable.

The Van Wagoner & Williams Hardware Co., from September 1, 1895, have transferred to the Cleveland office all books of account, formerly kept in New York. The general business of the company will be conducted at Cleveland, but the office at No. 14 Warren Street, New York, with its stock of goods, with the exception of some lines, will be kept there as heretofore. C. T. Stork, secretary of the company, who for over twenty years has occupied various positions in its employ, will have charge of the business in New York city and vicinity.

Reading Hardware Co.'s Discount Sheet.

The Reading Hardware Co., Reading, Pa., and New York, have issued under date of August 15th, an appendix to their discount sheet No. 3; which appendix gives the changes in list prices in their No. 3 discount sheet, and also the discounts from list prices in the catalogue of 1891. We are pleased to herewith give the discounts, as follows:

Page in 1891 catalogue.		Discount. Per cent.

Advance in Silverware Prices.

The announcement is made that twelve firms "controlling the manufacture of silverware in New York City have increased the price of sterling silver flatware ten cents an ounce." The firms are the Gorham Mfg. Co., George W. Shiebler & Co., the Whiting Mfg. Co., Dominick & Haff, Reed & Barton, the J. B. & S. M. Knowles Co., the Towle Mfg. Co., R. Wallace & Sons, the F. M. Whiting Co., Wood & Hughes, the Howard Sterling Co., and Davis & Galt. Mr. Shiebler, of George W. Shiebler & Co., said to a reporter: "The manufacturers have contemplated this increase for some time. For over a year we have made no profit whatever on flatware, which includes such articles as tea, dessert and table spoons, and table and dessert forks. No other goods will be influenced by the increase in price. The rise is, however, mainly due to the gradual increase in the price of silver bullion. which is now quoted at 68 cents an ounce. Over a year ago there was an understanding among the wholesale manufacturers that if bullion went up we should raise the price of certain articles. Another consideration we had in view was the fact that more expensive patterns in flatware have been introduced. This increase in prices was a trade secret and not designed for publicity."

Southern Hardware Jobbers.

The executive committee of the Southern Hardware Association, composed of John Brown, Charles H. Ireland, representing Odell Hardware Co., Greensboro, N. C.; Geo. E. King, of King Bros., Atlanta; Jas. J. Mendelbourn, of Tones Bros., Little Rock, and W. E. Gibbins, met some days since at Knoxville, Tenn. This committee is appointed by the Association to meet every six months and oftener, if necessary, to look after and attend to the interests of the Association. It has the power of appointing certain committees to attend to specific business. The following committees were appointed: Manufacturers' Committee, Transportation Committee and the Grievance Committee. On each is three men. The correspondence that had accumulated since the last meeting was attended to, as well as time and place selected for the next meeting of the Association. It will meet the 13th, 14th and 15th of May, 1896, at Lookout Inn. After the meeting the visitors were shown over the city by the local Hardwaremen, and with one voice were loud in their praise of Knoxville.

Pike Mfg. Co.'s New Quarters.

The Pike Mfg. Co., Pike Station, N. H., have decided to open quarters of their own, and under their direct personal management, in New York City. They have accordingly leased the ground floor and basement at No. 151 Chambers Street, where they will carry everything in their large line of manufacture. J. M. Yarnall will be in charge of a large executive force, and the export trade will be looked after here, as well as that which naturally belongs to this territory.

The company are preparing in all ways to meet the renewed business activity that is so surely upon us. They are erecting a new factory at Hot Springs, Ark., in which will be cut and finished their Arkansas and Washita Oil Stones. A new building is also being erected at Pike Station, to supply the greatly increased demand for their Indian Pond Scythe Stones. The company have lately made contracts for a large number of stones to be sent abroad.

Scattergood Pay-Roll and Record Book.

The Scattergood Co., Disston building, Philadelphia, are having unusual success with the Scattergood Pay-Roll and Time-Record Book, some information concerning which has already appeared in these columns. The announcement is made that this book is at present in use by leading firms in the United States, Canada and England, employing all the way from 25 to 2000 hands, and is giving universal satisfaction. It is further explained that it is a safeguard against errors, giving a complete history of the pay-roll at a glance, with a complete record of each employee. It is a perpetual index to the time-records and pay-roll, by use of which one can turn to any record in an instant, no matter how old. Some further advantages are referred to as follows: "No copying from one book into another. No carrying of names and rates from one portion of a book into another. The only labor-saving Pay-Roll or Time-Record Book that can be used to advantage where there are frequent changes. Only current matter to handle. Neat and compact. Saves re-writing names and rates indefinitely. Can be used with any system of time-keeping." Any company or house which carries a pay-roll, will find it to their advantage to correspond with this company, and receive detailed information as to the character of the book, and the special advantages which are to be secured from its use. Sample pages showing its method of work will also be sent.

How He Wet His Feet.

Alfred D. Clinch, of Underhill, Clinch & Co., New York, is the last man in the world to sit still and doze away the dreamy hours, when there is work to be done, for Hardware dinners or humanity. They say, down in Asbury Park, that some days ago he was sitting with his little ones under the shade of a huge umbrella upon the sunny sands, when there came a cry for help. Two women had gone out beyond their depth. The life-saver went by like a flash of lightning, but was not quicker than the agile Clinch, who was up and ahold of the rope with which the saver expected to be pulled to shore. As the rope was not quite long enough to allow the man to go clear out, Mr. Clinch gave him more slack, and to do so, forgot that he wore shoes and trousers, and went down into the surf. The waves of old ocean beat about his knees while he stood there and held on, and it was not until after rescued and rescuer were safe ashore, that he remembered the matter of clothes; but haled gaily forth to his stopping place, happy in the thought that he held on to the rope, even though his feet were wet.

A serious fire has occurred in the works of the Sandusky Tool Co., Sandusky, Ohio. It burned for about an hour, and consumed twelve car loads of valuable timber and several hundred feet of the two storage buildings. The buildings were not very valuable, and were merely a covering for the timber when in progress of drying. The timber was valued at about $5000, and consisted of apple, maple, bass and beech woods. Some of it had been in storage for about four years, and was just to be used in filling a large order for planes and tools. Very little of the pieces of timber damaged by the fire can be used.

According to HARDWARE 200,000 bicycles were manufactured in this country in 1894; the paper estimates that the output of the machines for this year will be 400,000. There is a suspicion that wheels may be in the editor's head, for he prophesies that 1896 will show an output of 700,000.—*Grand Rapids (Mich.), Democrat.*

Burial caskets are now being made of aluminum by an enterprising company at Allegheny, Pa. They are air-tight and rust-proof.

NEW GOODS IN THE MARKET.

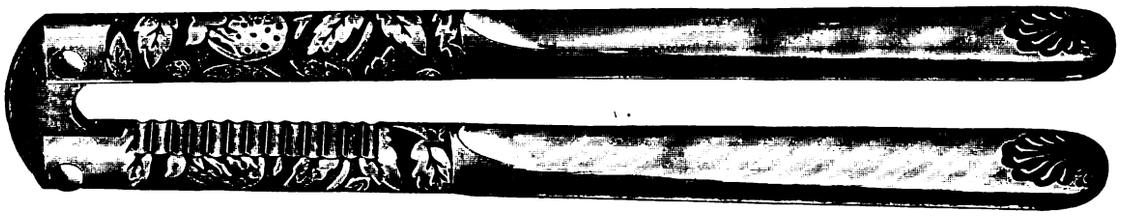
If you have anything NEW, let the world know it by illustrating it in these columns.

NO CHARGE WHATEVER is made, direct or indirect, as our interest lies in showing the readers of "HARDWARE" where the LIVE manufacturers and wholesalers are, and what they are doing.

When your NOVELTY or SPECIALTY is ready, send us an Electrotype and descriptive matter, which will appear immediately.

The Hardwaremen everywhere read this department; it is to your interest to make prompt use of it.

A Vibrating Push-Button.



The R. & B. Mfg. Co., No. 1814 Fairmount Avenue, Philadelphia, are placing upon the market the new Vibrating

Push-Button here shown. It consists of a small magnet and armature mounted within the push-button case and connected in series with the contact spring, so that the vibrating bell at the other end of the circuit will operate the armature within the push-button and indicate to the person signaling that the signal has been properly transmitted. Absence of the clicking sound produced by the armature indicates, of course, that something is wrong and that the signal has not been reproduced by the bell at the other end. The device is about the same size and appearance as an ordinary push-button, and can be substituted for the latter without any change whatever in wiring, just as though it were identical with the button displaced. The great convenience afforded by being able to tell instantly whether or not a signal has been transmitted properly is obvious to any one who has called repeatedly without response, and is left in utter ignorance as to whether the signal was transmitted, or whether the lack of attention was due to the negligence or absence of the person summoned.

A Steel Wire Nut Crack.

The Steel Wire Nut Crack here shown is being placed upon the market by the Upson & Hart Co., Unionville, Conn. It is made from steel wire, silver or nickel-plated, and is described by the makers as strong, durable and attractive. Put up half dozen in a box, and also with a corresponding number of nut picks, having handles of shell pattern. The company will send prices upon application.

"Quick-Cut" Can Opener.

The Gibbs Mfg. Co., Canton, Ohio, in introducing this new article to the trade, tersely say: "A source of satisfaction is always felt when placing the Quick-Cut Can Opener in stock—you know you've got the best, and that they are sure to suit." A glance at the accompanying illustration will give a good idea of this article and its method of operation. The makers describe it as cutting easy, does

not slip, "will open any shape or size can on top or side, and works equally well right or left hand. Cuts smooth and close up to the edge, turning the edge out, so that the contents may be easily removed without being torn or disfigured. To operate.—After inserting blade let the notch rest on edge of can; hold the handle loosely and take short upward strokes, using the notch as a fulcrum which grips the edge and prevents slipping. Furnished either lacquered or nickel-plated. One dozen in a neat box for counter display." The company will be pleased to furnish information as to prices, etc., on application.

I. C. Valve for Pneumatic Tires.

The I. C. Valve for Pneumatic Tires, here shown in an improved form, is being offered to the trade for 1896 by the Clark Novelty Co., Rochester, N. Y. As will be seen by Fig. 2, the valve consists of only few parts—the small rubber bulb upon which the action of the valve depends, the shell, cap and deflating pin secured in the plug to which the bulb is attached. As explained by the makers, "the

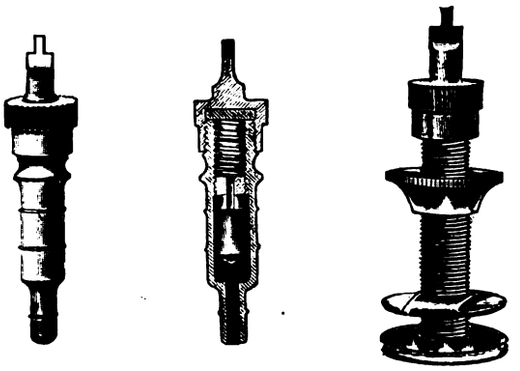


FIG. 1.—PLAIN VALVE. FIG. 2.—SECTIONAL VIEW OF PLAIN VALVE. FIG. 3. METAL BASE VALVE.

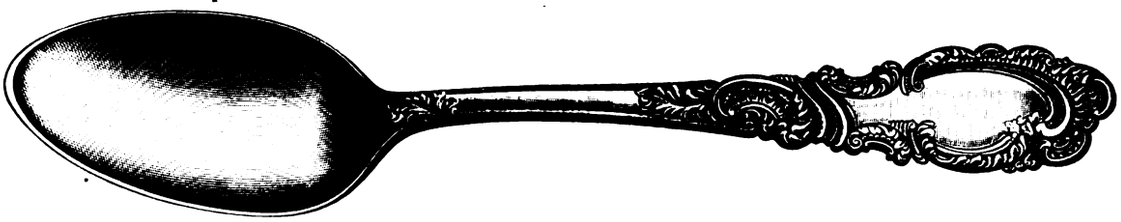
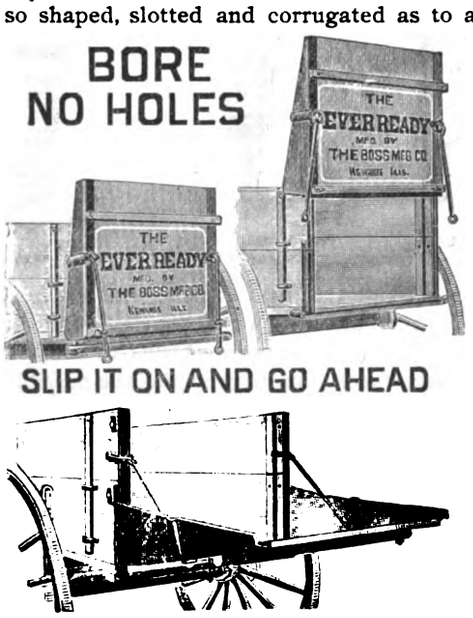


air passes through the little slots on either side of the plug and around the bulb, which is upset against the wall of the valve by the return pressure of air; this forms an absolutely perfect check, but to preclude the possibility of any slight escape by use a dust cap is provided with a first quality thick rubber packing, being held in a recess to prevent its dropping out and which presses tightly against the flat rim of the shell to make it absolutely air-tight. The cap is fitted with a screwdriver and pin which is used for removing the plug and bulb and for releasing the air by pressing against the deflating pin which enters the bulb through the plug. After the valve has once been tied or vulcanized to the tire it need never be removed as all the

Digitized by Google

parts can be taken out of the exposed end. The diameter of the shell is fitted with the universal pump connection and thread." In Fig. 3 is shown the metal base I. C. valve.

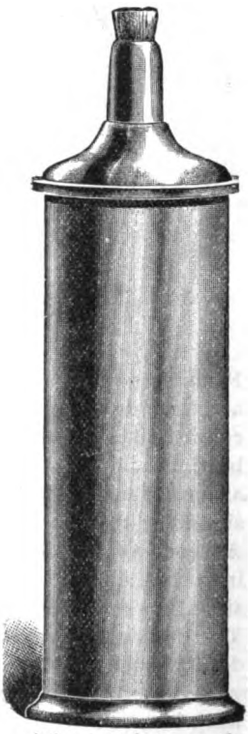
The Aldine Ware.



The Rogers & Hamilton Co., Waterbury, Conn., are bringing out a new, handsome and complete line of their silver-plated ware, one sample of which is here shown.

They call this the Aldine pattern. In a note to the trade they say: "In presenting to your notice the Aldine, our latest production, we wish to emphasize the fact that it contains all the excellent qualities for which our goods are especially noted, namely, elegance of design, bold and striking figures, and extra heavy spring tempered shanks; is carefully finished in the metal before plating, aud after plating by the sectional process, thoroughly burnished and finished. This pattern will, in our judgment, be a most remarkable seller, and should be in the stock of every first-class dealer." In addition to the staples made in this design, such as knives, spoons and forks, they are also offering a number of special fancy pieces, such as cheese servers, berry spoons, crumb knives, fish knives, sugar shells, salad forks, ice cream forks, etc.

Ever-Ready Shoveling Board.



The Boss Mfg. Co., Kewanee, Ill., have commenced the manufacture of the Ever-Ready Shoveling Board here shown. It is intended for attachment to a farm wagon, and is described by the makers as possessing several novel aud attractive features. No holes need be made for its use; is merely slipped on, and can be adjusted to any wagon without mutilating it. The makers further say: "It has good shiplap pine bottoms, strong steel sides, castings of best malleable iron. Attaches to wagon by means of four castings so shaped, slotted and corrugated as to admit of

almost instant adjustment without boring any holes or bolting to wagon at any point. Malleable parts A 2 and No. 3 act as clamps only as, from the nature of their shape, they fit around the inside cleats and hold the board firmly in place. The malleable parts are bolted and riveted together before leaving the factory, so it is an easy matter to set the board up. When board is closed and rods fastened, the end of wagon box sets in between steel side and board bottom, thus strengthening the wagon body materially. By using a little care in adjusting the long A 1 casting in connection with A 2 and No. 3 so that it sets close to the end cleat of box, a sufficient tension can be obtained at the eye or fulcrum plate, when rods are hooked or fastened, to hold the board very firmly against end of wagon."

The Little Wonder Pocket Torch.

David Hymes, No. 135 Lake Street, Chicago, is offering the trade his Little Wonder Pocket Torch, illustration of which is herewith shown. It is intended for the use of mechanics and others who are compelled at times to work in dark places. It will be appreciated by plumbers, gas fitters and furnace men; also for those who may occasionally have to work in vaults, closets, etc. "It can be used anywhere as a substitute for a candle. It will burn kerosene, gasoline, benzine, lard oil or any kind of oil; does not smoke or smell, and can be carried in the pocket or tool kit without the least danger of leaking. When filled, the torch will burn from ten to twelve hours. It is nicely finished, and price is very reasonable."

Klages Cork Screws.

The illustrations here shown represent two new designs in cork screws placed on the market by Frederick Klages & Co., No. 107 Chambers Street, New York. As shown in Fig. 1, the screw is contained in the body of the bottle, the neck unscrewing to allow it to be drawn out. The neck is again screwed on to the body and is ready for pulling corks. The bottle as shown in Fig. 2, is 2¾ inches long, finished in nickel plate. A brass plate on the bottle has the words "Crooked but has a Pull." The cigar Cork Screw when closed measures 4 inches in length, taking up no more room in the pocket than a cigar. The

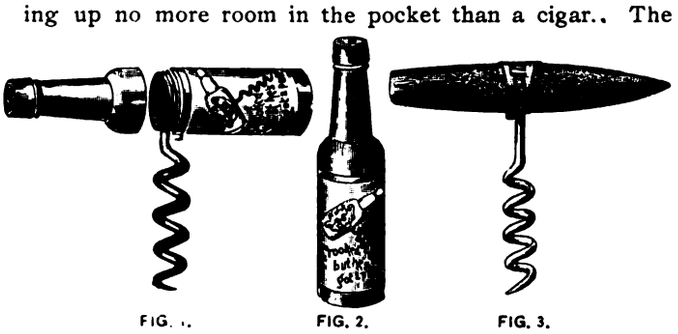


FIG. 1. FIG. 2. FIG. 3.

attractive features of these goods include their utility, the novelty of the designs, their finish and the facility with which they may be carried in the vest pocket.

Sanitary Ash Sifter.

Briner's Sanitary Ash Sifter is a new article which Briner Bros., Nos. 54-58 Rutgers Street, New York, have just placed upon the market, although it has been experimented with in practical use sufficiently long to show how well it does the work assigned it. The makers are so well satisfied upon this point, and as to the demand for it, that they offer to consign a sample to any dealer who feels inclined to take hold of the article. The Sifter and its method of

Digitized by Google

operation can be readily understood by a glance at the accompanying illustrations. In description the makers say: "Being absolutely dustless, this Sifter may be operated wherever the ashes are removed. There is nothing on it to get out of order. No knobs, no handles, no hinges. It is detachable, so that the can may be placed upon the street for the ashman to empty. It is portable, and may be conveniently kept near the range or furnace. Being provided with a cover, it permits filling to the top, thereby shortening the operation. The can will hold the ashes of about one week. By sifting you avoid the frequent

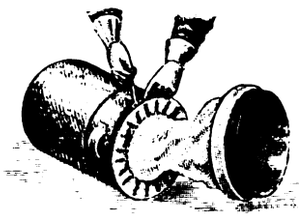

FIG. 1.—ATTACHING.

FIG. 2.—FILLING.

dumping of ashes. This will be most appreciated by those who carry ashes up and down stairs." The sieve is made of close mesh galvanized iron wire, with a deep hard wood frame. The cover and bag are made of the most closely woven sail duck, dyed gray. The cover is provided at the edge with a felt packing, as an extra precaution against the escape of dust. The ash can is made of black iron, galvanized after construction. In attaching, place the ash can, bag, and sieve, as shown in Fig. 1. Draw the first string tightly around the mouth of the can, and fasten in the hook. Be sure to have this string close to the rim of the can. Then draw the second string together, and tie in a loop. This second string prevents ashes from settling upon rim of the can. Filling: Fold the bag inward, or give it a slight twist while lowering the sieve, thus forming a bottom under the sieve, to prevent the untimely dropping of ashes. Fill the sieve full and place the cover firmly upon it. Raise the sieve, and shake as usual. Dumping: After shaking, lower the sieve, and allow it to remain unopened for a few moments, so that the dust may settle within. Dump and repeat in the same manner. Do not detach the bag until the can is full, which

FIG. 3.—SIFTING.

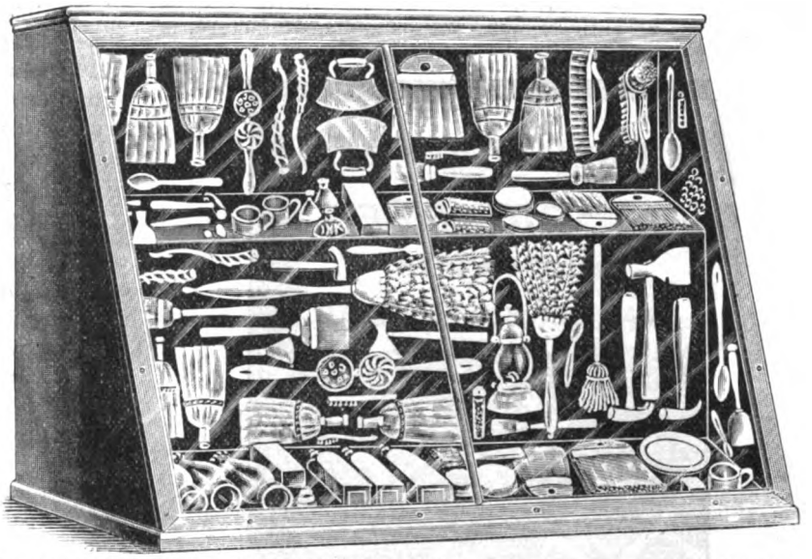

FIG. 4.—DUMPING.

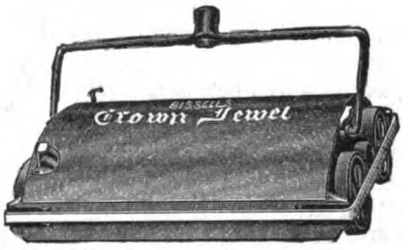
may be determined by pressing the loose bag into the can." Dealers will do well to take advantage of the generous offer of the manufacturers to send a free sample upon consignment.

Whittier's Perfection Show Case.

This attractive Show Case is manufactured by Smith & Whittier, Nos. 116–118 North Street, Boston. It is 6 feet long, 2 feet and 6 inches high, and 27 inches wide. It is designed expressly for the display of goods in grocery and Hardware stores. "By its use a fine display can be made; samples of goods which are never shown may be kept in full view, thereby largely increasing sales of such articles as pay the largest profits. Twenty-five square feet of shelves to which one hundred and fifty samples may be attached, prices marked as desired so that customers may make a selection. The sash, which is 3x6 feet, is screwed securely to the case, making it dust-proof. In the back of the case shelves are arranged for keeping stock, and, if needed, drawers may be put under the counter. These



Cases will pay for themselves in any store several times a year. For instance: if you sell two articles more a day, which pay a profit of five cents each, you will pay for the Case each six months. This being true, how can any storekeeper afford to be without them? Sold at the nominal price of $16 to customers who buy small wares of us; $15 if taken from our store without being packed. Order by mail, or call and see one in use. Old show cases taken in exchange and allowed the price at which we can sell them."

The Bissell "Crown Jewel."

The Bissell Carpet Sweeper Co., ever wakeful to the increasing demands of the trade for improvements, have just made some very radical changes in their well-known line of "Crown Jewel" sweepers, having changed the entire construction and finish of the Sweeper, by placing the wheels on the outside, and bevelling the top of the case with fine selected three-ply veneer top, gracefully curved and finished in imitation mahogany, natural birch and imitation quartered oak. The trimmings are of three kinds—japan, silver bronze and nickel. This Sweeper in its improved form is unquestionably the best low-priced Sweeper ever placed on the market. It is a good sweeper, a good looker and a good seller. It con-

tains the Bissell broom-action, everlasting pure bristle brush and spring dumping device. The "Crown Jewel" is a marvel for the money and is a Sweeper that must be seen to be fully appreciated.

The Falcon Iron & Nail Co., Niles, Ohio, employing about fifteen hundred men, recently posted notices that all employees not governed by the labor associations would be granted an increase in wages of 10 per cent.

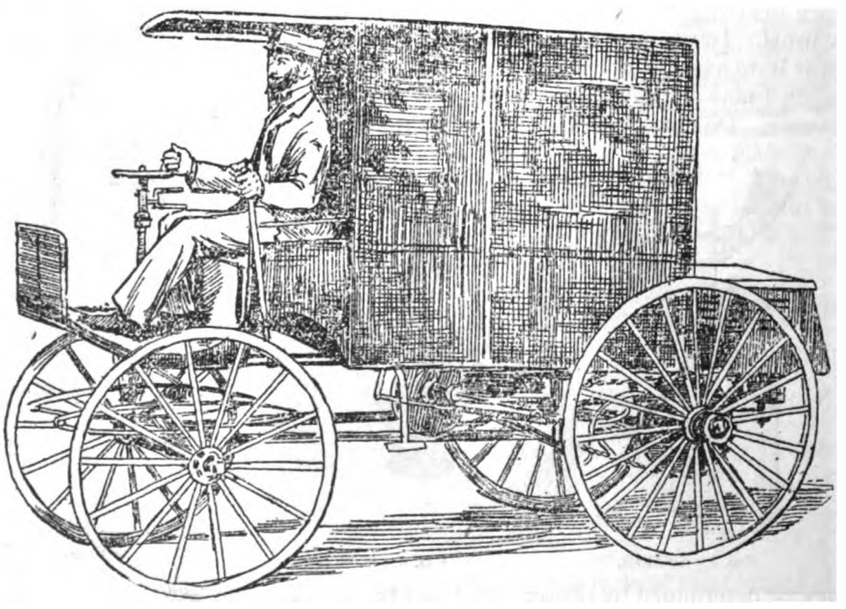
A New Style of Rubber Belt.

The New Jersey Car Spring & Rubber Co., Jersey City, N. J., who have won an enviable reputation as manufacturers of high grade vulcanized rubber goods, such as belting, packing, hose, tubing, mats and matting, have put a new style of belt upon the market, which bids fair to become one of the most popular ever offered users of such goods. It is of entirely new design and manufacture, is



constructed with the great care characteristic of all the company's products, and is styled the "Gladiator Seamless Quilt Stitched Belt." As the name indicates, it is extremely strong and durable, is seamless and quilt stitched, as shown in the engraving. It is in this method of stitching that it differs radically from other sewed belts, and to it also the belt owes its other attractive and superior qualities. Especial points made in its favor are these: "For a long time there has been a recognized demand for a first-class stitched belt—one that would retain its strength, in which the stitching would not break and tear the belt with every unusual strain, and in a word could be thoroughly depended upon to give continued satisfactory service. While the ordinary longitudinally stitched belt with which the public has long been familiar undoubtedly possesses merit, there are many objections inherent in the different methods of its construction. These briefly stated, are, that the straight lines of longitudinal stitches greatly weaken the belt and render it liable to tear in the same direction; that the strain is nearly all on the outside stitches, and the thicker the belt may be, the greater the disparity of strain on the stitches and the more liable they are to break; that, as the sewed belt is naturally somewhat contracted by the longitudinal plan of stitching, the threads are liable to break when a severe strain is put upon the belt, and that the lines of stitching put in the way they are, weaken the belt for lacing. In the Gladiator Seamless Quilt Stitched Belt the belt is double stitched, the lines of stitching being put in obliquely and crossing each other; in other words, the belt is 'quilted.' The merit of this method of stitching is at once appreciated. In this way the strain upon the belt is more evenly divided and distributed in all directions and there is no liability of the stitches breaking to tear the belt and so weaken it; on the contrary, a network of cotton stitching is formed, each component part of which adds strength to the others and to the belt as a whole. The manufacturers have perfected machines of special design for making these belts and claim that in the Gladiator they offer what may be truly called a perfect stitched belt, having none of the objectionable features that pertain to the old-fashioned sewed belts, but with every merit which a perfect belt of the kind should have and with a degree of strength and durability not possible to secure by any other method of construction." A sample of this new style of belt, with full information, will be sent free to all who apply for it at the main works of the New Jersey Car Spring & Rubber Co., Wayne and Brunswick Streets, Jersey City, N. J.

New York's Horseless Wagon.

In this connection we show a petroleum driven vehicle, which has made its appearance in New York City, being one brought from France by Hilton, Hughes & Co. It was made by M. E. Roger, of Paris, who invented the contrivance by which its speed is regulated. It was tried on the asphalt of Washington Square because it was feared that part of the machinery, particularly the chains which move the wheels, would not stand jolting over rough stone pavements. An extra outfit of stronger machinery was in the Custom House, but as the owners were impatient to try the new carriage the asphalt of the park was selected.

The experiment was entirely successful. The wagon darted about the park at a high rate of speed. It was readily controllable, and made its way among vehicles and pedestrians with facility. Mr. Roger smilingly stepped up to what would be the driver's seat in any other carriage, his engineer moved the brake, and the wagon started. It moved slowly at first, then increased the speed. The engineer brought the wagon back to its starting point. Several trips were made around the circle at the centre of the square, and two blocks up Fifth Avenue were covered on one ride. The wagon is operated by a petroleum motor, and it is said to be the only one of the horseless vehicles that is supplied with a horizontal motor. This can be removed and used for any other purpose for which a motor is desired. The engine uses rectified petroleum with a density of 700.

A disastrous fire recently visited the St. Louis Wire Mill Co.'s plant, St. Louis, Mo., causing a damage of about $20,000. The worst damage was done to the machinery and belting in the nail mill, which is estimated at about $15,000. The damage to the building is placed at $2,000, while $3,000 will cover the rest of the damage done.

CONFESSIONS OF AN UNSUCCESSFUL CLERK--VII.

Despite the shortcomings before enumerated, I must have made some progress as a clerk during my first year with Samson & Crown, as they engaged me for the second year, and advanced my salary to two hundred and fifty dollars.

Toward the end of this second year, I began to realize that if my desire to become a lawyer was ever accomplished, it was time to take a definite step in that direction.

Plucking up courage for the venture, I called upon John Stahl, one of the leading lawyers of Grange, in whose Bible class I had been for some months. He heard my story with close attention, asked a few questions which turned me inside out before him, and then said:

"I think, my boy, that you would be justified in taking up the study of law, provided you are ready and willing for study of the most severe character. You must greatly improve your education in a general way—without that it would be foolish for you to think of taking up the law at all. They have a good seminary up at Weston (my father's home.) Do you think you could go back there and dig in for a couple of years?"

"I think I could, sir. I could live at home free of expense, and probably help my father enough to buy my clothes. I have saved about sixty dollars out of this year's salary."

"That is good. When your year is up here, go home; put in a couple of years; study hard, read good books; improve your mind and muscle; keep out of bad company. At the end of that time come again to me. I may have an opening in my office, or I can perhaps help you somewhere else."

I thanked him from a full heart, and set about the work he had so pointedly laid out.

Mr. Samson fully approved of Judge Stahl's advice when the matter was laid before him. I knew where Almon stood, as he had from the first advised me to try a couple of years in some good school. My father was pleased with the arrangement; and the joy of dear mother in getting one of her sons home again, was as deep as had been her sorrow when he went away.

The year that followed was, perhaps, the happiest of any that had so far been recorded in my life. The Weston Seminary was a staid and respectable school, founded and conducted under the auspices of the Methodist Conference. It had become one of the recognized educational landmarks of the Western Reserve, not quite so well known as Hiram Institute, or so important as Oberlin or the Western Reserve College at Hudson, but of a character to attract students from points many miles away. Men and women who had partaken of its benefits in their earlier days, were pleased to send their children, knowing that they would be surrounded by good influences, in a town that boasted that not a drop of liquor could be purchased within its borders.

The course of study laid down was a little too classic and high-sounding for the majority of students who attended; but so far as I can learn, Lysander Bancroft, of Nelson, was no poorer as a farmer because he had browsed around in Greek for a couple of years; while friend Jim Scott perhaps made a better justice of the peace over at Bainbridge, because he had A.M. and B.S. and B.C. attached to his name, and knew Cicero by heart. The larger portion of us, however, needed drilling in spelling, arithmetic and geography; and if we had been kept at these, and away from Moral Science, Rhetoric and Cæsar, we would all have been better equipped for the practical work of the world. But our pride of intellect, and educational self-esteem, would have been kept much smaller. The happiest man on earth was "Ben" Chamberlin, when he stood up in Trew's woods on Commencement Day, and spouted a Latin valedictory over the heads of some scores of open-mouthed farmers down below. Many congregations have listened to his eloquence since then; many pulpits have heard his modest appeals for better service for the Master whose loving and devoted minister he has become—but never has he felt himself so large a man, as he did on that memorable June day when he "orated" for a half hour in a tongue which no man there—even Professor Craft himself—could follow, and which caused a terrible wrench upon the mental apparatus of the orator himself, to remember as he went along.

How much or how little good a year and a half of schooling did me, I am unable even now to judge. The literary exercises with which the hard labor of study was interspersed, were pleasant and profitable, although it is with a sad but by no means cynical amusement, that I now recall the ambitious effusions which we youngsters put forth, in our efforts to become Websters and Emersons before our time.

Naturally one would suppose that at the expiration of the above-named time, I made haste again to Grange, and sought the opening which my good friend, Judge Stahl, had so generously promised.

Could I have done so, what would have been my fortune in after-life? Would I now be an old man, earning a mere pittance in this country store? Would I have done better, or found more of happiness, than has been mine? The poet well says that no man can roll the stone from the door of his dead youth; that "of all sad words," the saddest are: "*It might have been!*" Perhaps it would have been better, had it been as things were not; perhaps worse for me. I have tasted much sweet with the bitter, and with the memory of these past years clustering about me, I shall not complain.

Like too many others, I loved too young; made haste to take upon my boyish shoulders, far in advance of their time, the solemn burdens of married life. I laid aside—temporarily, I then thought—my career, that I might make life easier for the one that I then felt was the only one on earth for me. It is the old, old story:

"She was a child, and I was a child,
In this kingdom by the sea!"

She was some years my junior—a sweet, pure, young girl of common school education, quiet manners, and good sense. An orphan, employed in a millinery establishment of our town, her position appealed to me with unusual stress. We argued ourselves into the belief that an early marriage would be only a small hindrance to my career in life; in fact, I even made myself believe that when thus steadied down with home ties and responsibilities, I would work and study all the harder, and certainly enter my profession at an early date.

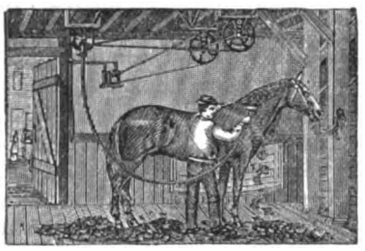
So we were married. It was a quiet affair, with little encouragement from any source outside of our fond, foolish, youthful hearts. My mother had opposed us earnestly, and with a kindness of advice that I can now see was golden in its wisdom. My father simply said: "Of course, you will do as you have made up your mind to—you have always done that. You will find that it will pay you to wait."

I again stated our side of the case.

"All right," was his answer. "Go ahead if you think best. But you must bear one thing in mind. The farm is small, and mother and I have our hands full looking after the other boys. You will have to find a home and work somewhere else. If you do get married, of course you can

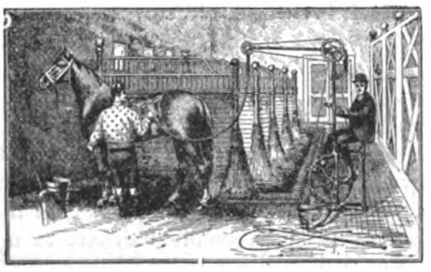
Digitized by Google

bring Minnie home until you look about. But it will be a visit only—I won't have mother burdened any more at her age."



I had the grace to thank him for his kindness; but left him, I am afraid, with the air of one who felt that he was able to look after his own chances in the world.

We had need of my father's invitation for only a week or so. I had learned of a storekeeper in a neighboring town who needed a clerk, and drove over three days after the wedding to apply for the situation.



As it was a case of necessity upon my part, we had little trouble in coming to an understanding. The small salary he offered me—I hardly dare say how small it was—was supplemented by free rent of a little house he owned near the store, and free fuel from his woodpile. A few days later my little wife and I packed our few belongings into father's wagon, and Frank drove us over to Branch. Her parents' household goods had been saved, and were of great assistance to us just then, when all the money I had in the world was a ten-dollar bill my father had loaned me.

Horse Clipping Machines.

The season has arrived for clipping horses, and parties looking for machines of well-tried merit and popularity are requested to consult the advertisement of the Gillette Clipping Machine Co., No. 201 East Twenty-third Street, New York, on another page. They manufacture, it is said,

"the only absolutely flexible shaft, also make the widest and most rapid cutters on the market. The machine is the simplest made, having the fewest parts, therefore the least liable to get out of order." On account of rapidly increasing business their facilities for manufacture have been doubled for the coming season. Grinding of cutters is one of the special branches in their works, all grinding and re-

pairs being finished and returned on the day received. No delays. All customers are requested to send in knives for repairs at once, and be ready for clipping early in the season. These machines are largely exported to other countries, and receive the highest praise from every source. Send for new catalogue and price list. Over 500 machines ordered for Europe, speaks volumes in its favor.

It is reported from Lock Haven, Pa., that the Danville Nail Works, which have been idle for a couple of years, "have been bought by a party of capitalists, who are well known in financial and iron circles who will at once have necessary repairs made and put in active operation. This is one of the most complete factories in the country for nail making. There are over 100 nail machines, and when in operation employment is given to 600 men."

The Cycle Show for 1896.

The Second Annual Eastern National Exhibit of Cycles, Cycle Accessories and Sundries will be held in Madison Square Garden, New York, from January 18 to 25, 1896. This is a decision recently reached by the National Board of Trade of Cycle Manufacturers. The allotment of spaces will occur on October 9th at the garden. In a circular announcing the exhibit the management says:

"Character of Exhibits. It being the intention to make this Exposition exclusively a Cycle mechanical exhibit, the Madison Square Garden Co. reserves the right to decline and prohibit any exhibit, exhibitor or proposed exhibitors, or exhibits not approved of by the National Board of Trade of Cycle Manufacturers, and to permit only such matter and conduct as shall be approved of by the National Board of Trade of Cycle Manufacturers. The above reservation covers persons, things, conduct, printed matter, souvenirs and emblems, and all things which affect the character of the exhibition. Information, submission of proposed matter or conduct to be made to Frank W. Sanger, manager for the National Board of Trade of Cycle Manufacturers of the Eastern National Cycle Exposition, Madison Square Garden. Exhibitors have the right to distribute approved of catalogues and price lists, only from the space occupied by them. Applications for special privileges, such as advertising, souvenirs, etc., together with a sample of the same, must be submitted to Mr. Frank W. Sanger, not later than January 10, 1896.

"Conditions of allotment of spaces. Applicants are requested to make all of their selections in their first or original application, and to number their selections in the order of their preference, first, second, third, etc., etc. Upon a date fixed and advertised, allotment will be made without regard to date of application. When a space is applied for by two or more applicants the same will be allotted in observation of the following claims to preference: First. Members of the National Board of Trade of Cycle Manufacturers. Second. Signers of agreement to exhibit only at sanctioned exhibits of the National Board of Trade of Cycle Manufacturers. Third. Largest amount of space applied for. Fourth. Desirability and appropriateness of exhibit; preference given to exhibitors of bicycles only. Fifth. Former exhibitors at cycle shows given in Madison Square Garden. When the rights of applicants are equal they will be notified and requested to settle among themselves and notify. Should they fail to do so for ten days they will be notified that the space will be allotted to that applicant who offers the largest premium, but one offer being permitted, and the premium paid being repaid in admission tickets. No allotment will be made until all applicants with greater claims to preference have been provided for. Allotment will be made by Frank W. Sanger, manager, to whom all applications must be made, subject to the confirmation and approval of the executive committee of the National Board of Trade of Cycle Manufacturers. No application will be opened until Wednesday, October 9, 1895, at 12 o'clock noon, and then they will be opened by Manager Sanger in the presence of a representative of the National Board of Trade of Cycle Manufacturers."

The text of the advertisement of the Geuder & Paeschke Mfg. Co., of Milwaukee, Wis., in this issue, is of special interest to those dealers who desire to handle a first-class, reliable line of pieced tinware. The Geuder & Paeschke Mfg. Co. make these goods of charcoal tin, on improved machinery, and guarantee them to give satisfaction in every respect. Write them for prices.

By direction of the Executive Committee, the date for holding the Annual Convention of the National Association of Manufacturers, at Chicago, Ill., has been changed to November 19, 1895.

RECENT TRADE PUBLICATIONS.

The Yale & Towne Mfg. Co., Stamford, Conn., and New York, have published a supplementary catalogue of the products of their Branford Lock Works department, an advance copy of which has just come to hand. Although a comparatively small volume, 215 pages, this book contains an unusually large amonnt of new and attractive matter, among which the following are the principal items: First: On pages 27 to 43 is shown a line of plain metal trimmings made from wrought bronze and wrought steel in place of cast metal, as has heretofore been customary. It is not possible by illustration to more than indicate the form of these goods, but their construction and finish are both of the best character and superior to much of the similar work in the market, especially in the matter of thickness or weight of material. Second: On pages 44 to 66, also 111 to 132, and 142 to 157, are illustrated two entirely new and very extensive lines of ornamental trimmings in wrought bronze and wrought steel, designated respectively Arcadian and Castilian. These designs are the work of the best designers at command and mark a distinctly new departure in this, that while adapted to a line of good but inexpensive Hardware, intended for popular public use and in buildings of the middle grade, their artistic characteristics are of the highest order and are such as to make the work suitable for use in almost any location, and acceptable to the most cultivated taste. The great favor with which these goods have been received since their introduction a few months ago, is conclusive evidence that the popular taste appreciates good designing of this kind, and will gladly substitute artistically decorated Hardware in place of the meretricious and too often unsightly work which has too often done duty as "ornamental Hardware." The Arcadian ornamentation is made only in wrought bronze and is exceedingly beautiful in appearance when furnished in "Old Copper" on sand finished surface. The Castilian ornamentation is made only in wrought steel, but in a wide variety of attractive finishes. Third: On other pages are shown examples of an attractive line of cast bronze Hardware of the Florentine ornamentation, to which several additions have been made since the issue of their complete Branford catalogue of 1893. Fourth: On pages 185 to 193 are given illustrations of their latest line of ornamental cast iron Hardware. This is known as the Arno design, and is particularly pleasing and appropriate for use in a wide range of buildings. Fifth: On pages 194 to 215 is shown an extensive line of locks and Hardware in the Madras ornamentation, which, although not new, has always since their first introduction of it been exceedingly popular with the trade. Sixth: Attention is also called to the very full line of Hardware of the Alsatian ornamentation, shown on pages 67 to 79, now furnished in cast iron, and which heretofore has been listed only in cast bronze. This new volume is substantial evidence of their policy and intentions as to the business of the Branford Lock Works department. Since acquiring control of this plant the company have steadily sought to raise the standard of the product, intending that in the field of middle grade Hardware it shall be fully equal to the repute so long enjoyed by the Yale products in the field of fine Hardware. To assist in this, they are making extensive changes and improvements in the Branford plant, as well as adding constantly new and attractive articles to its line of products, which latter will be duly announced as completed. Their business in both lines of products is conducted jointly through the branch houses in New York, Chicago, Philadelphia, Boston, Buffalo and San Francisco, directed from the general offices, No. 280 Broadway, New York.

We have received from the National Lead Co., No. 1 Broadway, New York, two entertaining monographs, in which the value of the information contained is equalled only by the handsome form in which it comes. These are entitled: "Red Lead and How to Use It: Permanent Protection of Iron and Steel: Made Certain by Red Lead, Linseed Oil and Proper Application;" and "Concerning Babbitt or Anti-friction Metals." Each is a plain but thoroughly scientific treatment of the subject named, and a glance will show has been prepared by a writer who has a most minute knowledge of the theme treated. In introducing the pamphlet last named, the company say: "This pamphlet is intended for the consumers of Babbitt and Anti-friction Metals. Our object in issuing it is to come into direct contact with and interest the users of lining metals, engineers, machinists, engine builders, etc. We consider that it will be advantageous both to the trade and ourselves to bring this about. The consumer will be benefited by obtaining at reasonable prices alloys which are scientifically prepared to fill every requirement, and which we guarantee to be perfectly satisfactory (if properly treated) when used as directed. We are making a superior line of anti-friction metals and selling them at prices which are as moderate as is consistent with the cost of the metals entering into their composition. By direct communication with the consumer, we cannot only better inform ourselves what alloy will prove most suitable for his needs, but will be in a position to know that he is only charged a fair price and that the composition of the metal is not misrepresented. Our brands vary in price according to the cost of the metals used in their manufacture, and we do not wish our low-priced goods to be sold to the consumer at an exorbitant profit."

Either of these little books will be sent upon application.

"Ice Skates" is the taking and self-explanatory title upon a little book just received from the Union Hardware Co., Torrington, Conn., and New York. It is their full illustrated price list for 1895, and shows very attractive cuts of their well known lines of these goods. In a note the company say: "For 1895 we are making same general line of men's and women's Skates as we have used so successfully for the past six seasons. We have made improvements by using toe braces and adding a knurled nut to our adjusting screw. All of our Skates are carefully mated, inspected and packed. The material which we use is of the highest grade which can be obtained, and we devote the best of oversight to our work. Our aim is to retain the reputation of making superior Skates. Our Ice Skate Telegraph Code will be furnished to our customers upon application."

"The Advance Courier" from the Relay Mfg. Co., Reading, Pa., just received, is the first announcement that has reached this desk for bicycles for 1896. The company announce that the Relay bicycles for 1896 will be strictly high grade goods, and will consist of the Relay Special, weight 20 pounds, price $100; Relay Model A, 23 pounds, $85; Relay Model B, 25 pounds, $75; Relay Model C, 27 pounds, $65; Relay Ladies', 23 pounds, $90. They say that their new factory will be four times the size of the present one, and will be filled with special new machinery, and they will use a visible ball-bearing, and the patented rear-adjusting fork which has met with such great success during the past two seasons. Their catalogue for 1896 will be ready in December.

Nearly all of the big department stores in New York have aluminum departments now.

The Story of a Pump.

This is not a history of the famous town pump which soliloquized to millions of school children in the old Fourth Reader, but the plain and simple story of an everyday pump, upon the farm of one Brown, presumably in Ohio, or some other State in the West where pumps have taken the place of the well-sweep or pole. The narration is made in poetry, and the illustrations which appear upon each alternate page, convey to the eye the same moral that the text carries to the mind. The poet—who, of course, is an Ohio man—opens his story with a tragic climax at the very start:

'Twas on a wash-day at the farm,
Mrs. Brown was much put out,
For Farmer Brown had gone to town,
And the pump had given out!

Dame Brown worked at the "pesky" thing,
But the water it would not flow—
And the more she work'd at the pump
The harder it seem'd to go.

At this critical point, the good dame ceased operations, awaited the return of her husband, and then proceeded to give him a piece of her mind. In the morning he was up with the sun and at work with the old pump. It was of no use. He met a neighbor who showed him a ray of light by stating that he had a pump which had worked for eight years:

"'What's the name of the pump?' you ask,
You've got me now 'up a stump.'
But look! there the name is on it,
Let's see—yes—it's a MYERS pump.

"And they're made in Ashland, Ohio.
Well, I'll declare!—never was there?
Yes, they are the fellows that took
The first prize at the World's Fair."

Farmer Brown smashed the old outfit; bought a Myers pump; set it at work, and the poet tells the rest:

It really did'nt take them long
To get that pump to working—
It runs so easy, that now at
Pumping there is no shirking.

The old pump was a "hard one,"
But now the farmer's daughter,
A little pretty four-year-old,
Can pump up all the water.

The reader misses the best part of the story, which lies in the illustrations. Those who wish to read the whole story can receive a copy, by writing to F. E. Myers & Bro., Ashland, Ohio.

A Road You Can Write On.

Or a road upon which you can write, or a road you can write about; take your choice! either is true. We are talking about the Lake Shore and New York Central railroads between Chicago and New York. A newspaper man who has to send in "copy" *en route* appreciates it, after traveling all over the United States, when he gets back to a road you can do this on while making 50 per cent. better time than on Western roads which joggle your copy into illegibility.

This is ignoring the luxury of a perfect dining car service, scenery, including Niagara, which is a delight to the eye and an underlying sense of security from the consciousness of a block system which may make the difference to you between existence here and "kingdom come."

Safety, speed and comfort; they are all there; and when electricity makes a hundred miles an hour practicable, it is safe to say that the Vanderbilt roads will be in it. The men who are harnessing Niagara have got their eye on improved systems of applying electric power, and nine hours and a half to Chicago are quite within the possibilities of the near future.—*American Grocer.*

Aluminum pens are being extensively manufactured, and are sold as cheaply as the best grades of steel pens. They are hard, durable, and absolutely will not corrode in the ink.

Review of the Markets.

Money: The money market is quiet and no changes of importance have occurred since our last. Cheap money seems to be the order of the day. Offerings have been liberal, but demand has not been very active. Large sums will soon be required in the reorganization of bankrupt corporations, and greater activity is looked for by dealers. Call loans were made from 1@1½ per cent. Time money quoted at 1@1½ per cent. for 30 days; 2 per cent. for 60 days, 2½ per cent. for 90 days to 4 months.

There has been a fair degree of activity for commercial paper, which is worth 3½@4 per cent. for 60 and 90 days' indorsements. Choice single named, 4 months 4½@5, per cent. and 4½@5 per cent. for names less well known. Foreign exchange dull. Rates nominally $4.89 for 60 days, and $4.90 for demand. As indicative of the general monetary situation *Bradstreet's* says there have been sales of $18,000,000 of bonds at the New York Stock Exchange this week, against $7,000,000 last week; 25,000,000 bushels of wheat futures at New York against 17,000,000, and 1,500,000 bales of cotton futures, against 900,000 bales a week ago. New York's bank clearings are 25 per cent. larger than last week, but at Pittsburg the increase is 60 per cent., at New Orleans 50 per cent., Cleveland 51 per cent., Minneapolis 26 per cent., Providence 25 per cent., and St. Louis 18 per cent. larger. Bank clearings at eighty cities in the United States aggregate $885,000,000 this week, 1.5 per cent. less than last week, 19 per cent. more than in the last week of August, 1894, 36 per cent. more than in the like week of 1893, but 8 per cent. less than in 1892, and 21 per cent. less than in 1891.

The condition of the Hardware market is one that shows steady improvement in the amount of business actually transacted. With harvest nearly over, and large crops of all the great staples assured, there comes a quickening of demand in all lines of Hardware, and retailers, jobbers and manufacturers alike are rejoicing at the outlook. The tendency of prices is toward a higher basis, and the advance in iron, both raw and manufactured, is reflected in higher wages. Wire Nails have been advanced 20 cents, contrary to expectations. In many goods no advance has yet been made, and manufacturers are not disposed to hasten higher rates—at least not until they feel assured that prosperity has come to stay for a while, at least. Every indication is in favor of a good trade in all lines during the fall and winter months. Our correspondents in St. Louis, Chicago, and other points report steady increase in demand for all lines, and with a noticeable tendency toward higher rates, especially in heavy Hardware, stoves, cast iron goods, builders' Hardware, etc.

Wire Nails: So rapid has been the advance in iron that the rate for Wire Nails has again been advanced. At a special meeting of the manufacturers held on Tuesday an increase of 20 cents was declared necessary though the trade generally supposed that August rates would prevail for some weeks hence. Press despatches Thursday announced a still further advance in iron, and we will, likely, see a still higher quotation for Nails. Carload lots are now at $2.25 for Pittsburg, or $2.35 for less than carloads. New York price, carloads, $2.40, small lots from store about $2.50. The market is steady, and the demand is good, though there has been, naturally, some falling off. Our Chicago correspondent reports an extremely active demand by manufacturers, and satisfactory orders are entered every day. Jobbers also are busy, and rates of $2.40 for car lots prevail. Pittsburg reports good demand. St. Louis mills are busy and orders coming in a very satisfactory manner.

Cut Nails: We have no advance to note, though it has been the general practice to increase the rate as Wire Nails advance. Quotations consequently remain unchanged, at $2.05 for carloads at Pittsburg, and $2.15 for less quantity. Advices to HARDWARE from Pittsburg, Chi-

Digitized by Google

cago, St. Louis, and other points all indicate active demand.

Barb Wire: Firmly held at the recent advance, and a very satisfactory demand prevails. It is quite likely there will be another advance in prices. Four-point galvanized $2.70 in car lots per 100 lbs; painted, $2.30; in New York, four-point galvanized, $2.85 carloads, $2.98 for less. Our correspondents at Chicago and St. Louis report good demand at firm rates.

Plain Wire: Firm with factories working to their full limit. An advance has been established and $1.75 prevails at Pittsburg for car lots.

Galvanized: About 40 cents higher.

Glass: Is quiet. Purchases are being made as wanted at previous rates. An increase in wages to workers has been agreed upon to take effect September 21st, when new fires will be started.

Rope: Quotations remain unchanged. Demand fair. Manila 6¾@7; sisal, 4¾.

Linseed Oil: The Dean Linseed Oil Co. announce following quotations, under date of August 27th: Raw, 45 cents per gallon; Boiled, 48 cents per gallon; Calcutta Raw, 50 cents per gallon.

The prices quoted below are for small lots. Round lots, except Tobin Bronze, can be purchased at lower prices:

Clapp & Co., bankers and brokers, New York, in their weekly letter, say: "Freshly made blood and nerve begin to turn from hill and shore to trade and finance. Summer breezes have been full of fresh hope and courage. Every wheel now anticipates a new burden with which it may enrich its owner. Bushels and bales are returning the store of the golden goddess with a new confidence born of returning values. The United States is entered to win in the autumn races of 1895 The wool clip of 48 States and territories growing wool in 1895 was 294,296,720 pounds, against 325,210,712 pounds last year and 348,538,138 pounds two years ago. Bessemer pig iron has nearly doubled in value since low panic point, because of the stoppage of ore supplies in the Marquette region. It is estimated Great Britain's railway system earned 3.77 per cent. on its capitalization during the past year, or a net revenue of $185,000,000. Atlanta's Exposition will open September 18th, on the very spot from which General Sherman shelled the city 31 years ago. America has 68,403 post-offices. The immigration to this country in July was 28,133 against 17,889 in July, 1894. The Railway Ferry, carrying 28 cars from Peshtigo, Wis., via Lake Michigan to Chicago, a distance of 260 miles, is pronounced a success. September 2nd was Labor Day in 30 States, the other States having a Labor Day observing it on different dates. The production of gold in the United States during the first seven months of 1895 was likely double the net amount exported. Gold exports the last five weeks were about 15 per cent. smaller than those of last year same time. Net gold exports January 1st to September 1st were $25,554,275, and for 1894 same time $71,066,948."

THE MINNEAPOLIS TRADE.

Slight improvement in trade; a better feeling all round; good crops assured; fair prices expected, and everyone that has kept his head above water the past two years or more in the Northwest is quite happy at the prospect. The retail dealers in the Twin Cities will realize this later in the fall and next year more than now, while the jobbers are all very busy in all lines. Great activity in railroad shops repairing and building new cars to handle the enormous grain crop. The general advance in prices on all kinds of Hardware shows the satisfactory condition of affairs throughout the country at large. It is comparatively easy this year to realize the advances. Customers expect it and do not murmur generally. In driving about the city we notice a great deal of building; really more than the past two years put together; a good many apartment houses under way; no good modern houses for rent. The laboring class as a rule is well employed in all lines.

W. K. MORISON & Co.

THE CLEVELAND TRADE.

The business during August has not shown the amount of increase that was to be expected. Although values have continued to advance and seem to be well sustained, yet the consuming trade have not responded, and the demand which is so apparent in the market is mainly from large dealers who are stocking up, in anticipation of a better demand later.

We have no doubt that this demand will surely come, although in this immediate vicinity, we do not look for as large an increase in business, as in other sections that have been more favored in the matter of crops. We have been having copious rain during the last three weeks, but during that time the grain crops were maturing, a large section of country in this vicinity was without needed rain.

Fortunately, the State of Ohio is so diversified in its product and manufacture that the failure of any one individual industry does not affect the state as a whole, and we will therefore hope to share in the general prosperity of the country by distributing to those regions that are more favored in the matter of crops, the products of Ohio's workshops. A further advance in Nails has been announced, covering deliveries for the month of September. Wire has also advanced, and the prices are well sustained.

There seems to be a disposition all along the line to get better prices, and with the exception of a few commodities the advances that are demanded, are not unreasonable. As long as this is the case, we look upon the condition as favorable, but when an effort is made to drive prices higher, there will naturally be a reaction.

We hope to be able to report to you favorably during the the entire Fall, as regards business conditions.

THE MCINTOSH-HUNTINGTON CO.

THE PHILADELPHIA TRADE.

Vacations are at an end, and familiar faces are once more seen in stores and offices, and it is very noticeable that they reflect a much more hopeful feeling.

The prices for August have been very satisfactory, showing a volume of sales largely in excess of the same month last year, and all indications point to a good fall trade which may reasonably be expected to greatly exceed last year. Already all commodities, such as Iron, Steel, Cotton, Wheat, etc., are higher, thereby enabling the different sections of the country where these goods are produced, to purchase more freely and to dispense with the hand-to-mouth policy which has characterized business for the last two or three years.

Prices are still on the move upward, but with the exception of Nails, there does not appear to be any advance which could be called sensational. The Nail manufacturers claim that this charge cannot even justly be applied to their advance, and we have positive inside information that orders have been placed for Wire Rods at an advance of nearly 50

Digitized by Google

per cent. over old prices, so it can readily be seen that a large part of the advance in Nails is justified by the advance in material alone. It can certainly be said that as a rule manufacturers of general Hardware have pursued a very conservative course, and their advances, in most cases, have been very moderate; so much so that it is freely predicted that we have only seen the beginning of higher prices, and the next sixty days will bring many further advances which there is no doubt of maintaining.

During the past few days manufacturers of Locks have advanced prices on their entire lines, while all large makers of shelf goods have issued, or are about to issue, new discount sheets covering their entire line showing a general advance.

As we are nearing the end of the Bicycle season, a review is timely. The season for 1895 has been the most marked in the history of the Bicycle business, and it is safe to say it has been many years since a similar shortage has been witnessed in any of our lines. This shortage amounted to practically famine, and as is generally known it was absolutely impossible, during a large portion of the spring, to fill any orders promptly, and those who had been haggling over low prices in the early part of the season and deferred making arrangements, were only too glad to pick up supplies at very much advanced figures. There seems to be a prevailing opinion that Bicycles should be lower next year, but this is very far from being justified by the facts. As it stands to-day, a practically first-class Bicycle can be retailed for about $80, while a very good machine can be sold at retail for $60. It must be remembered that a stock of Bicycles counts up into money very quickly, and the retailer cannot be expected to handle this line except at a fair profit, and by the time the retailer gets his profit and the jobber his commission, the net price resulting to the manufacturer is not excessive. It is also to be remembered that almost all material entering in the manufacture of Bicycles has advanced, and advanced largely, and we have positive and credible information that it costs from $3 to $5 extra to make Bicycles for 1896. It is not likely, therefore, there will be any reduction in the price of Bicycles for the next year; on the contrary, prices are apt to be somewhat higher, as the demand is constantly for a good machine at a medium price, and consumers must realize that when they want a machine weighing only from 21 to 25 pounds, and expect it to carry from 150 to 175 pounds weight over all kinds of roads and through all sorts of weather, it is necessary that it should not only be made of the best materials, but also made in a thorough manner; and as life and safety depend upon a machine being thoroughly reliable, it certainly seems the height of folly to risk both for the small difference in price between a reliable and an unknown and untried machine. BIDDLE HARDWARE CO.

THE GRAPHITE TRADE.

August sales do not show so widely distributed a percentage of gain as the sales for the previous month. Crucible orders were far in excess of the orders for the general line of Graphite productions. Stove Polish comes up well to the front; then Pencils, Lubricants and sundries. Now that schools are paying more attention to drawing, and to the use of pencil and paper in general work, instead of the slate pencil and slate, the effect is more noticeable to the pencil manufacturer. There is nothing at this writing to which special attention can be called. General business is good, with orders from all quarters and representing healthfulness in all the prominent industries of the country, but with a disposition to secure the best goods at close prices. Collections cause no trouble.

JOSEPH DIXON CRUCIBLE CO.

Electric Hardware Mfg. Co., New York City, incorporated. Stock, $45,000. To manufacture and sell magnetized hairpins, magnetizing boxes, etc.

Scandinavian and Special Padlocks.

An association has been formed by the padlock manufacturers of Lancaster, Pa., for the purpose of putting the market for Scandinavian and Special Padlocks in a more satisfactory condition, than has obtained for some time past. The manufacturers who have thus associated themselves are E. T. Fraim, the Slaymaker-Barry Co., the Union Lock & Hardware Co., and D. F. Buchmiller. As the trade well understands, there has been very lively competition among the manufacturers, with the result of not only forcing prices down below a normal level, but also a deterioration to more or less extent of quality of some of the lines concerning which competition is most pronounced. The manufacturers above named have had several conferences, and finding that all were disposed to work in harmony for the good, not only of the manufacturers but of the trade at large, this association was the outcome. The cost in the production of goods and the general upward tendency of the market, has compelled an advance in prices, and all the former quotations have been withdrawn. It is thought by those most interested, that this new arrangement will not only result in an improvement in the quality of the goods, but will remove all cause of friction, and place this entire important line in a better condition in many regards.

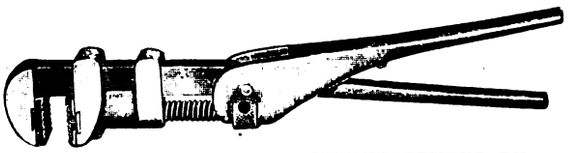
The White Mountain Freezer Co.

The White Mountain Freezer Co., Nashua, N. H., are engaged in building an important addition to their plant. This is a new storehouse, situated southeast of their present buildings, and it will be one of the largest and best storehouses in that city. The new building is 70x118 feet, three stories high, and built of brick. It is strongly and substantially built, and when finished, will hold a large amount of goods. The contract calls for its completion by October 15th, and judging from present progress, the building will be ready on time. L. F. Thurber, the manager, states that the new building will tend to an increased business by the company. Mr. Thurber says: "The nature of our business is such that the rush comes in the spring and summer. At this time of the year we are not able to manufacture our goods fast enough to fill our orders. This means that to supply our trade we have to carry a very large reserve stock. Our business has been increasing each year and we have found it impossible to do without more storage room for this reserve stock and consequently this new storehouse is being built."

The Cold Handle Iron Co.

A meeting was held in New York on September 4th, at which the Cold Handle Iron Co. was dissolved by mutual consent. This was composed of the Enterprise Mfg. Co., Philadelphia, Pa.; Bless & Drake, Newark, N. J.; Cleveland Foundry Co., Cleveland, Ohio; and A. C. Williams, Ravenna, Ohio. While the relations of all concerned have been harmonious, it was thought best, in view of the condition of the market in this line, to discontinue the association.

The weight of a cubic foot of cast aluminum is 159 pounds. Brass is 524, copper 558, wrought iron 480 and steel 490. Platinum is over eight and one-half times as heavy as aluminum, gold is nearly five times, and silver four times as heavy, while iron or steel is only three times as heavy.



The Butte Hardware Co., Butte City, Mont., has decided to go out of business. It has been in existence since the early days of the camp. The competition of late years has been so sharp that the margin of profit has been cut to such a point that the company concluded not to remain in the market.

RETAIL TRADE RECORD.

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Hardware Stores.

Andover, Mass.—Wm. Driscoll.
Ann Arbor, Mich.—F. S. Abbott.
Braidentown, Fla.—W. C. & G. H. Watts.
Bridgeton, N. J.—Brooks & Nicholson.
Dalton, Pa.—Rice & Davis.
Decatur, Ala.—William Tucker.
Fenton, La.—S. J. Fenton & Sons.
Fiskdale, Mass.—J. S. Woodhull.
Glasford, Ill.—Charles Lang.
Hibbing, Minn.—T. H. Lees.
Holly Springs, Miss.—Wall & Jones.
Tannersville, N. Y.—Frank Allen.
Terre Haute, Ind.—Edgar Dick.
York, Pa.—L. S. Cladcover.

Record of Changes.

Afton, Iowa.—George M. Violet, Hardware, reported as having gone out of business.

Alexis, Ill.—Bailey Bros., Hardware, etc., reported as having dissolved partnership.

Allentown, Pa.—E. M. Jacoby, the Hardware dealer, at No. 40 North Second Street, has sold out to Daniel Roth & Bro.

Anoka, Minn.—Bean & Guderian, Hardware and stoves, reported as having been succeeded by M. V. Bean.

Argentine, Kan.—W. F. Lucas has sold his Hardware store at the corner of Third and Metropolitan Avenues to McCaslin & Wilson.

Aurora, Ill.—Supervisor T. N. Holden has retired from the firm of Kendall & Holden, Hardware dealers.

Broadlands, Ill.—G. A. Astell, Hardware, etc., reported as having sold out.

Chula, Mo.—Owens & McGee, Hardware, reported as having been succeeded by F. P. McGee.

Columbus, Ga.—Estes & Abbott, Hardware, reported as having dissolved partnership.

Cummings, N. D.—M. T. Forthum, Hardware, reported as having been succeeded by John Munroe.

Dartmouth, N. S.—James Simmonds & Co., Hardware, G. E. Smith retires.

Eau Claire, Wis.—Thomas Kemp, Hardware, stoves, etc., reported sold to Enos Fisher.

Elbow Lake, Minn.—O. L. Lundberg & Co., Hardware, etc., reported succeeded by F. A. Johnson Co.

Santa Rosa, Cal.—C. E. Haven has purchased the Westrup Hardware stock, and will continue the business at the old stand.

Sheboygan, Wis.—H. H. Miller has sold his Hardware store on Michigan Avenue to C. Zelle and Joseph Trilling.

South Weymouth, Mass.—M. L. Loud & Co., the new Hardware firm, have purchased Stewart & Howe's business. Mr. Stewart will be in their employ, Mr. Howe retiring.

St. Joseph, Mo.—O. M. Spalsbury has sold his Hardware establishment at Eighth and Locust Streets to August F. Devorss.

West Duluth, Minn.—R. J. Fenton has sold his Hardware store to Wieland & Wade, a firm consisting of Theodore F. Wieland and Frank H. Wade.

Improvements and Removals

Dubuque, Iowa.—John Ernsdorff & Son, Hardware merchants, have purchased a lot on the corner of Main and Jones Streets on which they will begin immediately the erection of a five-story building.

Kaukauna, Wis. — Lemke & Wittman, Hardware merchants, are building a tin room to their establishment on Wisconsin Avenue. It will face the latter named street, being eleven feet front and forty-two deep.

Seneca Falls, N. Y. — Cary's Hardware store has been removed to the apartment in the Pew block, lately occupied by W. J. Peck.

Stevens Point, Wis.—The Hardware firm of C. Krembs & Bro. will occupy their new building in a short time. The building was erected at a cost of $10,000 and is said to be one of the most complete of its kind in the State.

Sullivan, Ohio. — Frank Geissinger has moved his Hardware into his new store.

Wichita Falls, Tex.—C. E. Pesterfield, Hardware, reported to have removed business to Itasca, Tex.

Williamsburg, Pa.—Metz Bros. are busily engaged in enlarging their Hardware store and making other alterations in their blacksmith shop.

Wilmington, Del.—The Delaware Hardware Co. have contracted with the A. S. Reed & Bro. Co. for the erection of a new store at the corner of Second and Shipley Streets; the building will cost about $6200. The new structure will cover the entire lot—52 feet on Shipley and 54 feet on West Second Street—and will have a floor space of 2808 square feet on each floor, or a total of 14,040. It will be five store high, including a basement. The walls will be eighteen inches thick and will be capped with heavy galvanized iron cornices.

Business Embarrassments.

Bath Beach, N. Y.—W. E. Johnson & Co., Hardware, etc., reported to have made an assignment.

Blair, Neb. — J. H. Stewart, Hardware dealer, failed.

Burlington, Vt.—The Ranson Hardware Co., filed its petition in insolvency.

Fair Play, Mo. — Charles M. Breeder, Hardware, has made an assignment.

Horton, Kan.—D. A. Palmer, Hardware dealer, has assigned.

Mechanicsville, N. Y.—Bunce & Cady, Hardware dealers on Park Avenue, have made an assignment.

Milwaukee, Wis. — Herman Gallun, the Vliet Street Hardwareman, has made a voluntary assignment to Frederick Knockenhauser, who gave a bond of $1000.

Orange, Mass. — Frederick P. Carruth, Hardware dealer, has assigned. Liabilities, $23,000; assets, $12,000.

Owatonna, Minn.—John T. Clark, dealer in general Hardware, has made an assignment to George R. Kenyon, cashier of the First National Bank.

Union, Iowa.—Huneston & Van Vorhis, Hardware dealers, of this city, have failed.

York, Pa.—J. F. Rohrbach, Hardware dealer, has faield for $20,000.

Burglaries in Hardware Stores.

Benton Harbor; Mich. — Wentworth's Hardware store, $150.

Centralville, Mass.—Rollins & Son, $12.

Ceres, N. Y.—Hickok & Cole, $100.

Constantine, Mich. — Bliss' Hardware store, $30.

Davison, Mich.—T. Hurd & Co., cutlery.

Florence, Wis.—E. P. Langesin, $150.

Golden, Col.—J. H. Linder & Co., $150.

Grand Forks, N. D.—Whitney's Hardware store, $200.

Greenwich, N. Y.—Hiram C. Hill, $200.

Hillsdale, Mich.—George Gardner, $200.

Lima, Ohio,—J. J. Ewing, $100.

Norway, Mich.—Chas. Trieber, $600.

Orrville, Ohio.—J. F. Deas & Son, $300.

Ottumwa, Iowa. — George Haw & Co., $100.

Red Cloud, Neb.—W. W. Wright, cutlery.

Staplehurst, Neb.—Herman Meyer, $60.

Vera, Ill.—Hoffman Bros., $200.

Waverly, Ohio.—Chas. F. Smith's Sons, $300.

Winchester, Ind.—C. E. Magee & Son, $100.

Fires in Hardware Stores.

Barkers, N. Y.—Jesson Bros., Hardware, reported burnt out. Fully insured.

Chafee, N. Y.—R. L. Willis, Hardware, burnt out. Not insured.

Clayton, N. Y. — Atwood Bros., Hardware, reported burnt out.

Clinton, N. J.—A. K. Smith, Hardware, fire loss of $3000, with some insurance.

Cook, Neb.—John Mastalka's Hardware store burned. Loss, $4600.

Corunna, Iowa.—The Hardware store of Milo Thomas has been burned.

Hoosic Falls, N. Y.—Wattrous & Rilleys, Hardware, corner Church and Classic Streets, burned out. Loss, $6000.

Kenton, N. J.—A. K. Smith, stoves and Hardware, store damaged by fire. Loss on building, $5000; insurance, $4000.

Lockport, Ill.—O'Connell & Sloane, Hardware, store burned.

Melrose, Iowa.—J. Mullins, Hardware, fire loss of $4000. Insurance, $1800.

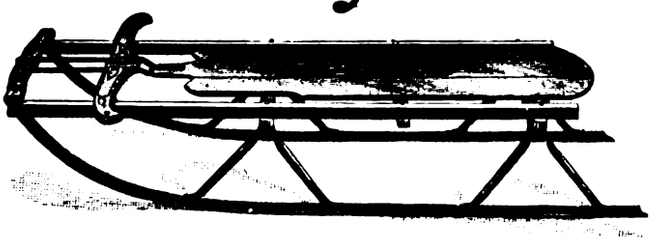
Muskegon, Mich.—Bosema & Bolt's Hardware store destroyed by fire.

Pittsburg, Pa.—Henry Swift, Hardware, No. 612 Fifth Avenue, destroyed by fire.

Pittsburg, Pa.—J. Morrison, Hardware store, No. 616 Fifth Avenue, destroyed by fire.

Rockville, Conn. — Parker & Barber's Hardware store has been burned. Loss, $10,000; insurance, $7200.

Somerville, Mass.—Whitney & Snow's Hardware store has been damaged by fire. Slight loss.



Washington, D. C.—The Hardware store of James B. Lamb has been damaged by fire.

Waukegan, Ill.—Lake Zurich Hardware store burned. Loss, $5000.

Wauwautosa, Wis.—C. S. Walters, Hardware store on State Street, damaged by fire.

"Flexible Flyer" Sleds.

SLEDS have been made the same style for many, many years. About the same shape too, and length, width and height. About the same speed and safety. But now in the very last decade of the Nineteenth Century the "FEXIBLE FLYER" comes along, and the world to-day has a Sled lighter, stronger, handsomer, speedier than ever before, and one that can be steered by a touch of the hand. It avoids dangers, saves shoe leather, pleases the boys and the girls and the grown folks. Its ease of management and its many fine qualities are little short of marvellous. Easy to sell as soon as known. The dealer who first handles them adds to his profits, to his satisfaction, and to his reputation.

STERLING CYCLE WORKS,
236-240 Carroll Ave.,
CHICAGO.

The Elizabeth Tin-Plate Co. have organized and purchased a tract of land, 200x1000 feet, at the foot of Florida Street, Elizabeth, N. J., and will erect at once a large brick building, which will be completed, it is expected, by November 1st. From this 2500 boxes of tin will be turned out every week. The capital stock is $150,000. The president is Dr. T. Edwards, of Newark. Colonel Bacon, of New York, is vice-president, and H. A. Pritchard, of Elizabeth, N. J., secretary.

The Ely Hoe & Fork Co., of St. Johnsbury, Vt., will rebuild. Their new plant will be a building 45x213 feet, and will be completed about October 11th.

Situation Wanted.

WANTED—In a wholesale Hardware house a position as city or house salesman, by a young man thoroughly familiar with builders' Hardware. Best city references. Address A. H. A., No. 130 West Fifty-ninth Street, New York.

BICYCLE TRADE RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Companies, Stores, Etc.

Brooklyn, N. Y. — Charles Schwalbach, formerly manager for Gormully & Jeffery, bicycle manufacturers, has gone into the bicycle business for himself, leasing the summer garden on Flatbush Avenue, adjoining the McLachlen Hotel.

Denver, Col.—The Colorado Cycle Supply Co. is reported organized.

Eau Claire, Wis.—Herman Schlegelmilch, Hardware, is preparing to take up the manufacture of bicycles.

Fond du Lac, Wis.—The American Metallic Packing Co. have decided to commence manufacturing bicycles, and will establish a factory at Fond du Lac.

Freeport, Ill.—The Henney Bicycle Co. has been incorporated by J. W. Henney, O. P. Wright, H. R. Nelson and J. A. Woods, to manufacture bicycles. Capital stock, $10,000.

Janesville, Wis.—The Janesville Machine Co. is reported to have decided to go into the manufacture of bicycles next year.

La Crosse, Wis.—W. B. Medary, bicycles, appointed agent for the Syracuse Cycle Co.

Lake View, N. Y.—The Idlewood Bicycle factory is completed, and the Queen City Co. will put in the necessary machinery at once, and give employment to one hundred men at the start. They are now working day and night forces in Buffalo, with fifty men.

Lockport, N. Y.—A movement is on foot, looking to the establishment of a bicycle factory here.

Marinette, Wis.—Peter Sandlund & Co. is the name of a firm newly organized, having for its object the manufacture of bicycles.

Milwaukee, Wis.—Chief Cycle Mfg. Co. has been incorporated.

Milwaukee, Wis.—The Meiselbach Mfg. Co. has commenced manufacturing bicycles, under the management of A. D. Meiselbach, formerly of the Columbus Cycle Co. of Columbus, Ohio. Walter Lindsay is interested in the enterprise, and announces that 20,000 wheels will be built during the coming season.

Montville, Conn.—Parties are organizing a company for the purpose of manufacturing bicycles.

New London, Conn.—A. J. Gould, No. 5 Washington street, is reported to be contemplating the establishment of a bicycle factory.

New York, N. Y. — The Stanley Cycle Mfg. Co. has been incorporated by Leo Schlesinger, No. 129 Crosby Street, Silam Franklen, and Leopold Stearnes. Capital stock $100,000.

New York, N. Y.—The Tinkham Cycle Co. has been incorporated, with a capital stock of $100,000, to manufacture bicycles and Carrier tricycles. The new company will have exclusive sale in New York City, Long Island and the metropolitan district, of the Stearns bicycles, and will succeed to the business of the Bidwell, Tinkham Cycle Co., Nos. 306 to 310 West Fifty-ninth Street. Branch houses will be maintained at No. 20 Warren Street, No. 1213 Bedford Avenue, Brooklyn, and in other cities. Julian R. Tinkham is president of the new company, Ernest F. Walton is treasurer and general manager; Lloyd McKim Garrison, secretary.

New York, N. Y.—Parkhurst & Wilkinson, manufacturers of bicycle materials, Chicago, have established an eastern branch at No. 95 Reade Street, with J. I. Brandenburg, as resident manager.

Springfield, Mass.—The Indian Orchard Screw Co. is the name of a new enterprise, which will manufacture bicycle fittings. G. O. Gridley, is the manager, and among the parties reported interested are W. S. Lovell, Springfield, Vt., and W. B. C. Stickney, Bethel, Vt. The factory will employ twelve hands at first, and will increase the capacity as business warrants.

Toledo, Ohio.—The Union Mfg. Co. have taken up the manufacture of bicycles, making the Viking, a high grade wheel.

Toledo, Ohio.—The Toledo Mfg. Co. has been incorporated by J. R. Ransom and others, to manufacture bicycles. Capital stock. $50,000. A factory building is to be erected on Oakwood Avenue.

Waltham, Mass.—Messrs. Thompson and Howe, of the Orient Cycle Co., are reported to be organizing a new company, with a capital stock of $300,000, to manufacture a new bicycle, to be of the highest grade, the name of which has not yet been decided upon. A new factory is to be erected, three stories in height, 180x27 feet. Employment will be given to one hundred hands.

Youngstown, Ohio. — Steps are being taken, looking to the organization of a bicycle company, to manufacture bicycles.

Changes and Removals.

Allentown, Pa. — The Wetherly Bicycle Works are reported to have been sold to J. C. Sendal.

Asheville, N. C.—Penniman Bros., Hardware, bicycles, etc., reported succeeded by Penniman Bros. & Co.

Birmingham, Ala.—The Iron City Cycle Co. is reported to have sold out its business to the Loosely Cycle Co.

Hayward's, Cal.—Rahr Bros., bicycles, reported as having gone out of business.

McMinnville, Tenn. — The McMinnville Hardware Co. sold an interest in the business to William Biles, formerly of Nashville, Tenn., and bicycles will be taken up. Propositions from manufacturers of wheels and sundries invited.

Minneapolis, Minn. — Bird & Spencer, manufacturers of bicycles, reported to have dissolved.

Newark, N. J. — The American-Dunlop Tire Co. is reported to have decided to establish its manufacturing plant in Newark.

Ontario, Cal.—Williams Bros., bicycles, reported to have admitted F. Hatch, to partnership.

Paterson, N. J.—Snider Mfg. Co. bicycles, reported moved to Newburg, N. Y.

Shreveport, La.—Buckalew & Pleasants, Hardware, bicycles, etc., have been succeeded by Buckalew, Curry & Warren.

New Goods and Improvements.

Brooklyn, N. Y.—The Montauk Bicycle Co. are having plans prepared for the erection of a bicycle factory on Flatbush Avenue and Sterling Place, to cost $15,000.

Buffalo, N. Y. — C. Hermeril is making preparations to erect a two-story brick factory, at No. 195 Herman Street, to cost $1,000.

Buffalo, N. Y.—Queen City Cycle Co. is having an addition erected to its present factory building.

Chicago, Ill.—The Monarch Cycle Co. has recently placed a contract for additional 300-horse power boiler.

Cleveland, Ohio.—The Hoffman Bicycle Co. have given out a contract for the erection of new factory building.

Goshen, Ind.—The Ariel Cycle Mfg. Co. has certified to an increase of its capital stock to $80,000, and will add new machinery, and largely increase the capacity of its present plant.

Hartford, Conn.—The Pope Mfg. Co. has been given a building permit for the erection of a three story brick factory building, 103x63 feet, with wing same size 18x32 feet. Another wing on the north side, will be two stories high.

Norwich, Conn.—The Hopkins & Allen Mfg. Co., bicycle manufacturers, commenced the erection of additional factory building.

Peoria, Ill.—Rouse, Hazard & Co. manufacturers of agricultural implements and bicycles, commenced preparations for the erection of a new factory, two-stories and basement, 60x280 feet, and 300 hands will be given employment.

Pittsburg, Pa.—The Bicycle Stand Co. Eisner Building, is putting on the market an improved wheel rest, which is designed to allow a bicycle to stand without other supports.

Thompsonville, Conn.—Work on the new bicycle factory building, for the Lozier Co. is being pushed rapidly forward. A large force have commenced work, manufacturing tools for use in making bicycles.

Torrington, Conn. — The Eagle Bicycle Mfg. Co. have awarded contracts for two new factory buildings, each two stories high, 150x40 feet. Construction will be completed by November 1st, and the capacity of the plant will be increased to 25,000 bicycles a year.

Recent Fires.

Boston, Mass.—O. J. Faxon & Co. manufacturers of the Puritan bicycle, stock damaged to the extent of $500, by fire and water.

Boston, Mass.—Fairbanks Wood Rim Co. manufacturers of wooden bicycle wires, fire loss of $1000.

McKeesport, Pa.—W. J. Mead, bicycles, store destroyed by fire.

Trenton, N. J.—Overton & Hawkins, bicycles, damaged by fire; covered by insurance.

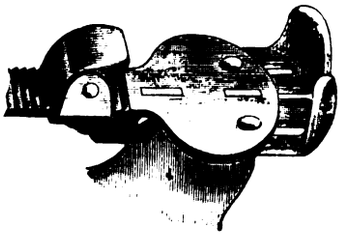
PECK & SNYDER'S NEW AMERICAN CLUB SKATE.



Peck & Snyder's NEW AMERICAN CLUB SKATE for 1895 has revolutionized the art of skate making. New American Club represents an entirely new heel clamp that will fit any heel instantaneously. The old method of clamping to the heel is entirely don away with. It cannot slip, is stronger, acts instantaneously, no screwing or adjusting necessary, saves time, and is without question the most perfect heel clamp ever invented.

MADE IN FIVE GRADES.

Peck & Snyder's New American Club Skate is the most perfect skate ever constructed. It has simplicity of adjustment, solid foot plates, solid heel clamps, and will fit any heel.

The Clasps Cannot Slip. Sure Grip. Thumb Screws and Sets entirely disregarded. It is Light, Handsome, and Twice as Strong as the old club skate.

HERE'S THE NEW CLAMP.

Ask your jobber to show you samples of the **"New American Club."** If he doesn't carry them, send direct to us for samples and prices. Handsomely illustrated catalogue of this skate mailed on application. Address

PERSISTENT

Enterprising people are beginning to learn the value of advertising the year round. The persistency of those who are not intimidated by the cry of "dull times," but keep their names ever before the public, will surely place them on the right side in the end. Think over the persistent advertisers you know.

Just What Every Manufacturer Wants!

The Reference Book

OF THE

Hardware and Kindred Trades of the United States and Canada.

THE Book contains, in the most condensed and convenient form possible, the Names and Ratings of all firms in the following Trades in the United States and Canada:

Hardware Dealers.
Dealers in Sporting Goods, Bicycles, Firearms, &c.
Agricultural Implement Dealers.
Stove Dealers.

Sent (Postpaid) on Receipt of

TWO DOLLARS.

CERTAIN marks are printed after each name, showing the line or lines of goods handled.

The work is complete, condensed and convenient, and will be found especially desirable in sending circulars, on account of the street numbers. The ratings enable the user to select names of any specified rating or over that may be desired.

In cities the lists are classified—Hardware dealers all in one condensed list, Stove dealers in another, etc. In most cases, in the Hardware list, are specified the special kind of Hardware handled, as Shelf Hardware, Cutlery, etc.

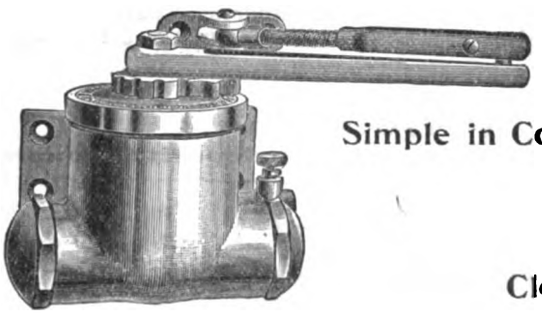
BEST AND CHEAPEST
STONE WATER FILTER
ON THE MARKET.
Tripoli Stone Block System.

Set up ready for use. There are two crocks, each of four gallons capacity—an upper one holding the Filter Block, and the lower one, which can be used as a water cooler if desired. This Block is four inches in diameter by the same in height, and is hollowed out on inside. This fits on a metal tube, which fastens by means of a nut to bottom of Filter Jar. Block can be lifted off tube, cleaned and replaced in two minutes, and with no trouble at all. Water passes from outside of block, through the walls, into the hollow chamber, and from thence, by the means of the Drip Tube, into the lower receptacle.



The Finest Piece of Salt Glazed Stoneware Ever Offered the Public.

YOUNG business man, over four years' experience in ornamental iron and builders' Hardware lines. Best recommendations from two popular New York firms. Address Michael Hoffman, No. 39 East 106th Street, New York City.

THOROUGH business man of wide experience, desires immediate engagement. Location not essential. Can fill any position in a wholesale and retail house. Full particulars by addressing J. B. B., Box 192, Caldwell, N. J.

A POSITION as shipping Clerk. Has had experience in the Hardware trade. First-class references will be given. Address F. N. W., care HARDWARE, No. 143 Chambers Street, New York.

A PRACTICAL brass, iron and metal founder seeks position as foreman, superintendent or otherwise. Thoroughly up on the economical production of castings and the handling of help. Good all around mechanic. Address Energetic, care HARDWARE, No. 143 Chambers Street, New York.

A MAN of 30 is open for engagement. Has had thirteen years' experience in the retail Hardware trade, having served in every capacity, and has a thorough knowledge of the business, including builders' Hardware. Address J. B. B., Box 192, Caldwell, N. J.

Side Line Wanted.

WANTED by traveling salesman for a large Hardware house, a side line of pocket cutlery, scissors, etc., visiting New York towns and cities. Address L. K. Wadsworth, South Butler, Wayne County, N. Y.

FOR SOUTHERN TRADE.—The undersigned, representing cutlery manufacturers, and making frequent visits to all the principal cities of the South, would like to represent some manufacturers of Hardware also. G. A. Seaver, No. 2717 Chestnut Street, New Orleans.

Side Line Offered.

WANTED—Salesman to handle as a side line, a first-class line of pocket cutlery and scissors, paying good commission, to retail trade in New York State, Pennsylvania and Ohio. Address L. M. N., care HARDWARE, No. 143 Chambers Street, New York.

WANTED salesman to handle as a side line a first class line of Pocket Cutlery and Scissors, paying good commission, to retail trade in New York State, Pennsylvania and Ohio.. Address R. S. T., care of HARDWARE, No. 143 Chambers Street, New York.

SALESMEN, to sell a patented staple specialty which is as great a success as it is a seller. Good commission. A splendid side line for the Hardware, household and kindred trades. Season now on. Address Gibbs Mfg. Co , Canton, Ohio.

SALESMEN that canvas the retail Hardware trade in New York, Pennsylvania, Ohio, Michigan and Indiana, and want a good side line, address, stating territory covered and class of goods now selling, "Side Line," office of HARDWARE, No. 143 Chambers Street, New York.

WANTED salesmen having established trade with jobbers and large retailers to sell on commission a line of patented and well-known night latches. Address, giving names of towns visited, with references, "Latches," care HARDWARE, No. 143 Chambers Street, New York.

WANTED—Traveling salesman to take a good line of white metal spoons and forks and other novelties as a side line on commission. Call or address M. L., Room 1, No. 221 Fifth Avenue, Chicago, Ill.

SALESMEN wanted to sell patented staple specialty to the Hardware and grocery trade. Large commission. R. Givens, Corpus Christie Tex.

WE want traveling salesmen to carry as side line direct to retail trade, on commission basis, our line of Wire Hangers for garments. Commission liberal. Further particulars by addressing Barber-Koenig Mfg. Co., No. 115 North Vine Street, Hazleton, Pa.

SALESMEN wanted to introduce and sell our new ratchet shutter bowers to the Hardware and house-furnishing stores throughout the country. A good commission paid and exclusive territory given. Sample free. Write for particulars. Walter Smith & Co., Juliustown, Burlington County, N. J.

Agencies for Hardware Specialties Wanted.

AN old-established firm of advertising agents and contractors in the city of London, England, doing business with the leading advertisers of the United Kingdom, are open to accept sole agencies for the United Kingdom for embossed steel or enamelled iron goods, which are suitable for large advertisers, or any novelty in the advertising line for inside or outdoor exhibition. Apply by letter to C. A. H., Room 25, Times Building, New York.

EXPERIENCED cutlery and Hardware salesman, about to locate in San Francisco, wishes to correspond with manufacturers in those lines, with view to representing them on the Pacific Slope. Address Rhoads, care HARDWARE, No. 143 Chambers Street, New York.

Export Agency Wanted.

GENTLEMAN of wide experience and undoubted integrity will shortly remove to Germany, and desires to represent American manufacturers abroad. Propositions may be addressed to "Export," care W. H. H. Hull & Co., Tribune Building, New York.

Business Opportunity.

WANTED—An active, energetic young man who can command from $5000 to $8000 capital to enter into a co-partnership with an old established company. He will be wanted to take care of the finances of the company, and attend to the office business. This is an unequaled chance, and to the right man will present an opportunity that will be very valuable. Address XX, care HARDWARE, No. 143 Chambers Street, New York City.

Patent for Sale.

FOR SALE: One-half or whole of United States and Canada patents, recently allowed on the only Adjustable Ratchet Monkey Wrench now made. Demand great. A big winner. Address Owner, No. 231 S. Lincoln Street, Chicago, Ill.

For Sale.

FOR SALE—In one of the best manufacturing towns in Ohio, a stock of Shelf and Builders Hardware, Paints, Oils, and Agricultural Implements; stock will invoice $17,000 to $19,000; clean and in good shape. Store does a business of $40,000 per annum. Apply to T. B. Rayl Co., Detroit, Mich.

FOR SALE in Philadelphia, Pa., the Lease, Goodwill and Fixtures of the old established House Furnishing and 5 and 10 cent store at No. 127 North Eighth Street. This is cream of location; and if you are looking for such a store this is one of the few opportunities. Address E. Frey, No. 127 North Eighth Street, Philadelphia, Pa.

A FOUR-HORSE Power Gas Engine, in good running order; now in use by us at our stores. Edward Darby & Sons, 233 Arch Street, Philadelphia, Pa.

For Sale or Rent.

A NEW, large manufacturing plant, hitherto used in manufacturing reapers and mowers, but well adapted to other uses; thoroughly equipped wtth machinery, tools and appliances of best modern make, all ready to steam up and run; at St. Louis Park, just outside of Minneapolis, Minn., with street car connections; the property being situated alongside of the Minneapolis & St. Louis, and Chicago, Milwaukee & St. Paul railroads with switch connections. For particulars address Geo. C. Squires, St. Paul, Minn.; C. F. Forster, 638 Rookery, Chicago, Ill., or John Little, Xenia, Ohio.

To Rent.

TO rent at New Rochelle, N. Y., a store in the best business part of town. A good opportunity for a live man. Addrees H. E. Colwell, agent; or E. Lambden, Jr., owner.

Attention! Hardware Travelers!

HARDWARE and other traveling salesmen who wish to increase their incomes, will be placed in a position to do so by sending their name and address to the HARDWARE Publishing Co., No. 143 Chambers Street New York.

THE OLDEST AND LEADING MANUFACTURERS OF GALVANIZED WIRE GOODS IN AMERICA.

"Pennsylvania" Fruit Picker

This Cut almost speaks for itself—the device being so much like the human hand, shows at once the utility of the article.

PATENTED.

AS A FRUIT PICKER IT HAS NO SUPERIOR.

It is made of Heavy Galvanized Wire, and Easily Adjusted to a Pole. It has been sold for several years, and the demand (as it is becoming known) is steadily increasing. The difficulty of detaching fruit and securing it unbruised is apparent to everyone so engaged. This overcomes the difficulty, and saves the finest fruit, which commands the highest prices.

THE LOW PRICE AT WHICH IT IS SOLD

Brings it within the reach of those who have but little fruit to gather as well as those who have large quantities **Price, per doz., $6.00. Liberal discount to dealers.** It will gather Apples, Peaches, Pears, &c.

—MANUFACTURED BY—

Pennsylvania Wire Works,

EDWARD DARBY & SONS,

233 & 235 ARCH STREET, PHILADELPHIA, PA.

MAGNOLIA METAL

IN USE BY EIGHT LEADING GOVERNMENTS.

Magnolia Metal Co.,
OWNERS AND SOLE MANUFACTURERS,
74 Cortlandt Street, New York.

London Office: 75 Queen Victoria St.
Chicago Office: Traders Building.

CORNELL UNIVERSITY.
ITHACA, N. Y., August 10, 1895.

To whom it may concern: I would respectfully state that I have used Magnolia Metal with satisfaction for bearings where other metals have given a great deal of trouble. I have employed the metal in crank-pin boxes on the Experimental Engine at Sibley College, and in the bearings of water wheels which were under considerable pressure.

We have made some tests to determine accurately the friction reducing qualities and durability of this metal. On account of an accident to our machine these tests are not all completed, and a full report cannot be given at the present time.

Sufficient has been done, however, to indicate the superior quality in every respect. I may say that I fully believe the metal has most excellent quality in every respect for the purposes and uses claimed. I am sir, truly yours. R. C. CARPENTER.

(Professor of Experimental Engineering, Sibley College, Cornell University, Member Society Mechanical Engineers, &c., &c, &c.)

ORANGE SPORTING POWDER, MANUFACTURED BY LAFLIN & RAND POWDER CO

ORANGE RIFLE EXTRA, ORANGE SPECIAL, ORANGE DUCKING, ORANGE LIGHTNING.

The attention of TRAP AND FIELD SHOOTERS, RIFLEMEN AND DEALERS IN GUNPOWDER, is called to the new ORANGE SPORTING POWDER, patented April 17th, 1888, and branded ORANGE RIFLE EXTRA.

This Powder is quick and strong, and burns with such perfect combustion that the only residum left in the barrel after shooting is a dark oily substance easily removed While this Powder is not exactly SMOKELESS, it gives only a light bluish smoke, which is almost instantly dissipated, and interferes but little with the shooting of the second barrel, taking the place of the so-called smokeless powders in this respect.

This brand of powder sells at the same price as any other brand of Rifle Powder and is superior to any made. No person who shoots can afford not to give it a trial, as after once trying it he will never use any other Powder when he can obtain the ORANGE EXTRA. Weight and quality guaranteed

MILITARY, MINING AND BLASTING POWDER.

PLACE THE MATTER CLEARLY.

To make a man realize an idea as you realize it, is what is necessary to make him understand his needs. Advertisements should aim to place a matter so clearly before the public that they see it as clearly as the advertiser does.

Digitized by Google

IT TAKES A PULL

to separate the plies of our rubber belting. A yoke of oxen can do it, but hard service won't, so strong is the friction. Our belting is uniform in width and thickness, consequently more of its surface comes in contact with a pulley. That means

NO WASTE OF POWER.

Rubber belting is never injured by water, hence it is best for out-door use, for wet localities, and for mills where the atmosphere is surcharged with moisture or steam, as in paper mills, tanneries, etc. Buy the durable kind, branded 1846-Para, Double Diamond or Carbon, made for 50 years by the

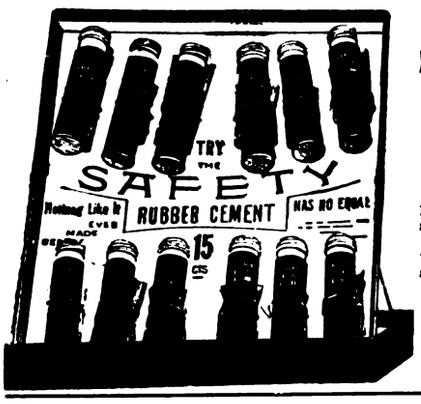
American Lead Pencil Co.,

429 Broome Street, New York.
110 Cheapside, London, England.

113. "CARBON" PENCIL.



TO obviate that tired feeling and dull pain in the fingers, which invariably accompany the use of the ordinary black lead pencil whenever too much pressure is brought to bear or it is used any length of time, and at the same time to produce an article that is very smooth, very black and very firm, thus adapting it for all kinds of work where a fine, smooth, black and legible mark is required, this pencil cannot be too highly commended. For writing on soft paper it surpasses anything heretofore produced; and for sketching, draughting and heavy shading it is indispensable.

Dozen mailed on receipt of 50 cents. Samples, Catalogue, Information upon Application. Address
American Lead Pencil Co., 429 Broome Street, New York.

The AMERICAN WICK is made on scientific principles. The gum inherent in the natural cotton is taken out, and no expense is spared to produce a wick that will give THE GREATEST ILLUMINATION.

THE
AMERICAN WICK
Made by the
WICK DEPARTMENT
Of the STANDARD OIL CO. of NEW YORK.

Oil drawn up through the AMERICAN WICK burns with a large, clear, white light and the flame does not drop off in size as it does when a poor wick is used. When the cotton is clogged with its natural dust and gum the full illuminating power of the oil is not obtained and the complaint is heard that the light DROPS.

"A WINNER."

THE ORIGINAL IS THE BEST.
ROYAL CENTRAL DRAFT LAMP.

This Lamp has no Superior in the known world.

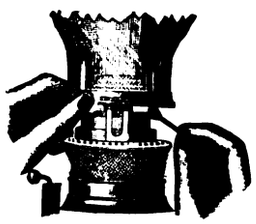
Gives the Largest Light for Wick Exposure of any Lamp made.

ROYAL LAMP.—No. 1013.

Chimney Lift and Wick Raising Device the best and easiest of adjustment. There are many imitations of these improvements, but the **ROYAL** is still the best.

The Royal Chimney. Lift will stay in position while lighting the lamp without support from the hands. This no other lift device will do.

The Wick Raising Device of the Royal Lamp is unquestionably the best, and has the approval of our largest competitors by their practical adoption of it.



The Wick can be adjusted more accurately and more easily than by any other device.

Workmanship, Style and Finish are unsurpassed. Made in all finishes of Stand, Table and Banquet Lamp. No better lamp for the dealer to handle.

OHIO "WATER TIGHT"

STEEL MORTAR and BRICK HODS

OHIO "Water Tight" Steel Hods are from 25 to 50 per cent. lighter when in use than the common wooden Hod.

Ohio "Water Tight" Steel Hod bodies are positively Water Tight. These bodies are the only ones made, folded from a single piece of sheet steel without cutting the metal, are reinforced on the edges and at the dumping point By our special devised machinery we are enabled to furnish the strongest, lightest, most durable and only double end mortar and brick hods offered to the trade.

Our improved Malleable Iron Fork and Wooden Shoulder Saddle make it easier for the user to carry, or to attach a piece of cloth, should he so desire, to the under side of the saddle than the old style.

With our improved one piece Malleable Iron Fork and socket for holding the hardwood handle and taking up the shrinkage, a broken handle can be readily replaced, and hods shipped knocked down.

THE ROYAL DOOR CHECK AND SPRING.

The Latest, Cheapest, Best.

Patented, Sept. 11, 1894.

Simple, Compact, Strong, Durable.

The *Royal* has a *compressed air check.* No liquids to freeze up or leak. Doors open easily. No back suction. Easiest attachment. Does not require a skilled mechanic to put them on. Improved ratchet for increasing tension on spring. Will fit right or left-hand doors.

PRICE LIST:

	BRONZED.
No. 1, for Light Screen Doors	each, $2.40
No. 2, for Medium Inside Doors	" 3.30
No. 3, for Large Inside or Small Store Doors	" 4.30
No. 4, for Large Store or Vestibule Doors	" 5.60
No. 5, for Extra Large Doors	" 7.00

Packed One Dozen in a Case. Write for Trade Discounts

DIRECTIONS.

Place the shoe (S) in an upright position on the door, about six inches from back and flush with the top; *fasten securely;* slide the check into the shoe until the lugs (B) fit solid, then put in the end-screw (D). Bring arm (L) down to the transom-rail till it rests firmly, then put in the screws and the spring is ready for adjustment.

HOW TO ADJUST IT.

The thumb-screw (E) regulates the air check. A very slight turn changes the result. If the door slams, tighten it up. If it checks too soon, loosen it. It should check about three inches from the closing. If the spring is weak, increase the tension by turning up the ratchet-wheel (C) one cog. Care should be taken that the spring is not made too strong. If the spring swings the door easily, it is strong enough. Regulate the closing by the screw (E). In case that the transom-rail has a raised moulding, shorten the arm (R) by changing it into the next hole. Also, in putting the arm on the pintle, see that it is *securely fastened* and *rigid.* The checks are reversible for right or left-hand doors by simply changing the arms from one side of the pintle to the other. Follow the above directions, and the spring will give good satisfaction.

Elevator Inspection and Protection.

It is a fact recognized in the experience of all, that constant exposure to a danger, largely removes the dread of the same. This fact is emphasized by daily experience and observation in any of the new sky-scraping buildings that are being so rapidly erected in all parts of New York city. Each of these contains elevators that travel many miles each day. In many cases these aerial railways are regularly inspected by guarantee companies organized for that form of insurance. In others there does not seem to be any inspection at all. Perhaps not one man in a ten thousand of those who use these elevators each day, has ever been in one when it dropped through accident; but if that one man is discovered and interviewed, he will certainly use some emphasis in expressing an opinion that the most rigid system of inspection would fall short of the mark of perfect protection.

The writer of these lines had the experience of being in an electrical elevator some days since, when it dropped four or five stories, before yielding to control; and the repeated assurances of the elevator conductor that there was no danger—given, however, after the bottom was reached—failed to remove the natural shock which the sudden fall had caused.

It is only a question of time when some frightful disaster in one of these long-distance elevators will be chronicled, and the fact that such has not yet been the case is no proof of safety for the future. The sudden stoppage, after a descent of a half dozen stories at cannon-ball speed, is apt to shake to pieces the gear of any elevator that science has ever been able to construct. The old-fashioned steam elevator may not be so rapid in its ascent and descent as the new-fangled electrical devices, but nevertheless there is in it a sense of safety which electrical elevators fail to provide. The legislator who will make it his business in the forthcoming session of the State legislature, to see that there are laws enacted, passed and put into force, for the safety of these appliances, will cover himself with enough glory to re-elect him as many times as he wants to go to Albany. Now that the use of elevators has become so universal, and so many hundreds of thousands of our citizens use them every day, it is time some steps were taken for providing the best possible appliances, and enforcing their use by law.

The Railway Speed Competition.

The great speed competition which has been waging for some time past between the trains on the London & Northwestern Railway and Great Northern Railway running between London and Aberdeen, has bore fruit here. The records of the English flyers, which were recognized to be the long distance records of the world, have been smashed by a flyer on the New York Central, which covered the distance between New York and Buffalo, 436½ miles, in the unprecedented time of 407 minutes, or 6 hours and 47 minutes, giving an average speed of 64⅓ miles an hour, with two stops and twenty-eight slow-ups. In comparing the English and American records, it must be borne in mind that the New York Central train weighed 207 tons, or nearly 135 tons more than the record breaker on the London & Northwestern; and again our English cousins have other advantages, there being no grade crossings to slow up for, and the general condition of the road bed is superior. We do not care to discuss the wisdom of these speed trials. A certain amount of benefit may be derived from them, though this is undoubtedly offset by the additional danger of collision and the delay to the ordinary traffic on which a railroad company must necessarily rely for its profits. A reasonable increase of speed on all the lines in the country, would be hailed with delight by a long suffering public, as nothing is more trying and disagreeable than a long ride on a slow train.

The opening of the Cotton States and International Exposition, on September 18th, Atlanta, Ga., marks a new epoch in the industrial development of the South. Until recently the South was regarded as an agricultural section, rich in cotton, sugar and tobacco, but of late the eyes of the country have been opened to her mineral riches, and the constant establishment of factories within her borders is a strong indication of the extent of the South's industrial attractions. In many sections of the South are found immense deposits of both iron and coal, and ere long we may expect to see her hold her own in the manufacturing world. The exposition now open is one of great importance, and

Digitized by Google

its completeness of detail shows how hard our Southern brothers have worked to make it a success. The machinery was set in motion at 6.56 P.M. by President Cleveland, who pressed an electric button in his summer residence at Gray Gables, Buzzard Bay, Mass.

R. Lindsey Coleman's Atlanta Banquet.

All wheelmen who can make it convenient to be present at Atlanta during the closing days of November are invited to partake of the hospitality of R. Lindsey Coleman, President of the Western Wheel Works, who is arranging to entertain wheelmen from every state in the Union, no matter in what numbers they may come. The following communication has been received from Mr. Coleman:

NEW YORK, Sept. 12, 1895.

EDITOR HARDWARE: Having decided to entertain as many representative wheelmen and their ladies as may find it convenient to be present in Atlanta on November 30th next, and wishing all such to feel that they are, individually and collectively, heartily welcome as my guests, I take this method (as it would be too great an undertaking to reach them by personal invitation) to ask all wheelmen from whatever country they may hail, to break bread with me at Atlanta on the evening of November 30th next.

In preparing for a banquet of such dimensions as I sincerely trust the coming feast will assume, the importance of knowing in advance the number for which plates are to be laid, is apparent. I should be obliged therefore, if all wheelmen who anticipate being able to accept, will forward their acceptances, not later than November 1st, to Harry C. Palmer, manager, Potter building, New York city.

Thanking you in advance for the courtesy of space for this communication, I remain,

Sincerely yours,

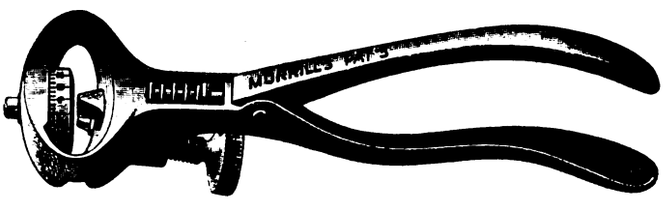
R. LINDSEY COLEMAN.

Kansas Hardwaremen's Banquet.

Some evenings since the members of the Kansas City Implement, Vehicle & Hardware Club and a few invited guests feasted together. The occasion was the opening of the fall and winter sessions of the club, which, beginning with the third Monday in October, will be held once a month. It has always been the custom of the club in the past to begin its season every fall with a banquet, and this affair was one of the most elegant and enjoyable yet arranged. Colonel J. G. Stowe occupied the chair of president, and the club members around the board were: Messrs. W. J. Hankins, R. B. Crawford, S. P. Yeakel, George H. Taylor, H. S. Rhodes, George E. Giles, A. Q. Chase, G. W. Fuller, F. E. Lally, G. J. Ferguson, A. W. Calkins, A. G. Trumbull, W. E. Manning, M. H. Loose, W. S. Harrington, John Maloney, O. V. Dodge, A. Gallagher, W. P. Yancey, J. H. Milligan, J. H. Ford, C. A. Patterson. The guests were: Messrs. John Sullivan and W. A. Lawton, representing the Karnival Krewe; Messrs Nain Grute and Smith Hall. It was decided to accept an invitation from the Implement Dealers' Association, of St. Louis, to visit that city, and the club will go down there in a special car.

Richard W. Montross, proprietor of the Wolverine Handle Factory, Galien, Mich., is spending a few days in the East, in attendance upon the fifty-seventh anniversary of the marriage of his parents. The father is ninety years old and the mother eighty. His grandfather, Richard S. Williams, was one of the early mayors of New York City. Mr. Montross was himself born in this city, and takes great pleasure in his annual visit home.

The Grand Rapids Cycle Co., Grand Rapids, Mich., celebrated a very successful season by giving their employees a dinner at the Lakeside club-house, Reed's Lake, Mich., on the evening of September 12th. Special cars, music, and a happy enjoyment of it all were among the features of the occasion.



Ahead, as Usual.

The first trade organization to meet in the Bourse, the Hardware Merchants & Manufacturers' Association of this city, met in the assembly room, on the third floor, yesterday afternoon, and resumed business after the summer vacation. William W. Supplee, president of the local and also of the national associrtion, presided, and, in his welcoming address, complimented the directors of the Bourse on the consummation of their building work. He reviewed the history of the Association since its organization, on February 8, 1886, and stated that there were now ninety-eight enrolled members, representing the leading Hardware interests of the city. A paper relating to the history of the growth of Philadelphia's enterprise in different directions was read by James H. Ritter. Stating broadly that cities are successful through their merchants, he showed how Philadelphia had been so, and instanced the building of the Bourse as a noteworthy step in the right direction. At the conclusion of his address a vote of thanks was tendered, and Secretary Fernley was requested to have the address printed for distribution. It is interesting to note that of three national trade associations Philadelphia is the home of their presidents. The Hardwaremen are presided over by Mr. Supplee, the manufacturers by Thomas Dolan and the board of trade by Frederick Fraley.—*Philadelphia Ledger.*

Mr. Morrill Addresses the Trade.

To the Trade and Consumers: The world still moves, and too at such a rapid pace, that people on foot can not keep up with the crowd. So get out your bicycles, line up, and make ready for the start, else you will be left in the rear. Morrill's New '95 Saw Set is coming, and no one can afford to be left in the lurch.

The Set has only to be seen to be approved; it explains itself, so that anyone can readily adjust it to any hand saw,

and proceed to his work with confidence, and know that he is right and that his saw will do its work with unerring certainty.

This is a leap into the future that none, however cautious, will hesitate, as there is no danger ahead; you are certain you will have reached the goal, and prove that the human body is all soul. Who will then deny the biped's capability, or say he cannot reach perfection ability, who will then deny, unless he is gravel blind, over matter the omnipotence of mind.

In a short time the '95 Saw Set will be on sale in all Hardware stores at a price within the reach of every industrious man.

Please observe the revolving anvil with the indicator subdivided and marked with plain figures, each figure indicating the number of teeth to the inch in the saw to be set.

Respectfully yours,

CHAS. MORRILL.

The Nicholson File Co. are able to give their many correspondents an object-lesson as to the size and extent of their works. Upon a handsome new letterhead they have had lithographed a picture of their four plants—the Nicholson File plant No. 1 at Providence, R. I., plant No. 2, for X F files, at the same place; American works at Pawtucket, R. I.; and the Great Western File Works at Beaver Falls, Pa. It makes a strong and attractive showing.

New President of the Hardware Club.

A meeting of the Board of Governors of the New York Hardware Club was held on Monday, September 16th, at which considerable business of importance was transacted. In the absence of Vice-President Swayze, the chair was occupied by R. R. Williams. The following gentlemen were elected to membership:

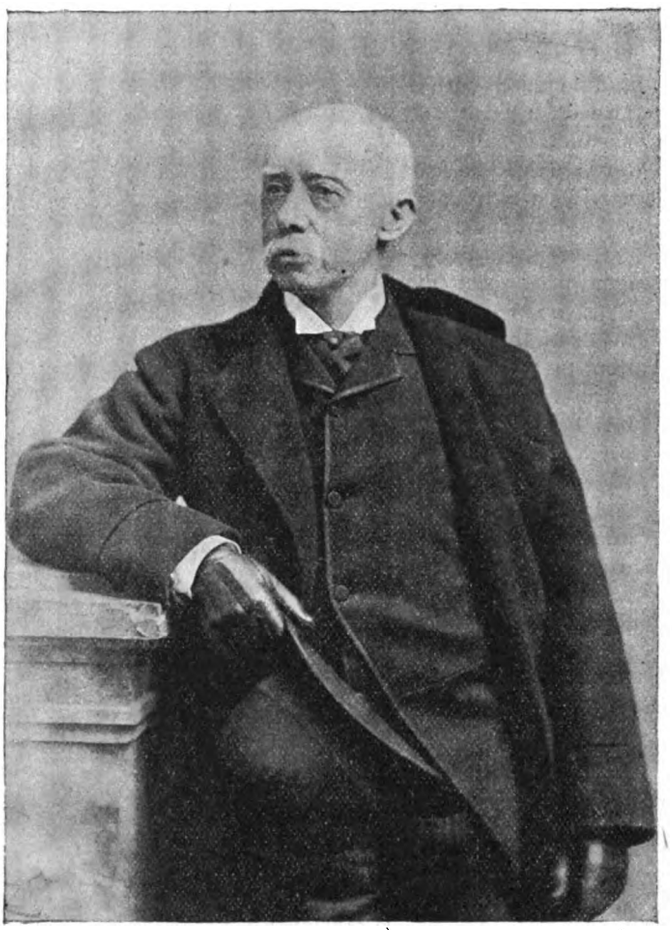
Frank Baackes; Salem Wire Nail Co., Salem, Ohio.
Montague Stanley Tweedie, No. 9 Stone Street.
Henry H. Goddard, No. 10 Barclay Street.
Fred. J. Johnson, Fitchburg, Mass.
Jasper R. Rand, No. 23 Park Place.
Edward F. Du Vivier, No. 22 Warren Street.
Le Roy W. Baldwin, No. 60 Murray Street.
John P. McDermott, No. 76 Reade Street.
Charles L. Johnson; United States Rubber Co., No. 90 Reade Street.
Charles H. Dale, president Peerless Rubber Mfg. Co., No. 16 Warren Street.
George H. Ismon; Salem Wire Nail Co., No. 277 Broadway.
C. I. Markham; Cleveland Twist Drill Co., No. 99 Reade Street.
S. Y. L'Hommedieu; Columbia Rubber Co., No. 66 Reade Street.
Frank Harvey Field, No. 261 Broadway.
Edward S. Peck, No. 261 Broadway.
Alfred S. Major, American Bank Note Co.
Abbott Loring, Boston, Mass.

At a previous meeting a committee had been appointed to prepare resolutions of respect to the memory of William H. Williams, the late president of the club, and on behalf of that committee the following memorial was presented and adopted, by a rising vote:

WILLIAM HILTON WILLIAMS.

We desire to place upon record our appreciation of the invaluable services rendered this Club by William Hilton Williams, whose death has come to us and to the membership of the Club of which he was the honored and efficient President, as a personal sorrow. We recognize the influential part which he had in the organization of the club and in the subsequent direction of its affairs. He possessed in a marked degree not only the qualities which made him an efficient and felicitous presiding officer, but a rare combination of wisdom, energy, breadth of view and tact such as are required in the direction of affairs. These traits together with a charm of manner and a sincere cordiality and courtesy, and the honor in which he was held for his personal worth contributed to make him an ideal president. To this office he was repeatedly chosen, and has been the Club's only president.

Coming to our city in his youth almost his whole business life, first as a faithful employe and then as an upright and honorable merchant, was spent among those who now deplore his loss. We recognize not only his ability but his high ideal of uprightness, and the sterling integrity which characterized all his dealings. In these relations also his personal qualities endeared him to those with whom he was brought into contact, and our loss is thus shared by many merchants throughout the land to whom he was united by friendly ties, which in the warmth of his nature were highly prized.



Mr. Williams exerted a wide influence in public matters in the city of his home and always on the side of good government. He thus held a prominent position as an able and distinguished citizen.

The affection with which he was regarded by those with whom he was brought into close relations is a testimony to his goodness of heart and many admirable qualities. The governors and members of this club will value the sincerity of his friendship and cherish his memory.

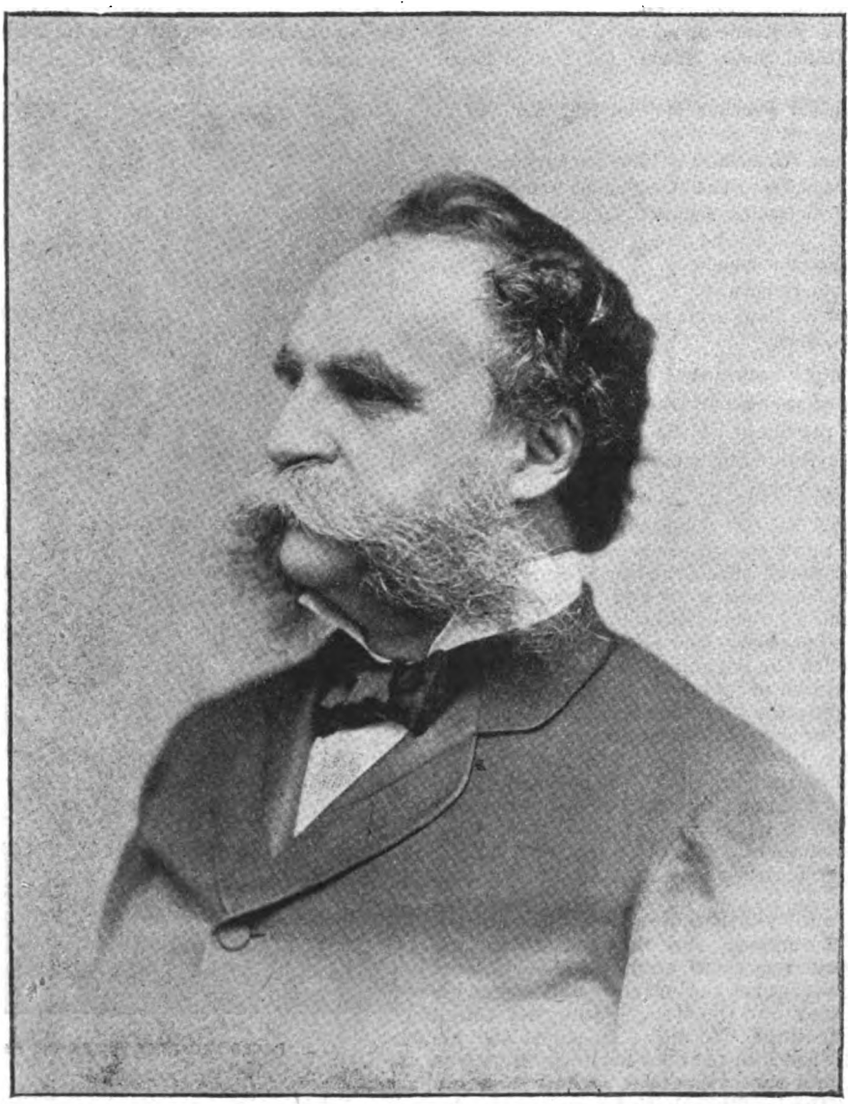
It is not permitted to refer to the sorrow of those nearest to him, to whom his death is a deep and sacred grief, further than to express our profound sympathy, and to commend them to the divine comfort and grace.

It was thought by the board that the time had come for the election of a president, to fill the vacancy caused by the loss of the first and only president of the board, and on motion the board proceeded to take action to that end. The minds of the members had by general consent turned to Peter McCartee as the most fitting successor to Mr. Williams, and the one who by his early and continued labors in behalf of the board had well earned such recognition. It was therefore but an expression of opinion of all of the members when Mr. Clinch in placing Mr. McCartee in nomination expressed the following sentiments:

"Mr. Chairman: The time has arrived when the duty devolves upon us to fill the office of President of our Club, made vacant by our loss, the death of our greatly beloved associate, William H. Williams, the first and only President our Club has had. The office to be filled is worth the seeking by any member of our trade, but we do not expect to find one who will fill the position as Mr. Williams did. As a presiding officer he was an example for emulation by those who will in the future hold the office. As we consider upon whom the mantle of Mr. Williams shall fall, we see no one more worthy than he who is our respected member and friend, with whom it is a pleasure to associate and whom we love to honor. And now, Mr. Chairman, I have the honor to nominate as President of the Hardware Club of New York, Mr. Peter McCartee."

PETER McCARTEE, PRESIDENT HARDWARE CLUB.

The election was unanimous, and when Mr. McCartee was installed in his seat as chairman, he made a few happy and heartfelt remarks which showed that he highly appreciated the compliment that had been paid him, and in which he pledged himself to do everything in his power to further the interests of the board.



The vacancy in the board caused by the death of Mr. Williams was then filled, on nomination of Mr. Clinch, by the unanimous election of George H. Sargent, of Sargent & Co., there being no other candidate proposed. It is needless to say that this action of the board will find endorsement by the club, and the Hardware trade at large, as certainly no one more widely known or highly esteemed could have been selected than the new member of the board. Mr. Sargent has since signified his acceptance of the position, and expressed his desire to make himself a useful member of the board in all possible ways.

We have already had the pleasure of laying before the

Digitized by Google

trade the biography of the new president of the board. He has been in the Hardware business since 1848, when he commenced as an errand boy in the Hardware store of Wetmore & Co., on Vesey and Washington Streets of this city. His continued advance through various positions of trust and honor, was the highest guarantee of his usefulness and ability as a Hardwareman, and his present prominent position as the New York representative and vice-president of the Stanley Works, is but another evidence of his eminence in that portion of the trade which finds New York as its center. His labor in behalf of the Hardware Club as first chairman of the house committee, and the ability which he has shown in various positions since that, has shown his usefulness as a member of the board, and that influence will be widened and increased with the enlarged opportunities and labors which have now been committed to his hands.

George H. Sargent, of Sargent & Co., certainly needs no introduction to the Hardware trade. He has been a member thereof for near forty years, and the very prominent position which his house holds in that trade is his best monument. His ability, force of character and geniality, are the factors which have given him his remarkable success as a Hardware manufacturer and merchant, and the club is to be congratulated now that those qualities have been especially enlisted in its service. We take pleasure in presenting herewith a portrait of the new member of the board, and also one of the new president.

GEORGE H. SARGENT, GOVERNOR HARDWARE CLUB.

Sportsmen's Exposition for '96.

The trustees of the Sportsmen's Exposition Association held a meeting in New York on September 17th and decided to hold the Second Annual Sportsmen's Exposition from March 16 to 21, 1896, inclusive, at the Madison Square Garden. A committee made up of J. A. H. Dressel, J. Von Lengerke and Alfred Chasseaud were chosen to have charge of the Exposition, and will be in continuous communication with F. W. Sanger, who will have the direction of the coming event. It will be remembered that the success of the 1895 Exposition was largely due to Mr. Sanger's efforts. Arrangements are being made for a greater display than ever, and a larger measure of success is looked for.

Kearney & Foot Co. To the Trade.

The Kearney & Foot Co., No. 100 Reade Street, New York, issue the following, under date of September 14th, 1895:

Owing to advance in price of steel during the past six months and also the fact that even with increased facilities we find ourselves unable to ship orders promptly, and also to the advance of other material necessary in the manufacture of files, we propose to advance prices on the 1st of October next.

We deem it the proper thing to notify our customers of this proposed change, presuming they may wish to place orders at the old prices. We will accept moderate orders at present figures, all to be specified for by October 1st, 1895, and shipped prior to January 1st, 1896, we reserving the right, in view of the present rush of business, to ship as late as March 1st, 1896.

It has been our constant aim to put a file on the market second to none, and with that end in view we are today paying extra prices for steel to secure the best quality, also the highest prices for skilled labor. Soliciting your continued patronage, we are,

Yours resp't'y,
KEARNEY & FOOT [Co.
JAMES D. FOOT, President.

A Window Glass Trust.

A dispatch from Chicago, under date of September 17th, says: Arrangements for a combine of all the window glass manufacturers in the western district were perfected at the Auditorium here yesterday, and the price of window glass was increased 8½ or 9 per cent. Hereafter the entire product of the seventy window glass concerns in the district, whose capacity is 4,800,000 to 5,000,000 boxes a year, worth $10,000,000 to $12,000,000, will pass through the hands of but two sales agents, one at Pittsburg and another in Indiana. The glass bottle manufacturers expect to complete a similar organization.

In Favor of Cushman & Denison.

Cushman & Denison write us that word has just been received from Washington that the Examiner of Interferences has decided in favor of Cushman & Denison in the suit brought by them against the company who are making an oil can similar to C. & D.'s "Star" Oiler.

Hon. Charles W. Mackey on Progress.

At the recent celebration of the one hundredth anniversary of the founding of Franklin, Pa., an address was delivered by Hon. Charles W. Mackey, ex-president of the American Axe & Tool Co., upon the theme, "The Men who have made the City of Franklin Famous." The address was eloquent, full of historic information, and contained many ideas of a striking and original character. We cannot forego the temptation to quote some points of Mr. Mackey's eloquent conclusion:

"Conservatism in all things is a desirable attribute, but too much conservatism dwarfs communities as well as men. The buoyant, sanguine, aggressive man, although he may at times overreach himself and undertake that which is difficult of completion, yet he is the man who originates and brings into existence and forces into importance those measures, enterprises and policies which, although they may be shorn somewhat of their original features by the more conservative, yet, nevertheless, end in the accomplishment of great purposes and push the world rapidly, irresistibly, impetuously, I might truthfully say, forward to the attainment of a higher civilization and to a grander and loftier station among the peoples of the earth.

"When a man reaches that time of life when he can, in justice to himself and to others, substantially retire from the perplexities and annoyances of business, it is eminently proper that he should do so. But for a man who is in the full vigor of ripe manhood to assume and carry out in his business affairs that spirit of conservatism which should characterize the aged alone, then, in my judgment, he fails in the performance of the duties he owes not only to himself, but to his fellow-citizens. In these latter days of the nineteenth century there is or there should be no room for sluggards or drones in the great hive of activity. When we are rushing, as we are, with fearful rapidity from small to great and from great to greater every man should do well his part in assisting in the development of the resources of his country and of forcing her into such a position of wealth, power, grandeur and greatness as to make her splendor, her virtues and the happiness of her people superior to those of all the other nationalities. It would seem to be better, nobler, more praiseworthy to have the satisfaction of being the originator, the projector, the creator of some great enterprise, or policy, or measure, than to live in the luxury produced by the proceeds of investments realized after long years of self-denial and rigid economy.

"What the future will bring to this community depends largely upon the action of those who are here to-day. If we are entirely satisfied with our surroundings, and I am sure that in many respects we should be, we will remain practically where we are; but, on the other hand, if the citizens of this town will make up their minds to be more aggressive, more determined, more selfish, if you please, in their desire for the upbuilding of the city, I am confident our development will be rapid and our prosperity correspondingly greater. Do not understand me as finding fault with our present condition of affairs. In many respects we have very much for which to be proud. A more beautiful town can scarcely be found within the limits of the nation. A more happy, contented, refined, educated, dignified community, in my opinion, does not exist in the Commonwealth; but we should not be contented with this. We should strive for that goal, which, if attained, would prove conclusively that we, as a people, had utilized all our possibilities in the development of all our material interests. We should make this an ideal city—the abiding place of extraordinary culture, refinement and wealth, and also a conspicuous centre of industrial activity and progress. We should take advantage of our excellent, our commanding, our meritorious position. We should set our standard higher and should move onward and upward with determination and confidence, seeking the very *ultima thule* of all it is possible for us to attain in the way of development and progress. If we will do this; if we will simply use with vigor the benefits and possibilities within our grasp, those who come after us and those who celebrate the bi-centennial of the foundation of our town, can call up the history of the past and point with honor, pride and satisfaction to the achievements of their ancestors."

Bicycling in Bogota.

EDITOR HARDWARE: It may interest some of your readers to hear something of what is going on with regard to bicycling in this out-of-the-way corner of the world. Four years ago, when I first came to Bogota, I saw at once what a splendid country it was for the bicycle. Situated as it is on an immense plain some 8500 feet above the sea, with fairly good roads extending for many miles and with a lovely climate, it seemed astonishing that the bicycle rage had not penetrated to this remote region—but things move very slowly in Colombia.

When I returned to England, I mentioned to the Coventry manufacturers that this was a new market, worth cultivating, and even offered to bear the expenses of taking one or two machines out with me as samples to show the natives, but they did not see it. "They would not throw their bread upon the waters." They did not know exactly where Bogota was, and they would much rather have sent them to Central Africa. About six months ago one or two "Safetys" appeared in the streets, brought from New York. I think the first was brought by the President's son, who had been at the World's Fair. Since then the numbers have increased (all American machines), and I suppose there are over one hundred now running, and before the end of the year there will be at least five hundred. I see the "Columbia" have appointed agents here, and they are advertising these makes and taking orders. Already a club has been formed under very good auspices, and members are being enrolled daily, and this will give a great stimulus to the business.

This city contains some 130,000 inhabitants. There are only two short railways, going north and south, so that on horseback is practically the only means of locomotion, but horses cost money to keep, and in times of revolution the government have a nasty trick of seizing every horse on which they can lay their hands, without so much as asking "by your leave." Therefore on these great plains as bicycles are just as good for getting about on as horses, I prophesy a great future for them.

I read your valuable paper with great interest and pleasure, and shall be happy later on if you will grant me space, to give your readers some information on Hardware generally in this country. WM. DARLEY BENTLEY.

Bogota, Republic of Colombia, P.O. Box 328.

The invention of bullet-proof shields is enlarging, and in this connection it is worthy of note that a point is laid down by a New York engineer, which is that the outer surface of such material should be of a soft yielding material. This breaks the blow, and then the resisting material is apt to ward off effectually the force of the projectile. If the outer surface is hard and unyielding, the blow is sometimes so great as to overpower the recipient of the shot, and instances are on record that men on the battlefield have actually been killed by this shock. The whole subject is an intricate one, and the progress made in it is not such as to deter the inventor from thinking out new devices.

Patten & Stafford, manufacturers of wheel rakes at Canastota, N. Y., report a sale of 6500 rakes this season. They are erecting two new factory buildings, which will give them facilities for an increased output next season.

Those Fallen by the Way.

A merchant of many years' experience, and well-known to the trade, writes us upon a point that must touch a sympathetic cord within the hearts of all our readers. He says:

"For the purpose of renewing trade with a list of customers whose names were on our books eight or ten years ago, but from whom we had not heard since, I prepared a special circular-letter this spring and mailed to about fourteen hundred such addresses. I made it quite personal, giving it a very friendly tone, and offered as an excuse for sending it the fact that having formed their acquaintance n past years I did not want to lose it, but was desirous of renewing it once more.

"These letters went from Maine to Oregon, from Michigan to Texas, and I was quite anxious as to the responses I should receive. I will say here that, as a business getter, they paid, but the special point that impressed me was the large number that were answered by friends or relatives of the ones to whom I had written, telling me of the death of these. It was saddening to see how many were gone. I got so that I dreaded to open the special envelope that I knew contained an answer to this circular. Of course we all realize that Death is making havoc constantly in the ranks of our friends and customers, but my circular had, as it were, massed the deaths of eight or ten years into one month. The father, or husband, or brother to whom I had written had passed away, and my letter seemed to be so friendly and so personal, a surviving relative had felt called upon to write me to this effect.

"It is only in such a way as this that one is brought to realize how many of his friends and pleasant acquaintances have gone before him. It has not only a tender but it has a practical side to it. Every business man is, through removals and through death, losing customers year by year. Is he making note of this and securing others in their places? New faces come upon the scene; is he making their acquaintance and securing his share of their trade? To cease to push out for new trade is to fall behind."

Electric Lighting for Carriages.

Gas lighting, which was common in London as early as 1810, was not introduced into Paris until 1819, and more than twenty years elapsed before its use as an illuminant became general in France. On the other hand, when we turn to the subject of electric lighting, it must be admitted that France has taken a foremost rank among European nations in adopting the electric light. In Paris, electrically lit private carriages have, for the last five years, been extensively patronized by the affluent classes, but only recently has this process of lighting been applied to private carriages in London and Berlin. The Prince of Wales was the first to adopt it in London, and now we learn that the German Emperor has brought the resources of his active mind to bear on the subject of lighting carriages, and, as a consequence, the court carriages in Berlin are now lit by electricity, not only by outside lanterns, but also in the interior, which is illuminated by a series of accumulators carried in the vehicles. "All over the harness are placed what the Germans call *Gluhlampe*, or small, colored lights, which glow like fireflies when the carriage is in motion."

There seems no valid reason why all public conveyances, cabs, omnibuses, tram cars, etc., as well as private carriages, should not be illuminated by electricity. It would certainly largely enhance not only the comfort, but the safety of locomotion in the thoroughfares of large cities. Indeed, it has been found that in a carriage supplied with a properly arranged electric light, the most formidable of outdoor foes, the dense fogs of European cities, might almost be defied, while the brilliant, searching electric light would enable passengers to amuse themselves by reading books and newspapers. It is, moreover, obvious that the adoption, on an extended scale, of electricity as an illuminating agent in private and public vehicles would serve a double purpose—first, one of a distinctly practical usefulness; next, that of increasing the brightness and cheerfulness of the streets, which would materially aid in the beautifying of a city. Again, it has been ascertained that the more the omnibus and tram car companies make their vehicles attractive, the greater will be their traffic.

In private carriages, the electric lamp is placed inside, in the centre of the roof, and the twin lights, for there are two, contained in flat vial-shaped vacuum glasses, are shielded by a circular glass plate rather larger than the "bull's-eye" of an ordinary search light, but neither convex nor concave. At the back of the lamp, there is a dome or bell-shaped enamelled reflector. The horseshoe carbon filaments, which become incandescent, are very diminutive, and the current is conveyed to them by platinum wires. In order to economize space, the flat vacuum glasses are not hung vertically in the bell protector, but lie horizontally, and in order to prevent the wires dropping downwards when hot a little glass stilt is added to support them. In this way, the roof of a brougham is filled with a light diffuser which will not interfere with a person's head entering the vehicle. Each of these lamps gives a light equal to seven candles. In the first attempts to light carriages in this manner the moving of the carriage was apt to jar the lamps, often causing a breakdown, and steel springs were not found sufficient to prevent this. The plan now adopted is to suspend the complete lamp in a sheet of rubber, which is attached to the interior of the carriage, neutralizing the vibration. It is only necessary to press a button in order to switch the current on, and by a second push it is turned off again.

A sufficient supply of electricity required for the lamp is stored in an accumulator. One accumulator, weighing two pounds, is the allowance for each lamp. Should the two outside lamps be also electric, two other batteries would be needed. The outside illuminators are not of the same shape, and differ in principle from the interior lamp, but an india rubber socket is used to reduce vibration. Accumulator, or accumulators, as the case may be, are carried in the boot, under the coachman's seat, and they are easily accessible. The coachman himself, without electrical knowledge, makes the necessary connections. An eight-cell storage battery for an ordinary family carriage or brougham is simply a box 8 inches long, 4 inches wide, and 7 inches deep. This supplies the current to keep the lamp lighted for eighteen hours, which, ordinarily, is sufficient to last the owner of the carriage from one to two months. The cost of recharging varies, according to wear and tear, from 50 cents to $1—not more than the expense entailed by the employment of oil lamps, which invariably give out an unpleasant odor and an uncertain illumination. The electric lamp does not wear out unless subjected to careless treatment, or unless it is weakened by the application of too strong a current. The accumulator, however, makes the latter contingency almost an impossibility.

An objection to electric launches has always been the narrow limits to which they are necessarily confined on account of recharging the batteries. It is suggested that the difficulty may be overcome by carrying a tank of oil, an oil engine, and a little dynamo, with which to charge the launch at night or when not in use. Another plan, now in use in several places in America, is to take the current for charging from a trolley circuit.

The output of aluminum has increased from 223 pounds in 1883 to 550,000 pounds in 1895. The cost of production has been decreased from nearly $10 per pound to less than 60 cents per pound. The output for 1894 was valued at $316,250.

PRACTICAL TALKS TO HARDWAREMEN.

SHELVES AND SHOW CASES.

Webster's definition of the word "shelve" is: "To place on a shelf, hence to lay on a shelf, or put aside with a view to prevent re-appearance."

In arranging his stock, the retailer will do well to bear in mind this definition. If he has a class of goods he does not want to sell, let him "shelve" them, and thus prevent their re-appearance. If his desire is to sell goods let him show them:

The more goods shelved
The more goods held,
The more displayed
Means money made.

Shelves have their uses, of which uses one is to hold surplus stock. The problem to solve is how to display the greatest variety of goods in the smallest space.

The solution is found in the show case; not, however, the kinds usually seen in Hardware stores, which are very shallow with either flat or oval tops. But the modern show case, three feet deep, capable of displaying on its three tiers of glass shelves in full view, five times as much as the conventional case.

The improved case is about the same as the old respecting length and width, the departure being in the depth. Instead of resting on the regulation counter, the new case comes within a foot of the floor, with just sufficient woodwork at the base to protect the glass from the customers' feet.

An Eastern retailer, who was one of the first to adopt the new style, said the idea was not original with him, but like many progressive ideas, was taken from the dry goods merchant. Such a case nine or ten feet long, made of oak and filled with plate glass, costs in the neighborhood of a hundred dollars, yet his experience was that in less than six months the increased sales had more than paid for the cost of the case.

"MULTUM IN PARVO."

If any motto has been abused, this is surely one. How an advertiser succeeded who desired to put a very big ad. in a very little space, is shown in the following. The article to be advertised was a spray pump. Into a space one inch long by four and a half wide, he desired to put two cuts, a description, direction for using and price; in fact, enough matter to fill half a page. In order to get a striking effect the words "Spray fast as you walk" were placed in large type across the top, with a cut at each end. The first cut separated the letter "S" from the balance of the word "Spray," and just over the second cut, at the right of the ad., the words "when full" were printed in small type, evidently intended to call attention to the appearance of the pump when filled. The separation of the letters in "Spray" and the running together of the words in the sentence made a reading very different from the one intended by the advertiser. It read:

"Pray fast as you walk when full."

As many are aware who have been under the "influence," speed aids wonderfully in maintaining an erect position. The admonition of our advertiser gives to the disciples of Bacchus a warning that may be useful to them. To know that to "Pray fast when full" will enable one to maintain a progressive perpendicular, must surely be to them a welcome bit of news.

SHOP TALK.

The conversation, this Saturday night, turned upon the misunderstandings caused between customer and clerk by a similarity of sounds. It was told of the Tool Man that in response to an inquiry for yard sticks, that he brought the customer carpet tacks. A more excusable case occurred with the shipping clerk, who came to one of the regular clerks to find out what "kill oil" was, and where he would find the best kind. Upon interrogating the customer, who was an Irishman, he said, "It's best kill oil I'm wantin'," which was his way of pronouncing bicycle oil.

SHOP MAN.

Kerosene Burners in Russia.

For domestic heating purposes, petroleum is not used in Russia at all, the predominant fuel in the largest portion of the Empire being wood, supplemented with coal. For cooking purposes, kerosene is used only on a very limited scale and in exceptional cases, much less so, on the whole, than in the United States. The ordinary American kerosene stoves have been largely imitated in Germany and introduced into the Russian market. They are of various sizes and sell as low as 6 rubles (about $3) apiece. In the last few years, the "Bade Kerosene Gas Burner," of Swedish origin and manufacture, has been introduced into Russia, and there is said to be a considerable demand for it. This kerosene gas burner is also known and patented in the United States. By means of an air pump, the petroleum is forced from the reservoir into a cylinder, encircled in its upper portion with a basin, in which alcohol is burned to heat the cylinder and change the rising kerosene into gas, in which form it reaches the burner. The ordinary domestic petroleum gas burner, made of brass, is sold at 7 rubles ($3.50). About twenty thousand are said to be in use in Russia.

Hazard Powder Co.'s New Prices.

The Hazard Powder Co., Nos. 44 to 48 Cedar Street, New York, have decided in response to a popular demand, to lower the prices on some of their well-known brands of powders, so as to bring them more in reach of sportsmen. The manufacturers state that while they have decided to lower the prices, the quality will be kept up. The prices are: Electric, 1-pound canisters, 75 cents; Duck Shooting, 25-pound kegs, $8, and Duck Shooting, 6¼-pound kegs, $2.25, the former prices being 90 cents, $11 and $3, respectively. Kentucky Rifle can now be had in 25-pound kegs for $2.75, 12½-pound half-kegs for $1.65, and 6¼-pound quarter kegs for 95 cents. Five per cent. discount will be allowed on rifle and sporting powders. There is no further change in the list prices as issued under date of November 1, 1893.

The new car barn for the Hartford Street Railway Co., Hartford, Conn., will be designed and built by the Berlin Iron Bridge Co., East Berlin, Conn. The office will be located in the front end of the building on State Street, with the barn in the rear. The whole construction is to be of steel and fire-proof, the roof being covered with the Berlin Iron Bridge Co.'s patent anti-condensation corrugated iron roof covering.

The Lawton Cutlery Co., Nos. 132 and 134 Lake Street, Chicago, are a new company just entering business under very favorable auspices. The management is in the hands of Charles T. Lawton and George N. Brown. Mr. Lawton was for a number of years in charge of Hibbard, Spencer Bartlett & Co.'s cutlery department, while Mr. Brown has been engaged in the specialty business.

Ralph Cycle Lock Co., Chicago, incorporated. Capital stock, $10,000.

An Embryo Socialist.

"Did you notice that man that just went out?" inquired the customer at the furnishing goods counter.

"Yes," answered the salesman; "it was Mr. Teesquare. He's in the Hardware line in Chambers Street."

"And I'm the man that knows it full well," responded the customer. "Let me see that box of fifty-cent ties, please. I'm in the same concern with Teesquare, and we've both been there since we were boys, and every time I look at the ordinary little cuss I'm tempted to rail against the social order, for it does seem as if there was something wrong when such a fellow as him— Say! that line of ties you've got there, marked a dollar, are dandies, ain't they? Set them over here.

"Teesquare didn't have nothing to commence with any more'n I did, and now I suppose he's worth fifty thousand dollars, and in a fair way to make it a hundred thousand. And how'd he do it? Sheer luck. Why, that man ain't smart. He ain't any talker. He ain't sociable. He can work, and so can a hod-carrier; and that's all he can do. When a man sees two things that please him equally well, how's he going to choose? I'll toss up a cent to see whether I take this dotted tie or the one with a red stripe. Heads takes the dots. Tails, by jingo! I'll take 'em both. Let me see some collars; fifteen and a half, stand up.

"Teesquare was always close as the devil, for one thing, and the boys never liked him for that. When he was a clerk along with the rest of us, you'd never catch him joining us in a game of billiards after lunch. He always said he was too busy. He'd go back to his desk and work. Lord knows what at. The rest of us had a minute to spare once in a while. And then he got cheeky. He began to make suggestions to the old man about the business. Actually— What's that? Something new in suspenders? Two dollars a pair. They're a little too rich for my blood, I guess, but I'll take a look at 'em.

"The man actually began to tell the head of the house how to run his own business. Any other man in the place would have got set on mighty hard if he tried that, but somehow or other Teesquare managed to get around the boss, and blamed if what he said didn't go. How much do I owe you altogether?

"Four seventy-five, eh? Now the question is, how much have I got? A five and a two. That settles it. I take a pair of these suspenders, and I get twenty-five cents change. Well, it's pay-day. That's one comforting thought.

"And that's why I say there's something wrong. Fellows like Teesquare, with no life or sociability about 'em, and no more juice than a mummy, tumble into the soft places, and before you know it they are cutting coupons, while smarter men just manage to live. Ever run out during business hours to take a little something? No? Well, so long."—*Harper's Weekly.*

About Knives and Forks.

So familiar are we at the present day with the use of knives and forks, and other implements of the household, to assist us in the cutting up and eating of our food, that we are apt to forget that both these useful table and kitchen necessities are of comparatively modern invention—so recent, indeed, that it is curious to think what must have been the condition of society before they came to be in common use, says a writer in an English exchange. Discoveries have proved that the earlier inhabitants of Europe and the aborigines of America used splinters of stone or hard wood for cutting purposes, and it is a matter of wonder to discover what work they were enabled to perform with such primitive implements. The Greeks used copper hardened by tin, and various kinds of brass and bronze, as blades for the weapons and knives for domestic purposes. The Romans are supposed to have been the first to make edge tools of iron for carving meat and for warlike purposes. England has always been preeminent in the manufacture of knives, even from the time of Queen Elizabeth. Case or sheath knives are the most ancient kind of cutlery; they originally had the blade stuck in the handle, and when not in use were covered by a case or sheath. Coarse knives, called "Whittles," were manufactured at Sheffield in 1575, and were sold at the price of one penny, a good round sum in those days. In 1650, clasp knives were first recorded; they were made to fold over and shut into handles of iron or tortoise shell, but they were very clumsy implements compared with the elegant pearl and ivory-handled six and eight-bladed affairs of the present day. Sheath knives were used mostly for kitchen use and to cut up meat, and even now one can see a butcher or a cook wield a knife, which, when not in use, is enclosed by a leather sheath. But nowadays the knives used for culinary purposes are innumerable, and to describe them all would be to far overrun these pages.

Forks are of much later invention than knives. Probably the first pronged instrument was used by the Italians late in the fifteenth century. They appear to have been unknown to the ancients, no trace of them ever having been discovered among the ruins of Herculaneum and Pompeii. The Chinese had the nearest idea to the fork in "chopsticks," which required a great deal of expertness to use with grace or effect. Chopsticks are used by the Chinese for eating purposes up to date. Before forks were invented fingers were made to perform the service of picking up the meat, both for cooking and eating. Even after forks were introduced they were looked upon as unnecessary luxuries, and were even forbidden to be used in certain monastic establishments and convents. Forks were at first made with only two prongs of iron; in fact, they were more like double skewers; then three prongs were considered necessary, and these prongs were considered more useful when bent. The French manufactured a spoon fork, with four or five prongs, but these were considered more ornamental than useful, and were always made in silver for presents. Four prongs are now considered the proper number for a well made fork, although most of the steel forks have only three. The first absolute necessity for a fork was in all probability felt by a carver, who required something to hold the meat steady while operating. The oldest carving fork known originally belonged to Henry IV. of France, about the year 1600. It is still to be seen at the Castle of Pau, in the Basses Pyrenees, where Henry was born. It is made of steel and with two prongs of great length, being long enough and strong enough to secure a "baron" of beef. The earliest mention of forks in Italy was in 1611. In England, 250 years ago, it was quite a common sight at a banquet for each guest to put his fingers into the dish and help himself.

In *Lightning*, a correspondent asks how to apply an electric current to the purification of well water, the objection to this water being that it turns whiskey black. The writer has by no means proved that the water is at fault. He should look to his whiskey as well, as poor sorts of whiskey may contain sulphuretted hydrogen or tannin, which blackens iron salts. If the electrical treatment should prove to be too expensive, the editor of our contemporary recommends the American method of consuming the whiskey and water separately, and adds that he need not fear that the black compound will form in his own well, as the presence of the gastric juice will prevent the formation of any black iron sulphide.

J. Sage has opened a store for the sale of general Hardware and mechanics' tools, at No. 78 West Main Street, Rochester, N. Y., and would be pleased to receive catalogues and price lists.

ILLUSTRATED BICYCLE NOVELTIES.

MANUFACTURERS and DEALERS are invited to make FREQUENT USE of these columns.

Anything NEW in BICYCLES or BICYCLE NOVELTIES should be sent us immediately. NO CHARGE, direct or indirect, is made, as our interest lies in SHOWING THE HARDWAREMAN what is going on in THE BICYCLING WORLD.

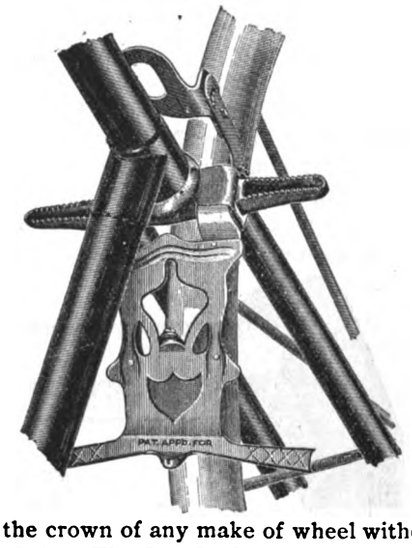
When your NOVELTY is ready, send us an Electrotype and descriptive matter, which will appear immediately.

Automatic Bicycle Seat.

Simple, sensible, scientific, handsome, humane and healthful are the six claims which the Automatic Cycle Seat Co., Grand Rapids, Mich., make for their new seat. The

cut shows a front view. The saddle is composed of a carrying-bar that crosses the regular saddle-bar, to which it is attached at right angles, and two seats that work automatically to this bar, adjusting themselves naturally to the form of the rider and the movement of his legs. The company claim it is as simple and comfortable as an old-fashioned rocker, and the rider sits upon a chair rather than upon a rail. The seats are adjustable for a rider who weighs 300 or for a rider who weighs 100 pounds. It is constructed of wood, finished with rubber enamel. Weight, 15 ounces; retail price, $5.

The Williams Globe Vapor Bicycle Lamp.



Hibbard, Spencer, Bartlett & Co., Chicago, are marketing a new bicycle lamp for which they make exceptional claims. Its principal feature is that it does not burn oil or any other liquid to shake about in the reservoir. Three tablespoonfuls, it is stated, of benzine poured on absorbent cotton will furnish the vapor that will burn from ten to twelve hours, giving a clear bright light—better than that of the ordinary lamp. It is further claimed that the light of this lamp cannot be jarred out and that the lamp can be turned upside down or thrown around without danger of its going out. Also there is no grease or oil to soil the hands and clothing and no smoke or soot to dim the reflector. It is made entirely of brass, with no solder used in the body,

and is nickel-plated and polished. Its height is 7 inches, and it weighs when filled but 11 ounces. It is furnished with 2¼-inch powerful hand ground lens, and Austrian jewel side lights (ruby and green.) The construction is not complicated, and it is said to be absolutely safe when simple directions are followed.

Combination Foot-Brake, Coaster and Lamp Bracket.

A Foot-brake, Coaster and Lamp Bracket, all three in one piece, is one of the latest novelties in the sundry line. The device is made of stiff composition metal, highly nickeled the features being the swivel attachment of the bracket, whereby the lamp may be placed any distance ahead without changing the bracket, and the leather brake shoe, which is held in place by screws and is easily taken out. It is ad-

justable to the crown of any make of wheel without removing a nut or bolt. The Standard, as it has been named, is made by the Richards Mfg. Co., No. 220 Fulton Street, Brooklyn.

A New Wheel Rest.

The Bicycle Stand Co., of Pittsburg, Pa., have recently placed upon the market a Wheel Rest which is shown in the accompanying illustrations. It consists of a brace rod

FIG. 1.

weighing less than four ounces, which is fastened in place on the lower brace of the bicycle by two small bolts. In

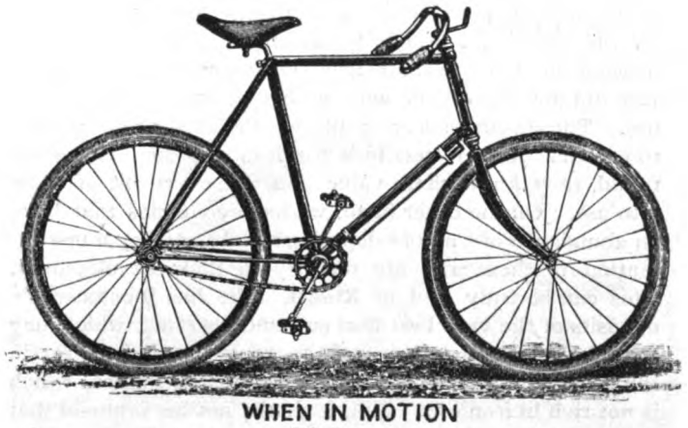


FIG. 2.

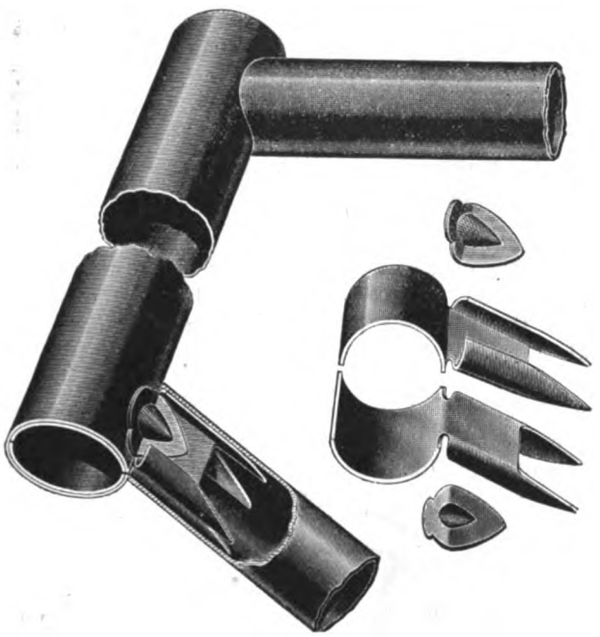

connection with the brace is a wheel lock. The Rest is designed to allow a bicycle to stand without other support; and it is turned up and fastened under the lower brace, as

Digitized by Google

shown in Fig. 2, when not riding. The makers claim the Rest is substantial and that it is impossible for it to get out of order.

Barnes' Steel Bicycle Connections.

The Barnes Cycle Co., Syracuse, N. Y., are using the Internal Steel Connections shown in the illustration, in the construction of Barnes' bicycles. The connections are punched and formed, and inserted in a slot in the larger tubing as seen in the lower part of the illustration, this being cut away to show the internal construction. The small braces are fastened to the larger pieces and the whole securely brazed in place, resulting in the joint shown in the upper part of the illustration. The makers claim that this makes a remarkably rigid connection, and that there are no drop forgings on the machine. Another feature of the machine is the absence of the nuts and bolts ordinarily used for securing the seat post and handle-bar stem. The end of the handle-bar stem is slotted, and into it is introduced

a metal plug the same diameter as the interior of the tube, but slightly conical, being the larger at the lower end. A threaded hole runs through the plug, connected with which is a square-headed threaded bolt, which passes down through the centre of the handle-bar. When the handle-bar has been adjusted to the right height, the nut of the bolt which rests on the handle-bar is tightened, thus expanding the end of the stem so as to hold it firmly in place. The seat post is arranged and held in the same manner.

Russian Iron Ore and Iron Industries.

The iron industry is one of the most important elements of the industrial progress of a country. We have countries on the one hand which have advanced in culture and learned the value of industrial development, although nature did not bless them with with extensive riches of iron ore. These countries are exploring the earth from one end to another of their territory for iron deposits, and, when found, they know their value and put every bit of them into use. On the other hand, we have countries that have an abundance of iron ore deposits, but do not pay much attention to them and are dilatory in their development. This can be truly said of Russia. She has inexhaustible deposits of the very best iron ore, and also fuel, which may be called the motive power of the iron industry, and yet in the production of iron Russia is behind even France, which is not rich in iron ore. Still, it should not be assumed that Russia makes no progress in this important branch of industry. It is, however, very slow. During the last ten years, her production of pig iron has been tripled, but it is a trifling quantity in relation to the extensiveness of her iron deposits. How far she is behind, and how much she must hasten in order to catch up with the other iron producing countries, may be seen below. In 1894, the following quantities of pig iron were produced by the respective countries named, to wit: England, 8,251,592 tons; United States, 7,457,128 tons; Germany, 6,301,544 tons; France, 2,293,112 tons; and Russia, 1,498,648 tons. From these figures, it may be seen that England produced five and one-half times as much as Russia, though England is far from being as rich in iron ore as Russia. The United States produced nearly five times as much, and Germany four times. The United States commenced their iron industry but a comparatively short time ago, and its development should serve as an instructive example to Russia. The United States, a young industrial country, has nearly caught up with old England in that respect, and there is no doubt that before long it will overtake England. Russia sees this and says, "Why should that which is possible for America be impossible for us? We must work, and work energetically, and not in a slow and careless manner."

In the Urals, where more iron ore is produced than in any other Russian region, many beds of iron deposits are not worked, and yet the Ural deposits of red hematite deserve special mention. The ore occurs in strata of the carboniferous formation, and yields as much as 64 per cent. of iron in smelting; in the same country, forests are in abundance, but are wasted by being burned down instead of being used or saved for fuel for iron industries. The manufacture of pig iron is carried on there mainly by charcoal fuel, which is either prepared in stoves or in stacks, and chiefly from pine and birch wood, with which the country is well supplied.

South Russia is also rich in mineral fuel, but, so far, has been very little explored as to iron ore except on the borders of the government of Kherson and Katerinoslav, where, not far from the village of Krivoi-Rog, vast deposits of exceedingly pure and rich ores, with 60 to 68 per cent. of iron, chiefly specular iron, magnetic iron ore, and red hematite, have been discovered.

The statistics showing the total yearly yield of iron ore in Russia are available so far only up to January 1, 1892. In 1890, there were in the whole Russian Empire 536 iron ore mines and 195 lakes, which yielded 1,979,335 tons of iron ore; in 1891, there were 683 mines and 202 lakes, which yielded 2,158,771 tons of iron ore. The following shows the total production of pig iron in the Empire during the last five years: In 1890, 1,021,244 tons; 1891, 1,107,550 tons; 1892, 1,134,170 tons; 1893, 1,248,970 tons; 1894, 1,498,-648 tons.

The duty on iron in Russia is of two kinds—the "raised" tariff (charged on iron from the countries with which Russia has no agreement), and the conventional tariff (charged on iron from countries with which Russia has an agreement)—and is as follows: The "raised" tariff on iron in bars, puddling iron, iron in powder, and iron rails, is 72 copecks (gold) per pood (36.112 pounds), or 42.62 rubles ($32.91) per ton. The conventional tariff is 50 copecks (gold) per pood, or 27.71 rubles ($21.39) per ton. The "raised" tariff on sheet iron, including No. 25 of the Birmingham calibre, is 1.02 rubles (gold) per pood, or 56.48 rubles ($43.60) per ton. The conventional tariff is 65 copecks per pood, or 36 rubles ($27.79) per ton. The "raised" tariff on sheet iron above No. 25 of the Birmingham calibre is 1.20 rubles in gold per pood, or 62.05 rubles ($47.90) per ton. The conventional tariff is 80 copecks per pood, or 44.30 rubles ($34.20) per ton.

Russia, thus far, has neglected the riches which nature has given her, and acts as a people for whom iron is not an article of first necessity but of luxury. Here, it would seem, are rich fields for enterprise and industry and a profitable opening for capital.

St. Petersburg, June 12, 1895. JOHN KAREL, Consul-General.

NEW GOODS IN THE MARKET.

If you have anything NEW, let the world know it by illustrating it in these columns.

NO CHARGE WHATEVER is made, direct or indirect, as our interest lies in showing the readers of "HARDWARE" where the LIVE manufacturers and wholesalers are, and what they are doing.

When your NOVELTY or SPECIALTY is ready, send us an Electrotype and descriptive matter, which will appear immediately.

The Hardwaremen everywhere read this department; it is to your interest to make prompt use of it.

White's Patent Spacing Strip.

The accompanying illustrations show White's Patent Spacing Strip, which the Pennsylvania Machine Co., No. 31 North Seventh Street, Philadelphia, Pa., are placing on the

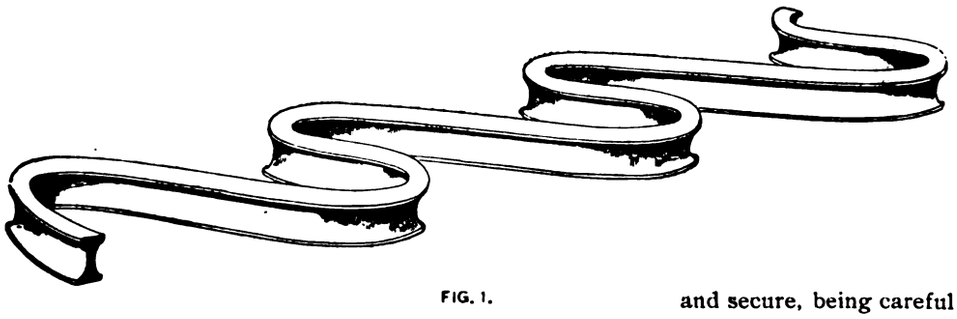

FIG. 1.

market. The Strip is practically a wrought iron beam ⅛-inch in height and corrugated in form, and is made of first-class wrought iron, heavily coated with pure red lead and linseed oil to prevent corrosion. When a spacing strip is interposed between the flooring and joists, as shown in Fig. 2, the boards and joists do not come in contact, and there

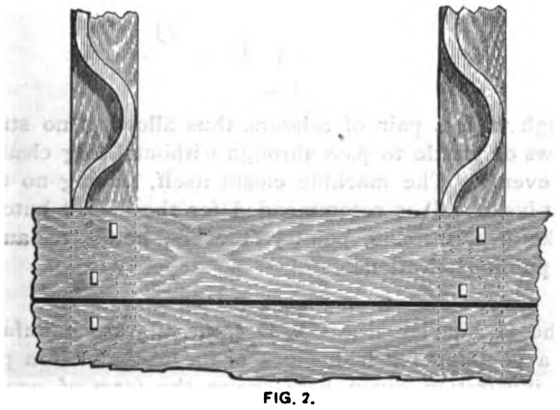

FIG. 2.

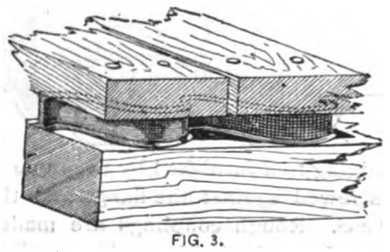
is a continuous air space, Fig. 3, on each side of the strip to insure the passage of a current of air to thoroughly ventilate every joint. The strip runs a zigzag course along the upper face of the joist, the grain of both joist and flooring being well crossed. The flooring is nailed in the usual manner, and the strip is used without especial provision of any sort. The strip is designed to supply a thorough ven-



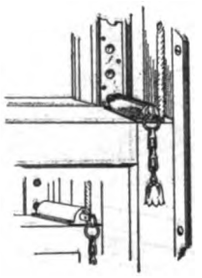


FIG. 3.

tilation between a flooring and the joists or stringers supporting the same, thus arresting decay. The makers claim that its use will increase the durability of wooden platforms, board walks, bridges, porch floorings and all similar structures exposed to the weather at least 100 per cent. The strip is supplied in lengths of about ten feet.

Carlisle's Burglar-Proof Sash Lock.

E. A. Carlisle, Pope & Co., No. 2 Sudbury Street, Boston, are placing upon the market Carlisle's Improved Burglar-Proof Window Sash Lock, the method of applying which is here shown. It is described by the makers as "a safe lock for the window when closed. The lower sash may be raised or the upper one lowered six inches, and be secure from tramps and others who are watching for open windows. The Lock is very easily applied by anyone. You fasten the Lock on meeting rail of lower sash, directly over the stile; place the plate with holes on stile of upper sash

and secure, being careful that the lower hole in plate is so adjusted that the bolt may enter easily when window is closed. With a ⅛ bit bore through holes in plate about one-half inch deep, and the Lock is ready for use. If you wish for ventilation from top and bottom of window at same time, place the bolt in upper hole of plate and then pull down window; you may then have space of three inches at top and bottom. Leave the bolt free, unless it is desired to raise or lower the sashes full length, which can be done by drawing the bolt, and with a gentle downward pressure it is caught in a slot so that the sashes may be raised or lowered without injury to paint or wood. When the window is shut there is no fear of its being unfastened, as it is self-acting and self-locking when the bolt is free." Price 35 cents each.

Perfection Hot Vegetable Peeler.

The American Specialty Co., Hartford, Conn., are offering the trade a novelty in the shape of a Hot Vegetable

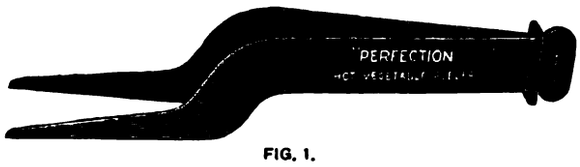

FIG. 1.

Peeler herewith illustrated. The peeler is shown in Fig. 1, half-size and consists of two nickel-plated steel blades, riveted at one end and pointed at the other. The sliding ring

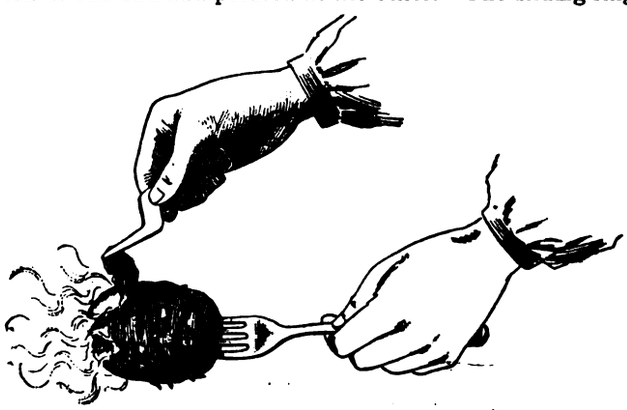

FIG. 2.

holds the points together when not in use. One of the blades is sharpened and the other one is dull. In use, Fig.

Digitized by Google

2. the point of sharp blade breaks the peel, and by pressing blades together, the dull blade acting as a thumb, the peel is nipped at points of the blades and is drawn off in usual way. The manufacturers state that it will peel boiled Irish potatoes, boiled sweet potatoes, boiled beets and scalded tomatoes.

The Connecticut Meat Chopper.

The illustrations here given represent the Connecticut Meat Chopper put on the market by O. D. Woodruff, Potts-

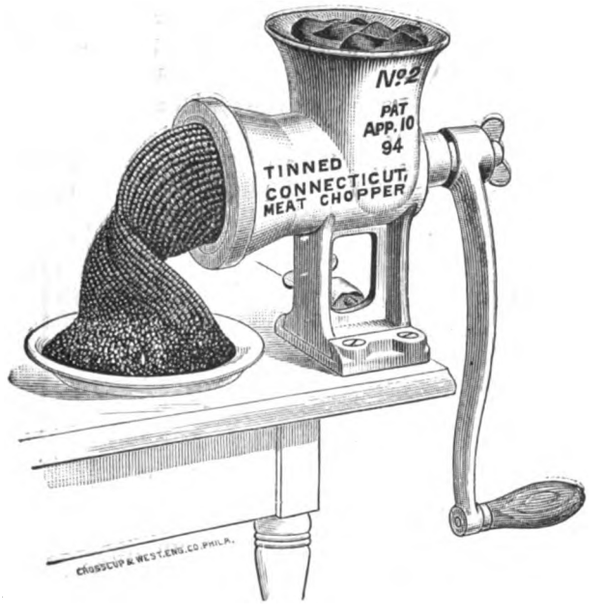

FIG. 1.

town, Pa., and for whom W. H. Jacobus, No. 90 Chambers Street, New York, is the Eastern selling agent. This Chopper consists of four principal parts, the cylinder, feed cutter,

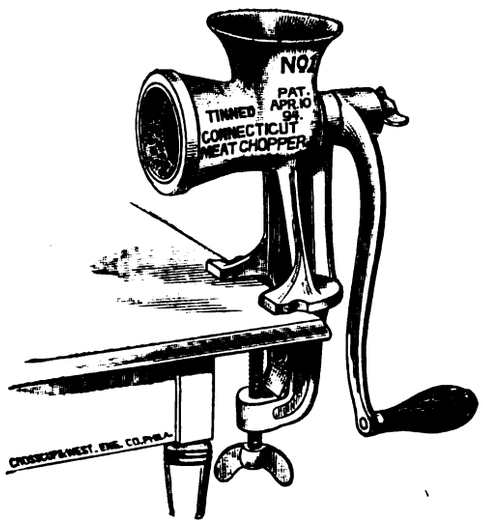

FIG. 2.

crank and thumb-screw, shown in Fig. 3. The parts are interchangeable. In operation the meat is fed into the hopper and by the feed cutter carried forward and after the

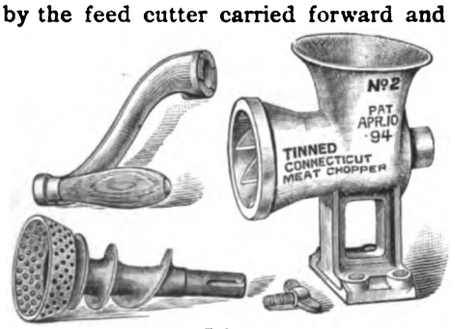

FIG. 3.

preliminary cutting is done is forced into the perforations at the end of the feed cutter, where the final cutting is done by the eight cutting points. With every revolution of the crank each hole makes eight cuts. The pieces thus cut are ejected by the meat following. The No. 1 Chopper has 42 holes in the feed cutter, which in conjunction with the eight cutting points in the cylinder, is said by the manufacturer to cut 336 pieces of material at each revolution of the crank,

FIG. 4.

giving a product of at least 2 pounds per minute. The No. 2 size, which has 87 holes in the feed cutter, cuts 696 pieces at each revolution, with a capacity of about 4 pounds a minute. Fig. 4 shows the stuffing attachment to be used in connection with the chopper for stuffing sausages. Fig. 5 shows the Chopper with stuffing attachment in operation. The maker claims that cutting is done as perfectly as

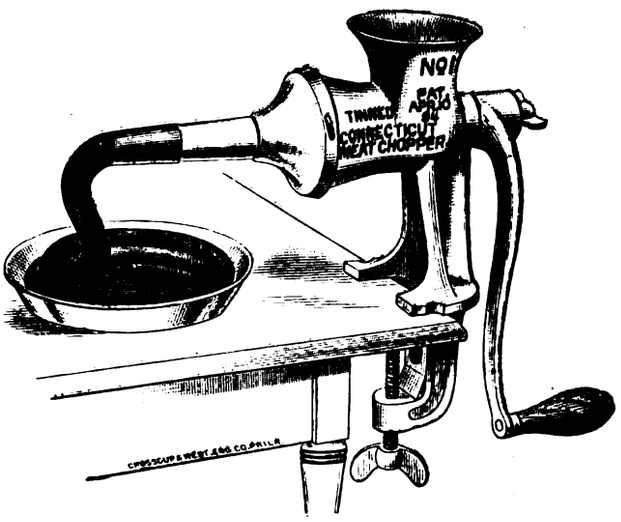

FIG. 5.

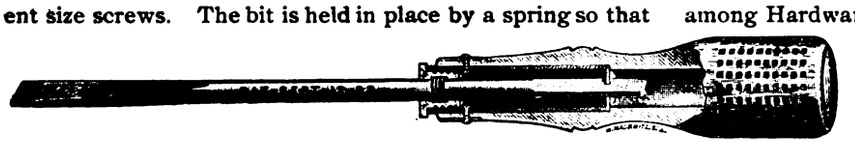
though with a pair of scissors, thus allowing no strings, sinews or gristle to pass through without being clean cut and evenly. The machine clears itself, leaving no uncut meat inside. It is recommended for the use of butchers, marketmen, farmers, poultry breeders, hotels, restaurants and public institutions.

Lead Flange Coupling.

The H. Mueller Mfg. Co., Decatur, Ill., are manufacturing a coupling for lead pipes or for lead and iron pipes. The illustration given here shows the form of coupling used to connect lead pipe with lead pipe. This is largely used for boiler and water back connections. Either form saves the trouble of wiping joints. The lead pipe after insertion in the coupling, is merely swedged to a flange with

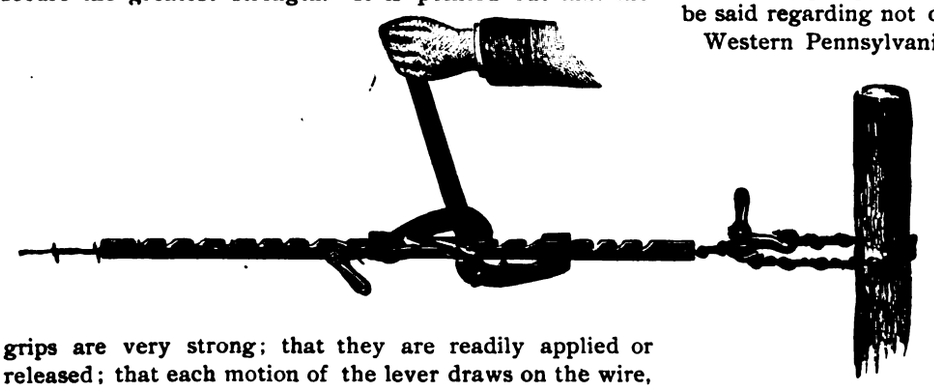


a cheap swedging tool furnished by the same company, the coupling is screwed against the flange and the connection is ready for use. Rough couplings are made for outdoor use, and finished ones for inside work at a slightly increased cost. Five sizes are made, ranging from ⅜ to 1 inch.

Reversible Bit Screwdriver.

The H. Mueller Mfg. Co., Decatur, Ill., are introducing a new Screwdriver which is here shown. The illustration shows a portion of the handle broken away for the purpose of showing its construction. The essential feature is a

Digitized by Google



hand screwdriver with a reversible bit for using on different size screws. The bit is held in place by a spring so that

it cannot be lost out even when improperly adjusted, nor can it turn in the handle as it enters a slot inside of a steel tube in the handle. The handle is securely riveted to both the inner and outer ferrules; the bit is made of spring tempered tool steel, and the hard wood handle is knurled. Four sizes are made, so that a set comprises eight screwdriving bits.

The Freeport Wire Stretcher.

The illustration herewith represents a Wire Stretcher introduced by the Warner Hardware Co., Freeport, Ill. It is made of steel and malleable iron and proportioned so as to secure the greatest strength. It is pointed out that the

grips are very strong; that they are readily applied or released; that each motion of the lever draws on the wire, and that the dogs engage with the notched bar automatically without the use of springs, whatever the position of the hand lever.

Some Notes Taken by the Way.

E. F. Hope, a leading Hardwareman, of Beaver Falls, Pa., left for England some time since, intending to spend the summer across the water. His stores are being looked after by his son, Harry, during his absence.

The Toronto Hardware Co., Toronto, Ohio, carry a full line of Hardware; in fact they have everything to make a complete Hardware stock, and report business a decided improvement over last year.

The White & Smith Hardware Co., Wellsville, Ohio, are doing a splendid business, and say Fall prospects are very bright. They are fine people and have a first-class general Hardware stock.

W. H. Adams, East Liverpool, Ohio, is one of the "good fellows" you meet, with a pleasant word for you always. Business is very good with him. The firm recently changed, having been Adams Bros. He carries a full line of Hardware, builders' supplies, farm implements, etc.

George W. Martsolf has purchased the store of Thomas Arnott, New Brighton, Pa., and assumes charge at once. We bespeak for him the same good trade his predecessor has enjoyed.

T. J. Johnson, New Brighton, Pa., carries a large stock of general Hardware, building supplies, house furnishing, etc., and says he is having a fine trade. This section is feeling in better spirits now, and will soon be in the lead.

The Eagle Hardware Co., of East Liverpool, Ohio, one of the most progressive and up-to-date Hardware firms in the country, report trade good, and have recently opened a branch store at Wellsville, Ohio, with as full and complete a line of Hardware as can be found anywhere.

Western Pennsylvania has suffered a great deal from drought this year, but happily the recent rains have so much improved the Hardware trade that one can scarcely find a complaint from a dealer. The increasing trade, the rising prices, the increasing demand, coupled with an outlook for a fall trade of unusual magnitude, has restored confidence among Hardwaremen generally, and a caller is now greeted with, "Oh, first rate, thank you; can't complain even a little bit."

"Better than '94?"

"Better? Sure!"

"Prospects?"

"Well, you can say we expect to equal '92. Remember, however, that we are calculating on shelf and other goods, not builders' Hardware. We do not expect builders' Hardware and supplies to 'cut much ice' until later, but are figuring very closely on work in sight, and can confidently assert that this year will be far in advance of '94."

Among Hardwaremen you meet the brainy and observing men of the country, and their renewed confidence is the best indication of the returning prosperity. In fact, all are jubilant over the higher prices, the increased trade, and the comforting prospects of an increased Fall trade. This may be said regarding not only Hardwaremen, but all trades.

Western Pennsylvania, eastern Ohio and northern West Virginia are among the pleasant spots on this continent. There you meet the best of fellows, clever, all of them; willing, aye, even anxious to help smooth the way of the traveling man. Many a pleasant face, many a cheering word, and many a hearty "Come again," have greeted me.

I paid a visit to the extensive establishment of Heeren Bros. & Co., Pittsburg, Pa., a short time since, and was taken in hand by that kind and courteous gentleman, J. M. Larmour, their manager, and shown from attic to basement. Space and time forbid my attempting to bill in detail what I saw. I can simply say I have never seen a stock of jewelers' and machinists' tools and supplies to equal theirs. For convenience, an unlimited stock, beauty, discipline and courtesy, I have not as yet met the equal. I wish to return thanks to Mr. Larmour for his attention, and say that it will ever remain a red letter day with me.

CARO.

A. P. Moore, general manager of the National Vapor Stove & Mfg. Co., Lorain, Ohio, has been in Philadelphia recently, and has arranged to locate an Eastern warehouse for distribution of stock. He has rented No. 52 North Second Street, Philadelphia, for that purpose. George T. Moe & Co., who have removed to this number, will act as managers of this branch house and agents for the sale of the goods. Various improvements have been made in the store. The services of John G. Krider, quite well known among the stove men, have been engaged. All who are interested in oil, gasoline and like stoves, are invited to call at the new quarters.

A dispatch from Boston says: "A new company was recently organized under New Jersey laws with a capital of $1,000,000 for the extensive manufacture of articles made exclusively from aluminums by a new process. Inducements were offered for them to settle at Canton, Ohio, Chicago and other places, but at the last moment it was decided to locate at South Boston, as they wished to be near tidewater. The concern is composed of New York, New Jersey and English parties. The first buildings will cost about a quarter of a million, and work will be given to 1000 men."

The New England Hardware & Iron Association held their regular monthly dinner at the Brunswick, Boston, the other evening. President A. M. Wiley presided, and about twenty-five members were present.

The "Boss" Washing Machine.

As an article of household utility, convenience and advantage, the Washing Machine has steadily made its way into thousands of American homes, overcoming all prejudices and gradually taking the place of the old way among the intelligent people. To-day the well-constructed, reliable Washing Machine is a standard article of stock in every house-furnishing goods house of any prominence in the country, and the demand for it is constantly increasing.

Of the various machines on the market, especial points of value, for simplicity of operation, first-class construction and good work, belong to the "Boss," manufactured by the Boss Washing Machine Co., of Cincinnati. The growth of the business of manufacturing this machine and the "Eli" and "Champion," the other machines made by this company, has been something wonderful.

Mr. Conrad Dietz first perfected the machine about four years ago, and began manufacturing in a little room fourteen feet square. If he turned out two complete machines a day and sold them, he considered it a good day's work. In this way the business was started. Every machine was an advertisement in itself and sold others. "It did exactly what the manufacturers claimed it would. Washed cleaner without injury to the clothes, quicker and with greater ease, than any machine ever invented. With such merits and such features of superiority, it was not long finding a market, and, as a result, the business became a prosperous industry from the start. There was a steady enlargement of manufacturing facilities and the number of employees, until within the last year or two the manufacture of these machines has grown to be one of the big industries of the city, requiring a large four-story building, a complete mechanical equipment and the most complete facilities to carry it on and to fill orders, which now come from Hardware and house-furnishing goods dealers all over the United States."

The output is now seventy-five complete Washing Machines every day, and the same care is exercised in their manufacture that marked the industry at the start.

This is a double-acting machine, having two cylinders working in opposite directions, so arranged that "it is absolutely impossible to tear the clothes, and working equally

satisfactory from the ordinary wash to the finest fabrics. They are made in sizes adapted to family, hotel and laundry use, so arranged as to be run either with hand or power, and are made of the finest materials throughout. Only selected Louisiana cypress lumber is used, and every part of the machine is made strong and durable." So confident have the manufacturers always been of the superior merits of these machines, that all they have ever asked from the public was a fair trial. If not exactly as represented, and if it was not found that the machine did better work with greater ease than could be accomplished the old way, it could be returned.

The wonderful growth of the business of the Boss Washing Machine Co. during the last four years is the strongest possible testimonial. The factory and office is located at Nos. 216 and 218 West Pearl Street, the officers of the company being Conrad Dietz, president, and J. F. Dietz, vice-president. Conrad Dietz, upon whom the active management of the business has always devolved, has proved

himself a business man of the most progressive ideas, and certainly his success is most creditable to the growing industrial importance of the city. The subjoined letters speak for themselves:

ELYRIA, OHIO, July 9, 1895.

Boss Washing Machine Co.

Dear Sirs: We have sold nine of your Boss Washers and all are giving good satisfaction—in fact, nothing else would do. The principle cannot be beat; they work easy and do good work. Yours respectfully,

THE HELDMEYER HARDWARE CO.

AVERY, OHIO, April 22, 1895.

Boss Washing Machine Co.

Dear Sirs: The Boss Washer was received last Friday, having tested it this morning and find it properly named. Fifty dollars would not buy it if there were no more like it to be had. I cheerfully enclose check in payment. No other Washers or washboards in our house.

Yours truly, A. H. PROUT.

News from Busy Newburgh.

Among the visitors at the Handware club of recent date was Thomas Coldwell, president of the Coldwell Lawn Mower Co., Newburgh, New York, who is known as the man who invents Lawn Mowers in his sleep, and sells them wherever nature makes grass grow. He was immensely pleased with the club rooms, and imparted to a friend the glad tidings that despite all drawbacks, their business has this year been larger and more satisfactory than ever before. This applies more especially to Lawn Mowers, although they have not been able to keep up with the orders in their new knock-down-and-put-together-again iron Lawn Settees. Mr. Coldwell was accompanied by John T. Bullen, who has just accepted a position as Western representative of the Coldwell Lawn Mower Co., with headquarters at No. 73 Wabash Avenue, Chicago. Mr. Bullen was for years with the Woodrough-Hanchett Co., and knows the western trade from A to Z.

H. G. Higgins & Co., composed of H. G. Higgins and D. K. Phemister, have opened an office as manufacturers' selling agents, at No. 19 Pearl Street, Boston. They have convenient and commodious quarters, and will cover the Hardware trade of New England and outside large cities. They would be pleased to correspond with reliable manufacturers having goods to sell to the trade. They are the New England agents for the Utica Tool Co., Utica, New York, the Knapp & Pratt Mfg. Co., Geneva, Ohio, and also handle solid braided sash cord, hickory handles for picks, axes, etc.

Frank S. Allen, a prominent Hardware merchant, of San Angelo, Tex., was shot and instantly killed by John Fitzpatrick, a bar-keeper.

CONFESSIONS OF AN UNSUCCESSFUL CLERK-VIII

Those who have followed this record of a commonplace life, have anticipated the confession that must be made just here.

My marriage put an end forever to my dream of a profession. Many young men could have arisen superior to the circumstances into which I had been so willingly led, but I was not of that number.

I made an attempt to hold my ground. 'Squire Savage kindly loaned me a copy of Kent's Commentaries, into which I plunged boldly as occasion offered. But when one has arisen at 5 A.M., opened the store at 6, and handled goods and talked with customers until 10 P.M., he does not find much time, and less energy, for study. The Sabbaths claimed a certain period of rest; and the clerk in a small country town who does not go to church at least once on Sunday, soon loses a certain amount of caste with employer and customers. The result was, that Mr. Chancellor Kent soon became a neglected commentator; and when my wife one night carried the book quietly home to the 'Squire without consulting me, I asked no questions; but I knew, as she had foreseen, that one chapter of my ambition was closed.

The store presided over by Simon House was the principal one in Branch. It carried all kinds of general goods from a hay rake to a cambric edging; was headquarters for town gossip and lounging, and the official centre from the fact that its owner was postmaster and I his honored deputy. Once each day the hack from Grange came to our door, keeping us in touch with the world outside.

To the general view, the three or four years that followed my settlement in Branch were filled only with commonplace events, small excitements and trivial village experiences. The village was simply a little group of people, set down in a pleasant farming land, where the average mind was more interested in "Hen" Kibbee's crops or Lyman Wolcott's horses, than in the fall of empires or the course of financial delusions. We were New England in every feature, nine out of ten of the inhabitants being the children or grandchildren of Connecticut or Massachusetts Yankees, who had come westward in the early days of the century.

We lay, as a village, around the four sides of the town commons, or "green," as we called it then. We had a Methodist, a Presbyterian and a Congregational church. We were devoted to the cause of the public schools, and made it a point of honor to support the county newspaper. We took an intense delight in watching local politics; and if Colonel Hatch made a move upon part of the local Democrats, "Jim" Crane felt that great interests were at stake, and made a counter move for the Republicans. As a general thing, sidewalks, street draining, and the running at large of Sam Jones' hogs, were the lines along which our parties divided.

I worked hard in the store. We had a fairly good trade, and now that I had to earn bread for two, I felt the necessity of holding a position that would give us a home and a living. Mr. House appreciated my labors, and I had been with him only a year when he surprised me with a proposition.

He was a large, slow man, who whittled a great deal, and slept in a corner on dull days when customers were not about. He was quite wide-awake when they were. We had closed for the night, and the proprietor had been engaged upon his books for an hour. Closing them, and laying them upon the counter to carry home, as he did each night, he came around to where I was, climbed upon a barrel, took out his knife, sat in meditation some moments, and then said: "Well, Hank, I had a pretty good business last year."

I knew him well enough to know that he had not taken the trouble to climb upon that barrel and take out his knife, to talk politics or the weather. I put down my broom, backed up against the counter, and answered: "Glad to hear it, Sim."

(They all called him that, from 'Squire Savage to the blacksmith's striker, and why should not I?)

"'Hain't got a thousand dollars about you, Hank?" he asked without a smile.

"When you pay me ten dollars to-morrow," I answered, also without a smile, "I'll have two of it left after Minnie pays the bills. That's yours, if you need it, Sim."

He sat silent for a moment, and then said: "Got any rich relations?"

"If I have, they haven't come forward to claim me."

"Old man well fixed?"

"He's got the farm. It's paid for. That's all."

"What's it worth?"

"Three or four thousand."

"Mortgaged?'

"No."

The silence that followed held so long, that I was compelled to break it.

"Old man, what are you driving at?"

"Nothing. But if you had a thousand dollars to whack down, I'd be driving at a partner. That's what I need. With you hustling here all day, and a thousand more of capital, I'd double the business in three years, and increase the profits from the start. That's all."

"But I haven't——"

"So I see. I'd rather have you in here with me than anyone I know. Of course, you'll have first chance. If you can't, why——"

"Some one else can?"

"Yes, I've had an offer."

"That throws me out of a job?"

"Sorry, Hank; but the business won't keep three."

"If I had it?"

"Well, the business will invoice easily at five thousand dollars of stock and good accounts. Say nothing about the good-will. You pay me one thousand, and you get a one-fourth interest clean. You get your wages just the same, and take one-fourth of the profits. They were twelve hundred last year. Next year they'll be fifteen. That gives you nearly four hundred dollars interest on your thousand. I need a partner, because the boys want me to run for sheriff. Order some A coffee sugar to-morrow, Hank. I'm going home. Good night."

He had got through the door before I could take it all in. I called after him: "How long to think it over, Sim?"

"Two weeks," and he was gone.

I picked up my broom, finished the task of setting things to rights, turned out the lights, locked up, went out to the seat by the hay scales, and sat down to give my brain a chance to cool off. This was indeed a sudden dilemma to be thrust into. A thousand dollars meant a secure position, increased income, partnership, and perhaps eventual wealth. The lack of it, a loss of my job, the giving up of my home, and perhaps a return to Weston, and labor on a farm.

All sorts of schemes came into my mind, but there was only one that took shape. It was, however, the one of all others, that I did not like to undertake.

My wife had seen the lights go out, and wondered what kept me. When I had brooded over my trouble as long as I dared, I went home and found her waiting by the gate,

Digitized by Google

We had not reached the door before she looked at me quickly, and asked, "What's the matter?"

"Nothing," I answered, as carelessly as I could.

"Yes, there is. I haven't studied you two years for nothing."

"Well, then, the boss wants to run for sheriff. That means more work for me."

"And more pay?"

"There is a chance of it. Any pie in the house?"

She looked at me closely, took me by the shoulders, held me so that I must answer the tender question of her eyes, and said: "You have not told me all. Have you reached the point already when you hide things from me?"

That ended it. I sat down—with the pie—and told her all. Unlike myself, she saw only the bright side, and all her love and ambition were up in arms to do me service, and make secure the good fortune within our grasp. From questioning she went on to planning, and I grimly smiled between mouthfuls, at the royal way in which she was already spending our income; for others, God bless her, and not for herself. Finally she asked: "When does the new sign go up—House & King?"

"When Vanderbilt sends me the check for a thousand dollars, or you find a gold nugget on the top of Asper's hill."

Her face fell. "Do you have to have *all* the money down?"

"I do. What else did you think?"

"I thought perhaps Mr. House would let you have time, and pay it out of the profits."

This pure bit of feminine financiering was too much for me. With a hearty laugh I locked the house and went to bed; the sleep that followed was full of gold mines, partnership, and new sign-boards over the old store.

The "Waverley" on Deck for 1896.

The Indiana Bicycle Co., Indianapolis, Ind., who are always progressive, and we might say extremely aggressive, as well, are preparing for a great onslaught for 1896 business. They have more than doubled the capacity of their already large plant, and are now ready to build 60,000 machines, if they find it necessary, to supply their trade the coming season. They have bought stock and supplies for 50,000 and are going right ahead with this number, with the idea of having an immense stock ahead by the time the spring trade begins. They had any number of machines ready when the past season opened, having completed 14,000 Waverleys ahead. This forethought enabled the firm to fill orders promptly, while others were losing sales because of their inability to deliver. The success of this season has prompted a much greater activity for next year, and they are not going it blind, either.

During the past week they have had a meeting at the factory of all their branch managers to see the new models, and discuss the merits of the machine from every standpoint that the wide experience of these managers, who come in direct contact with the rider, could suggest. The managers' experience, coupled with that of the heads of all the departments of the factory and the officers of the company, themselves practical men, made an aggregation of talent, the equal of which was certainly never gathered together in the history of the bicycle trade. The object of this congregation, or bicycle school, which lasted for nearly a week, was the production of a machine for the 1896 trade that would be "simply perfection itself." In the discussion, the men were given to understand that the expense of production was not to be taken into consideration. What was wanted, was "the best bicycle that could be produced, regardless of price," and with this idea firmly fixed in their minds, these men of experience began a session of deliberation and discussion that resulted in the final adoption of a model for the 1896 Waverley that they are sure "will certainly be as nearly perfect as any machine can possibly be made." The company say that "the prices and terms for the coming season will remain the same, notwithstanding the fact that the material has advanced nearly 50 per cent. and a great increase of cost in production will be added to the new model."

After the meeting was over, the visiting managers were shown over the beautiful city of Indianapolis, and photographed in a group with the officers of the company. They were also entertained at the residence of President Smith, where tenpins, billiards, music and lunch were served galore. The managers present dictated the following letter to Manager Conwell, of the San Francisco Branch, which in a faint way shows the spirit of good-will that exists in this happy family:

INDIANAPOLIS, September 11, 1895.

Mr. J. S. Conwell, Manager Indiana Bicycle Co., San Francisco, Cal.

Dear Sir: We, the undersigned managers of Waverley branch stores, wish to express our regret at not having had the pleasure of meeting you at this, our first annual visit to the factory. We are also sorry that a manager of so important an office as the San Francisco branch, should have missed the very pleasant and instructive three days' conference that we have enjoyed here.

We were invited to the factory to see the new models, and given the privilege singly and as a body, of discussing the merits of the new wheel from every standpoint that our past experience might suggest. We have taken the greatest advantage of this privilege, and every man has expressed his ideas freely, which were listened to with courteous attention and patience by those present, including the officers of the company and the heads of the mechanical departments.

We have also had the pleasure of listening to talks of the members of the company on the merits of the "Waverley," which were full of instructive ideas, as also were the talks of the various talented gentlemen present, on the mode of conducting the largest and most successful bicycle business in the world.

That you should have missed all of these pleasant and instructive exchanges of ideas, and that we in turn should have failed to receive your valuable opinion on the matters of importance to all concerned, is certainly to be regretted.

It is also a fact to be deplored that your manly features are absent from the official photograph. Let us hope that you will not be absent from next year's meeting.

Wishing you every success for the coming year, we hereby extend our most sincere regards.

Fraternally yours,

A. O. McGARRETT, Boston.
LEON JOHNSON, New York City.
H. D. SIMMONS, Philadelphia, Pa.
AUGUSTUS H. KNOLL, Buffalo.
ARTHUR D. BLACK, Chicago.
O. E. BOLES, Denver.
G. V. ALLEN, Dayton.
EDW. ROLLE, Atlanta, Ga.
J. C. HOOLE, Cincinnati, Ohio.
R. F. MAXWELL, Louisville, Ky.
J. HENRY SIPP, Newark, N. J.
PERRY D. GATH, Columbus, Ohio.
A. G. GRUENDLER, Springfield, Mass.
F. C. GRAVES, Springfield, Mass.
FRANK STALEY, Indianapolis, Ind.

The Berlin Iron Bridge Co., East Berlin, Conn., have just completed for the Geo. W. Stafford Mfg. Co., Providence, R. I., a new machine shop 50 feet wide and 174 feet long, two stories high. The building is constructed of brick and iron, and is so designed that two additional stories may be added in the future. The same company have also just completed a new car barn for the New Haven Street Railway Co., the barn being 86 feet wide and 188 feet long. The roof is covered with slate.

The Covert Saddlery Works, Farmer, N. Y., inform us that their trade this season is fully fifty per cent. better than last.

BICYCLE PROPHECIES FOR 1896.

The widespread interest among Hardwaremen everywhere as to the prospects for the coming Bicycle season of 1896, has led us to lay before the leading wheel makers of country several questions, a number of answers to which are given below:

POPE MFG. CO.

EDITOR HARDWARE; Replying to your favor of September 16th, it is our estimate that 600,000 bicycles will be put on the market during the year 1895, and probably 1,000,000 during 1896.

There is, unquestionably, a still increasing demand, though it is impossible to tell now whether or not a proportionate increase will continue after 1896.

The Hardware trade is becoming a more important factor all the time in marketing bicycles, and in a very large number of cases they make the most desirable agents that can be found. It is quite out of the question, however, for us to make any accurate guess as to what part of this year's product has been placed through them.

The prices on the highest grade of bicycles will not be reduced for 1896, and there is no reason that they should be. There is a strong probability, however, of the breaking of prices in the medium and lower grades, and there is a good deal of danger of a general disturbance in the marketing of these next year, owing to the fact that there are a good many manufacturers coming in who lack the experience or the capacity to make and sell bicycles in a way calculated to protect themselves and those with whom they come in competition. In other words, we believe that while the bicycles made by the most experienced and best equipped manufacturers will be in sufficient demand, and will be carefully enough handled during 1896 to insure their prices being held, the business in the others will be overdone.

Yours truly, POPE MANUFACTURING CO.
A. E. Pattison, Secretary.

Hartford, Conn., September 19th, 1895.

FAY MFG. CO.

EDITOR HARDWARE: Replying to your favor of the 16th inst. will say that we do not believe there will be over 750,000 bicycles manufactured in America for the season of 1896, and frem reports current we have been led to judge there has been about 450,000 manufactured in 1895.

We do not believe there is danger of the bicycle business being overdone, as the output will be controlled by the inability to get material,

FAY MANUFACTURING CO.
Harrison Williams, Manager.

Elyria, Ohio, September 18th, 1895.

KEATING WHEEL CO.

HARDWARE: We have yours of the 17th, but it is almost impossible to give a definite answer to the questions you propound. Bicycle prices will be about the same in 1896 as in 1895. The high grade wheels will sell at $100, medium and low grade from $75 down tp $50. Yes, we do think there is considerable danger of the bicycle industry being overdone in certain lines. Yours truly,

KEATING WHEEL CO.

Holyoke, Mass., September 18th, 1895.

CRAWFORD MFG. CO.

EDITOR HARDWARE: Referring to your inquiry, would say from what we know is going on in the bicycle trade, it is our opinion that the outpnt for 1896 will be about seven hundred thousand machines. This we imagine to be about 40 or 50 per cent. advance on the present year output.

We see no reason why the price of bicycles should be lower, as, in our opinion, the demand will absorb everything that can be produced; besides that, there is a general upward tendency, both in material and wages.

We have no means of knowing how many machines were sold by the Hardware trade for our neighbors, this past year; but think that more than 40 per cent. of our output was marketed through them, and it is the writer's firm belief that the Hardware dealers are one of the best channels through which to market this class of goods. We were among the first to seek an outlet through them, and have no reason to regret our effort in that direction.

THE CRAWFORD MANUFACTURING CO.

Hagerstown, Md., September 19th, 1895.

ROCHESTER CYCLE MFG. CO.

EDITOR HARDWARE: We beg to acknowledge receipt of your valued favor of the 18th inst. Our replies to the questions in your letter are naturally somewhat of the nature of guess work.

"How many bicycles will be manufactured in America for the season of 1896?" Three-quarters of a million.

"How many were manufactured in 1895?" Four hundred thousand.

"How many of these were marketed by the Hardware trade?" To this question we cannot give any intelligent idea.

"Will prices in general be lower or higher?" They will remain at about the same figures.

"Is there any danger of the Bicycle industry becoming over-done?" We should say not for the season of 1896; after next year we should say there is great danger of this.

ROCHESTER CYCLE MFG. CO.
A. E. Benjamin, Sec'y and Treas.

Rochester, N. Y., September 19th, 1895.

MCINTOSH-HUNTINGTON CO.

EDITOR HARDWARE: Replying to yours of September 16th, we take pleasure in answering your questions to the best of our ability, in the order in which you have asked them.

First: "How many Bicycles will be manufactured in America for the season of 1896?" We regret to say that upon this subject we can give no accurate information, as the only thing upon which we can base our estimate are the newspaper statements, and we unfortunately have not learned to have very much faith in them. From conversation with those in trade, however, we think it would be fair to estimate that the product for 1896 of American Wheels will be in the neighborhood of 500,000 to 600,000.

Second: "How many wheels were manufactured in 1895?" We have no accurate means of judging this any more than we have of the product for 1896, but should estimate at least 350,000, and of these, a large measure of them were marketed by the Hardware trade in one form or another.

Third: "Will the price of Bicycles in general be lower or higher?" So far as the season of 1896 is concerned, our opinion is that the prices of Bicycles will not vary materially from that of 1895, but that the demand will be such that prices will be maintained rigidly on all standard makes of wheels, and that the only opportunity to buy wheels at very low prices will be on odd lots and undesirable goods. There have been a great many rumors circulated and given publicity by the daily press to the effect that a numerous quantity of Bicycles were to be purchased during the coming season from some unknown source, and that the price of high grade wheels would not exceed $25 at retail. To the initiated, these statements are so absurd that it seems to be a waste of time to contradict them, but we find that the general public give more or less credence to them, and we therefore believe that it is incumbent upon the trade press

Digitized by Google

to contradict such statements as those appearing in the daily press so that the trade may move along more smoothly than is likely to be the case with such erroneous ideas prevailing. An editorial from such a source as your own would have great effect, and we have no doubt that you could readily secure data to prove the absurdity of the statements.

Fourth: "Is there any danger of the Bicycle industry being overdone?" This is a question upon which we do not feel competent to express an opinion. In these hustling days, there is danger of almost any business being overdone, and to that extent we believe the Bicycle industry is in danger. It would seem, however, that there is sufficient conservatism and brains now engaged in the Bicycle business to control this to a certain extent, so that the demand may not so far exceed to supply as to demoralize the trade. It is unquestionably true that the margin to the retailer on Bicycles is gradually becoming reduced to the level of other goods, and that it follows as a necessary consequence that they must be introduced as a line in some legitimate business. The Hardware business seems to be the natural outlet for this class of goods, and we believe this fact is being recognized more and more each year. We know from our own experience as jobbers that we are now selling to many retailers who two years ago would have nothing to do with Bicycles. They are now forced into it by their competitors, and we believe that all those who take it up during the coming year will not be sorry for it.

McINTOSH-HUNTINGTON CO.

Cleveland, Ohio, September 20th, 1895.

THE WINTON BICYCLE CO.

EDITOR HARDWARE: Responding to your communication of the 17th, would state that in our opinion 400,000 bicycles would be a conservative estimate of the entire 1895 production in this country, while for the coming season the indications are that this amount will be about doubled. The Hardware dealers are the distributers of a very large percentage of the output, and are materially increasing their efforts in this department of their business. We have just finished moving into our new factory buildings, which are a double of our former capacity, and this of course will mean a corresponding increase in our output for the coming season. Our 1896 models are stylish, select, choice, and every one of them a work of art. The new models are a complete change, and do not consist of an alteration in name plate only. THE WINTON BICYCLE CO.

Cleveland, Ohio, September 19, 1895.

WARWICK CYCLE CO.

EDITOR HARDWARE: "How many bicycles will be manufactured in America for the season of 1896?" About 800,000.

"How many were manufactured in 1895?" About 500,000.

"In your opinion, how many wheels were marketed by the Hardware trade during the year past?" Have no means of knowing.

"Will the prices of bicycles in general be lower or higher?" We think prices will range about the same in '96 as '95.

"Is there any danger of the bicycle business being overdone?" Not at present. WARWICK CYCLE CO.

Springfield, Mass.

ST. LOUIS REFRIGERATOR AND WOODEN GUTTER CO.

EDITOR HARDWARE: In response to yours of the 8th, we have pleasure in giving you our opinion in reply to the various questions you ask.

First. We believe there will be in the neighborhood of 750,000 bicycles in the United States in 1896.

Second. We believe there were in the neighborhood of 425,000 manufactured in 1895.

Third. We have not sufficient information at hand to enable us to make anything but a hazardous estimate as to the portion sold to the Hardware trade. We, therefore, prefer making none.

Fourth. We think the average price of bicycles will be lower. What we mean by this is that a great many machines which have been sold at more than their true value will come down to where they belong. The strictly legitimate high grade goods will be sold without change of price, either at retail or to the trade.

In our opinion as to any danger of the bicycle industry being over done, will say that in one sense there is no danger, and in another sense a great deal of danger of this kind. In our opinion there is no danger about there being an over production of legitimate, reliable goods, made up by people of experience, who know what they should do. On the other hand, we fear that the market will be flooded with altogether too many machines turned out by people new at the business, that although their intentions may be the best in the world will be handicapped. It has been pretty clearly demonstrated that no one can make a bicycle to their own satisfaction, to say nothing about the exactions of the buyers, under two or three years' experience in which to get their factory in proper shape. A great many young makers are preparing to market large quantities of goods this year instead of pursuing what would be a more judicious course, and making haste slowly until everything was perfected. This form of over production will by the middle of the season fill the auction houses with plenty of bicycles, but it will not hurt the established trade materially, and in one sense it will have a good effect in that it will make bicycle riders, and most of these riders will sooner or later want first-class bicycles in place of those they first got.

We advise that the new maker be sure of every step he takes, and that the dealer do the same in choosing his line, for nothing is more certain than that an unsatisfactory line of goods will go further than anything else to disgust a Hardware dealer with a bicycle business the first year or two in which he takes it up.

Yours truly, THE ST. L. R. AND W. G. CO.

St. Louis, September 20, 1895. L. W. CONKLING.

QUEEN CITY CYCLE CO.

HARDWARE: Your letter of September 18th is at hand and carefully noted. In reply, we beg to state that while our information is not at all exact, and cannot be relied upon, we have reason to believe that there will be about 650,000 bicycles manufactured in America during the season of 1896 and that there were manufactured in 1895 about 400,000. It is impossible for us to judge of how large a proportion of the goods made this year were marketed by the Hardware trade, but we believe that it was quite a liberal percentage.

The prices of bicycles in general, we believe, will be about the same as last year. They should be higher on account of the increase of price in steel and various supplies, but the enlarged competition resulting from new makers entering the field will be likely to cut down margins somewhat. Yours very truly,

Buffalo, N. Y., September 19, 1895. QUEEN CITY CYCLE CO.

BUFFALO WHEEL CO.

Your favor of the 18th inst. at hand and noted. The questions you ask us are very broad, and those which only a man with a full knowledge of the trade happenings can answer. We cannot tell how many wheels were manufactured last year, nor how many wheels will be made the coming year. As to how many wheels were marketed by the Hardware trade is another problem we are unable to solve. You are in that trade and have better means of finding out than we have. As to 1896 prices it will all depend upon the disposition of the public and the manufacturers. If everyone rushes into the bicycle business next year there is a possibility of its being overdone.

Buffalo, N. Y., Sept. 21st, 1895. BUFFALO WHEEL CO.

Review of the Markets.

Money: The market has just recovered from a moderate depression, but indications point to a steady rise. The apprehension of a new bond issue, due to the steady depletion of the Treasury gold reserve, has passed away, and though an issue before Congress convenes is possible it is hardly probable. Time money in New York is quoted at 3@3½ per cent. for short, and 3½@4 per cent. for long dates. Call money can be had at 1½@2½ per cent. The imports of general merchandise from the port of New York for the week ending September 21st amounted to $10,719,812. A considerable gain over the previous week.

Hardware: There is a fair volume of business with a steady improvement in sight. Builders' Hardware and shelf Hardware are moving quite freely. There have been large sales of carpenters' tools lately, which is regarded as a favorable sign. It shows that mechanics are being employed and that the building movement continues. The orders received by jobbers are of a miscellaneous kind, which goes to show that the retailers' trade is more than holding its own. Manufacturers do not look for a great improvement in the condition of the Hardware trade to be manifest before the spring, but things are in a much more satisfactory state now than this time last year. Some of the trade look with disfavor on the advances, as they fear a setback. They favor a more gradual increase in prices.

Cutlery: The condition of the market shows a gradual improvement. The manufacturers generally expect this movement to continue but no sudden rush of business is looked for. A healthier tone is the feature in this line.

Nails: There is a lull in the Nail market at present. This condition of affairs has been produced by jobbers and retailers buying up more Nails than they could possibly dispose of earlier in the season, in anticipation of still further advances. This makes the dull period come now instead of coming in June and July, when it is generally looked for. It may be interesting to state for the benefit of some who have not observed closely that since April the base prices of Wire and Cut Nails had advanced, the first named from 80 cents car load lots, f. o. b., Pittsburg, to $2 25; the last named from 70 cents, for car load lots, f. o. b., Pittsburg, to $2. The increase is not, however, all profit to the manufacturers, as some suppose, for the advance in raw material has made the cost of production of Nails increase fully $1 per keg. A special price can be obtained on Nails for export trade. The buoyant condition of the American Nail market has had a salutary effect on other markets, and a better condition prevails the world over. Manufacturers are reluctant to state their opinions as to another advance, but they say, however, that if the cost of raw material still goes up another advance in Nails is inevitable.

Wire Nails: There is no change in prices. Quotations are as follows: Carload lots or mixed cars, $2.25 per keg, base, f. o. b., Pittsburg; less than carload lots, $2.35 per keg, base, f. o. b., Pittsburg. To jobbers taking from one mill within one calendar month 1,000 kegs and over 5 cents per keg rebate will be made.

On contracts direct shipments of less than car lots of 24,000 pounds of Nails an extra 5 cents per 100 pounds will be charged. Wire Nails in carload lots on dock in New York are quoted at $2.40, and small lots from store are held at $2.50.

Cut Nails: On September 13 a meeting of the manufacturers was held and an advance of 20 cents per keg was agreed upon, to harmonize with the advance which had recently been made by the Wire Nail producers. The prices now ruling are: Carload lots or over, $2, base, Pittsburg delivery; less than car load lots, $2.05, base, Pittsburg delivery. To jobbers taking from one mill within one calendar month 500 kegs or over 2½ cents rebate per keg is allowed, and on 1,000 kegs 5 cents per keg rebate is made. For half kegs 10 cents extra will be charged. New York quotations are as follows: Carload lots on dock, $2.15; small lots on dock, $2.26, and small lots out of store, $2.30.

Auger Bits: A revised list on Auger Bits was adopted September 5, by the following manufacturers: Snell Mfg. Co., the New Haven Copper Co., Humphreysville Mfg. Co., the Connecticut Valley Mfg. Co., the Hamden Mfg. Co., James Swan, Deuce Bros., C. E. Jennings & Co., the Peck, Stow & Wilcox Co. and the Chester Mfg. Co. The new list is as follows:

3/16	4/16	5/16	6/16	7/16	8/16	9/16	10/16	11/16
$3.50	3.50	3.50	3.75	3.75	4.00	4.25	4.50	5.00

12/16	13/16	14/16	15/16	16/16	17/16	18/16	20/16	22/16	24/16
$5.50	6.00	6.50	7.25	8.00	9.00	10.00	11.00	12.00	14.00

It will be seen that new figures are in force on only the sizes from 4-16 up to 9-16.

Linseed Oil: The Dean Linseed Oil Co., quote pure Linseed Oil as follows: raw 42 cents per gallon, boiled 45 cents per gallon and Calcutta raw 47 cents per gallon.

White Lead, dry or in oil, and Red Lead and Litharge in kegs, the quotations given by the National Lead Co., are as follows: In lots of 500 pounds or less 6 cents net; in lots of 500 pounds or over 5½ cents.

Putty: Quotations remain the same at 1.40@2.25, as to quantity and style of packing.

Glass: At a meeting held in Chicago recently the final arrangements for the glass combine were perfected. The entire product of the association will be marketed through two central agencies, one at Pittsburg and the other at Muncie, Ind. It was also deemed advisable to advance the price of glass 9 per cent.

Clapp & Co., bankers and brokers, New York, in their weekly letter, say: "Prosperity is writ large without respect of class. It takes time to convert corn into meat and prospects into dividends. A silver statesman cannot be turned into a gold bug in a moment any more than can the silver certificates be converted into gold in large amounts. The lawyer that can win every case and the broker whose advice is always right are yet to be born. Government expenditures have exceeded receipts during 32 months, ending September 1st, $136,196,229.68. Total merchandise imported free of duty in 12 months ending June 30, 1895, was $363,233,795; the value of that paying debt was $368,736,170. In 1890 there was $225,317,075.65 collected as duties on $507,571,763.95 of values. An English statistician claims 70 per cent. increase in real wages (purchasing power) in United Kingdom during 31 years ending 1891, and 60 per cent. increase in United States during the same time. Dry goods imports since January 1st equal $107,000,000 against about $61,000,000 last year. The *Chronicle* says: 'It is felt that with foreign exchange so high this is not the time to encourage a speculation either in stocks or commodities.' Other authorities believe foreign money anxious to come here if rates of interest warrant. The

Digitized by Google

world's railways are estimated to be worth thirty billion dollars. Bessemer iron is again being imported; the first cargo arrived in Philadelphia last week from the Mediterranean district."

THE BIRMINGHAM TRADE.

We are glad to report continuation of good trade, and think that the prospects for at least the remainder of the year are good.

The products of the field, orchard and garden have been abundant, thus increasing the purchasing power of the people, making them cheerful and hopeful. While the cotton crop will be short, the price has advanced and will make up for deficit in quantity, thereby saving the farmer the extra labor of handling a large quantity, and giving him more time to devote to other sources of income.

We note that the consumption of iron throughout the country continues to run ahead of production, and it appears that the stocks will before a great while, become very light. In the face of facts of this kind, we do not see much chance for a decline in iron and steel products. Besides, the consumption, even at the present rate, is not as large as it was at a former period, when our population was considerably less than it is now.

The meeting of the G. A. R in Louisville, the dedication of the National Park at Chicamauga and the Cotton States Exposition in Atlanta are all tending to give the South some good advertising. We feel sure that the citizens at the points mentioned will display their usual courtesy, giving some good impressions of this section of the country.

Another hopeful feature is that immigration is coming this way. The agent of the Louisville & Nashville Railroad has recently succeeded in locating a colony near Birmingham, which will give us an influx of new population. We trust that they will bring with them the ideas of true progress and, as they come from different sections of the country, will mingle their ideas with those of our native population, and thus get a good combination, which will be better than the ideas of any particular section, illustrating that diversified labor is best, and that there are other sources of income than those of raising only corn and cotton.

When we can once have an abundant population we will not be troubled in securing manufacturers, as they are always anxious to be contiguous to a dense population.

MOORE & HANDLEY HDW. CO.

THE PITTSBURG TRADE.

We think we are speaking within bounds, when we say that the present improvement in the Iron and heavy Hardware business manifested itself first in Pittsburg, and that our city has well maintained its position as the leader of iron and steel manufactures.

Looking about us to-day at our furnaces, mills and shops, all fully employed, with orders in hand for months ahead, it is difficult to realize that less than one year ago the depression in prices and demand was at its lowest ebb. The best informed and most far-sighted of our manufacturers were prepared for the great demand which sprang up this year, but many were not so prepared, and failed to profit by it. However, all are now getting a share of the returning prosperity, and labor is fully employed.

There is a strong feeling among conservative business men that prices of some goods are being pushed up too radidly. This is notably the case with Nails. We have all been doing business without profit so long, that there is a temptation to overdo the matter, now that the opportunity offers; but these things will soon regulate themselves.

We find that it takes several months for changes, either for better or worse, which occur in the cities, to work out into the small villages and crossroad stores. These places are yet struggling with a scarcity of money and poor trade but as the increased purchasing capacity of labor begins to be felt, farm products will be in better demand, the crossroad stores will sell more to the farmer, and they in turn will want more from the jobber and manufacturer.

The weather in the first half of September was unreasonably warm, somewhat retarding the sale of fall Hardware, but the general line of goods is moving in good volume, and cooler weather will improve the demand still more.

LOGAN, GREGG & CO.

THE BOSTON TRADE.

There seems to prevail a decidedly conservative feeling among the retail trade, and purchases represent only what immediate wants demand, there being an absence of speculative feature in the orders that are being placed. Although we do not expect the immediate boom which many predicted during the summer months, yet the volume of business is very satisfactory, and the general reports from New England jobbers indicate that orders are coming in freely, and for assortments that are attractive.

The advances daily made by the manufacturers are being maintained, and it is only the unreasonable buyer that objects to paying any legitimate advances. While these advances are welcomed by all good business men, yet it is hoped that manufacturers will be as conservative as their interests will allow, as any change in opposite direction might prove disastrous.

Reports from manufacturing towns are that labor has been well employed, and in many cases at an increase of wages.

Although we may not feel the benefit of the condition immediately, yet it will be sure to follow in the early spring months.

FRYE, PHIPPS & CO.

THE BUFFALO TRADE.

August, one of the usually dull months, left nothing of any special moment to report. The volume of business was better than a year ago, but this may be accounted for in part by the advance in prices, which we are pleased to report have been fairly maintained both on the part of the jobber and manufacturer.

Although orders have been small, they have been frequent and well assorted, and the business has been a healthy one.

The recent advances in Steel and Wire Nails have not been received kindly by the trade, but we trust that a few days will bring a better feeling in this respect.

Present indications bid fair for a steady fall trade, and unless something unlooked for occurs, we will undoubtedly realize our expectations.

WEED & CO.

THE PHILADELPHIA TRADE.

The excessively hot weather has had its effect upon trade, and while business is still in excess of the same period of last year, the time has been taken for a breathing spell in the last few weeks. One of the characteristic signs of the century is the increasing number of conventions which are being held in all parts of the country, and there is scarcely a man who does not serve as a delegate to a convention of Odd Fellows, Knights Templar, Masons, Christian Endeavorers or some similar association.

The last week has witnessed the Grand Army celebration at Louisville, the Odd Fellows convention at Atlantic City, the opening of the Atlanta Exposition, and political conventions too numerous to mention—all these have the effect of withdrawing men from business and making trade a little quiet. It is confidently thought, however, that this is simply a breathing spell, and all look forward to a large trade this fall.

Prices show no signs of weakening, but on the contrary are firmer than ever, and there is every indication that many goods on which prices are still unchanged, will, before long, join in the procession and march towards higher figures.

Last week there was a proposition made to again advance the price on nails, but in deference to popular feeling, this

Digitized by Google

action has been, at least for the present, postponed, although higher prices seem very probable. It is commonly charged that nail manufacturers are going too fast, but it does not need a very long memory to recall Wire Nails at $2.50 per keg, as this was the price in 1891, and was then considered a low figure. Manufacturers claim that even at present prices there is very little profit in the goods owing to the increased cost of material.

New prices throughout seem well sustained. Large stocks at old prices are comparatively few, and while they sometimes exist, the holders find that after so many years of a declining market, they must recruit when the opportunity offers.

There is no denying that collections are slow, and again the weather prophet comes in for a share of blame. It is very hard to be energetic and persistent when the thermometer is 95 to 100 degrees, and no one has the heart to blame a collector if he mops his face in a cool spot, and let the debtor go undunned for a few days. A few brisk winds will doubtless make things once more lively, and they may reasonably be expected in a few days.

BIDDLE HARDWARE CO.

THE CLEVELAND TRADE.

The extremely unseasonable weather of the past two weeks has had a depressing effect upon trade, and as a result, the volume of business for the first two weeks of September is not as satisfactory as we would like to have it. In spite of this lull, values are well maintained, and there is no sign of weakening anywhere. The demand is sure to come, as we must certainly have some cool weather before long, which is all that is necessary to place business upon an active basis.

The sale of specialties, such as Oil Stoves, Air Tight Stoves, Stove Boards, etc., had been reasonably good up to date, but the retailers have not as yet been able to dispose of their first purchases, and until that condition comes, the jobber must be contented with a limited business.

The advanced prices on Nails, Barbed Wire and Smooth Wire are very firmly held, and indications are that they will be maintained absolutely during the balance of the season, and in all probability rule in the Spring.

THE MCINTOSH-HUNTINGTON CO.

THE BALTIMORE TRADE.

Business in this section during the past month has been very good, so good, in fact, that the writer has been obliged to omit his letters to HARDWARE under the pressure of other duties. Orders are plentiful. Those sent us by salesmen are larger and more satisfactory as to quantities than for any period during the past eighteen months, while the voluntary mail orders of the "Rush type" have been so numerous as to tax us up to our full capacity. To borrow a phrase from the manufacturers' parlance, we are "running full time."

What has added to the activity more, perhaps, than either of the above causes has been the number of visiting buyers in this market. Baltimore has always been favored in this respect. Before the travelling salesman had become as omnipresent as he is to-day, it was considered by the Southern merchant a necessary pilgrimage to come to the Baltimore market at least once a year. Aside from the social features attending such visits, it had a foundation upon good business reasons. The advantages of buying in an open market are many. The merchant comes prepared with his want list and the last cost of the goods to him. He visits each jobbing house pricing such articles as he needs, studying the quality of goods, examining novelties and incidentally picking up any improved business methods adapted to his line. He is an up-to-date man; he knows the market value of staples and looks into the future with a clear vision. Of course, he places his order to the best advantage. The advent of mammoth catalogues and the large increase in the number of travellers employed by jobbing houses has greatly reduced the ranks of visiting buyers, but there still remain a sufficient number who cling to the old method of buying, and we cannot help but think that they are the gainers.

This season brought many such here who failed to visit us last year owing to the business conditions then existing. Their hopefulness is certainly refreshing, and it would be a skeptic of the most malignant type who could look upon the bright faces of those Southern merchants and not be convinced of the return of "good times." One Georgian earnestly remarked to the writer, "Give our planters seven cents for their cotton, and there will be no necessity for our merchants asking any extension."

Speaking of cotton. Has the average Hardware dealer stopped to think how the increase in price of this commodity will be reflected next Spring by the advance in Back Bands, Web Halters and Ties, Collar Pads, Seine Twine, Trot Lines, etc.? Cotton Rope has already felt the impulse, and several of the items named above are at that chrysalis stage and give promise of coming forth dressed in higher figures. This is an era of changes.

In the world of manufactured iron the changes have been so many and so varied as to keep perplexed the coolest of us. No one can be averse to changes that are justified by an increase in the cost of production. The manufacturer is as worthy of his wage as the workman, but some recent advances have so little to recommend them that the effect must later be suicidal to the "boomers." Every ship that sails the sea of trade must fly its colors at the mast, and looking upon these crafts calmly and dispassionately we detect among the fleet some who fly the pirate flag, although it bears evidence of having been recently painted white. It is but fair to admit, however, that the majority of these advances have been fully justified, conservatively made, strictly adhered to and give every promise of lasting. Collections are fully up to expectations.

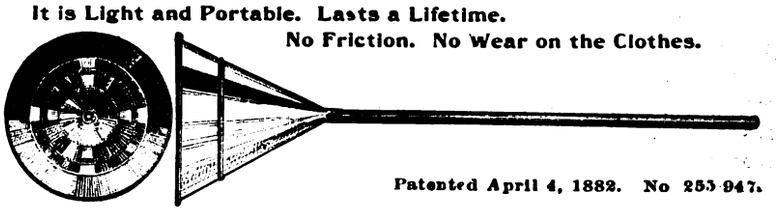
THE TABB & JENKINS HARDWARE CO.

THE TOLEDO TRADE.

The Hardware trade in general has been quite fair, owing to the increased demand for goods. We find there is considerable building going on in our section, especially in Toledo, which makes builders' Hardware quite in demand. The demand for nails has been greater than in previous years, but we look for a falling off in nails, wire and heavy goods, as we think the dealers and consumers of the above mentioned goods have added to their wants several months ahead of their use, so that there will not be much of a demand this fall in these lines. Although this month's trade is fair, still it does not indicate a very large business for the fall months. August business was way ahead of former years, but September shows a decline.

We think that the manufacturers of heavy goods have advanced their prices so rapidly, and for more than the demand later on will warrant, and we expect to see a reaction set in this winter.

There is quite a demand at present for Galvanized Sheet Iron and Black Sheets, Coal Hods, Elbows, Stove Boards, and also for builders' Hardware. Manufacturers of builders' Hardwars seem to be slow in filling their orders, especially in the better grade of goods. Tinware has been selling very low, owing to the fact that the manufacturers quote what they call their minimum price to every department store and five and ten cent store they can find; in fact they quote the same price to the small trade that they do to the jobbing trade. Manufacturers claim that they are selling at a loss. We think that if they would confine themselves to the jobbing trade, they would get better prices than by trying to cater to all the Cheap John Stores in the country. They would not only get better prices, but would sell a better grade of goods.



The crops in our section have been very good, with the

exception of hay. A large corn crop seems to be in sight. Fruits are very plenty, and a drug on the market.

We hope that we will enter upon a good healthy business for the next few years, but not upon boom times.

Admonishing all not to be afraid to ask good prices, we remain, STOLLBERG & CLAPP CO.

THE DAVENPORT TRADE.

The continued hot weather is having a decidedly depressing effect on trade. Mercury climbs up among the nineties every day, without any more apparent effort than it requires to advance the price of iron nails or barb wire. Farmers refuse to sell their grain at the ruinously low prices offered, and hence they cannot pay for the Hardware they have bought during the summer, necessarily making collections slow.

The rapidly advancing prices of staple goods for a time seemed to stimulate trade, but now the effect is the same as with other stimulants that were sometimes used here, before Iowa became a prohibition state—the reaction occurred, and merchants are buying less than usual, not that the prices are really too high, but the suddenness of the change is paralyzing. The Hardware market pendulum swings too far and too often. Will we ever settle down to a reasonably steady market again, and with a uniform margin of profit?

SICKELS, PRESTON & NUTTING CO.

Mr. Hamilton, of Rogers & Hamilton, Waterbury, Conn., had a narrow escape from drowning some nights since. He was on the yacht of Mr. Wayland when it was shipwrecked, and only the arrival of timely help saved the lives of those aboard.

Warren Woodruff, a resident of Rockford, Ill., for fifty years and a pioneer in the Hardware business, died at the age of seventy-five years.

The New York Hardware Club would be pleased to receive copies of all the latest catalogues and other publications of the trade.

The Chantrell Tool Works, Millmont, Pa., will build an additional building of 125x53 feet.

When you begin Handling Bicycles

One of the important things for you to do is to find the pneumatic tire which has the most friends. When you have found it, stick to that tire. It will be well for you to know that more than sixty-five per cent. of the total tire business is done by Morgan & Wright, Chicago. They have a guarantee which guarantees. They know how to take care of their customers. You have often seen their trade-mark—

Oregon, Ill.—Gilbert & Tyler, Hardware, C. C. Tyler purchased half interest in business; will be conducted under the above name.

Orlando, Fla.—J. L. Guernsey has purchased the Winkleman Hardware stock, and will move the goods into his own store.

Perris, Cal.—J. J. Walther & Co., Hardware, J. R. Parker retires.

Ravenwood, Mo.—Warden & Foote, Hardware, reported to have been succeeded by Ross & Son.

Redwood, N. Y.—E. H. Smith has sold his Hardware store and stock to E. J. White.

Reedville, Pa.—F. M. Womer has disposed of his Hardware store to Mr. Gibboney.

Sherman, Tex.—The Roberts, Willis & Taylor Co., Hardware merchants, changed name to Roberts, Hardwicke & Taylor Co.

Westminster, Md.—F. Thomas Babylon has withdrawn from the firm of Babylon & Gilbert, plumbers and extensive dealers in general Hardware, etc., on account of ill health, and his interest in the business has been purchased by Denton S. Gehr, teller of the First National Bank. The new firm has taken the name and title of Gilbert & Gehr.

Winston, N. C.—R. B. Crawford & Co. have bought out the entire stock of Overman & Merriman, who assigned a few weeks ago, and will continue a general Hardware business at the same stand, in the Crawford building.

Yorktown, Ark.—E. A. Milliken, Hardware, etc., stock purchased by McIntyre & Son.

Improvements and Removals.

Gloversville, N. Y.—Henry J. Jenkins has removed his Hardware establishment to No. 14 Bleecker Street.

Parishville, N. Y.—Thos. Crawford, purchaser of the stock of the Hardware owned by the late L. A. Hoit, has bought the "old stone store" of H. M. Daggett, and moved his stock of goods. He will occupy the rooms over the store as a dwelling.

Roscoe, Pa.—W. A. Furlong has moved his Hardware store into his new building.

Unionapolis, Ohio.—E. W. Roderick, Hardware dealer, will remove his stock of goods to Agosta this week, and will enter business. Mr. Roderick is well known in the western portion of the county, having resided there before.

Warren, Pa.—The Pickett Hardware Co. are building a large warehouse at the corner of Beech Street, opposite the Dunkirk freight depot. The building will be 20x80 feet, with platform all around, and a switch on the railroad side. The building will be used to store heavy Hardware.

Business Embarrassments.

Pittsburg, Pa.—Howard Royer & Co., Hardware merchants, of Smithfield Street, have made an assignment to H. I. Riley.

Youngstown, Ohio.—John H. Blunt and George Blunt, engaged in the retail Hardware and tinware business at the corner of Federal and Holmes Streets, recently made an assignment to Joe Davis. Business depression is believed to have caused this action.

Burglaries in Hardware Stores.

Buffalo, N. Y.—Adam Reid, $100.
Evansville, Ind.—H. I. Simmons, $24, arms, ammunition and cutlery.
Fisher, Minn.—Hamilton Bros., $200.
Gorham, N. Y.—C. L. Crosier, cutlery.
Rushville, Neb.—F. J. Andras, $200.
Sandusky, Ohio.—P. L. Van Alstyne, $75.
Sandusky, Ohio.—J. Mertz & Sons, cutlery valued at $15.
Waterloo, Que.—E. & P. Gates, small loss.

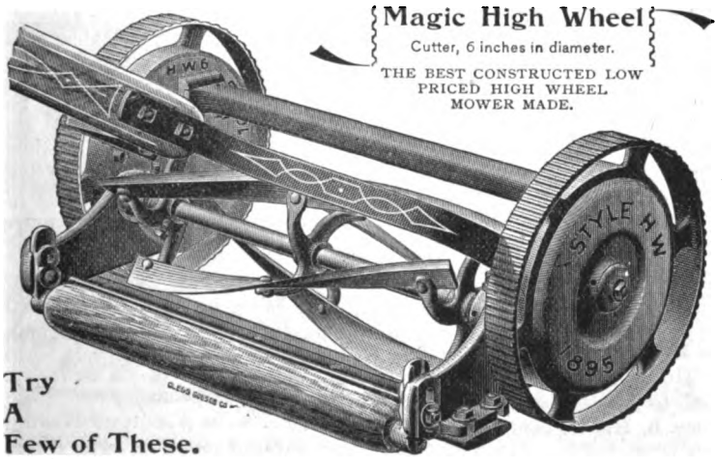
THERE is always a time in the career of every business when Quality and Finish is necessary to build up and maintain your business.



Has this time yet come to you?

It has if you wish to continue the confidence your customer has placed in you. The more competition you have the better ought to be your line of Barrows.

Thoughts and Ideas are valuable, but to maintain the intelligent effort, your goods must maintain a high quality and a moderate price. **THE CHAMPION BARROWS** possess all the above. What more can you ask?

BICYCLE TRADE RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Companies, Stores, Etc.

Beaver Falls, Pa.—Steps are being taken looking to the organization of a company to manufacture bicycles, in the Swoger factory building, with M. R. Rappold, as superintendent.

Beaver Falls, Pa.—The Eclipse Bicycle Mfg. Co., has been incorporated, with A. M. Jolly, president; Simon Harrod, vice-president, and H. T. Dempsey, secretary. Capital stock $25,000.

Bridgeport, Conn.—N. Larson, sporting goods, etc., is preparing to open a new store.

Bridgeport, Conn.—Steps are being taken looking to the organization of a company to manufacture a newly patented folding bicycle.

Brooklyn, N. Y.—Henry Osborn, No. 235 Cumberland Street, is reported negotiating for one of the largest buildings in the eastern part of Brooklyn, for a bicycle academy, and for the sale and rental of bicycles.

Chicopee Falls, Mass.—Thomas G. Spalding, of Jersey City, C. L. Pepper, and others, are reported to be organizing a company, with a capital stock of $50,000, to establish a bicycle tire factory. Other bicycle materials are to be manufactured. Mr. Pepper, who was formerly superintendent for the Overman Wheel Co., will take charge of the new factory.

Cohoes, N. Y. — William Beattie, Sr., machine shop, is preparing to erect a factory building on Columbia street, for the purpose of manufacturing bicycles. He is endeavoring to induce the Common Council to exempt the new industry from taxation for a period of years.

Dalton, Pa.—Rice & Davis, Hardware, bicycles, etc., have opened new store.

Decatur, Ala.—William Tucker, Hardware, has opened new store, and will add bicycles. Propositions from manufacturers of bicycles, and bicycle sundries are solicited.

Elgin, Ill.—The Illinois Watch Case Co. have commenced the manufacture of bicycles, confining themselves to a strictly high grade wheel. The company announce that the capacity will be 5,000 for 1896, and that 20,000 feet of floor space is being added to the present height.

Greenville, Ill.—Hord & Armstrong, new firm composed of A. L. Hord, and E. I. Armstrong, preparing to commence business about September 1st, and will deal in vehicles, and implements, and add a line of bicycles, if satisfactory proposition is submitted.

Harrisburg, Pa.—Ewing & Foster, bicycles, new firm composed of J. G. Ewing, and Douglass Foster, preparing to open new store on Front Street.

Indianapolis, Ind.—John A. Wright is reported to be endeavoring to organize a company to put on the market a device recently patented by him, for catching tacks that are caught by the tire while riding, claiming that the tire is not punctured at the first contact, and that the device will remove the tack before a second revolution of the wheel.

La Porte, Ind.—The J. W. Bryant Co. has been incorporated, with a capital stock of $40,000, to manufacture bicycle rims of paper.

Little Falls, N. Y. — Snyder & Fisher, manufacturers of knitting machinery, announce their intention to commence the manufacture of bicycles, expecting to be able by November 15, to turn out twenty-five high grade wheels per day. They will erect an addition to their present plant, and employ seventy-five additional operatives.

Mantua, Ohio.—Bard & Brainard, hardware, bicycles, etc., preparing to commence business.

Marion, Iowa.—Charles Drew, of Elgin, Ill., is forming a partnership with Cheney White, and will do a general bicycle business, with repair department, corner of Fourth Avenue and Eleventh Street.

Morrisville, Pa. — M. H. Mason, Jr., jeweler, has added a line of bicycles, and is obtaining information, with the view to adding a bicycle repairing department.

Syracuse, N. Y.—The I. A. Weston Co. has been incorporated by I. A. Weston, of Janesville, N. Y., C. W. Snow, of Syracuse, and others, to manufacture and sell bicycle wheels, etc. Capital stock $20,000.

Thompsonville, Conn.—Steps are reported as being taken looking to the establishment of a bicycle factory here.

Winchester, Cal.—John Patterson, bicycles, accepted agency for the Monarch bicycle.

Changes and Removals.

Detroit, Mich.—Huber & Metzger, bicycles, etc., reported to have dissolved co-partnership, Stanley B. Huber, continuing the business.

Frankfort, Ind.—Fennell & Shaw, have been succeeded by the Clinton Cycle Co.

Hartford, Conn.—American Cycle Repair Co., has dissolved co-partnership, E. A. Wheeler continuing the business under the same name.

Indianapolis, Ind. — Aker & Lake, bicycles, reported dissolved, E. Aker continuing the business.

Newark, N. J. — A. K. Fields, sporting goods, has been succeeded by Max Bros.

Newark, N. J. — Reed & Marsh, bicycles, reported to have dissolved co-partnership.

Pottstown, Pa.—Pottstown Nickel Plating Co., which was recently organized, has purchased the manufacturing plant of the Light Cycle Co.

St. John, N. B.—Burnham & March, bicycles, reported to have dissolved co-partnership. Ernest C. March continues and liquidates.

Toronto, Ont.—The A. D. Fisher Co., bicycles, reported to have dissolved co-partnership. A. D. Fisher continues style unchanged.

New Goods and Improvements.

Brooklyn, N. Y.—C. J. Cock, at No. 676 De Kalb Avenue, is endeavoring to interest capital in manufacturing and placing on the market an improved sprocket wheel, which is said to have several unique features.

Hagerstown, Md.—Crawford Bicycle Co., R. S. Crawford president, will shortly increase working force from 700 hands to 1000, when factory additions are completed. The company has recently distributed $10,000 among its employees, out of the earnings of the past year.

Jamestown, N. Y.—The Fenton Metallic Mfg. Co., manufacturers of the Blue Crown Fenton Bicycle, have contracted with the Fox Machine Co., the Baird Machinery Co., the Hendy Machine Co, for a complete bicycle manufacturing equipment, which is meant to increase their already large capacity.

Peoria, Ill.—Euthy & Co., heretofore dealing in bicycles, are making arrangements to commence their manufacture, and will put in the machinery, for the turning out of a high grade wheel.

Peoria, Ill.—F. F. Hyde, bicycle manufacturer, is preparing to double the capacity of his plant.

San Francisco, Cal. — The Golden Gate Bicycle Mfg. Co., No. 550 Mission Street, contemplate the enlargement of their factory.

Toledo, Ohio.—The Snell Cycle Fittings Co., have commenced the erection of two large additions to their plant, and will increase their working force, from 400 skilled mechanics to 750.

Williamsport, Pa.—Tivy Cycle Mfg. Co., have recently fitted up their factory with improved machinery. They are manufacturing a high grade wheel.

Miscellaneous.

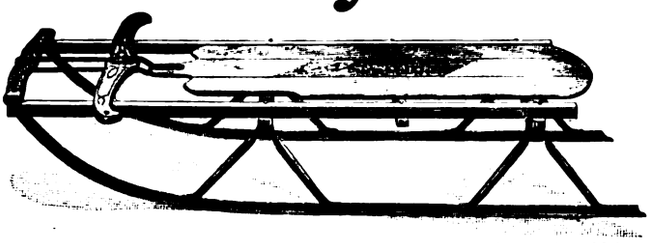
Allentown, Pa.—The Allentown Board of Trade has opened negotiations, with a view of establishing a large bicycle factory.

Hagerstown, Md. — M. L. Main, bicycle manufacturer, offering bicycle factory for sale or lease. Plans now in operation.

Middletown, Conn.—President Duskin, of the local Board of Trade, is negotiating, looking to the establishment of a bicycle factory, employing between 400 and 500 operatives. A successful outcome of the matter seems to rest upon the abatement of of taxes for a term of years, which is said to be all the parties ask.

Providence, R. I.—Diamond Machine Co. manufacturers of special bicycle machinery, report constantly increasing demand for bicycle machinery.

Rochester, N. Y. — The Punnett Cycle Mfg. Co. has filed a certificate for the increase of its capital stock, from $5000 to $25,000.



Rochester, N. Y.—The Rochester Cycle Mfg. Co. held annual meeting, and elected W. W. Kenfield, A. Benjamin, F. M. Thushen W. G. Benjamin, and J. Heath, directors.

Recent Fires.

Taxton, Ill,—Mat. Odell, bicycle repairing, store burned, covered by insurance.

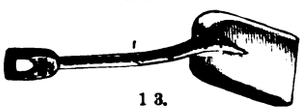
"Flexible Flyer" Sleds.



SLEDS have been made the same style for many, many years. About the same shape too, and length, width and height. About the same speed and safety. But now in the very last decade of the Nineteenth Century the "FEXIBLE FLYER" comes along, and the world to-day has a Sled lighter, stronger, handsomer, speedier than ever before, and one that can be steered by a touch of the hand. It avoids dangers, saves shoe leather, pleases the boys and the girls and the grown folks. Its ease of management and its many fine qualities are little short of marvellous. Easy to sell as soon as known. The dealer who first handles them adds to his profits, to his satisfaction, and to his reputation.

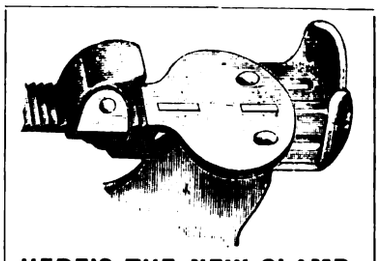
PECK & SNYDER'S NEW AMERICAN CLUB SKATE.



Peck & Snyder's NEW AMERICAN CLUB SKATE for 1895 has revolutionized the art of skate making. New American Club represents an entirely new heel clamp that will fit any heel instantaneously. The old method of clamping to the heel is entirely done away with. It cannot slip, is stronger, acts instantaneously, no screwing or adjusting necessary, saves time, and is without question the most perfect heel clamp ever invented.

MADE IN FIVE GRADES.

Peck & Snyder's New American Club Skate is the most perfect skate ever constructed. It has simplicity of adjustment, solid foot plates, solid heel clamps, and will fit any heel.

The Clasps Cannot Slip. Sure Grip. Thumb Screws and Sets entirely disregarded. It is Light, Handsome, and Twice as Strong as the old club skate.

HERE'S THE NEW CLAMP.

Ask your jobber to show you samples of the **"New American Club."** If he doesn't carry them, send direct to us for samples and prices. Handsomely illustrated catalogue of this skate mailed on application. Address

BEST AND CHEAPEST
STONE WATER FILTER
ON THE MARKET.

Tripoli Stone Block System.

Set up ready for use. There are two crocks, each of four gallons capacity—an upper one holding the Filter Block, and the lower one, which can be used as a water cooler if desired. This Block is four inches in diameter by the same in height, and is hollowed out on inside. This fits on a metal tube, which fastens by means of a nut to bottom of Filter Jar. Block can be lifted off tube, cleaned and replaced in two minutes, and with no trouble at all. Water passes from outside of block, through the walls, into the hollow chamber, and from thence, by the means of the Drip Tube, into the lower receptacle.

The Conroy patented New Automa ic Refrigerator Door Fastener, with lock and key.

THIS FASTENER is the most complete one ever invented. The door will push to more easil with this Fastener than any in the market. The Fastener will tighten the door by the door closing. It is the most substantial; nothing about it to get out of order. By lifting the handle quarter circle the door will open, and if it sticks it will release it. It has a new and improved lock, absolutely secure. Made of finish or raised doors, composed of brass or bronze metal in any finish desired, plain or ornamental.

Just What Every Manufacturer Wants!

The Reference Book

OF THE

Hardware and Kindred Trades of the United States and Canada.

THE Book contains, in the most condensed and convenient form possible, the Names and Ratings of all firms in the following Trades in the United States and Canada:

Hardware Dealers.
Dealers in Sporting Goods, Bicycles, Firearms, &c.
Agricultural Implement Dealers.
Stove Dealers.

Sent (Postpaid) on Receipt of

TWO DOLLARS.

CERTAIN marks are printed after each name, showing the line or lines of goods handled.

The work is complete, condensed and convenient, and will be found especially desirable in sending circulars, on account of the street numbers. The ratings enable the user to select names of any specified rating or over that may be desired.

In cities the lists are classified—Hardware dealers all in one condensed list, Stove dealers in another, etc. In most cases, in the Hardware list, are specified the special kind of Hardware handled, as Shelf Hardware, Cutlery, etc.

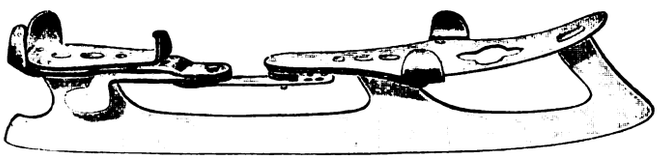
TO JOBBERS AND RETAILERS.



We are in the market with a new patented Skate, and it is the only skate made in the world that is **up to date.**

We offer a new and full line of Ice Skates of unequalled quality.

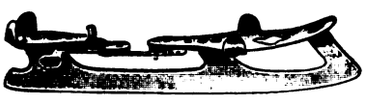
The most valuable new feature of our Skates is the Method of Adjustment, which is superior to any other known, because

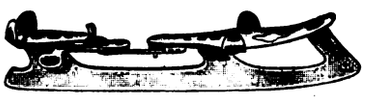
1st. It is stronger.
2nd. It is very much ligther.
3rd. It will not slip.
4th. Its neat appearance is very marked.
5th. It can be more quickly and easily adjusted and handled in retail stores.

THE SCREW ADJUSTMENT IS A "BACK NUMBER."

We desire to call special attention to

WINSLOW'S THREE-PLY WELDED IRON AND STEEL RUNNER STOCK





From which we make our highest grade of Skates, which have no equal in the market.

This stock is made and hardened by a special process, and we can furnish

A BONA FIDE SELF-SHARPENING SKATE RUNNER.

For details kindly send for our 1895 Skate Catalogue.

WANTED salesmen having established trade with jobbers and large retailers to sell on commission a line of patented and well-known night latches. Address, giving names of towns visited, with references, "Latches," care HARDWARE, No. 143 Chambers Street, New York.

WE want traveling salesmen to carry as side line direct to retail trade, on commission basis, our line of Wire Hangers for garments. Commission liberal. Further particulars by addressing Barber-Koenig Mfg. Co., No. 115 North Vine Street, Hazleton, Pa.

SALESMEN wanted to introduce and sell our new ratchet shutter bowers to the Hardware and house-furnishing stores throughout the country. A good commission paid and exclusive territory given. Sample free. Write for particulars. Walter Smith & Co., Juliustown, Burlington County, N. J.

WANTED—Traveling salesman to take a good line of white metal spoons and forks and other novelties as a side line on commission. Call or address M. L., Room 1, No. 221 Fifth Avenue, Chicago, Ill.

SALESMEN wanted to sell patented staple specialty to the Hardware and grocery trade. Large commission. R. Givens, Corpus Christie Tex.

Agencies for Hardware Specialties Wanted.

AN old-established firm of advertising agents and contractors in the city of London, England, doing business with the leading advertisers of the United Kingdom, are open to accept sole agencies for the United Kingdom for embossed steel or enamelled iron goods, which are suitable for large advertisers, or any novelty in the advertising line for inside or outdoor exhibition. Apply by letter to C. A. H., Room 25, Times Building, New York.

EXPERIENCED cutlery and Hardware salesman, about to locate in San Francisco, wishes to correspond with manufacturers in those lines, with view to representing them on the Pacific Slope. Address Rhoads, care HARDWARE, No. 143 Chambers Street, New York.

Export Agency Wanted.

GENTLEMAN of wide experience and undoubted integrity will shortly remove to Germany, and desires to represent American manufacturers abroad. Propositions may be addressed to "Export," care W. H. H. Hull & Co., Tribune Building, New York.

Business Opportunity.

WANTED—An active, energetic young man who can command from $5000 to $8000 capital to enter into a co-partnership with an old established company. He will be wanted to take care of the finances of the company, and attend to the office business. This is an unequaled chance, and to the right man will present an opportunity that will be very valuable. Address XX, care HARDWARE, No. 143 Chambers Street, New York City.

Patent for Sale.

FOR SALE: One-half or whole of United States and Canada patents, recently allowed on the only Adjustable Ratchet Monkey Wrench now made. Demand great. A big winner. Address Owner, No. 231 S. Lincoln Street, Chicago, Ill.

For Sale.

FOR SALE—In one of the best manufacturing towns in Ohio, a stock of Shelf and Builders Hardware, Paints, Oils, and Agricultural Implements; stock will invoice $17,000 to $19,000; clean and in good shape. Store does a business of $40,000 per annum. Apply to T. B. Rayl Co., Detroit, Mich.

FOR SALE in Philadelphia, Pa., the Lease, Goodwill and Fixtures of the old established House Furnishing and 5 and 10 cent store at No. 127 North Eighth Street. This is cream of location; and if you are looking for such a store this is one of the few opportunities. Address E. Frey, No. 127 North Eighth Street, Philadelphia, Pa.

A FOUR-HORSE Power Gas Engine, in good running order; now in use by us at our stores. Edward Darby & Sons, 233 Arch Street, Philadelphia, Pa.

For Sale or Rent.

A NEW, large manufacturing plant, hitherto used in manufacturing reapers and mowers, but well adapted to other uses; thoroughly equipped wtth machinery, tools and appliances of best modern make, all ready to steam up and run; at St. Louis Park, just outside of Minneapolis, Minn., with street car connections; the property being situated alongside of the Minneapolis & St. Louis, and Chicago, Milwaukee & St. Paul railroads with switch connections. For particulars address Geo. C. Squires, St. Paul, Minn.; C. F. Forster, 638 Rookery, Chicago, Ill., or John Little, Xenia, Ohio.

To Rent.

TO rent at New Rochelle, N. Y., a store in the best business part of town. A good opportunity for a live man. Addrees H. E. Colwell, agent; or E. Lambden, Jr., owner'

Attention! Hardware Travelers!

HARDWARE and other traveling salesmen who wish to increase their incomes, will be placed in a position to do so by sending their name and address to the HARDWARE Publishing Co., No. 143 Chambers Street New York.

ESTABLISHED 1818.

THE OLDEST AND LEADING MANUFACTURERS OF GALVANIZED WIRE GOODS IN AMERICA.

"Pennsylvania" Fruit Picker

This Cut almost speaks for itself—the device being so much like the human hand, shows at once the utility of the article.

PATENTED.

AS A FRUIT PICKER IT HAS NO SUPERIOR.

It is made of Heavy Galvanized Wire, and Easily Adjusted to a Pole. It has been sold for several years, and the demand (as it is becoming known) is steadily increasing. The difficulty of detaching fruit and securing it unbruised is apparent to everyone so engaged. This overcomes the difficulty, and saves the finest fruit which commands the highest prices.

THE LOW PRICE AT WHICH IT IS SOLD

Brings it within the reach of those who have but little fruit to gather as well as those who have large quantities. **Price, per doz., $6.00. Liberal discount to dealers.** It will gather Apples, Peaches, Pears, &c.
